No. 51 Report of Librarian upon the State of the Library for the year 1912. Presented to the Legislature, 5th February, 1913. *Not printed.*

No. 52 Return to an Order of the House of the 11th April, 1912, for a Return shewing: 1. The quantity of pine timber cut at or near mileage 81 on the Timiskaming and Northern Ontario Railway during each of the seasons 1907-1908, 1908-1909, 1909-1910, 1910-1911, by the North Land Mining Company, Limited. 2. The price at which the said pine timber was sold to the said Company in each of the said seasons. 3. The names of the persons by whom the pine cut in each of the said seasons by the said Company was measured for the Government. 4. The names of the original incorporators of the said Company and the names of its shareholders and directors in each of the years 1907, 1908, 1910, 1911 and 1912. Presented to the House 13th February, 1913. *Mr. Mageau. Not printed.*

No. 53 Return to an Order of the House of the 9th April, 1912, for a Return of Copies of all correspondence, official or unofficial, reports and written memoranda of every kind passing between the Government or any Minister or officer thereof and any other person or corporation with respect to:—(*a*) The granting of a permit for a tug owned by the Dominion Fish Company to fish on what is known as "the Lizard Island Preserve," during the season 1911, and copy of such permit. (*b*) The granting of a permit or permits to any other body or person or corporation to fish upon the said Lizard Island Preserve during the season 1911, together with copies of such permits. (*c*) The granting of permits to move the tugs of the Dominion Fish Company from one fishing ground to another, in either of the years 1909, 1910, 1911, with copies of such permits. (*d*) The issue of permits permitting the removal of tugs or other fishing boats owned by persons or corporations other than the Dominion Fish Company from one fishing ground to another during the seasons 1909, 1910, 1911, with copies of such permits. (*e*) The issue of a license to a Canadian-owned tug or boat to fish in waters of the Lizard Island Preserve in either of the seasons of 1911 or 1912, with copy of such license, if any. (*f*) The issue of licenses or permits to use 5-lb. or 6-lb. nets on the said Lizard Island Preserve during the seasons of 1911 and 1912, with copies of such licenses or permits. Presented to the Legislature, 13th February, 1913. *Mr. Mageau. Not printed.*

No. 54 Return to an Address to His Honour the Lieutenant-Governor of the sixth day of March, 1911, praying that he will cause to be laid before this House, a Return of copies of all correspondence between the Province of Ontario and the Dominion of Canada, regarding the establishment of Fish Hatcheries in Ontario. Presented to the Legislature, 13th February, 1913. *Mr. Gamey. Not printed.*

No. 55 Copies of Orders in Council and Regulations to be laid before the Legislative Assembly as required by section 27 of the Department of Education Act. Presented to the Legislature, 13th February, 1913. *Not printed.*

No. 56 Copy of an Order in Council approved by His Honour the Lieutenant-Governor the thirtieth day of April, A.D. 1912, pursuant to provisions of Subsection 3 of Section 78 of the Surrogate Courts Act, Chapter 31, 10 Edward VII., that there be paid to His Honour C. F. Sutherland, of the County Court of the County of Grey, from year to year during his tenure of Office, the Surplus Surrogate Fees over and above the amount payable by Statute to the Surrogate Judge of the said County of Grey, provided, however, that the sum paid out of the said Surplus Surrogate Fees shall not in any year exceed the sum of six hundred and sixty-six dollars ($666.00). Presented to the Legislature, 14th February, 1913. *Not printed.*

No. 57 Return to an Order of the House of the 11th April, 1912, for a Return of copies of (1) All correspondence passing between the Government or any Minister or official thereof or any commission under the Government or any official thereof and any other person or corporation with respect to the development of the Smoky Falls Water Power on the Sturgeon River for the benefit of the Town of North Bay. Presented to the Legislature, 17th February, 1913. *Mr. Mageau. Not printed.*

No. 58 Return to an Order of the House of the 17th day of February, 1913, for a Return shewing whether the Prime Minister or any person on his behalf received a telegram purporting to be from one Rowlandson of Elk Lake between the 1st and 11th days of December, 1911, addressed to the Prime Minister with reference to the building of the Elk Lake Branch of the Timiskaming and Northern Ontario Railway. 2. If such telegram was received, the contents of such telegram. 3. If such telegram was received, did the Prime Minister or any person in his name or with his authority or knowledge or on his behalf send a telegram in reply to the said Rowlandson. 4. If so, the date of such telegram and the contents thereof. Presented to the Legislature, 17th February, 1913. *Mr. Elliott. Not printed.*

No. 59 Return to an Order of the House of 2nd April, 1912, for a Return of copies of all correspondence between any person or persons whatever and the Government of Ontario, or any Minister or Official thereof, with respect to the water power on the Montreal River, known as the "Notch" and all applications for a lease of the said water power and any and all leases issued, assignments of any such leases and all other papers and documents in any way relating to the said "Notch" water power or to the Montreal-Cobalt Power Company, Limited, since the 1st day of January, 1905. Presented to the Legislature, 18th February, 1913. *Mr. Mageau. Not printed.*

No. 60 Return to an Order of the House of the 28th March, 1912, for a Return of Copies of (1) All correspondence between the Department of the Attorney-General or any official thereof and any other person whatsoever with respect to certain charges against M. Houston, one time Police Magistrate for the City of Chatham. (2) All charges against the said M. Houston. (3) All Commissions issued, evidence taken and documents submitted in connection with the said charges and the dismissal of the said M. Houston from his office as Police Magistrate. Presented to the Legislature, 18th February, 1913. *Mr. Richardson. Not printed.*

No. 61 Return to an Order of the House of the 20th March, 1912, for a Return of Copies of: 1. All correspondence, reports, estimates or returns of any kind and from any source respecting the quantity of timber cut upon the Munn limits in the seasons of 1909-10, 1910-11 and 1911-12. 2. The amount received by the Government of Ontario for timber dues. stumpage, rentals, or otherwise howsoever in connection with the said limits in each of the financial years 1909-10-11 with full details. 3. The Annual Return made to the Department of the Provincial Secretary by the Munn Lumber Company, Limited, for the years 1909. 1910 and 1911. Presented to the Legislature, 21st February, 1913. *Mr. Sinclair. Not printed.*

No. 62 Return to an Order of the House of the 11th March, 1912, for a Return showing:—1. (*a*) The number of Forest Rangers and Timber Cullers employed by the Government of Ontario in the seasons of 1903-4 and 1904-5. (*b*) The number of feet of timber measured in each season. (*c*) The amount of money paid in each of the said seasons to (1) Forest Rangers, (2) Timber Cullers. 2. Also showing all the information hereinbefore asked for with respect to the seasons 1909-10 and 1910-11. Presented to the Legislature, 21st February, 1913. *Mr. Mageau, Not printed.*

No. 63 Return to an Order of the House of the 17th February, 1913, for a Return of a Copy of the Report made by Mr. E. Saunders, appointed to investigate into certain charges made by Michael Farr of an attempt made to procure money from him in consideration of a license being renewed for the Union Hotel in the Town of Goderich, together with copies of all correspondence which passed between the Government and any person in reference to the said license or the said investigation, the evidence taken by Mr. Saunders and generally all papers, letters, memoranda or papers of any kind and description relating to the said license, including all papers, and correspondence relative to the refusal of a renewal of such license. Presented to the Legislature, 21st February, 1913. *Mr. Proudfoot. Not printed.*

No. 64 Return to an Order of the House of thirteenth day of April, 1912, for a Return of:—(*a*) All memorials, resolutions, letters or other written memoranda received by the Government or any Minister or official thereof since the 1st day of January, 1910, from any individual, public officer or organization with respect to the increase of the number of Judges of the Supreme Court of Judicature for Ontario or with respect to the changes in the constitution of the Supreme Court of Judicature for Ontario provided for in sections 1 to 19 inclusive, of The Law Reform Act, 1909. (*b*) Copies of all letters or written memoranda from the Government or any Minister or official thereof to any individual, public officer, or organization with respect to the said two subject matters, or either of them, since the said date. Presented to the Legislature, 26th February, 1913. *Mr. Elliott. Not printed.*

No. 65 Statement of the Auditor made pursuant to the provisions of Section 13, subsection 2, of the Audit Act as amended by Section 6, of Chapter 10, 9 Edward VII. Presented to the Legislature, 28th February, 1913. *Printed.*

No. 66 Return to an Order of the House of the 14th March, 1912, for a Return showing:—How many male patients have been admitted to each of the Provincial Institutions for the Insane, Feeble Minded, and Epileptics during the three years beginning Jan. 1st, 1909, and ending Dec. 31st, 1911. How many female patients were admitted to these institutions during the same years. How many male patients were discharged from each of these institutions during the same three years. How many female patients were discharged from each of these institutions during these years. Of these male patients discharged: 1st. How many were discharged recovered; 2nd. How many were discharged improved; 3rd. How many were discharged unimproved. Of the female patients discharged: 1st. How many were discharged recovered; 2nd. How many were discharged improved; 3rd. How many were discharged unimproved. Of the female patients discharged how many were under 45 years of age. Of the patients admitted to each of these institutions during the years 1909, 1910 and 1911 how many were admitted for the first time. How many were admitted for the second time. How many were admitted for the third time. How many had been admitted more than three times. In how many of these cases admitted during these years is there evidence that the patients have become the father or mother of children after the first attack of insanity. In how many of these patients is there a history of insanity, epilepsy or imbecility in the father, mother, brother or sister of the patient. In how many of these patients is there a history of insanity, epilepsy or imbecility in the children of the patients. How many patients are in each of these institutions who have had a father,

mother, son or daughter in an asylum at some time. Presented to the Legislature, 28th February, 1913. *Mr. Godfrey. Not printed.*

To His Honour Sir John Morison Gibson, *Knight Commander of the Most Distinguished Order of St. Michael and St. George, a Colonel in the Militia of Canada, etc., etc., etc., Lieutenant-Governor of our Province of Ontario.*

May it Please Your Honour:

The undersigned has the honour to present to your Honour the Report of the Registrar of Loan Corporations for the Province of Ontario for the year ended 31st December, 1912.

Respectfully submitted,

J. J. FOY,

Attorney-General.

Toronto, 1st April, 1913.

To the Honourable J. J. Foy, K.C., M.P.P, etc.,

Attorney-General,

Toronto.

Sir,—I have the honour to present herewith the fifteenth Report of the Annual Statements made by Loan Corporations under the Act (Loan and Trust Corporations Act, 2 Geo. V., Chap. 34). Prefixed to these statements will be found a copy of the official blank form.

The Companies included in the Report are classified (as in the Act) into:

Loan Companies.

Loaning Land Companies.

Trusts Companies.

The Loan Companies forming the first mentioned class are further subdivided into:

A. Companies having only permanent stock.

B. Companies having withdrawable as well as permanent stock, or having withdrawable stock only.

I have the honour to be, Sir,

Your obedient servant,

A. R. Boswell,

Registrar of Loan Corporations.

Parliament Buildings,
Toronto, 31st March, 1913.

NOTE.

Section 112 of The Loan and Trust Corporations Act (2 Geo. V., Chap. 34) provides as follows:—

Representations that standing of corporation is vouched for by registrar.

112.—(1) No corporation shall under the penalty of becoming disentitled to registry or of having its registry suspended or cancelled make, print, publish, circulate, authorize or be a party or privy to the making printing, publishing, or circulating of any statement or representation that its solvency or financial standing is vouched for by the Registrar or that the publication of its statement in his report is a warranty or representation of the solvency of the corporation, or of the truth or accuracy of such statement in any particular.

FORM OF ANNUAL STATEMENTS

SUPPLIED TO LOAN CORPORATIONS FOR PURPOSES OF THIS REPORT.

NOTE.—By comparing with this form the statement actually made by each company and printed within the fulness and completeness of the company's statement may be tested.

FORM OF ANNUAL STATEMENT.

The following is a copy of the form supplied to each Loan Corporation for purposes of its Annual Statement for the year ending 31st December, 1912.

[The Annual Statement and Duplicate (each duly completed, with its schedules) are to be filed with the Registrar of Loan Corporations for Ontario (Department of Insurance, Parliament Buildings), Toronto, on or before the *first day of March, 1913*, subject to a penalty of $50 for each day of default in filing, as provided by *The Loan and Trusts Corporations Act*, Section 110. In each of the statements there should be enclosed a certified copy of any statement or statements made by the Directors to the Shareholders during or relating to the year 1912, including a certified copy of the Auditors' Report. Ibid., Secs. 103, 110 (6); Also copies of all notices calling general meetings of the corporation during such year.]

[The above duplicates should be accompanied by a cheque for $5 (filing fee) drawn payable to the Provincial Treasurer of Ontario.]

CERTIFIED COPY OF RESOLUTION.

Referred to in Foregoing Affidavit.—2 Geo. V., Chap. 34, S. 110 (2).

I, undersigned, the .....of the..... hereby certify that at a meeting of the Board of Directors of the said Corporation held at ..... on the ..... day of ..... 19.... the following Resolution was passed (pursuant to the statute in that behalf) adopting the Statement within and above made as the Statement of the said Board.

Moved by ....., seconded by .....and *Resolved* that the Statement of the Company for the year ending the thirty-first day of December, made to the Registrar of Loan Corporations and to be verified by the affidavit of .....as President, and ..... as Secretary of the said Company ..... be and the same is this ..... day of ..... adopted as the Statement of the Board of directors of the said Company pursuant to the enactment in that behalf of the Province of Ontario, 2 Geo. V., Chap. 34, S. 110 (2).

.....

.....

Attach to this Annual Statement a certified copy of each notice calling a General Meeting of the Corporation during the year ending 31st December, 1912, and a certified copy of the Statement or Statements furnished to Shareholders during or relating to the said year; also a certified copy of Auditors' Report—*Loan and Trust Corporations Act*, sections 103, and 110 (6).

I. LOAN COMPANIES

DETAILED REPORTS OF THE SEVERAL COMPANIES

THE BRITISH CANADIAN LOAN AND INVESTMENT COMPANY, LIMITED.

Head Office, Toronto, Ontario.

Constating Instruments.

Incorporated on 12th April, 1876, by Special Act of Canada, 39 V. c. 57, which was amended by 40 V. (1877), c 76 (D); and by 50-51 V. c. 110 (D).

Under the special Act of the Dominion of Canada, 6 Edw. VII. (1906), chap. 65, the directors were empowered to collect, get in, dispose of, and realize all the assets of the Company, and to wind up the business of the Company (sec. 1).

By section 4 the directors were further empowered (after the debts of the Company had been paid off or provided for) to distribute the remaining moneys ratably among the shareholders of the Company according to the amounts duly paid up on the then outstanding and existing shares of the capital stock held by shareholders respectively, and to take releases, surrenders and transfers of such shares.

Annual Statement

Of the condition and affairs of the British Canadian Loan and Investment Company (Limited), of Toronto, Ont., at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 410 Traders' Bank Building, in the City of Toronto, in the Province of Ontario.

17. Special General Meetings held in 1912: Dates, none.

CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED.

Head Office, Toronto, Ontario.

Constating Instruments.

This Company was in 1891 constituted by an amalgamation of (1) The Canada Landed Credit Company with (2) The National Investment Company of Canada (Limited), and the re-incorporation of the amalgamated Company. Of the two Companies so amalgamated:

1. The Canada Landed Credit Company had been incorporated in 1858 by special Act of the Province of Canada, 22 V. c. 133; a special Act of 1859, 22 V. c. 105, increased the capital; the two foregoing Acts were amended by 29-30 V. (1866-7), c. 125. In 1873, an Act of Ontario, 36 V. c. 122, amended 22 V. c. 133, supra; in 1874 the powers of the Company were extended by 38 V. c. 73 (O.); in 1875-6 the capital was further increased by 39 V. c. 97 (O.); in 1882 the special Acts of 1858 and 1859 supra were amended by 45 V. c. 72 (O.). In 1882 the special Act of Canada, 45 V. c. 110, extended the Company's operations to Manitoba and the Northwest Territories. In 1890 the special Act of Ontario, 53 V. c. 128, authorized the Company to issue debenture stock to become amalgamated with other companies, etc. In 1871, Letters Patent of Canada, dated January, 1891, authorized the amalgamation of the Company with the National Investment Company of Canada. In 1891, Letters Patent of Ontario, dated 12th February, authorized the same amalgamation.

2. The Naticnal Investment Company of Canada had been incorporated by Letters Patent of Canada, dated 21st August, 1882, issued under 40 V. c. 43 (D.).

For the powers of the amalgamated Company, see the Letters Patent above cited; see also R.S.O., 1886, secs. 88-98, and sec. 101; see also the Loan and Trust Corporations Act, 2 Geo. V., chap. 34.

17. Special General Meetings held in 1912. Dates, none.

THE CREDIT FONCIER FRANCO-CANADIEN.

Head Office, 35 St. James Street, Montreal.

As to the Paris Board of Management ("Paris Committee,"), sec. 43-4 V., cap. 60 (Q.), secs. 30-35. 47 V., c. 62 (Q.), Sched. A, Art. 51, enacts as follows: "The general meetings shall be held before the 31st day of May in each year, either at the head office or at Paris in France, according as there may be more shares to order held and stock certificates to bearer deposited in the Province of Quebec or in France, thirty days before the meeting."

By resolution passed at a special general meeting of the Company, held pursuant to article 52 of the by-laws at Paris, France, on the 12th December, 1907, the directors were authorized to increase the capital stock from 25,000,000 franc ($5,000,000) to 40,000,000 ($8,000,000) by the issue of 30,000 new shares of 500 francs ($100) each.

Agent for Ontario: William Edwin Long, Toronto. .

Constating Instruments.

43-4 V., c. 60, Province of Quebec: An Act to incorporate the Company. Schedule A to the Act contains the original constitution and laws of the Company: See Act of Quebec (1884), 47 V., c. 52, infra.

44 V., c. 58, Dominion of Canada. Section 13 defines the Company's borrowing powers. (See also 62-63 Vic., c. 41 (D.), s. 20.)

44 V., c. 51, Province of Ontario, empowers the Company to establish branch offices in Ontario, to lend money, hold real estate in the Province, etc.

45 V., c. 84, Province of Quebec, amends 43-4 Vic., c. 60 (Q.).

46 V., c. 85, Dominion of Canada, assimilates the powers of the Company to those of other Loan Companies.

47 V., c. 62, Province of Quebec. Schedule A to the Act contains the revised constitution and laws of the Company.

55-56 V., c. 29 (D. Criminal Code, 1892), by sec. 205 (6 d) exempts the Company from the general law prohibiting lotteries.

63 V. (1900), c. 74, Province of Quebec. An Act to amend the Charter of the Credit Foncier Franco-Canadien.

17. Special General Meetings held in 1912: None.

THE HURON AND ERIE LOAN AND SAVINGS COMPANY.

Head Office, London, Ontario.

Constating Instruments.

This Company was, under the provisions of the Loan Corporations Act (R.S.O. 1897, c. 205), formed by the amalgamation of The Huron and Erie Loan and Savings Company with the Canadian Savings and Loan Company of London, Canada. See also 6 Edw. VII. (1906), c. 110 (D).

Of the above mentioned constituent Companies The Huron and Erie Loan and Savings Company was incorporated by declaration filed under the Building Societies Act (Consol. Stat. U. C., c. 53) with the Clerk of the Peace for the County of Middlesex, 18th March, 1864 (Decl. Book, p. 65). The original corporate name was The Huron and Erie Savings and Loan Society. The corporate name was changed to The Huron and Erie Loan and Savings Company by the Act of Ontario, 39 Vict., c. 95. The lending and borrowing powers of the Company were governed by 59 Vict. (1896), c. 49 (D), as amended by 62-3 Vict. (1899), c. 115 (D), and by 4-5 Edw. VII. (1905), c. 105 (D).

The Canadian Savings and Loan Company of London, Canada, was incorporated under the Building Societies Act (Consol. Stat. U.C., c. 53) by declaration filed with the Clerk of the Peace for the County of Middlesex on the 2nd of September, 1875 (Decl. Book I., p. 67). This Company's lending and borrowing powers were governed by the Loan Corporations Act, R.S.O. 1897, c. 205, and amending Acts.

The agreement for the amalgamation of these Companies under the corporate name of The Huron and Erie Loan and Savings Company was executed by both Companies on the 24th October, 1905; was ratified by the shareholders of the respective Companies on the 7th December, 1905; and was assented to by the Lieutenant-Governor of the Province of Ontario by Order-in-Council dated 29th day of December, 1905; and was further ratified and confirmed by the Act of the Legislature of the Province of Ontario, 6 Edw. VII., Chapter 130. See also Special Act of Dominion of Canada, 6 Edw. VII. (1906), c. 110 (D).

Annual Statement

Of the condition and affairs of The Huron and Erie Loan and Savings Company, of London, Ontario, at 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 442 Richmond Street, in the City of London, in the Province of Ontario.

The Board is constituted of nine Directors, holding office for one year.

The directors and chief executive officers of the Corporation at the 31st December, 1912, were as follows, together with their respective terms of office:

T. G. Meredith, K.C., President, London;	February, 1912;	February, 1913.
Robert Fox, 1st Vice-President, London;	"	"
F. E. Leonard, 2nd Vice-President, London;	"	"
John Labatt, Director, London;	"	"
H. E. Gates, Director, London;	"	"
F. R. Eccles, M.D., Director, London;	"	"
Prof. Wm. Saunders, C.M.G., Director, London;	"	"
George T. Brown, Director, London;	"	"
Hume Cronyn, Director and Manager, London;	"	"
M. Aylsworth, Secretary, London.

17. Special General Meetings held in 1912: Date, 14th February, 1912.

THE IMPERIAL LOAN AND INVESTMENT COMPANY OF CANADA.

Head Office, Toronto (38 Vic., c. 62 (D.), s. 2).

Constating Instruments.

As recited in the Preamble of 38 Vic. 62 (D.), the Company was incorporated under the Building Societies Act, Consol. Stat. U.C., chap. 53. The declaration of incorporation was filed on the 19th August, 1869, with the Clerk of the Peace for the County of York. The corporate name was The Imperial Building, Savings and Investment Company (Decl. Book II., 47).

In 1875 the corporate name was changed by 37 V., c. 62 (D.), to The Imperial Loan and Investment Company (sec. 1). The existing Corporation was continued under the new name, with its head office at Toronto (sec. 2).

Section 3 enacts: "3. The said Company shall not under its new name be deemed a new Corporation, but it shall have, hold and continue to exercise all the rights, powers and privileges that previously to such change had been held, exercised and enjoyed by the said 'Imperial Building, Savings and Investment Company' in as full and ample a manner as if the said Company had continued to exist under its original name; and all statutory provisions applicable to the said Company shall continue applicable to the said Imperial Loan and Investment Company."

In 1881, by Letters Patent of Canada dated 11th June, the Company was re-incorporated "under The Canada Joint Stock Companies Act, 1876, by the name of the Imperial Loan and Investment Company of Canada (Limited), and as a Loan Company within the meaning and provisions of the said last mentioned Act, with their now existing capital of one million dollars."

See Statutes of Canada, 1899, 62-3 Vic., c. 116.

For the lending and borrowing powers see R.S.C. (1886), c. 119, secs. 88-98; 62-3 Vict. (1899), chap. 41 (D.), s. 20; and the Loan and Trust Corporations Act, 2 Geo. V., chap. 34.

Annual Statement

Of the condition and affairs of the Imperial Loan and Investment Company of Canada, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 37 Yonge Street, in the City of Toronto, in the Province of Ontario.

The Board is constituted of five directors, holding office for one year.

The directors and chief executive officers of the Corporation at the 31st December, 1912, were as follows, together with their respective terms of office:

Douglas A. Burns, President, Toronto.	3rd February, 1912.
Edward B. Brown, Vice-President, Toronto.	"
H. Pollman Evans, Director, Toronto.	"
E. L. Taylor, K.C., Director, Winnipeg, Man.	"
W. M. German, Director, Welland, Ont.	"
Gerard Muntz, Manager and Secretary, Toronto.

THE SECURITY LOAN AND SAVINGS COMPANY.

Head Office, St. Catharines, Ont.

Incorporated under the Building Societies Act (Consol. Stat. U. C., c. 53) by declaration filed with the Clerk of the Peace for the County of Lincoln on the 12th March, 1870. The original corporate name was The Security Permanent Building and Savings Society.

The Corporate name was changed to The Security Loan and Savings Company in 1876 by 39 V. c. 64 (D); and also by Order-in-Council of Ontario, dated 18th August, 1876.

The lending and the borrowing powers of the Company are governed by the Loan and Trust Corporations Act, 2 Geo. V., chap. 34.

Annual Statement

Of the condition and affairs of The Security Loan and Savings Company, of St. Catharines, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 26 James Street, in the City of St. Catharines, in the Province of Ontario.

The Board is constituted of seven directors, holding office for one year.

The directors and chief executive officers of the Corporation at the 31st December, 1912, were as follows, together with their respective terms of office:

Henry J. Taylor, President, St. Catharines;	7th February, 1912;	5th February, 1913.
J. H. Ingersoll, K.C., Vice-President, St. Catharines;	"	"
M. Y. Keating, Director, St. Catharines;	"	"
Dr. W. H. Merritt, Director, St. Catharines;	"	"
Jabez Newman, Director, St. Catharines;	"	"
A. W. Moore, Director, St. Catharines;	"	"
E. F. Dwyer, Director and Secretary-Treasurer, St. Catharines	"	"

A.—Permanent capital stock: Total amount authorized, $500,000; total amount subscribed, $400,000.00, as more particularly set out in Schedule A hereto.

17. Special General Meetings held in 1912: Dates, none.

THE VICTORIA LOAN AND SAVINGS COMPANY.

Head Office, Lindsay, Ontario.

Incorporated under the Building Societies Act, 1887, c. 169, as amended by 56 V. c. 31 (O.), by declaration filed with the Clerk of the Peace for the County of Victoria, on the 4th September, 1897.

The operations of the Company were for a time by law restricted to the County of Victoria (56 V. c. 31), continued by R.S.O. 1897, c. 205, s. 8 (4); but the Company having fulfilled the statutory requirements, was by Letters Patent of Ontario, bearing date 11th November, 1898, relieved from the above restriction of its operations.

The lending and borrowing powers are governed by the Loan and Trust Corporations Act, 2 Geo. V. chap. 34.

Annual Statement

Of the condition and affairs of the Victoria Loan and Savings Company, of Lindsay, Ontario, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 71 Kent Street, in the Town of Lindsay, in the Province of Ontario.

15. What were the dividend days of the Corporation in 1912 and what rate or rates of dividend were paid on those days respectively? 1st January and 1st July, 6% per annum.
16. What is the date appointed for the Annual Meeting? 3rd Thursday in February. Date of last Annual Meeting? 15th February, 1912.
17. Special General Meetings held in 1912: Dates, none.

THE REAL ESTATE LOAN COMPANY OF CANADA, LIMITED.

Head Office, Toronto, Ontario.

Constating Instruments.

Incorporated under the Building Society's Act (R.S.O. 1877, c. 164), by declaration filed with the Clerk of the Peace for the County of York, 17th September, 1879, with the corporate name of the Real Estate Loan and Debenture Company.—Decl. Book II., p. 57.

Letters Patent of Canada (6th April, 1883) incorporating the Company under the Canada Joint Stock Companies' Act, 1877, with the corporate name of the Real Estate Loan Company of Canada, Limited.—Lib. 85, folio 282, Office of the Registrar-General of Canada. The capital authorized by this instrument was $2,000,000, being the capital of the said the Real Estate Loan and Debenture Company, with the same powers throughout Canada as now possessed by the said the Real Estate Loan and Debenture Company, and for the same purposes and objects, subject always to the provisions of the said last mentioned Act (Canada J. S. Co.'s Act, 1877) and with all such further powers, purposes and objects as are conferred upon Loan Companies incorporated under the provisions of the said last mentioned Act.

1884. Act of the Dominion of Canada, 47 V., c. 101 (D), respecting sales of assets.

Supplementary Letters Patent of Canada, 20th June, 1892, reciting By-law No. 62 of the Company, and (as therein provided), reducing the capital stock from $2,000,000 to $1,600,000.

Annual Statement

Of the condition and affairs of the Real Estate Loan Company of Canada (Limited), at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

16. What is the date appointed for the Annual Meeting? 6th February, 1913. Date of last Annual Meeting? 1st February, 1912.

17. Special General Meetings held in 1912: Dates, none.

THE HOME BUILDING AND SAVINGS ASSOCIATION, OF OTTAWA

Head Office, Ottawa, Ontario.

Incorporated under the Building Societies' Act (R.S.O. 1887, c. 169), by declaration filed with the Clerk of the Peace for the County of Carleton, on the 24th June, 1890. (Decl. Book II., 119.) The Company, for purposes of distinction, ordinarily uses the words "of Ottawa" as part of its corporate name, but those words do not appear in the declaration of incorporation.

The lending and the borrowing powers are governed by the Loan and Trust Corporations Act, 2 Geo. V., chap. 34.

Annual Statement

Of the condition and affairs of the Home Building and Savings Association, of Ottawa, Ontario, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 95 Sparks Street, in the City of Ottawa, in the Province of Ontario.

The Board is constituted of seven directors, holding office for two years.

The directors and chief executive officers of the Corporation at the 31st December, 1912, were as follows, together with their respective terms of office:

John R. Armstrong, President, Ottawa;	January, 1911;	January, 1913.
M. Kavanagh, Vice-President, Ottawa;	" 1911;	" 1913.
E. B. Butterworth, Director, Ottawa;	" 1912;	" 1914.
J. H. Thompson, Director, Ottawa;	" 1911;	" 1913.
D. O'Connor, Jr., Director, Ottawa;	" 1911;	" 1913.
F. H. Chrysler, K.C., Director, Ottawa;	" 1912;	" 1914.
D. M. Finnie, Director, Ottawa;	" 1912;	" 1914.
C. A. Douglas, Manager, Ottawa.

14. Names and addresses of the auditors respectively for 1912 and for 1913 (if appointed):
   For 1912: J. F. Lawson, J. L. Atkinson.
   For 1913:
15. What were the dividend days of the Corporation in 1912, and what rate or rates of dividend were paid on those days respectively? 1st January and 1st July, 5% and 6%.
16. What is the date appointed for the Annual Meeting? 3rd Monday in February. Date of last Annual Meeting? 17th February, 1913.
17. Special General Meetings held in 1912: Dates, none.

THE RELIANCE LOAN AND SAVINGS COMPANY OF ONTARIO.

Head Office, Toronto.

Incorporated under the Building Societies Act, R.S.O., 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of York, on the 2nd March, 1893 (Decl. Book II., 95). The original corporate name was "The Excelsior Loan and Savings Union," which name was by Order-in-Council in Ontario, 24th June, 1895, changed to "The Reliance Loan and Savings Company of Ontario" (Ibid).

The lending and borrowing powers are governed by the Loan and Trust Corporations Act, 2 Geo. V., chap. 34.

Annual Statement

Of the condition and affairs of the Reliance Loan and Savings Company of Ontario, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 82-88 King Street East, in the City of Toronto, in the Province of Ontario.

The Board is constituted of seven directors, holding office for one year.

The directors and chief executive officers of the Corporation at the 31st December, 1912, were as follows, together with their respective terms of office:

James Gunn, President, Toronto;	4th March, 1912—3rd March, 1913.
N. H. Stevens, Vice-President, Chatham;	" "
David Kemp, Director, Toronto;	" "
Rev. G. I. Taylor, Director, Toronto;	" "
H. Waddington, Director, Toronto;	" "
George Gillies, Director, Clover Bar, Alta.;	" resigned Feb. 7, 1913.
E. C. McNally, Director, Niagara Falls;	4th March, 1912—3rd March, 1913.
J. A. McEvoy, Director, Toronto;	7th February, 1913—3rd March, 1913.
H. Waddington, Managing Director, Toronto;	1st March, 1910.
Charles R. Hill, Secretary, Toronto;	21st Sept., 1909.

THE TORONTO SAVINGS AND LOAN COMPANY.

Head Office, Peterborough, Ontario.

Incorporated as "The Toronto Real Estate Investment Company," by Letters Patent of Ontario (June 15th, 1885), issued under the Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1877, c. 150. Supplementary Letters Patent of Ontario (29th December, 1877), were issued under R.S.O. 1887, c. 157, defining the borrowing powers, etc. Further Supplementary Letters Patent of Ontario (25th September, 1889) were issued under the last mentioned Act, increasing the capital stock from $400,000 to $2,000.000. Further Supplementary Letters Patent of Ontario (30th March, 1891) were issued under the same Act, conferring agency powers on the Company. The Corporate name was by Order-in-Council (2nd April, 1891) changed to "The Toronto Savings and Loan Company."

For the lending and borrowing powers, see the Letters Patent and the Acts, R.S.O. 1877, c. 150; R.S.O. 1887, c. 157; 2 Geo. V., c. 34.

Annual Statement

Of the condition and affairs of the Toronto Savings and Loan Company, of Peterborough, Ontario, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

17. Special General Meetings held in 1912: None.

THE CANADA TRUST COMPANY.

Incorporated on the 23rd July, 1894, by special Act of the Dominion of Canada, 57-8 Vict. (1894) Chap. 115, under the name of The General Trusts Corporation of Canada.

By a subsequent special Act, 62-3 Vict., Chap. 111 (D.) passed on the 11th August, 1899, the corporate name was changed to The Canada Trust Company, and certain other amendments were made in the incorporating Act.

The powers of the Company are defined by sections 3 of the incorporating Act, which powers are (section 4) to be deemed subject to the laws of the Province.

Annual Statement

Of the condition and affairs of The Canada Trust Company, of London, Ontario, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 442 Richmond Street, in the City of London, in the Province of Ontario.

The Board is constituted of sixteen directors holding office for one year.

17. Special General Meetings held in 1912. Dates: None.

THE TORONTO GENERAL TRUSTS CORPORATION.

Head Office, Toronto, Ontario.

The Toronto General Trusts Corporation was constituted on the 1st April, 1899, by special Act of Ontario, 62 Vict. (2), chap. 109, amalgamating into one Company under the above name:

(1) The Toronto General Trusts Company, and (2) The Trusts Corporation of Ontario.

By an agreement made under The Loan Corporations Act in two indentures dated respectively 13th and 30th July, 1903, approved by Order-in-Council (Ontario), 11th September, 1903, the Toronto General Trusts Corporation acquired the assets and assumed the liabilities and duties of the Ottawa Trusts and Deposit Company. See also special Act of the Province of Quebec (2nd June, 1904), 4 Edw. VII., chapter 93.

Annual Statement

Of the condition and affairs of the Toronto General Trusts Corporation, of Toronto, Ontario, at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

17. Special General Meetings held in 1912: Dates, 7th May, 1912.

THE TITLE AND TRUST COMPANY.

Head Office, Toronto, Ont.

Constating Instruments.

The Title and Trust Company was incorporated in 1905, by Special Act of the Parliament of Canada, 4-5 Edward VII., Chapter 162 (Royal Assent 20th July, 1905). By Section 19 of this Act the Company was required to make an initial deposit with the Receiver-General of Canada to carry on the business of Title Insurance, the said deposit to be increased to $75,000 within two years from the date of the issue of such license, and to be further increased as the Treasury Board may from time to time require.

In 1907, by Special Act of the Province of Ontario, 7 Edward VII., Chapter 118, the Company was upon the conditions therein specified made admissible to registry under *The Loan Corporations Act;* and initial registry was granted on the 30th August, 1907.

Annual Statement

Of the condition and affairs of The Title and Trust Company at 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is on the southeast corner of Bay and Richmond Streets, in the City of Toronto, in the Province of Ontario.

The Board is constituted of thirteen directors, holding office for the term of one year.

The directors and chief executive officers of the Corporation at 31st December, 1912, were as follows, together with their respective terms of office:

E. F. B. Johnston, K.C., Pres., Toronto, Ont.;	26th January, 1912;	24th January, 1913.
Hon. W. A. Charlton, Vice-Pres., Toronto, Ont.;	"	"

16. What is the date appointed for the Annual Meeting? 24th January, 1913. Date of last Annual Meeting: 26th January, 1912.
17. Special General Meetings held in 1912: Dates, none.

THE ROYAL TRUST COMPANY.

Head Office, Montreal, Que.

Constating Instruments.

The Royal Trust Company was incorporated in 1892, by Special Act of the Province of Quebec, 55-56 Vict., chap. 79, which was amended by 55-56 Vict. (1892), chap. 80 (Q.), and by 59 Vict. (1895), chap. 67 (Q.), and by 63 Vict. (1900), chap. 76 (Q.).

Authorized by Special Act of the Legislature of Ontario, 2 Edw. VII., chap. 103, to transact business therein as specified in section 1 (55) of the said Act, which enacts as follows:

"(5) The Company shall be limited in respect to all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in the schedule to the Ontario Trusts Companies' Act, and shall be subject to the general provisions of the said Act and of the general public law of the said Province relating to trust companies and trusts."

The Company has a deposit in the Province of Ontario amounting to $200,000.

Annual Statement.

Of the condition and affairs of the Royal Trust Company at the 31st December, 1912, and for the year ending on that day, made to the Registrar of Loan Corporations for the Province of Ontario, pursuant to the laws of the said Province.

The head office of the Corporation is at No. 107 St. James Street, in the City of Montreal, Quebec.

The chief agency for Ontario is situate at corner of Queen and Yonge Streets, in the City of Toronto, in the Province of Ontario.

The chief agent and attorney for Ontario is M. S. L. Richey, and his address is Royal Trust Company, Toronto, Ontario.

The Board is constituted of seventeen directors, holding office for one year.

Statements of Accountant and Law Clerk	115

To His Honour, Sir John Morrison Gibson, K.C.M.G., a Colonel in the Militia of Canada, etc., etc., etc., Lieutenant-Governor of the Province of Ontario.

Sir,—I have the honour to submit to you, as required by Statute, the Annual Report on the Works under the control of the Public Works Department, comprising the Reports of the Deputy Minister, the Architect, the Engineer, the Superintendent and the Accountant of the Colonization Roads Branch, and the Accountant and Law Clerk for the twelve months ending the 31st of October, 1912.

I have the honour to be, Sir,

Your obedient servant,

J. O. Reaume,

Minister of Public Works.

Department of Public Works, 24th February, 1913.

REPORT

OF THE

Deputy Minister of Public Works

Toronto, February 24th, 1913.

Honourable J. O. Reaume, *Minister of Public Works, Ontario.*

Sir,—I have the honour to transmit the reports of the Provincial Architect, the Provincial Engineer, the Superintendent and Accountant of the Colonization Roads Branch, and the Accountant and Law Clerk of the Department of Public Works, for the fiscal year ending October 31st, 1912.

An event of interest during the year was the passing of the Government House on King and Simcoe Streets; when the sale of the grounds was made in the year 1910, the agreement provided that possession would be given on June 1st, 1912, to the Canadian Pacific Railway. The Department was fortunate in procuring a suitable residence for the Licutenant-Governor on the corner of College and St. George Streets, with large ornamental grounds, spacious residence with conservatory, greenhouses and other necessary buildings. Good progress is being made in the erection of the new residence in Chorley Park, Rosedale. Excellent work is being done, which when completed will be a credit to the Province.

During the year, the West Wing reconstruction and Library addition or North Wing of the Parliament Buildings, were completed and are now occupied. Owing to the expansion of the work of the Hydro-Electric Power Commission, and the increase of the work of other departments of the Government, it was found impossible to find accommodation for all in the new buildings. It was decided therefore, after careful consideration, that the Hydro-Electric Offices should continue in the premises they were occupying.

Early in the year an excellent site was procured at Whitby, comprising 640 acres, for the erection of an Hospital for Insane, rendered necessary by the sale of the Toronto Asylum lands to the Grand Trunk Railway. Work has been proceeding during the year, using prison and patient-labour to a large extent.

The ordinary expenditure for the repair, alteration and upkeep of the buildings of the Hospital for Insane, and other public buildings at Brockville, Cobourg, Hamilton, Kingston, London, Mimico, Orillia, Penetanguishene, Toronto, Woodstock, Central Prison, Toronto, and Mercer Reformatory, Toronto, for the past year has been largely attended to by the Provincial Secretary's Department, which is charged with the operation and maintenance of the Institutions, and can employ patients to do a large part of the work on the buildings. At Brockville, a new Reception Hospital and Nurses' Home is being erected. At London a fire occurred on January 2nd, destroying the Kitchen, Canning Factory and Bakery on the ground floor, and the Amusement Hall on the upper floor. The fire equipment and water pressure were in good condition and the fire was confined to the building in which it started. It was determined, in rebuilding, to make the kitchen one story in height and erect an amusement hall upon another site.

The work upon the new Provincial Reformatory at Guelph has been proceeding vigorously during the year, under the direction of the Provincial Secretary's Department. An Industrial Farm has been established near Fort William; 1,100 acres of Crown lands in the Township of Neebing have been set apart for the purpose, and prisoners from the Western portion of the Province have been usefully employed in clearing the lands.

A new Registry Office has been under construction at Kenora, an addition to the Registry Office at North Bay has been erected, a new gaol has been erected at South Porcupine, and general repairs made to the Provincial buildings in the unorganized districts.

At the Institutions for the Education of the Deaf and Dumb at Belleville, and for the Education of the Blind, at Brantford, new dormitories are under construction, they will be two storeys in height and semi-fire proof to reduce the danger of loss of life or injury by fire. Two new fire escapes have been erected at each of these institutions, spiral in form, which can quickly and safely remove the children if any emergency should occur. A building for an English-French training school was purchased from the School Boards of Sandwich, and was altered and equipped in a satisfactory manner.

Contracts have been awarded for a five storey building on University Avenue and Anderson Street in the city of Toronto, for a Veterinary College, it will be of fireproof construction and will be finished and equipped in the latest and best manner. A new Dairy barn was erected at the Agricultural College, Guelph. Plans have been prepared for a new Dining Hall for the Agricultural College, Guelph, and the site prepared for its erection by the removal of two stone residences to another part of the grounds. At Jordan Harbour, a new water system has been installed, and a contract awarded for a new fruit packing house.

The report of the Provincial Engineer shows that during the year ending October 31st, 1912, extensive works have been carried out under his direction, in the construction of new bridges, the repair and maintenance of locks, dams and bridges, and in dredging and drainage works. The largest works constructed being the bridge across the Kaministiquia River in Paipoonge township near Slate River; the township of Paipoonge contributing towards the cost to make the bridge strong enough to carry an electric railway in addition to the ordinary vehicular and pedestrian traffic. The bridge at Burk's Falls provides for a crossing of the Grand Trunk Railway and the Magnetawan River and eliminates a dangerous level crossing. Seventeen steel bridges, sixteen on concrete and one on timber substructures; three reinforced concrete beam bridges, and one stone fill connecting Campment d'Ours Island with St. Joseph Island are all good permanent structures. Sixteen wooden bridges were constructed where, from their location and local conditions, permanent steel and concrete structures were prohibitive on account of high cost, these last being chiefly in Temiskaming and Rainy River districts, a few being in Muskoka and Parry Sound District, and one in Hastings County. Aid was given to the county of Peterboro towards the construction of a bridge at Eel's Creek, Burleigh Township, to the provisional county of Haliburton, towards the construction of two steel bridges at Haliburton, and to the township of Glenelg towards the construction of bridge in that township.

The appropriation for the maintenance locks, dams, bridges, dredging, etc., was expended with careful oversight. The repainting of the steel bridges under the control of the Department received special attention, a competent and experienced painter was engaged during the whole of the season until cold weather set in.

The Government dredge was operated during the season in the Huntsville waters in Mary's Lake and River.

The drainage of the roads in Rainy River was continued during the year. Improvements were made in seven small streams to drain the roads and lands. The following townships received aid under the Provincial Drainage Aid Act, upon inspection and report of an Engineer from the Department: Chatham, Colchester, Cornwall, Humberstone, Marlborough, Roxborough and Sarnia.

Under the direction of the Superintendent of Colonization Roads, 346.58 miles of new roads were constructed; 672.59 miles of roads were repaired and improved; 48 miles of winter road cut out: 2,056 lin. feet of new bridges constructed; 1,509 lin. feet of old bridges renewed; 782 culverts constructed on new roads, and 938 on old roads, at a cost of $443,727.97. This work was done chiefly in what is known as New Ontario, and almost wholly in that portion of the Province without County organization; small grants being made to the northerly portions of the counties adjoining the unorganized territories or where sparsely settled.

The work on the Sudbury-Soo Trunk road for the season 1912, consisted of completing the road easterly from Sault Ste. Marie to Echo Bay, and claying and gravelling the sections on the same where the soil was loose sand: repairing a short portion west of Blind River; and completing the portion between Webbwood and Espanola. In all about 8 miles of new road was constructed and 10 miles repaired.

An increasing number of township municipalities are taking advantage of the Colonization Roads Act, by which aid to the extent of from one-third to two-thirds of the cost of road work is given for road work undertaken by the townships under by-law designating certain main or leading roads to be constructed or improved under the Act.

The report of the Accountant of the Colonization Roads Branch gives in detail the amounts expended on each road with a recapitulation of the total amount expended in the several road divisions.

The statements of the Accountant and Law Clerk gives the Capital expenditure on Public Buildings, Public Works, Roads, Aid to Railways, etc., and of Contracts entered into in connection therewith, during the twelve months ending the 31st October, 1912, also valuable classified statements of expenditure from the 1st of July, 1867.

I have the honour to be,

Sir,

Your obedient servant,

R. P. Fairbairn,

Deputy Minister of Public Works.

REPORT OF ARCHITECT.

Hon. J. O. Reaume, *Minister of Public Works, Ontario.*

Sir,—I have the honour to submit my annual report of the work done by the Architect's Branch of your Department for the past twelve months.

Government House.

The old Government House and premises were vacated and possession given to the purchasers, the Canadian Pacific Railway Co., on April 15th, 1912, the house and premises St. George and College Streets having been leased by your Government for a temporary residence for His Honor, the Lieutenant-Governor, from Mr. Walter Beardmore. Some alterations were necessary to the residence and coachman's house, to make them suitable for the requirements. It was also necessary to redecorate some of the apartments, as much of the furnishings and pictures from the old Government House as could be used (the Beardmore house being much smaller) were placed in the temporary residence, and the remainder placed in storage. The plants from the old conservatory and greenhouse were also carefully removed to the conservatory and greenhouses in connection with the temporary residence, and are being well cared for by the Government House gardener and staff.

Good progress has been made to date with the erection of the Government House. Contract for foundations was finished early in the year, and at the present time the walls of the service wing and ball room extension are erected as high as the roof and the walls of the main building as high as the tops of the second floor windows. The steel beams and columns to ground, first and second floors are in position and some of the roof trusses are being placed. Terra cotta fireproof tile, supporting the floors, is in place on nearly the whole of the ground and first floors. The contractor for this work is following up the steel as fast as the construction of same will permit of its being done. Considerable delays have been occasioned from time to time either through the scarcity of steel, or the inability of the contractors to procure the same. Contracts in addition to those entered into last year have been awarded as follows:—Roofing, including tile and copper work, to the Messrs. Douglas Bros. Fire proofing, including terra cotta tiling and concreting, to Fred Holmes & Sons. Heating, Plumbing and Ventilation to Purdy, Mansell, Limited. Contract for bridge between fore and outer courts to Fred Holmes & Sons.

Work on the grounds, consisting of grading, the erection of concrete retaining walls and drainage, has been continued throughout the year. The retaining wall along the east side of driveway from the circular, or outer court, to Roxborough Street has been built for nearly its entire length, and the walls to this court nearly completed. The concrete foundation of bridge between the fore court and outer court have been built. The grounds and courts are shaping up most satisfactorily and despite adverse criticism, when completed will be the finest in the Dominion.

Parliament Buildings.

All contracts for the north wing, or Library addition, have been completed, with the exception of the marble work and electric light fixtures. The Library has been moved from the temporary quarters at No. 4 Queen's Park and occupies

the third floor for offices and reading room and stacks, the book stacks being built in the centre and extending up through the third floor, the Provincial Board of Health being located on the north and west sides of the first floor, the Department of Education on the whole of the second floor, the Printing Department being accommodated on the first floor. The offices on the fourth, or upper floor have been occupied by the Officials of the Department of Agriculture, including the Live Stock Exhibitions, etc.

The work in connection with the reconstruction of the west wing has also been completed, with the exception of the electric light fixtures and some of the marble work, and the offices occupied. The Ontario Municipal and Railway Board, whose temporary offices were rented in the Manning Chambers, have been accommodated with offices on the third floor of the wing; the Municipal Auditor, whose temporary quarters were also in the Manning Chambers, have been located on the fourth floor. Accommodation for the Provincial Archivist has been provided on the fifth floor, occupying the space over the south-west corner of this wing, being sub-divided into three offices in front and large stack room in the rear. The added space in the north and west wings, in my opinion, will give ample accommodation for some years to come, while a natural increase of business may be expected, the larger offices, some of which are at present occupied by one or two officials, will easily accommodate twice or thrice the number.

The fitting up, or furnishing the offices and vaults for the various Departments entailed a large amount of work by this Department in preparing drawings and specifications and procuring tenders, the work in all cases being awarded to the lowest tenderer.

Hydro-Electric. Alterations are being made in the electric apparatus for the using of Hydro-Electric current for lighting and for supplying power for operating the elevators and fans in connection with the ventilation system. A contract was awarded to Messrs. Kilmer, Pullen & Burnham, Limited, of Toronto, for supplying and installing service transformers, motor generators and switchboards. The work of changing the wiring system is being done under contract by The Robert Simpson Co., of Toronto. Good progress is being made and it is confidently expected the change from the City of Toronto Electric Light Co's. service to the Hydro-Electric service will be accomplished before the meeting of the Legislature. To provide space for the above apparatus, the steam fire pump was removed from the old pump room to a favorable position in the main corridor in basement, the apparatus being installed in this space and the Engineers' room adjoining, provision being made for the Engineers in another room. The foundation work and structural changes are being made by men employed by the Department under the direction of the General Clerk of Works.

Plans and specifications were prepared and tenders called for metal gallery and fittings for the vault in connection with the Sales and Free Grants Branch, Lands, Forests and Mines Department, and the contract awarded to the Library Bureau; the work has been completed.

Repairs to the buildings have been attended to, including steam heating, plumbing and lighting plants, roofs, painting offices and incidentals. Furniture has been supplied where necessary, and old furnishings repaired where possible. Tenders were called for electric light fixtures for the west wing and the contract awarded to The Fred Armstrong Co. Tenders were also called for the electric fixtures for Library Wing and the contract awarded to Messrs. Chadwick Bros., of Hamilton.

PROVINCIAL BOARD OF HEALTH AND DEPARTMENT OF MINES' LABORATORIES.

No. 5 Queen's Park. The upkeep of this building has received proper attention, repairs were made when required. The stable building at the end of the addition, or wing, has been fitted up for a garage for the Government Automobile, properly heated and lighted. The grounds have been kept in good order by the caretaker.

Osgoode Hall. The new north wing erected for the Court of Appeal division was completed, furnished and occupied by the Judges and Staff early in the year. The new Court Room was opened with due ceremony on April 10th. That this building is satisfactory to both the Judges and Bar is evinced by the complimentary remarks included in the address of Sir Chas. Moss, Chief Justice of Ontario, on that occasion, and the reply thereto on behalf of the Bar by Sir Aemilius Irving, which I take the liberty of inserting herein, as a record of an important event, reflecting credit on the Department.

ADDRESS BY SIR CHARLES MOSS, CHIEF JUSTICE OF ONTARIO, WELCOMING THE MEMBERS OF THE BAR ON THE OCCASION OF THE FIRST SITTING OF THE COURT OF APPEAL IN ITS NEW HOME.

Sir Aemilius Irving and Gentlemen of the Bar:—

My colleagues and I think that before proceeding with the business of the Court, it would be proper to make a brief reference to the new conditions and surroundings in which the Court is about to enter upon the work of the Sitting now commencing.

It is, we think, of some interest to the members of the profession who frequent the Court of Appeal, as well as of moment to the Judges themselves, that after a considerable period—a somewhat drawn out period, at all events—of comparative unrest, we are to be hereafter housed in these comfortable rooms; and that we are for the future to hold the sittings of the Court in this commodious and handsome chamber.

It is nearly a quarter of a century now since the Court, constituted substantially as it is to-day under the legislation of 1874, took up its quarters in the chambers which lay almost immediately to the south of where we are to-day; and there it continued its work until the manifest inconveniences from want of proper light and ventilation—and lately from the want of even sufficient space—led the Government of Ontario to decide upon the erection of this present building, into the possession of which, after a temporary lodgment elsewhere of nearly two years, we enter this morning.

It may be assumed, I suppose, that this building, which we trust remedies the defects formerly complained of—well lighted, well ventilated and spacious as it is—will continue hereafter to be for many years the domicile of the Court, so that it may be truly said that to-day marks the entry upon a new stage and the commencement of a new epoch in the history of the Court.

My colleagues and I entertain the belief that the relations between the Bench and the Bar, which have ever been of the most cordial and satisfactory nature in the past, will continue and be fully maintained in the future.

On behalf of my colleagues and myself, and through you, Sir Aemilius, I tender to the Bar a cordial welcome to this new building; and we are fully assured that the members of the Bar will do all that lies within their power, as they

always have done, I think, in the maintenance of the traditions of the Bar, to perpetuate and maintain the becoming decorum and dignity which should always surround, and has hitherto surrounded, the administration of Justice in His Majesty's Courts.

REPLY OF SIR AEMILIUS IRVING, TREASURER OF THE LAW SOCIETY OF ONTARIO, TO THE ADDRESS OF SIR CHARLES MOSS TO THE ONTARIO BAR.

Sir Charles Moss and My Lords:—

You have been good enough to refer to this handsome chamber in the course of the very appropriate remarks that you have made on this auspicious occasion: and I think I may use that term without using it aimlessly.

I think it might have been well had those who are more particularly responsible for the details that have been worked out—for instance, the Minister of Public Works, the Architect, and indeed the Attorney-General himself—been present here to-day; they would have been much gratified to have heard the laudatory remarks that Your Lordship has thought proper to utter with reference to the building in which we are now placed.

With reference to the Court itself, one finds here a fitting home for the purpose; and, speaking of course not as an expert dealing with Architecture, but as one struck with the simplicity, with the perfect good taste that this room presents, one cannot refrain from referring to those qualities, and to its admirable proportions.

I think those are matters of great importance, and of satisfaction not only to the Judges themselves who adorn this Court, but to the members of the Bar who practice, and of the public generally, in knowing that the results of the expenditure by the country upon this very necessary building has been followed by such successful completion.

Your Lordship was pleased to speak about the relations between the Bench and the Bar. With reference to the relations of the Bench, I do not think it is at all becoming for me from this position to speak. The Bench has always been the great honor of this Province, and it has, accordingly, invariably received that tribute from not only the Bar, but from the public as well.

With reference to the Bar, it is upon that point that we can speak. We have no doubt that the Bar will on its part follow out the traditions of the members of the Bar who have preceded us; and we will always remember that the highest tribute to the Bar would be to follow in the footsteps of those great men who have been at the Bar—some of whom have been on the Bench.

I beg leave, on behalf of the Bar present, and of those who are not here—who I am sure would be glad to be here did convenience permit—to thank your Lordships for the welcome that you have given us, and the kind hearing extended.

Plans and specifications were prepared and tenders called for a large area with driveway down the centre, between the Government portion of the building and the Law Society on the north side, the object being to improve the light in basement, and facilitate the delivery of fuel, the contract was awarded to Messrs. Thomson Bros., of Toronto, the work is finished and the object, for which it was built, has been accomplished.

Plans and specifications were made and tenders called for an iron and brick fence enclosing the grounds at the side of the new wing on Osgoode Street, the

brick work is being done by men in the employ of the Department; a contract has been awarded for the iron work to The Canadian Ornamental Iron Co. At the same time tenders were called for concrete side walks to Osgoode Street and to entrances of buildings on the north side and for a concrete road from Osgoode Street to the larger area, before mentioned. The contract was awarded to the Queen City Paving Co., the work has been completed. All of these works have been done in accordance with the contract under Mr. Wm. Beale, Clerk of Works.

An extraordinary amount of repairing was done to the main building, including the flooring of the caretaker's apartments in the basement of the old west wing, which had decayed, the old flooring was removed and this section properly surface drained, concreted and a wooden floor laid on top and the place left in a sanitary condition. This work was done by men in the employ of the Department under the directions of the General Clerk of Works. The wood framing of skylights over the atrium which were found to be badly decayed and in danger of falling, were removed and replaced by metal framing and rough rolled plate glass, the work being done by the Ormsby Co., of Toronto, under contract. The stained glass ceiling and dome lights under skylights were repaired and reglazed. The stone work in atrium and side corridors was cleaned down with acid and the walls and ceilings painted. The walls and ceilings of the new dividing corridor between the old building and the new north wing were also painted to harmonize with the atrium. The walls of all the apartments in the new wing, with the exception of the court rooms, were painted, the work being done under contract, by Mr. T. A. Ovens. It is proposed to paint the corridors and court rooms in this part of the building next year. It was also necessary to paint the walls and ceilings of the Chancery Court and the Master-in-Ordinary's Court in the west wing, this work also being done, under contract, by Mr. T. A. Ovens. The Master of Titles private office in the west wing, was moved to the room on the opposite side of the hall to the room formerly occupied by the Inspector of Legal Offices, that official having moved into the new north wing; this office was also painted and renovated. Some changes were made in the offices of the Accountant of the High Court, a large metallic standing desk was provided and the walls and ceilings repaired and painted. Vault fittings were provided for the vault in the central office, tenders being duly called for and the contract awarded to the G. N. Reynolds Co., of Toronto. Metal fittings were also supplied to the vaults in connection with the Registrar's office, Court of Appeal, under contract by the Library Bureau Co. Furniture was supplied where necessary and old furniture repaired. Repairs to the building in general have been made and the heating, plumbing and lighting plants kept in the usual good condition.

Hospitals for the Insane

The foundations of the Reception Hospital and Nurses' Home at Brockville were built during the summer, the work being done by day work, the labor of the patients being utilized as far as possible. With the exception of this building, the verandah at Orillia and the reconstruction of the east wing of the Hospital at Hamilton, all of the works in connection with the Hospitals were carried on by the Inspector of Asylums, utilizing patient labor, the materials being purchased by his Department. Plans and specifications were prepared in this Department and most of the works supervised by your officials.

I regret to report a disastrous fire took place at London Hospital on January 2nd, in the kitchen extension of the main building, which practically destroyed that portion of the building, with the exception of the foundations and a small portion of the brick walls, which were left standing. The fire extended from the passage way connecting this part of the building with the main building, to the south wall of the boiler house. The portion damaged, or destroyed, included the kitchen, pantries, scullery, canning factory and bakery on the ground floor and the amusement hall on the upper floor. I arrived on the scene in company with the Inspector of Asylums and the Inspector of Boilers at 7 o'clock a.m. the following day, patients were immediately set to work cleaning up the debris. Drawings were prepared as soon as possible on a very much improved plan, the amusement hall being omitted and that part of the building made one story in height. The bakery, canning room and cold storage were rearranged. To facilitate the work a satisfactory contract was made with Messrs. Hyatt Bros., Contractors, of London, to carry out the work on a percentage basis, materials being purchased by the Government. The building is about completed, preliminary sketches have been made for an amusement hall to be erected on the grounds to the north of the main building. Plans were made for a morgue, a large verandah of steel and concrete was erected at the end of the north building, plans of which were made last year, and the work has been satisfactorily completed.

Plans were made for alterations and improvements to the sewage plant at the Hospital for Insane, Kingston, as recommended by the Provincial Board of Health. A new precipitating chamber is being erected, the old precipitating chamber being converted into filter beds, and the work thereon is progressing and should be completed by the end of the year.

Plans and specifications were made for an extension to the coal vaults adjoining the main boiler house at Mimico Hospital, on the opposite side of same, and similar to the extension built last year the work has been completed. Plans were also made for a steel and concrete fireproof floor to the main kitchen.

Tenders were received for a verandah on the west side of the main building at the Hospital for Feeble-minded, Orillia, similar to that built last year on the east side of this building. The contract was awarded to Jos. Langman, and the work has been completed with the exception of the steps, which have to be rebuilt. Plans and specifications were made for an extension to the green house and conservatory, an addition to the piggery and a silo and milk room adjoining the new barn. These buildings have been completed. The barn, with the exception of the foundations and silo and milk room, was destroyed by fire on April 27th, 1913. I understand it is the intention to rebuild it next year.

Plans and specifications were made for a residence for the Medical Superintendent at the Hospital for Epileptics, Woodstock, the work being carried on under the Medical Superintendent, and judging from the progress made to date, will be completed early in the coming year.

The steel and concrete verandah in front of the Orchard House in connection with the Hospital for Insane, Hamilton, has been completed. Plans and specifications were made for a new cottage for the gardener, the work being carried on under the supervision of the Medical Superintendent. The reconstruction of the east wing of the main building, damaged by fire on August 1st, 1910, was completed early in the year.

Institution for Deaf and Dumb, Belleville.

To protect the students from fire and to give better accomodation for dormitories and study rooms, it was decided to erect two Dormitory Buildings, one for males and one for females. It is the intention when these buildings are completed to alter the main building, the dormitories in same being converted into class rooms. The students will get their meals and attend classes in this building and study and sleep in the new buildings. The new buildings have been suitably located on the front portion of the grounds, one on each side about 200 ft. from the main building. Plans and specifications were prepared for the building to be occupied by females and tenders received, the contract for general trades being awarded to Mr. S. F. Whitham of Brantford, for heating, ventilating and plumbing to the Purdy Mansell Co., of Toronto, and for electric wiring to Messrs. Greenleaf & Sons, Belleville. The foundations of the building have been erected and brick work is under way.

The building will be two stories in height with basement, has a frontage of 148 ft. by a depth of 53 ft. in centre, and 108 ft. at ends; is of semi-fireproof construction, the foundations of concrete, the walls above foundations of brick and stone. The main entrance is in centre of the front with vestibule and hall leading to a wide corridor the whole length of the building, with exits or entrances at each end; four dormitories are provided for on each floor, giving accommodation, in all, for 75 beds. The Supervisors' apartments are located in the first floor in front, study and play rooms are located on each floor, also lavatories, water closets and clothes rooms, a library and reading room is provided for on the second floor. Two large bath rooms are located in the basement, one fitted with shower baths and the other with single baths, the remainder of the basement will be used for work rooms and storage. The heating will be done with steam from the main boiler-house, the radiation being direct and indirect. An up-to-date system of ventilation has been designed in conjunction with the heating, the services of the Canadian Domestic Engineering Co. having been engaged for that purpose. All plumbing apparatus and equipment of the building generally will be up-to-date in all the appointments. The upkeep of the buildings in connection with the Institution has received proper attention by your Department. The roof of the workshop which was destroyed by fire on April 27th, and other damages, have been made good, the work being done by Contractor Alford on a percentage basis.

Institution for the Blind, Brantford

For the reasons given above, it is intended to erect two dormitory buildings in connection with this Institution. Plans and specifications were prepared for one of the buildings, which has been located to the west of the main building, about 100 ft. from the end of same. Tenders were called for the general trades, and the contract for same awarded to Messrs. P. H. Secord & Sons, of Brantford. The foundations have been built and other work is being rapidly advanced. The building will be two stories in height, with basement, is oblong in plan with a frontage of 158 ft. and a width of 46 ft. The foundations are of concrete and the walls above of stone and brick with stone facings. A broad corridor extends the full length of building in the centre with exits at each end, with fireproof staircases. While this building is being erected for the protection of the students from fire, it is entirely different in plan and design to the Domitory building being

erected for the Deaf and Dumb; in the latter, associated dormitories accommodating from 18 to 20 beds in each, study and play rooms and library are provided. This building will be used only for dormitory purposes and no dormitory will be larger than to give accommodation for four beds, in all 80 beds. Provision is also made on each floor for linen and clothes rooms, lavatories, wash rooms. Bath rooms for showers and single baths are located in the basement. Steam will be used for heating in connection with the heating plant from the main building. Both steam and heating systems will be similar to that designed for the Dormitory building at the Institution for Deaf and Dumb; the plumbing appliances will also be of the most suitable description. Two Kirker-Bender fire escapes have been erected to the main building. The upkeep of all of the buildings in connection with this Institution has received proper attention, repairs being made when necessary.

English and French Normal School, Sandwich.

Plans and specifications were prepared for additions and alterations to the Public School on Mill Street, in Sandwich, which was purchased by the Government from the School Board, for the purpose of a Normal School for English and French. The building is one story high, divided into two large class rooms. An addition has been built in the rear 32 ft. by 33 ft. for cloak rooms and lavatories, with basement. Entrances have been built to each class room in front, the old entrance being converted into a private room for the Principal. New floors were laid throughout, the old building and ceilings covered with embossed steel, the whole painted and put in first class condition. A hot water heating plant and electric lighting installed, as also the most approved sanitary appliances and a new tile drain being laid from the addition to the street. The work was done under contract for general trades by Mr. V. Williamson, of Walkerville, for brickwork, Mr. Geo. R. Sewel, of Windsor, for heating. Messrs. Pennington & Brain, of Windsor, and for plumbing, Mr. J. E. Purser, of Windsor. The building has been completed, finished and equipped in a first class manner, the work being satisfactorily carried out under the superintendence of the Clerk of Works, Mr. Reemy Vigneux, of Windsor.

New Veterinary College.

Plans and specifications were prepared for the above building to be erected on the site purchased for same, at the corner of University Avenue and Anderson Street. Tenders were called for and contracts awarded for the excavations for foundations to Messrs. Thomson Bros.: stone and brick work and fireproofing. Mr. Edward Gearing, carpenter work, T. V. Gearing and Co.; steel work the Dominion Bridge Co., for painting and glazing, Mr. James O'Hearn. Work has been commenced and will be continued through the winter. The building will be five stories in height, including the basement, of fireproof construction throughout, the foundations of concrete and brick, faced with grey stone and red bricks above grade, has a frontage on University Avenue of 134 ft. by a depth of 127 ft., a frontage on Anderson Street of 46 ft. and a frontage on Simcoe Street of 49 ft., in all an area of 10,000 ft. The basement floor includes a class room, pharmacy, infirmary for horses, with eleven stalls and six box stalls, with an entrance from Simcoe Street, a carpenter shop, boiler room with coal vaults extending under driveway on the west and sidewalk on the north. The main entrance to the ground

floor is in the centre of the building on University Avenue. A driveway will be built on the west side from Anderson Street continued along side of the north side of west wing to Simcoe Street, with entrance to an elevator large enough to accommodate a horse, and running from basement to the anatomical laboratory on the top floor. The first floor includes the Principal's room, offices, coat room, laboratory, store rooms and living apartments for the staff. There are three entrances on this floor, the main entrance being in the centre of the University Avenue facade. The second floor includes class room, faculty room, laboratory and an assembly hall, with a seating capacity for 500. Third floor includes museum, store room, class room, library and laboratory. Fourth floor includes an anatomical laboratory, incinerator room, toilet and students' rooms and laboratory. Ample provision has been made for lavatory conveniences throughout.

Ontario Agricultural College.

Plans and specifications were prepared for a dairy barn, tenders were called for, and the contract awarded to Mr. Thos. Taylor, of Guelph, good progress is being made with the work, the building will be completed by the end of the year.

Plans and specifications were made for a Field Husbandry building, tenders called for, and the contract awarded to Messrs. P. H. Secord and Sons, of Brantford. The foundations are being built and good progress is being made.

Preliminary plans have been made for the new dining hall, which has been located to the west of the main building in line with same. As this was the most suitable site for the building, it was necessary to remove a residence off same to a distance of about 800 feet to the west, to a location formerly occupied by the Assistant Engineer's cottage, which had been moved to a location near the main boiler house. The moving has been accomplished without in any way damaging the buildings, a new foundation is now being built under same, under contract by Reuben Rogers, of Guelph, the moving of houses being also done by him. All of these works are being carried on under the superintendence of the Clerk of Works, Mr. Wm. Tanner.

Jordan Harbour Fruit Station.

Tenders were called for the fruit packing house, plans of which were made last year, the contract being awarded to Messrs. Fretz & Wise, of Jordan Harbour. Foundations have been built and the work should be completed by the end of December next.

Experimental Farm, Monteith.

Plans and specifications were made for barn to be erected at this farm, work being done under contract by D. L. Stover, of Matheson. Same has been completed.

Plans and specifications have been prepared for Farm Director's residence, for which tenders will be called at an early date.

DISTRICTS.

Plans and specifications were prepared for a new Registry Office at Kenora, tenders were called for, and as it was impossible to obtain suitable tenders, it was decided to carry on the construction work by day labor, contracts were let for the heating, plumbing and roofing. Good progress has been made with the

work, and the building will be completed about March. The work has been carried on under Mr. A. J. Morton, Clerk of Works, who also superintended the erection of the court house and the alterations to jail.

Tenders were called for an addition to the Registry Office and Land Titles Office at North Bay, and the contract for the general trades awarded to Messrs. R. Wallace and Son, of North Bay, heating contract to the Cochrane Hardware Co. The work has been completed.

Some minor alterations were made to the Court House at North Bay, including enlarging of vault in the Clerk of Court's Office, and improvements made in plumbing.

Plans and specifications were prepared for an addition to Registry Office at Bracebridge, tenders were called and the contract awarded, for general trades, to Joseph Langman, of Hamilton, contract for heating and ventilating awarded to Ecclestone & Bates. Good progress has been made with the work.

Plans and specifications were made for a lock up at South Porcupine, the building has been completed. Tenders were called for and the contract for general trades awarded to Messrs. Hickey & Hawley, of Peterborough, contract for plumbing to A. Brazeau of South Porcupine.

The walls and ceiling of the Court House in Sudbury have been painted, work being done by J. J. Fitzpatrick.

Repairs have been made and furniture supplied when necessary to the Court Houses, jails and lock ups in the unorganized districts throughout the Province.

Hydro Electric

Hydro-Electric system for lighting and power has been installed during the last year in the Hospitals for Insane at London, Hamilton, Kingston and Mimico, Ontario Agricultural College, Guelph, Osgoode Hall and is at present being installed in the Parliament Buildings.

Boiler Inspection.

The boilers in the Provincial Government Institutions throughout the Province have been inspected twice in the year by the Boiler Inspector. All the new boilers inspected while under construction. The installation of Hydro-Electric system in the hospitals, machinery and mechanical equipment in the buildings have also received attention. I herewith submit his report.

All of which is respectfully submitted.

I have the honour to remain, Sir

Your obedient servant,

F. R. Heakes.
Architect.

F. R. Heakes, Esq.,
Chief Architect, Dept. of Public Works, Toronto, Ont.

Sir,—I have the honor to submit my report of the work done by this section of the Architect's branch for the year ending December 31st, 1912.

During the year, like previous years, my time has been divided between the different departments in the inspection of boilers, heating, lighting, plumbing, ventilating and repairs and replacements.

The Andrew Mercer Reformatory for Females.

Three Vulcan Mechanical Fuel Feeders were installed under the boilers with the object in view of eliminating the objectionable smoke issuing from the stack complained of so frequently by the City of Toronto Property Commissioner, and to burn a cheaper grade of fuel.

Additional machinery was installed in the laundry and all parts of machines considered dangerous were provided with guards.

One new 66 in. x 16 ft. return tubular boiler, one boiler feed pump, and one electric motor were installed in boiler room.

The boiler house, workshop, stable, grounds, kitchen, dining rooms and bake shop were wired in conduit for electric lighting.

The steam plant and all machinery is now up-to-date and in excellent condition.

Hospital for Insane, Mimico.

Cottages Nos. 4 and D were rearranged in the heating system. Vacuum valves were placed on the radiators and the system connected to vacuum pump in boiler-room. The electric wiring in two cottages has been changed and run in conduit.

Three new Myers Skimmers were installed in Nos. 4, 5, and 6 boilers, with most satisfactory results.

New laundry machinery was supplied, but owing to some necessary changes to be made to the floor it has not been installed.

All work in connection with repairs has been done in a most satisfactory manner.

Hospital for Insane, London.

Extensive repairs and replacements were made to the system of plumbing and heating in the main and north building.

New water mains under main building have replaced pipes found to be worn out.

A new flat work ironer and bosom ironer were installed in the laundry.

The installation of the electric lighting system and motors, replacing engines and steam pumps, was completed during this year.

One vertical boiler was installed in the slaughter house for heating water used at killing time.

Hospital for Insane, Hamilton.

One new extractor and one new washing machine was installed in the laundry to meet with the increased demand.

New plumbing fixtures were installed throughout the entire main building.

Electric lighting wires run in conduit were extended in the male side.

Temperature regulating valves were installed on the hot water heaters to maintain the desired temperature of water.

Tank.—A hydro-pneumatic water supply system is now being installed in the main building. The tank for same is 7 ft. x 32 ft., with a pumping capacity of 9,216 gallons per hour. This system will overcome the difficulty frequently experienced in not having sufficient water for flushing the plumbing fixtures on top floors. This apparatus is operated by an electric motor and is automatic in its operation, and will maintain a constant water pressure at all times.

Hospital for Insane, Brockville.

One new 1,000 gallon pump was installed and connected to the overhead tanks and fire mains.

The entire main building and rink are now being wired in conduit for lighting.

A heating system was installed in the engineer's house.

The alterations to water mains were completed, and with the new pump there will always be an abundant supply of water for fire purposes.

A new extractor and washing machine and flat work ironer were installed in the laundry.

Rockwood Hospital, Kingston.

The 6 in. water mains throughout the grounds were completed.

Extensive repairs were made to machinery and heater in pump-room. It is now possible to utilize all of the exhaust steam from pumps for heating water for main building.

Work was commenced on rewiring all the buildings in conduit.

Alterations were made to the heating of greenhouse with satisfactory results.

Hospitals for Epileptics, Woodstock.

Plans and specifications were prepared for the heating, lighting, and plumbing in the new residence for the Superintendent.

Sandwich.

Plans and specifications were prepared and the work installed for the heating, lighting and plumbing in the English and French Schools at Sandwich.

South Porcupine.

Plans and specifications were prepared and the work installed for the heating, lighting and plumbing in the Lock-up at South Porcupine.

Hospital for Feeble-minded, Orillia.

Plans and specifications were prepared for the heating of new greenhouse. The system was installed by the workmen at the institution.

New water mains were run inside the building to be used for inside fire protection.

One new extractor was installed in the laundry.

No. 1 boiler was retubed and the fire box decreased.

The old laundry engine was overhauled and is now in condition to operate the laundry in case of an accident to the electric power plant.

Hospital for Insane, Cobourg.

An ash conveyor was installed in the boiler-room.

Extra coils were added to the heating system.

The heating of officer's quarters was rearranged and connected up with a separate main.

Two rooms were fitted up with the Gegenstrom bathing apparatus.

The lighting of Superintendent's residence was rearranged and additions made.

One 36 inch direct connected fan was installed in dry room to remove the foul air and dampness.

One 20 inch direct connected fan was installed in the kitchen for ventilating purposes.

Parliament Buildings.

A complete new laundry plant consisting of a flat work ironer, extractor, washing machine, electric irons, starcher, etc., with each machine direct connected to an electric motor was installed in the laundry room of the Parliament Buildings. The results obtained and the benefits derived from the installation have proved entirely satisfactory.

The boilers in connection with the Public Institutions were inspected with steam on and steam off, and I am pleased to report that apart from the usual repairs no serious accident has happened to boilers or machinery.

Trusting that the work and conditions generally continue to be satisfactory.

I have the honor to be, Sir, your obedient servant,

D. M. Medcalf,

Inspector of Boilers, etc.

REPORT OF THE ENGINEER.

Hon. J. O. Reaume,

Minister of Public Works.

Sir,—I have the honor of submitting for your consideration a report on the Public Works under the Engineering Department during the year ending October 31st, 1912.

The different works under construction on the 31st of October, 1911, were continued during favorable weather. All concrete work was abandoned when freezing weather set in. The uncompleted work consisted mainly of concrete bridge floors. These floors were completed early last spring and the bridges opened to traffic.

The list of public works handled during the year for which special appropriations were voted comprised some 60 different works. The largest of the works constructed were the Burk's Fall Wharf bridge and the Kaministikwia River bridge at Slate River.

Seventeen steel bridges were erected during the year; sixteen on concrete steel substructures and one on timber pile piers.

The following steel bridges were erected: Kaministikwia River bridge, Paipoonge Township; Burk's Falls Wharf bridge; Big East River bridge, Chaffey; Ben's River bridge, Ryde; Kahshe bridge, Morrison; Black Creek bridge, Watt; Doe Lake Road bridge, Draper; Mumford's bridge, Chapman; West's bridge, Thessalon River; McCreight's bridge, Kirkwood; Birch Creek bridge, Birch Lake Road; Jean Baptiste bridge, Armstrong; Kabuska Creek bridge at Bonfield; Madawaska Village bridge; Maxwell's bridge, Burnt River; Hymer's bridge, Whitefish River; Veuve River bridge, Markstay; Golden Lake bridge, Bonnechere Creek; and North River bridge, Matchedash.

Three concrete beam bridges were constructed: Boom Creek bridge, Mattawa; Magnetawan bridge, 10th con. Perry; and the Walker River bridge, near Desbarats.

A stone fill bridge was constructed at Campment d'Ours Island.

Sixteen wooden bridges were constructed: Black Creek bridge, Stisted; Joseph River bridge, Medora; Forsyth's bridge, Christie; Ryerson bridge, Sprucedale Road; Otter Creek bridge, Brethour; White River bridge, Larder Lake Road; Brower Creek bridge, Glackmeyer; White River bridge in Pacaud; Driftwood bridge, Walker; Myer's Cave bridge, Barrie; Black Creek bridge, Robertsville; Whitefish bridge, Lybster; Pine River bridge, Dilke; Bunting Creek bridge, Dilke; Morley bridge, River Road.

Special grants were made to the following bridges: Eels Creek bridge, County of Peterborough; two steel bridges at Haliburton; and Glenelg Township bridges.

A number of small drains were opened up for the purpose of draining roads. Eight large drainage schemes to which aid had been voted were examined and reported on.

Drainage work was continued in the Rainy River District at a cost of $5,000.00. This work consists in providing outlets for road drainage when these outlets are too extensive to be undertaken under the ordinary Colonization Road grants. The result is that roads in this district are better drained than are the roads in any of the other districts.

The ordinary work of repair and maintenance was carried out at an expense of $35,000.00. The principal item of expenditure under this class was for repainting bridges. The repainting of bridges under the control of this Department had been neglected for several seasons past. This year a competent and experienced painter, Mr. G. W. Freeman, was engaged. Early in the year he began work in the Muskoka district. All the bridges in the district were properly cleaned of old paint and rust and then given two good coats of paint. The bridges in Parry Sound, Renfrew and Nipissing were similarly treated. He finished the season's operations in Algoma when cold weather set in. Next season it is proposed to continue the work through Algoma, the Soo District, Thunder Bay, Kenora and Rainy River.

The Government dredge was operated in the Huntsville waters, principally in Mary's Lake and River. Men were employed continuously during the summer in clearing the boat channels of logs, snags, etc.

The installation of the new pumping plant at the Experimental Fruit Station at Vinelands which was done under the supervision of this Department was completed and the plant put in operation.

Work was continued during the season on the Fish Ponds at Mount Pleasant. No. 4 Pond was completed and is ready for next season's operations.

The construction of all public works was continued by day labor under competent foremen. Tenders were received for furnishing of cement and the furnishing and erecting of steel superstructures was let by tender.

Algoma District Bridges.

Birch Creek bridge, Birch Lake Road.—A new steel bridge was erected over Birch Creek on the Birch Lake Road, about two miles north-west of Webbwood. It comprises a 60 ft. Warren truss, on concrete piers with a 26 foot concrete approach span at each end. The steel span was supplied and erected by the Sarnia Bridge Company at cost of $1,236.00. The substructure was constructed under the supervision of S. W. Butt, foreman. Cold weather prevented the laying of the concrete floor.

West's bridge, Plummer Township.—It comprises a 60 ft. steel span on concrete pile piers. A concrete beam approach span 29 feet long is supplied at each end of the steel span. This furnishes an effective waterway 106 feet wide. This season is the first time that the use of concrete piles was attempted in bridge construction, at least in this section of the country. The piles are moulded at the site, are generally about 30 feet long, 14 inches square at the butt, and 8 inches square at the top. They are reinforced with 4 one inch square twisted steel bars, laced or wound with steel wire at 3 inch intervals. The reinforcing bars are allowed to project from 8 to 12 inches from the head of the pile. The piles are driven with a follower hollowed out to admit the reinforcing steel. A light cushion of sawdust is used to deaden the jar of the driver. Piles handled in this manner need no tender care, as our experience shows they stand driving as well as timber piles. A one to four gravel concrete was used. The piles require about 30 days for seasoning.

Twelve piles are used in each pier, four at each end of the pier and two intermediate rows of two piles. The end cluster of four is set with the angle up stream to form a cut water. This angle is faced with an eight inch steel angle. The bridge seat three feet wide and the requisite length is then built up from the head of the piles. The concrete approach spans comprise four concrete beams 30 inches deep. The outside beams are 14 inches wide and the two middle beams are 16 inches wide. The floor slab is 6 inches thick. The beams are reinforced with one inch twisted bars and the floor slab with half inch bars.

The result of this experiment with concrete piles is highly gratifying. Heretofore soft bottoms have been the bane of bridge builders where permanent structures were required. The sinking of cribs, driving of pile foundations, and construction of coffer dams has been very expensive and supremely unsatisfactory. Not unfrequently to secure proper foundations long and heavy steel spans have to be used where if the bottom was good short and light spans would answer requirements. The heavy spans necessitated heavy piers or abutments. With the use of concrete piles we are practically independent of bottom conditions and may suit the span to the requirements of the stream. The steel span is erected and a temporary floor placed to accommodate the traffic during the winter. The concrete floor will be placed early in the spring. The work was done under the supervision of S. W. Butt, foreman.

McCreight's Bridge.—This bridge is erected over the Little Thessalon River on the Thessalon Wharncliffe Road, in the Township of Kirkwood. It comprises an 80 foot deck span with a 16 foot steel trestle approach on the west end, and a 56 foot trestle approach on the east end. The supporting steel columns rest on concrete pedestals. The steel superstructure was supplied and erected by the Hamilton Bridge Works Company at a cost of $3,408.00. The concrete work and grading was done under the supervision of S. Cole, Road Inspector for the District. The concrete floor is not laid, but a temporary floor has been provided to accommodate traffic during the winter.

Walker River Bridge, near Desbarats.—This is a concrete beam bridge erected over the Walker River. The span is 30 feet clear and the roadway 14 feet in clear width. The concrete beams are 30 inches deep, reinforced with one inch square twisted bars. The floor slab is 6 inches thick. The bridge was erected under the supervision of S. W. Butt, at a cost of $1,200.00.

Campment d'Ours Island Bridge.—This bridge is properly a stone fill across the channel between St. Joseph Island and Campment d'Ours Island. This back channel is only navigable for canoes. A passage has been provided for such small craft of light draft as may use the channel. The fill is about 400 feet long. 178 feet is in water from 2 to 12 feet deep and 228 on a flat marshy bottom. The fill is raised 3 feet above the water level and has a top width of 14 feet. The material used in the fill is rock quarried from a ledge on the south shore. The work was done under the direction of John Paquette, foreman. The cost of the work was $3,500.00.

Laird Township Bridges.—A number of bridges were reconstructed in the township under a special appropriation.

Garrett's Creek bridge, Section 7, is a pile trestle 60 feet long with 5 spans of 12 feet each. The old bridge was shortened 22 feet. the approaches filled and rip-rapped.

McCharlie's bridge is over the Barr River, on Section 7. It is 40 feet long. This is also a pile bridge. The old bridge is shortened 30 feet and the approaches filled.

Hounslow's Bridge, Section 7, is 14 feet long on pile abutments.

The White Church Bridge, Section 32, is over the Shoefelt Creek. It is 40 feet long, pile trestle, 4 bents with 4 piles in each bent. The old bridge was shortened 14 feet, the approaches filled with clay and the sides rip-rapped.

These bridges were constructed under the supervision of S. Cole, Road Inspector for the District, at a cost of $900.00.

Echo Bay Bridge.—The east approach to the Echo Bay bridge was completed early in the season and the bridge opened to traffic.

White River Bridge, Bellingham.—The concrete floor was not laid, nor was the grading completed on the Bellingham bridge when the cold weather set in. This work was completed early in the spring and the bridge opened to public traffic.

Sault Ste. Marie District Bridges.

Root River Bridge.—The only work done in the Soo District under special appropriation was the completion of the approach on the east end of the Root River bridge. This work was completed early in the summer and the roadway opened to the public.

Sudbury District Bridges.

Veuve River Bridge, Markstay.—This bridge is a 45 foot steel span on concrete abutments. The abutments rest on pile foundations. The steel span with steel stringers was supplied and erected by the Hamilton Bridge Works Company at a cost of $809.00. The concrete work was done under the direction of Norman Butt, foreman of Public Works. The concrete floor is not placed, but the grading of the approaches is complete. A temporary floor has been laid to accommodate travel until the concrete floor is in place.

Vermilion River Bridge, Hanmer.—This is a timber bridge over the Vermilion River in the 6th Concession of Hanmer. It has a centre span 30 feet long supported by a king truss. The truss is supported by double pile piers 6 feet wide. Timber approaches 16 feet long are supplied at each end giving the bridge a full length of 72 feet. The bridge was constructed by D. H. McIntosh, foreman, at a cost of $822.00.

Nipissing District Bridges.

Boon Creek Bridge.—This bridge is situate near the Town of Mattawa on Lot 15, Concession 14 in the Township of Papineau. It is constructed over Boon Creek on the Mattawa North Bay Road. It is a concrete beam bridge consisting of a central span 34 feet long with approach spans of 27 feet at each end giving an overall length of 88 feet. The roadway has a clear width of 16 feet. The floor slab is 6 inches thick and is supported by 4 beams. In the centre span the beams are 36 inches deep the two middle beams are 17 inches wide and the 2 outside beams 14 inches wide. In the 27 foot approaches spans the beams are 28 inches deep the centre pair being 16 inches wide and the outside beams 14 inches wide. The beams are reinforced with 1 inch square twisted bars and the floor slab is reinforced with ⅝ and ½ inch twisted bars. The bridge is constructed on a rock foundation. The beams are supported on concrete columns 16 in. x 18 in. and 12 feet high. The columns are built up from a through concrete base and are reinforced with ¾-inch twisted bars. For the railing of the bridge concrete posts are built up from the curb at 8½ foot centres, 3 lines of 1½-inch galvanized pipe form the hand rail. The filling at each end of the bridge is allowed to fall to a natural slope. The exposed parts of the fill are protected with rip-rap. The bridge was constructed under the direction of J. W. Hackner, an Engineer of this Department at a cost of $2,275.00.

Kabuska Creek Bridge.—This bridge is erected over Kabuska Creek at Bonfield on the Mattawa Road. It is located immediately up stream from the C. P. Ry. bridge. It comprises a central steel span 80 feet long with approach, concrete beam spans 24 feet long at each end. The steel span is supported by concrete piers resting on rock bottom. The west pier is built in water 7½ feet deep and the east pier is in 2 feet of water. The approach spans have a 6 in. concrete floor supported by 4 concrete beams 22 inches deep reinforced with 1-in. twisted bars. On the approaches concrete posts were provided for the handrail which consists of 3 lines of 1½-inch galvanized pipe which extend over the whole length of the bridge. The steel span was supplied and erected by the Dickson Bridge Works Co. at a cost of $1,740.00. The fill at the east end of the bridge was made with rock obtained from a ledge in the main street of the village that required to be removed. The fill on the west end is not completed. Owing to the late erection of the steel, the concrete floor was not laid on the steel span. The material is all at the site and the work will be completed early in the spring. The concrete work was done under the direction of P. R. Switzer, foreman Public Works.

Madawaska Village Bridge.—This is a steel and concrete bridge built on the Madawaska River in the village of that name located on Lot 11, Concession 2, township of Murchison. It comprises a 60 foot steel span on concrete pile piers with concrete approach spans 33 feet long at each end. The concrete pile piers follow the same line of construction as for West's bridge in Algoma. The approach spans have a 6 inch concrete floor supported by 4 beams 32 inches deep reinforced

with 1-inch twisted bars. On the shore ends the concrete beams rest on light concrete abutments. The steel span was supplied and erected by the Sarnia Bridge Co. at a cost of $1,174.50. The concrete work was done under the direction of P. R. Switzer, foreman, acting under the supervision of J. W. Hackner, an Engineer of this Department. The concrete floor is not laid but a temporary floor has been provided to accommodate travel until spring.

North Renfrew District Bridges.

Golden Lake Bridge.—This bridge of steel and concrete construction is built over the Bonnechere River between Lots 25 and 26, concession 8, in the Township of North Algona. It comprises a central steel span of 60 feet with a concrete trestle approach 46 feet long at each end giving an overall length of 152 feet. The steel span rests on concrete pile piers. The approach spans are supported by concrete pile bents, each approach has two spans of 23 feet, 40 concrete piles 30 feet long are used in the structure. The railing consists of concrete posts with 3 lines of 1½ galvanized pipe. There is a heavy fill at each end of the bridge which is faced with rip-rap in the exposed portions. The steel span and railing were supplied and erected by the Sarnia Bridge Co. at a cost of $1,205.00. The concrete work was done by P. Sorenson, foreman of Public Works. The concrete floor is not placed but a temporary floor has been supplied to accommodate traffic until spring.

Parry Sound District Bridges.

Burk's Falls Wharf Bridge.—This is a combination bridge and overhead railway crossing constructed across the Magnetawan River and the Grand Trunk Railway tracks on Syples Street in the town of Burk's Falls. The old bridge on Ontario Street was worn out and had to be replaced. At the old bridge was a particularly dangerous level railway crossing. It was decided to adopt a new site that would give better facilities and allow of the elimination of the level crossing. The new bridge is 328 feet long. It comprises 2 steel spans over the River each 80 feet in length with a steel trestle 168 feet long. The trestle consists of steel girders supported by steel columns. The columns rest on concrete bases. The structure is provided with a 4 foot side walk. The steel was supplied and erected by the Dickson Bridge Works Co. at a cost of $9,363.00. The concrete work was done under the supervision of S. W. Butt, foreman of Public Works.

Magnetawan Bridge, 10th Con., Perry.—This is a concrete beam bridge erected over the Magnetawan River on lot 20, concession 10, in the Township of Perry. It comprises a central span of 40 feet with approach spans of 24 feet at each end. This roadway is 14 feet in clear width. The beams in the central span are 42 inches deep and in the approach spans the beams are 22 inches deep all reinforced with 1 inch square twisted steel bars. The floor is 6 inches thick reinforced with ⅝ and ½ inch twisted rods. The handrail is of concrete. The posts are reinforced. The concrete beams rest on concrete piers built on a solid hard pan and boulder bottom. The work was done under the direction of J. W. Hackner an engineer of this Department at a cost of $2,300.00.

Mumford's Bridge, Distress River.—This is a small steel beam bridge over the Distress River at Mumfords, in the township of Chapman. It is a clear span 30 feet long, concrete abutments and floor with a pipe handrail. The steel beams and

handrail were supplied by the Hamilton Bridge Works Co., at a cost of $408.00. The concrete work, grading, etc., were done under the direction of D. H. McIntosh at a cost of $1,794.00.

Ryerson Townline Bridge, Sprucedale Road.—This bridge is a 6 foot concrete arch culvert put in to replace a long wooden structure. It necessitated a heavy fill. It is located on the Ryerson McMurrich townline on lot 16, concession 14. The fill is 120 feet long and 9 feet high at the centre. The work was done under the direction of D. Argue, road inspector for the district, at a cost of $956.00.

Forsyth's Creek Bridge, Christie Township.—This bridge is constructed over Forsyth's Creek, and is located at lot 22, concession 8, in the township of Christie. It consists of cedar piers 8 feet high. The span is 26 feet long. The stringers are of white oak. The approaches are marshy, necessitating a fill 226 feet long. The fill is 8 feet high at the centre. The exposed sides of the fill are protected with cedar timbers. The work was done under the supervision of D. Argue, at a cost of $520.00.

East Simcoe Bridges.

North River Bridge, Matchedash.—This bridge is built over the North River. It is located on lot 6, concession 1, in the township of Matchedash. It comprises a steel span 60 feet long supported by concrete pile piers. A concrete beam approach span 20 feet long is placed at each end of the steel span, 12 concrete piles 30 feet long are used in each pier, the bridge seat being built up from the head of the piles. In the approach spans 4 concrete beams 22 inches deep support a 6 inch concrete floor. concrete posts are supplied for the railing, which consists of 3 lines of 1½ inch galvanized pipe. The reinforcing of the piles consists of four 1 inch square twisted bars with 3/16 inch steel wire. The steel span was supplied and erected by the Sarnia Bridge Co. at a cost of $1,205.00. The concrete work was done under the direction of Amos Train, foreman. The concrete floor is not yet placed, but a temporary floor has been supplied to accommodate travel.

Muskoka District Bridges.

Big East Bridge, Chaffey.—This is a steel bridge erected over the Big East River in the 6th concession of Chaffey. It consists of a 60 foot steel truss span and a 30 foot steel beam span supported by piers and abutments of stone set in cement mortar. The steel was supplied and erected by the Sarnia Bridge Co. at a cost of $1,560.00. The piers and abutments were built by day labor under the direction of Wm. Lowe, road inspector for the district. The concrete floor is not yet laid, but the material is all at the site. The complete structure will cost about $2,700.00.

Black Creek Bridge, Stisted.—This is a timber bridge built over Black Creek on lot 10 in the 8th concession of Stisted. The old bridge which was replaced was 164 feet long. The new bridge is 148 feet long with a roadway 14 feet wide. The bridge is built on pile bents set 16 feet apart. It is raised 2 feet higher than the level of the old bridge to allow the free passage of logs. It is supplied with a substantial railing. Sixteen feet of the old bridge was filled with stone and clay. The exposed portion of the fill is rip-rapped. The whole was done under the supervision of Wm. Lowe.

Kahshe Bridge, Morrison.—This is a steel bridge erected over the Kahshe River, in the 6th concession of the township of Morrison. It consists of a 60 foot steel span on abutments of native rock set in cement mortar. The abutments rest on

pile foundations. The steel span was supplied and erected by the Sarnia Bridge Co. at a cost of $1,096.00. The abutments were built and the grading done under the direction of Wm. Lowe. The concrete floor is not yet in place, but a temporary floor has been provided.

Doe Lake Road Bridge.—This is a steel beam bridge erected over Fraser's Creek on the Doe Lake Road. The span is 32 feet clear. The steel beams and pipe railing were supplied by the Hamilton Bridge Works at a cost of $408.00. The abutments are built of native rock set in cement mortar. The floor is concrete reinforced with expanded metal. The abutments were built and grading done by day labor under the direction of Wm. Lowe.

Bens River Bridge, Ryde.—This is a steel beam bridge erected over Bens River, in the 2nd concession of Ryde, on the Housey Rapids road. It is a 30 foot span. The abutments are of native rock set in cement mortar. The steel beams and railing were supplied by the Hamilton Bridge Works Co., at a cost of $336.00.

Black Creek Bridge, Watt.—This is a steel beam bridge 26 feet long erected over Black Creek, in the 1st concession of Watt. The abutments are built of native rock set in cement mortar. The steel beams and pipe railing were supplied by the Hamilton Bridge Works Co. at a cost of $374.00. The floor is concrete reinforced with expanded metal.

Joseph River Bridge, Medora.—This work is the entire renewal of an old timber bridge over the Joseph River, in the township of Medora. The bridge is 320 feet long, and has a clear height of 17 feet as navigation has to be provided for. It is built of pile trestle driven at 16 foot centres. The central span is 20 feet wide; the work was done by day labor under the direction of Wm. Lowe. The entire cost of the bridge was $1,756.00.

Haliburton District Bridges.

Maxwells Bridge, Burnt River.—This is a 60 foot steel bridge erected over the Burnt River at Maxwells, about 1½ miles east of Irondale. The abutments are built of concrete. The steel span was supplied and erected by the Sarnia Bridge Co., at a cost of $1,096.00. The concrete floor has not been laid, but the material is all on the ground and it is proposed to lay it as soon as the weather conditions will allow in the spring. The concrete work, grading, etc., were done by day labor under the directions of Amos Train.

Monk Road Bridge, Cardiff.—This is a timber bridge constructed over a creek on lot 28 in the 12th concession of Cardiff. It consists of a king truss span 28 feet long supported on timber piers. The piers are 10 feet high. The stringers and covering are of flatted cedar. The truss of squared pine and the piers of squared cedar. The fill at the east end is 72 feet long and the fill at the west end 42 feet long. A substantial guard rail is supplied over the full length of bridge and fill. The work was done by day labor under the direction of John Bailey, road inspector, at a cost of $775.00.

Temiskaming District Bridges.

Otter Creek Bridge.—This is a timber bridge erected over the Otter Creek, on the 2nd concession of Brethour. It consists of a timber truss span 50 feet long resting on pile piers, with pile trestle approaches at each end. The bottom proved very soft, and piles could not be secured long enough to raise the bridge to

the required height. The piles were driven to water level and frame bents erected on top of the piles. The material was all furnished by the Department at the site and a contract let to the Farrelly Construction Co. for driving the piles and erecting the bridge. The work is not yet completed.

Jean Baptiste Bridge, Armstrong.—This is a 60 foot steel span on pile piers with timber trestle approaches 22 feet long at each end. The bridge is built over the Jean Baptiste Creek on the 4th concession of Armstrong, on the Earlton-Elk Lake Road. The steel span was supplied and erected by the Sarnia Bridge Co. at a cost of $775.00. The floor is 3 inch tamarac plank on 7 lines of 3 by 12 wood joist. The timber structure was constructed by day labor under the direction of W. E. Kerr, road inspector for the district.

White River Bridge, 4 and 5 Pacaud.—This is a timber bridge constructed over the White River on the line between lots 4 and 5 in the 1st concession of Pacaud. It consists of a 40 foot truss span supported on timber piers 9 feet high with 16 foot approach spans at each end. The pier timbers are drift bolted and loaded with rock. The piers are built of Jack pine and cedar, truss timbers spruce, flooring cedar and jack pine, railing jack pine. The bridge was constructed by day labor under the direction of D. Chalmers, road inspector for the district. The cost complete was $1,225.76.

Brower Creek Bridge, Glackmeyer.—This is a timber bridge erected over Brower Creek, on the road between concessions 2 and 3 in the township of Glackmeyer. It consists of a 24 foot span on timber abutments 8 feet high. At the west end of the bridge is a fill 4 feet high and 80 feet long, at the east end the fill is 3 feet high and 25 feet long. The work was done by day labour under the direction of D. Chalmers. The cost complete was $237.00.

Driftwood Bridge, Walker Township.—This is a timber bridge erected over the Driftwood River on the line between lots 8 and 9, in Walker township. It consists of a king truss 30 foot span supported on timber piers 8 by 16 feet and 12 feet high. The stringers are flatted tamarac and the covering is of flatted cedar. The timber was all received at the site and squared with the broad axe. At the north end of the bridge is a fill 50 feet long and six feet high, and at the south end the fill is 35 feet long, 5 feet high. The work was all done by day labor under the direction of D. Chalmers. A bridge similar to the above was constructed over the Driftwood on the line between lots 4 and 5 in the township of Walker, also under the direction of D. Chalmers. The entire cost of these two bridges was $2,192.00.

Larder Lake Road Bridge.—A number of culverts were repaired on the road leading from the T. & N. O. Railway at Dane to Larder Lake, and a new timber truss bridge was constructed across the north-east branch of the White River. The work was done by day labor at a cost of $893,00.

Addington Bridges.

Black Creek Bridge, Robertsville.—This is a timber bridge constructed over Black Creek at Robertsville, in the township of Palmerston. The old bridge was a long timber structure. The new bridge has a 20 foot span, the stringers resting on timber piers 6 feet wide. The piers are built of square cedar, while the stringers and cover are of flatted cedar. Shortening up the bridge necessitated a long and heavy fill. The fill is 188 feet long. It is built of stone and gravel. The material was secured by cutting down hills at each end of the bridge and greatly improving

the grades. A substantial handrail is built on each side over the full length of fill and bridge. The work was all done by day labor under the direction of W. W. Pringle, road inspector for the district, at a cost of $400.00.

Myer's Cave Bridge, Barrie.—This is a timber bridge on stone abutments constructed over a creek at Myer's cave, in the township of Barrie. The abutments are 12 ft. high of native rock laid in cement mortar. Extensive wing walls protect the fill at each end. The span is 30 feet, stringers are pine and cedar, and the covering is flatted cedar. A substantial hand rail is supplied over the full length bridge and fill. The work was all done by day labor under the direction of W. W. Pringle. The cost of the bridge complete was $931.38.

Manitoulin Bridges.

Indian Point Bridge.—The old swing bridge at Indian Point, at the entrance into Lake Wolsley, had become badly out of repair. It is a steel swing bridge with equal arms of 50 feet each. The pivot pier and rest piers are built of timber. The rest pier at the north end had tilted outward to such an extent that the bridge had no bearing on the pier. The deck of the swing bridge and approaches was badly decayed and in a dangerous condition. A new rest pier made of piles was provided for the north end of the bridge. New stringers and flooring were provided for the swing span. The timber trestle at the north end is 100 feet long, and at the south end 72 feet long. The decayed timber in the cribs were removed down to the water line and a new deck provided throughout. The work was done under the supervision of George Strain, foreman of Public Works, at a cost of $2,940.00. It is proposed to repaint the steel span during the coming summer.

Thunder Bay District Bridges.

Kaministikwia Bridge, Paipoonge Township.—Work was continued on the Kaministikwia River bridge, near Slate River Station. The concrete abutments were completed. The steel spans erected and part of the grading done at the north east approaches. The material for the fill at the south approach is to be taken across the bridge from the big hill on the north side. Owing to the late erection of the steel it was found impossible to complete the approaches or lay the concrete floor before cold weather set in. Work will be resumed on the approaches as soon as weather conditions permit. Material is at the site for the concrete floor which it is proposed to place as soon as danger from frost is passed. $17,906 was expended on work and material during the past season.

Hymer's Bridge, Whitefish River.—A steel bridge on concrete abutments was erected over Whitefish River at Hymer's Station, in the township of Gillies. The steel span is 50 feet long, roadway 14 feet in clear width. The concrete abutments are 13 feet high built on hard gravel boulder foundation. The steel span was supplied and erected by the Stratford Bridge Co., at a cost of $1,125.00. Steel floor joists were included. The concrete work, grading, etc., was done by day labor under the direction of Alfred Jackson, at a cost of $1,875.00. The work is complete and has been opened for traffic.

Whitefish Bridge, Lybster.—A new timber bridge was erected over the Whitefish River, at Morgan's Siding, in the township of Lybster. The bridge is a 4 panel timber truss 50 feet long. The work on the bridge, grading, etc., was all done by day labor under the direction of Alfred Jackson, foreman. The entire cost of the bridge was $499.45.

Kenora District Bridges.

Swanson's Creek Bridge.—A long, worn out, timber bridge over Swanson's Creek, on the Dryden Road, in the township of Van Horne, was replaced with a 6 foot corrugated iron culvert 35 feet long. The ends of the culvert were set in concrete. The old bridge opening was filled in to a height of 8 feet, with a roadway 16 feet in width supplied with a substantial guard rail on each side. The pipe culvert cost $362.00 f.o.b. Dryden, and the placing of the pipe concreting, grading, etc., cost $525.00. The work was done under the supervision of James Fraser. road inspector.

Wabigoon Township Bridges.—A number of bridges were built on the road leading from Vermilion Bay to Quibell, a station on the Transcontinental Railway. Fifteen bridges in all were built ranging in length from 20 to 135 feet.

No. 1, Hutchinson's Creek bridge, is located 1½ miles north of Quibell Station, on the line between lots 8 and 9, concession six. It is 135 feet long. The substructure consists of 5 timber cribs driftbolted. The deck consists of 5 lines of flatted Norway pine stringers with a floor of 8 inch flatted tamarac. A substantial guard railing has been supplied.

No. 2 bridge is located ½ mile north of Quibell. It is 20 feet long and 10 feet high.

No. 3 bridge, east of Quibell, is 15 feet in length.

No. 4 bridge, on lot 9, is 40 feet long.

No. 5 bridge, on lot 8, is 20 feet long.

No. 6 bridge, on lot 8, is 140 feet long.

No. 7 bridge, on lot 8, is 140 feet long.

No. 8 bridge, on lot 7, is 30 feet long.

No. 9 bridge, on lot 7, is 50 feet long,

No. 10 bridge, on lot 7, is 30 feet long.

No. 11 bridge, on lot 6, is 50 feet long.

No. 12 bridge, on lot 6, is 24 feet long.

No. 13 bridge, on lot 5, is 41 feet long.

No. 14 bridge, on lot 5, is 32 feet long.

The covering on the bridges is 16 feet long. The work was all done by day labor, under the direction of James Fraser. The full cost of the Hutchinson Creek was $280.00, and the full cost of the other 13 bridges was $199.00. The timber, of course, was secured from Crown lands free of cost. Appropriations were made for other bridges in this district, but owing to the extreme scarcity of labor the work could not be done to advantage during the summer. Work is now proceeding on these bridges and it will be necessary to revote the necessary money.

Rainy River District Bridges.

Pine River Bridge, Dilke.—This is a new timber bridge over Pine River. It is located on the river road on lot 22, in the river range, in the township of Dilke. The old bridge was 305 feet long. The new bridge is 180 feet long. It is raised well above flood level but not as high as the old bridge. By shortening the bridge 125 feet and cutting down the hills at each side we were able to get passable grades and greatly reduce the cost. The bridge as constructed is 12 feet 6 inches above normal water level. It is a pile trestle, flatted stringers, 3 inch tamarac floor, with a substantial handrail provided. The fill was an important part of the work, as 125 ft. of the old opening required to be brought up to grade. Material for the fill was

obtained from the hill at each end of the bridge. The work was done by day labor under the direction of Joseph Elviage, road inspector for the district. The entire cost of the work was $1,325.00.

Morley Creek Bridge.—This is a timber bridge constructed over a creek or gully near lot 57, on the River Road, in the township of Morley. The bridge is a pile trestle 60 feet long with pile bents set at 15 foot centres. The floor is 12½ feet above the bottom level. The fill is allowed to fall to a natural slope at each end. The stringers are 5 lines of 9 inch flatted tamarac. Covering, 3 inch tamarac. A substantial handrail is supplied. The banks at each end were cut to reduce the grades and furnish the necessary material for filling. The work was all done by day labor under the direction of Joseph Elviage, road inspector. The entire cost of the bridge was $742.00.

Bunting Creek Bridge, Dilke Townline.—This is a timber bridge over Bunting Creek, on the west townline of Dilke. The bridge is a pile trestle 50 feet long. Considerable filling was done at each end of the bridge. The caps, stringers, and covering are flatted tamarac. The work was all done by day labor under Joseph Elviage. The cost of the bridge complete was $596.00.

Glenelg Township Bridges.

A grant of $1,500.00 was paid to the Township of Glenelg towards the construction of a bridge over the Saugeen River on the Durham Road. The bridge is a concrete arch, 50 foot span, with a 16 foot roadway. This is the first of a large number of expensive bridges, the renewal of which must be undertaken by this Township at an early date.

Eels Creek Bridge, Burleigh.

The County of Peterboro' constructed a large steel and concrete bridge over Eels Creek in the Township of Burleigh on the Colonization Road, known as the Burleigh Road. The steel span is a Warren truss, 75 feet long, with a 16 foot roadway. It is finished with 8 lines of steel joist, which support a 6 inch concrete floor. The abutments are concrete from 8 to 10 feet high, resting on solid rock foundations. There is a heavy fill 100 feet long at the north end, and 75 feet long at the south end of the bridge. The sides of the fill are protected by rubble masonry set in cement mortar. After an inspection of the work the grant of $1,000.00 voted to this bridge was paid over to the County of Peterboro'.

Haliburton Bridges.

The Township of Dysart constructed two large and expensive bridges in the village of Haliburton during the summer. The Queen Street bridge is a steel span 100 feet long, with a 14 foot roadway. It is supplied with a 6 foot sidewalk on the south side. The floor of bridge and foot walk are of concrete.

The Exchange Street bridge is a concrete truss with a 55 foot span. The abutments are concrete on pile foundations. The bridge is also supplied with a 6 foot sidewalk. The two bridges cost $14,238.62. After an examination of the bridges and a report on the proper completion of the work, the grant of $2,000.00 voted to this work was paid over to the Township of Dysart.

Deep Bay Narrows Improvement.

The sum of $250.00 was appropriated in the Estimates for the deepening and improving of the channel between Parry Sound and an arm of the Sound known as

Deep Bay to allow the passage of tugs and scows into the bay. The work done consisted of building and placing two timber piers 10 feet by 20 feet and loading them down with stone. The stringing of 223 feet of boom timbers in front of and between the piers. The channel was cleared of all boulders that interfered with the passage of scows. The work was done by day labor under the direction of D. Argue, at a cost of $248.35.

Opickinimika River Dams.

The Opickinimika River is the waterway into the West Shining Tree Mining District from Ruel, a station on the Canadian Northern Railway. There are two series of rapids that seriously interfered with the operation of canoes and launches on this route. From levels taken it was found that the construction of two dams would raise and hold the water to a height sufficient to flood the rapids and render the navigation of the entire route practicable. The first dam is located about 12 miles north from Ruel. It is 6 feet in height and 75 feet long. A wing dam 60 feet long is built at the west end. The lower dam is located about 12 miles down stream from the upper dam. It is ten feet high and sixty feet long. It floods a series of rapids 4½ miles long, giving a safe depth of water throughout. Both dams are built of timber well driftbolted. They are of the self-loading type. A stop-log sluiceway 12 feet long is provided in each dam to admit of the regulation of the flow and level of the water. The dams were constructed during the month of March and were made water-tight with gravel during the summer. The work was done by day labor under D. H. McIntosh, foreman, acting under the direction of J. W. Hackner, an engineer of this department.

Maintenance Locks, Dams, Bridges, Dredging, Etc.

During the summer of 1912 the Government dredge was operated in Huntsville waters, Mary's and Fairy Lakes. The work done consisted of the removal of bars and the clearing of navigable channels. The cost of the work, including wages, board of men, fuel, repairs, etc., was $5,990.00. The dredge was under the control of G. B. Salsbury, foreman.

Huntsville Lock Repairs.—The lock between Mary's and Fairy Lakes was pumped out and new valves installed in the gates. The break-water below the locks on the east side was taken down to the water line and rebuilt.

The break-water on the east side of Peninsula Canal was also rebuilt above the water-line.

Considerable repair work was done at the locks and wharves at Port Carling.

A new lighthouse was built at the entrance to the Peninsula Canal.

At Bala Falls new piers and booms were constructed and the old bridge over the south channel repaired. A new bridge is badly needed at this place.

The steamboat channel in Indian River and the Bracebridge River were cleared of snags.

On the Magnetawan waters the channel was cleared from Burk's Falls to Cecebe Lake of logs, snags, etc. Three buoys were placed in Cecebe Lake below the swing bridge.

On Deer Lake Dam the piers were repaired and the stop-log floor replanked, and the wornout logs replaced. $569.00 was expended on this work.

The two scows at Magnetawan were repaired, calked and made ready for service.

In the Parry Sound district the gully bridge, on lot 18, in 4th concession of McKellar, was replaced with a 4 feet by 4 feet concrete culvert 60 feet long. The old site was filled in and a troublesome wooden bridge got rid of.

Bulger Lake Bridge.—Three new piers constructed, new stringers put in, and a new 3 inch plank floor provided. The bridge is located in the Narrows of Bulger Lake, lot 13, concession 6, township of Burton.

Township of Burpee Bridges, Lot 5, *Concession* I.—No. 1, 33 feet long, new cover and stringers provided and grading at end done as required. No 2 bridge, 36 feet long, new tamarac stringers and flatted cedar covering provided.

Wolf River Bridge, Lot 2, *Concession* 8, *Pringle.*—Bridge is 72 feet long, 2 new stringers 32 feet long were placed, new covering of 3 inch hemlock plank and a new guard railing were provided.

Distress River Bridge, Lot 3, *Concession* 1, *Joly.*—New abutments and side walls of fill of native rock set in cement mortar. The open span is 25 feet long. The stringers are four lines of 9 in. flatted tamarac, cover 6 in. flatted cedar. The old bridge was 37 feet long.

Horseshoe Lake Bridge, Lot 114, *Concession A, Foley.*—Length 26 feet, abutments of flatted pine, all joints well tarred, stringers and covering of pine. The bridge is all well painted. The old bridge was shortened up 16 feet and the space filled. The side of the fill is well rip-rapped.

Campbell Township Bridge on Manitoulin Island was rebuilt, 3 new cribs of cedar were placed and new stringers and covering of flatted cedar put on. The ends of the bridge were graded up, 150 loads of stone being used for this purpose. The roadway provided is 14 feet wide and is well gravelled. The work was done under the direction of Hiram Pearson.

Wisawasa Creek Bridge, Lot 14, *Concession* 11, *of Chisholm,* was repaired. The bridge is 242 feet long. All broken plank in the floor was replaced and a new wheel track of 3 inch plank 7 feet long put on over the full length of the bridge.

Hogans Creek Bridges in the Township of Widdifield that were carried away by the cloud burst in the spring were made passable for the season. New bridges must be provided.

Norlock Bridge, Barrys Bay was renewed. The bridge is 36 feet long. New timber piers 8 feet high, 8 ft. x 14 ft. were built. A King truss is used. The stringers are 5 in. x 12 in., and the covering is 4 inch cedar plank.

Hurds Lake Bridge in the 4th Concession of Bagot, was rebuilt. The bridge is 200 feet long, stringers and coverings are of flatted cedar. The necessary repairs were made to the piers.

Gull Lake Bridge. The old bridge 95 feet long was replaced with a 30 foot bridge. New timber piers were constructed and a new deck of flatted cedar put on; 47 feet at the south end and 28 feet at the north end was filled with stone and a good roadway provided.

Wabi River Bridge on Bucke—Firstbrooke Townline in the 3rd Concession was rebuilt. It is 21 feet in the clear. Timber abutments 5 ft. x 17 ft., and 6 feet high, corners and ties driftbolted, King truss and needle beam hewn timber, bottom chords of 4 lines of 2 x 10 plank bolted, white lead used between planks to prevent rotting, stringers flatted pine, covering 3 inch tamarac plank, approaches built up at each end 35 feet long, a substantial railing over full length of bridge and approaches.

Henwood Bridge repairs.—A new abutment built, a new row of piles driven at west abutment, faces of abutments planked, and bridge straightened up and a new floor put on.

Jean Baptiste Bridge, Evanturel, rebuilt, a 40 foot truss span, timber piers driftbolted and filled with stone, approaches 32 feet long at south end and 16 feet at north end are supported on frame bents resting on rock bolted mudsills, flatted stringers with 3 inch tamarac plank floor—approaches well graded.

The repair and maintenance work in the Algoma District was more extensive this year than usual. It was found necessary to renew ten of the more important bridges on Colonization Roads.

Clarks Bridge, Lefroy.—One of the ends of this bridge slid in, driving out the piles. A new pile abutment was put in and new stringers provided, and the approaches properly repaired.

Dunns Valley Bridge, Galbraith, No. 1.—Is situated on the Thessalon River Lot 4, Concession 3. It is 59 feet long, with 5 pile bents, 4 piles in each bent. Stringers are flatted cedar, floor 3 inch hemlock plank, and railing 4 x 4 timber. All the timber except the flooring is cedar. *No. 2 Bridge* is also over the Thessalon River on Lot 3, Concession 3, Galbraith. It consists of one 30 foot span, pile abutments, stringers 10 inch flatted cedar, floor 3 inch hemlock, approaches filled with clay, and well rip-rapped.

Cliffs Bridge, Iron River, on Section 3, *McDonald.*—Rebuilt. New pile abutments 24 foot span, with King truss of 6 x 8 cedar, stringers 10 inch flatted cedar and tamarac, cover 3 inch hemlock, approaches clay filled and walled up with cedar timber.

Ainsleys Bridge, Lot 8, *Concession* 5, *Wells.*—The old bridge was washed out in September, 1912. Two new timber piers 6 ft. x 16 ft and 8 feet high, well driftbolted, the span is 12 feet wide, stringers 10 in. pine, old covering used, new railing put on. The bridge is raised 18 inches above the old level. The approaches were repaired and built up the requisite height.

Sucker Creek Bridge, Lot 8, *Concession* 1, *Grassett.*—The old bridge was carried away by September flood. The old abutments were replaced. The span is 16 feet wide, new stringers and covering of flatted tamarac were put on and the approaches restored over a length of 35 feet and gravelled.

Murrays Bridge, Lot 1, *Concession* 3, *Aberdeen.*—Was restored. The caps were driftbolted to the old piles and the old stringers used. A new cover of 3 inch hemlock had to be provided. The approaches were restored and the bridge left in a serviceable condition.

Smith Bridge, Thessalon River, Lot 2, *Concession* 3, *Aberdeen.*—This bridge was badly twisted by the flood but was not carried away. The bridge was jacked up and corbells straightened to place, piles restored to place. The second bent is tilted and a timber is bolted to the cap to form a rest for the floor joist.

Hanburys Bridge, Lot 2, *Concession* 5, *Aberdeen.*—This bridge was straightened on piles driven to place. A new wheel track of 2 inch plank 8 feet long was put on over the old covering.

Montgomerys Bridge, Lot 12, *Con.* 6, *Galbraith.*—The washed out approaches were filled with stone and made fit for travel.

Salter Bridge, Section 35.—This bridge has a span of 16 feet clear. Two new timber abutments 7 ft. x 16 ft. and 7 feet high, stringers 12 x 12, 30 feet long, covering 4 inch hemlock plank, approaches 100 feet long at each end were built up, and a new guard rail provided on each side of bridge and approaches.

Eagle River Bridge, Keewatin.—This bridge located just above the Falls on Eagle River, is a long truss span badly in need of repair. Falsework was used to jack up the bridge, new mudsills were put in on the south side, and all new

stringers in the centre. The approaches were properly repaired and a lot of stone piled around the footing of the approaches to afford protection against the action of the water.

Sinclair Bridge, Mellick Township.—This bridge is located about 3 miles north of Kenora. The old bridge was 80 feet long and 14 feet high. It was carried away by flood water. The new bridge is a pile trestle 50 feet long, raised 2 feet above the old level. The caps, piles and stringers are tamarac, and the covering is 3 inch tamarac plank 16 feet long. A strong guard rail is provided. The approaches are built up of rock, and the roadway gravelled.

Keewatin Swing Bridge.—The timber trestle of this bridge is built of pile piers driven in a rocky gravel bottom. The piles have not a secure footing. This season rock was piled around the footing of the rest pier to a height of 6 feet to guard against any chance of movement. $388.00 were expended on the work.

Stanley Bridge.—This bridge over the Kaministikwia River, was refloored at a cost of $500.00.

Espanola Bridge.—Repairs were made to the concrete bases of the south approach.

Stobie Mine Bridge.—A bridge over a creek at the Stobie Mine on the Sudbury-Blezard Valley Road had gone down. It was replaced with a concrete arch bridge with a 16 foot roadway.

Field Bridge.—Small repairs on floor of bridge.

Smoky Falls Bridge.—Piers were levelled up and truss straightened.

Crosby Martland Townline bridge.—Repaired at a cost of $196.00.

Sevard Bridge.—Repaired at a cost of $145.00.

Deer Creek Bridge, Verner Road.—Repaired at a cost of $164.00.

Lamb Creek Bridge, Cardiff.—The old bridge was destroyed by fire. The bridge was replaced at a cost of $220.00.

Lambs Bridge, Verulan.—Was repaired at a cost of $201.00.

Riley Bridge, Addington.—Was rebuilt at a cost of $179.00.

Kabuska Creek Bridge in Bonfield.—A timber bridge a couple of miles north of Bonfield Station was destroyed by fire. The bridge was replaced at a cost of $337.00.

Somerville and Minden Bridge floors.—When these steel bridges were erected some 6 years ago they were supplied with steel floor joist but timber floors were put on. This season it was found necessary to replace the floors of both bridges. The work was placed in charge of Amos Train. Six inch floors of reinforced concrete were laid on each bridge. The cost of the work was $784.00.

Protecting bridges.—Men were placed on guard at the Slate River and Stanley bridges during the break on the Kaministikwia River to prevent ice jams, dynamite is used when jams begin to form and trouble is avoided.

On the White River men were placed on guard to protect the bridges from log jams. The bridges guarded are Matheson, Marter, Shorts, Tomstown, Hilliarton and Pearsons. The pay list for these men amounted to $910.00. This is a work that properly should be done by the lumbermen and legislation to this effect should be enacted.

During the season of 1912 a number of steel bridges were thoroughly cleaned of old paint, rust, etc., and were given two coats of paint. Paints of different brands were used. In many cases two brands were used on the same bridge, each on a separate truss. The paint giving the best satisfaction was chosen for the con-

tinued work. Next spring it is proposed to select for the balance of the work the paint that best stands the test of the winter's exposure. The following bridges were those cleaned and painted:—

Huntsville Swing bridge, 2 spans, length, 206 ft.
Big East bridge, 1 span, length, 81 ft.
Dorset bridge, 3 span, length, 147 ft.
Baysville bridge, 2 span, length, 205 ft.
Bala bridge, 2 span, length, 146 ft.
Severn bridge, 3 span, length, 218 ft.
Wasdale bridge, 2 span, length, 130 ft.
Oakley bridge, 2 span, length, 109 ft.
Kendricks bridge, Snowdon, 1 span, length, 25 ft.
Lambs bridge, Burnt River, 1 span, length, 74 ft.
Minden bridge, 1 span, length, 71 ft.
Hayles bridge, Snowdon, 1 span, length, 50 ft.
Gooderham bridge at dam, 1 span, length, 33 ft.
Gooderham bridge, Burnt River, 1 span, length, 47 ft.
Simmons bridge, Burnt River, 1 span, length, 58 ft.
Calabogie bridge, 1 span, length, 105 ft.
Latchford bridge, 3 span, length, 248 ft.
Palmers Rapids bridge, 2 span, length, 149 ft.
Mattawatchin bridge, 2 span, length, 208 ft.
Petewawa bridge, 2 span, length, 171 ft.
Kearney bridge, 1 span, length, 84 ft.
Eauclaire bridge, 1907, 1 span, length, 54 ft.
Eauclaire bridge, 1910, 1 span, length, 61 ft.
Patois Creek bridge, 1 span, length, 23 ft.
Mattawa bridge, 2 span, length, 216 ft.
Webbwood bridge, 3 span, length, 273 ft.

Lockmaster's Returns.

The following are the lockmaster's returns of lockages as recorded at the different locks during the season of navigation in 1912:—

Port Carling lock: Steamboats, 4,518, small boats, 523, scows, 571, and rafts of timber, 70. Total 5,682.

Huntsville locks: Steamboats, 508, small boats, 425, scows, 74, and rafts of timber, 61. Total, 1,068.

Magnetawan locks: Steamboats, 720, small boats, 37, scows, 268, and raft of timber, 58. Total, 1,083.

Experimental Fruit Station Water Supply.

A new pumping plant and water supply system was installed and put in operation at the Experimental Fruit Station at Vinelands, in the Niagara fruit district. Lake Ontario water is obtained from a well dug at the shore and forced by a gasolene engine belt driven pump, discharging 35 gallons per minute, to a pressure storage tank of 4,300 gallons capacity placed below ground level, back of the Administration Building. The engine and pump are housed in a neat, one storey, pressed brick pumphouse, located at the lake shore, and being 16 feet long and 10 feet wide

inside measurement. A gasoline engine of 3 horse power has been supplied with the pump but was found to have insufficient power and a new 8 horse power Gould-Shapley & Muir engine was purchased. A test was made of the running of the pump and engine. At the commencement the pressure on the discharge was 20 lbs. per square inch, and after operating 20 minutes the running pressure was 75 lbs, but on closing down the engine it dropped 40 lbs. The engine and pump each worked smoothly. All piping is galvanized iron laid 4 feet below the surface of the ground and off the main supply pipe, which is 2½ inch from the pump house for a distance of 600 feet beyond the fruit packing house there is tapped a one inch pipe to the Lake Shore boarding house. Immediately north of the fruit packing house three 2½ inch connections are left for future irrigation schemes, and at the fruit packing house a 2½ inch pipe supplies the superintendent's residence, and a 2 inch the Administration Building. To the barn a 2 inch pipe is carried with a one inch to the canning factory, a one inch to the lodge, and a 2 inch to the cottages. Other one inch connections are provided for lawn and garden watering, Fire protection has been provided for by placing 50 feet north of the barn a 2 inch pipe with fire hose connection and a sufficient length of 2 inch fire hose, with ⅝ inch nozzle, will be kept there housed in a box and attached ready for service. In the Administration Building, 100 feet of 2 inch hose, and ⅝ inch nozzle protect everything there, and at the cottages and fruit packing house 50 feet of the same sized hose and nozzle are available for fire protection purposes. A test was made of the hose in the Administration Building, and with 40 lbs. pressure on the full tank, water could be thrown to the cornice of the building.

With reference to the purity of the water, I would point out that septic tanks with sub-irrigation of doubtful efficiency are located near the lodge, also north of the Administration Building, and at the Lake Shore boarding house. The soakage from the first two reaches the creek and is discharged into the lake at a point about 1,100 feet east of the intake. The soakage from the tank at the lake shore pollutes the ground water within 700 feet of the well. I would, therefore, judge that with present conditions, contaminated water might at times reach the well. These tanks should all be inspected and a method devised of doing away with the sewage in a way that will not endanger the water supply. Samples of the water as delivered by the pump should at once be tested for the presence of colon bacillus, and if the water is found to be contaminated chlorination should be resorted to immediately.

The principle upon which the pressure of the water system is obtained is forcing the water into the closed tanks and compressing the contained air. When the tank is full the pressure is about 40 lbs. per square inch, but as water is drawn off the pressure drops very rapidly so that only a small volume of water is available at 40 lbs. pressure for fire purposes. The only way to keep up the pressure is to install an air pump.

Some small changes and additions such as a larger engine belt and 6 inch wood pulley on pump, also check valve on the discharge and a washout valve on the storage tank will be made by Mr. Dolmage.

Extension of Railways.

During the year 1912 there was completed and opened for traffic in the Province of Ontario 635.35 miles of railway making the total in operation within th Province 10,039.22 miles.

Transcontinental Railway: The total miles of track laid during the year was 253.2 and this closure completed the line for a distance of 758 miles across Northern Ontario from the Quebec boundary on the east to the Manitoba boundary on the west. From Sioux Lookout to the Manitoba boundary a tri-weekly service has been in operation, and from Cochrane the same service has given settlers from the Quebec line to west of Grant a quick means of getting in supplies. It is expected that the coming year will see a daily passenger service operating the full length of the Ontario section of the line.

Canadian Pacific Railway: An extension from Guelph Junction to Hamilton, a distance of 16.3 miles was completed and put in operation. The enormous increase in traffic between Sudbury and Fort William has so congested the single line that double tracking of short sections was undertaken, and 58.5 miles of comparatively light work completed. There is now under contract 183.5 miles of the Campbellford, Lake Ontario and Western Railway which passes from Agincourt through Belleville, Trenton, Cobourg, Port Hope, Newcastle, Bowmanville, Oshawa, and Whitby. Double tracking of 29.2 miles on the London Sub-division was also completed.

Algoma Central and Hudson Bay Railway Company. The line from Sault Ste. Marie to Franz on the Canadian Pacific Railway was completed by a closure of 20.25 miles from mileage 97 to 117.25 north from Sault Ste Marie. This section has now a passenger service in operation northerly from Franz to Oba on the Canadian Northern Railway, a distance of 50.53 miles; track was laid and a work train furnishes accommodation for the journey. At present there is under contract 50.23 miles which will connect Oba with the National Transcontinental thus giving a thorough service from Sault Ste. Marie north for 295.23 miles.

Manitoulin and North Shore Railway.—This road is now known as the Algoma Eastern Railway, and has during the past year completed 36.55 miles of track to mileage 66 from Sudbury. Grading is completed for the balance of the distance to mileage 84.95 at the south shore of Goat Island, where work on the swing bridge across the channel to Little Current is under way.

Temiskaming and Northern Ontario Railway.—The branch line from Earlton to Elk Lake, a distance of 28.8 miles, for the greater length through good agricultural land, was put in operation. A second track for a distance of 1.75 miles from Haileybury Spur to the southerly limit of New Liskeard was built and rented to the Nipissing Central Railway. A new connection 3 miles long has been constructed from the main line to the Transcontinental freight yard at Cochrane.

A location has been made from Iroquois Falls Station easterly to the falls on the Abitibi River where the Abitibi Pulp and Paper Mills Company are erecting a mill. The Paper Company are to clear and grade the line but no contract has yet been entered into. During the year a trial line was run from Timmins, the terminus of the Porcupine branch, south-westerly as far as the Canadian Northern Railway. A very good location for a line was found connecting with the Canadian Northern Railway at Congden. This survey was in the nature of a reconnaissance and nothing further has been done.

Canadian Northern Railway.—During the past year 51.25 miles of track were laid on the Toronto-Ottawa line, and 35.36 were under construction at the close of the year. On the Ottawa-Capreol line 40.75 miles were laid and 263.94 are under construction. The closing link of the eastern and western lines between Sudbury and Port Arthur was extended 142.04 miles, leaving 401.09 still in the hands of the contractors. It is expected that the fall of 1913 will see a through train over this portion of the road.

REVISED STATEMENT OF RAILWAY MILEAGE IN ONTARIO TO DECEMBER 31ST, 1912.

No.	Name of Railway.	Terminal Points.		Completed prior to Confederation.	Completed since Confederation.	At present under construction.	Total length completed of each railway or system of railways in miles.

Drainage Work.

Howick Township Drainage.—$300.00 was expended in enlarging a creek below the Mill Dam on lots 17 and 18 in the Township of Howick.

Mara Township Drainage.—$232.53 was expended to complete work on lot 17 to 20, in the 8th concession of Mara. Started in the year 1911.

Louise Township Drainage.—$700.00 was expended in opening up a creek from lots 3 to 8 in the 6th concession of Louise.

Capreol Drainage.—$800.00 was expended in opening up a drain from lots 5 to 10 in the 3rd concession of Capreol.

Hanmer and Rayside Drainage.—$1,500.00 was expended on the outlet of a large drain in the Townships of Hanmer and Rayside. The work extends from lot 10 in the 1st concession of Hanmer downstream along a creek, reaching an outlet into Chelmsford Creek Township of Rayside.

Bonfield Township Drainage.—$500.00 was expended in opening up 80 rods of a creek on lots 5 and 6, in the 9th concession, and 151 rods on a creek on lot 2 in the 11th concession of Bonfield.

Ferris Township Drainage.—The sum of $500.00 was spent in opening up drains on the following lots in the Township of Ferris:

On Lot 1, Concession 6	56 rods
On Lots 11 and 12, Concession 7	80 rods
On Lot 18, Concession 8	120 rods
On Lot 25, Concession 10	80 rods
On Lots 12, 14 and 15, Concession 11	220 rods

Brethour Township Drain.—$500.00 was expended in opening up a drain for road drainage in the Township of Brethour.

Evanturel Township Drainage.—$750.00 was expended in opening up a creek in the Township of Evanturel.

Harley Township Drainage.—The sum of $472.00 was spent in opening up a creek in the 2nd concession of Harley.

Hilliard Township Drainage.—The sum of $780.00 was expended in continuing a drain started in 1911, from lot 7 to lot 3, in the 4th concession of Hilliard.

Drainage Aid.

John Taylor Drain, Marlborough and North Gower.—The John Taylor drain and branches constructed by the Township of Marlborough, under By-law No. 251, commences at the middle of lot 9, in the 8th concession of Marlborough, and extends easterly and southerly, following the course of Pinery Creek to Steven's Creek, on east half of lot 18, in concession 2 in the Township of North Gower, a total distance of 36,000 feet.

The Bradley branch being an extension of the "John Taylor" or main drain, commences near the front of the 7th concession at the line between lots 13 and 14, and extends north-easterly, discharging into the head of the main drain on lot 9, in concession 8, and having a length of 14,833 feet.

The Taylor branch commences on lot 12, at the rear of the 6th concession and extends north through lot 12, joining the Bradley branch at the centre of the 7th concession, and having a length of 2,749 feet.

The McCartney branch commences on the road in front of the 8th concession, on lot 9, and extends northerly, joining the main drain on lot 8, in the 8th concession, having a length of 4,574 feet.

The Purdy branch commences at the rear of the 8th concession, and extends south along the line between lots 7 and 8, joining the main drain near the centre of concession 8, and having a length of 1,903 feet. The total length of the main drain and branches is 60,059 feet, or about eleven and one-third miles.

The drainage area affected by and assessed for the work comprises 21,958 acres,—14,310 acres in Marlborough, and 7,648 acres in North Gower. Of this area, 3,965 acres (3,205 in Marlborough and 740 in North Gower) are swamp lands. The swamp is boggy, wet throughout the year, and covered with a heavy growth of scrub poplar. In their present undrained condition the lands are valueless, and the existence of this large swamp renders roadmaking very difficult and expensive. The construction of the drainage work will admit of the reclaiming of the lands and rendering them fit for cultivation, and will allow of the easy and inexpensive construction of public roads.

The estimated cost of the work in both townships, including all incidental expenses, is $14,774.70. The lands and roads in Marlborough affected by the work are assessed at $11,268.65, and the lands and roads in North Gower affected by the work are assessed at $3,506.05.

The estimates for the work were prepared in 1904. Owing to the advance in cost of labor, the township was unable to get the work constructed within the estimated cost. The final entire cost of the work as reported by and certified to by the Treasurer of the Township of Marlborough is $17,883.68. The work was examined and reported on in the month of October, and the grant of $1000.00 voted to this work was paid to the Township of Marlborough.

Perche Drainage Scheme, Sarnia.—This work which was done under the Municipal Drainage Act, under By-law No. 5 D., of the Township of Sarnia, comprises the enlargement of the Perche Creek drain from the Grand Trunk Railway in concession 4, northerly to dead water near Lake Huron, a distance of 2,029 rods. The work is very heavy, the excavation being done by a dredge. The upper end of the drain has a bottom width of 20 feet, which is increased to 30 feet at the outlet. The depth varies from 6 to 10 feet. The drainage area comprises some 28,990 acres:

Township of Sarnia	20,720	acres
" Moore	5,730	"
" Enniskillen	1,505	"
" Plympton	1,035	"

The estimated cost of the work is $32,500.00, which under the Engineer's assessment is distributed as follows:

On lands and roads in Sarnia Township	$27,276.00
" " Moore Township	3,795.00
" " Enniskillen Township	871.00
" " Plympton Township	558.00

The drain was examined in the latter part of June, 1912. At that time the work was being energetically prosecuted and was nearing completion. The work has been done in a workmanlike manner and promises to give the relief it was designed to provide. At the last session of the Legislature a grant of $1,500.00

was voted in aid of the Perche Creek drainage scheme. On the report of an engineer of this Department as to the completion of the work the grant was paid to the Township of Sarnia.

Maxwell Creek Drain, Chatham.—This drainage work commences at the Little Bear Creek drain, near the middle of the 11th concession of Chatham, on the sideroad between Lots 6 and 7, known as the Prince Albert Road. It extends northerly along the Prince Albert Road 12,100 feet, to the front of the 14th concession, where it joins the main outlet known as Maxwell's Creek. Thence it follows the course of Maxwell Creek westerly to the Chanel Ecarte, a distance of 37,100 feet, making a total length of about nine and three-quarter miles.

Along the Prince Albert Road the drain has a bottom width of 20 feet and varies in depth from four to ten and one-half feet. On the Creek through the Township of Chatham the drain has a bottom width of twenty-four feet, and varies in depth from six to twelve feet. A new course for the drain was selected through Lots, 2, 3 and 4, in the 14th Con. that greatly reduces the length of the drain and adds to its efficiency. The cut-off involves very heavy work, as the depth averages about ten feet over a length of 4900 feet.

Through the Township of Dover, a distance of 15,700 feet, the drain has a bottom width of 32 feet, and varies in depth from four to ten and one-half feet.

The estimated cost of the work, including all incidental expenses, was $44,014.04, which was under the Engineer's assessment, distributed as follows:

On lands and roads in the Township of	Chatham.....	$37,376.56
" " "	Dover.....	5,456.68
" " "	Camden.....	1,181.40

At the last Session of the Legislature a grant of $4,000.00 was voted in aid of the Maxwell Creek Drainage works. On the report of an Engineer of this Department as to the proper completion of the drain the grant was paid to the Township of Chatham.

South Branch Drainage Scheme, Cornwall: This drainage work comprises the widening, deepening and otherwise improving the South Branch of the Aux Raisin River from Lot 32, Con. 1. 4th Range, in the Township of Cornwall, easterly to Lot 14 in the 2nd Con. of the Township of Charlottenburg, a distance of 18½ miles. The work was undertaken for the purpose of re-claiming low-lying lands and to relieve other lands adjacent to the stream from periodic flooding and rendered successful cultivation impracticable. The original estimate of the cost of the work made by the Engineer was $23,281.50. In the construction a much greater quantity of rock excavation was encountered than was shown in the Engineer's estimate. The Engineer's estimate of price for rockwork was found also too low, the ultimate result being that the final cost of the work reached the enormous total of $52,761.44 being 226½ per cent. or original estimated cost. The drainage area affected comprises some 19,010 acres,—15,610 acres in Cornwall and 3,400 acres in Charlottenburg. The estimated cost of the work as finally confirmed by the Drainage referee is $23,281.50, of which $1,535.00 is assessed against Lands and Roads in Charlottenburg and $21,746.50 against Lands and Roads in Cornwall township. At the last Session of the Legislature a grant of $3,000.00 was voted in aid of the South Branch Drainage Scheme. On the report of an Engineer of this Department as to the proper completion of the work the grant of $3,000.00 was paid to the township of Cornwall.

North Branch and McIntosh Drain, Roxborough: This drain was examined by Mr. R. P. Fairbairn, Engineer of Public Works, and on his report, dated Dec. 12th,

1904, a grant of $2000.00 was paid to the Township of Roxborough. A further examination of the drain was made in August of this year. The work has been completed some time. On application from the interested municipalities for more aid a grant of $2,000.00 was voted to further assist the heavily burdened ratepayers.

On the recommendation of an Engineer of this Department the grant of $2000.00 was paid to the Township of Roxborough, the initiating municipality.

Richmond Drain, Colchester South: At the last Session of the Legislature a grant of $1500.00 was voted in aid of the Richmond Drain in the Township of Colchester South. The drain to which this grant applies consists of the improvement of the Richmond Drain as carried out under By-law No. 570, of the Township of Colchester South, which embraces the report of James S. Laird, O.L.S. the Engineer in charge. The work extends from the 2nd Concession Road southerly and easterly, to Lot 14 in the 4th Con., a distance of 1968 rods,—a little over six miles. The drain has a bottom width of nine and one-half feet at the head and sixteen feet at the outlet on Lot 14. The depth varies from four to seven feet. The estimated cost of the work including all incidental expenses, was $13,387.85, which was assessed by the Engineer as follows:—

On lands and roads in Colchester South	$13,204.90
" " Colchester North	182.85

The work has been completed for some time. On the report of an Engineer of this department the grant of $1500.00 was paid to the Township of Colchester South.

Lyons Creek Drain, Humberstone: This Drain consists of two branches,—Lyons Creek and the east branch of Lyons Creek. The main drain, or Lyons Creek, begins on Lot 25 in the 4th Con. of Humberstone at the east side of the Welland Division of the Grand Trunk Railway, and extends northerly a distance of 3300 feet, with a bottom width of 6 feet to the junction with the east Branch of the drain. Thence it continues northerly, with a bottom width of 25 feet, a distance of 1200 feet, to a sufficient outlet on lot 19, in the 6th Con. of the Township of Crowland. The east branch begins at the sideroad between Lots 12 and 13 in the 6th Con. of Humberstone, and extends westerly a distance of 1,900 feet, joining the main drain on Lot 28, in the 5th Con. of Humberstone. The bottom width varies from 3 to 14 feet. The total length of both branches is 34,300 feet, —nearly seven miles. The estimated cost of the work as shown by By-law No. 415 A. of the Township of Humberstone is $6450.00 which was assessed as follows:--

On lands and roads in Humberstone	$5,880.00
" " Crowland	570.00

The work on the main drain is completed, and the work on the east branch is rapidly nearing completion. On the report of an engineer of this department the grant of $1000.00, voted in aid of this drain was paid to the Township of Humberstone.

All of which is respectfully submitted.

I have the honour to be,

Sir,

Your obedient servant,

A. J. Halford,

Engineer Public Works.

A. J. Halford, Esq.,

Engineer Public Works.

Dear Sir,—During the past year the following road drainage works in Rainy River District were undertaken:

Attwood Township Drain was constructed from the south-east corner of section 36 for a distance of 1,700 feet westerly along the Rainy River Colonization Road and thence south 3,055 feet to outlet in a creek. Previous to the construction of this drain a big body of water flowed down the road to the east of section 36 and flooded the Rainy River Road for a considerable distance. This situation is now one of the past for the new ditch two to four feet deep intercepts the water and carries it to a good outlet leaving the roads always in a passable condition.

Morley Township Drain.—From the Canadian Northern Railway side ditch south across part of section 19 was dug to intercept and prevent the spring freshet flowing out of the C.N. ditch and rendering the road west of section 91 impassable for weeks. The ditch is 3,000 feet long and from two and a half to three feet deep.

McIrvine Township Drain between River Range lots 40 and 41 from the Canadian Northern Railway south 2,550 feet and thence 1,050 feet west to outlet in a creek provides efficient drainage for the road across part of the big muskeg north west of Fort Frances.

Blue Township Drain east from the Blue Pratt and McCrosson Road 1,500 feet across part of section 14 provides an outlet for the side ditches of the Grassy River Road at a point where formerly nearly ¾ of a mile of corduroy would float in the spring of the year. This ditch is four feet deep and has made this road passable at all seasons.

Nelles Township Drain in front of section 3 and with outlet east to a good-sized creek has a length of 5,700 feet and drains about a mile of muskeg road west of section 3 Nelles and section 34 Dilke.

Woodyatt Township Drain from road between river range lots 32 and 33 has a length of 4,088 feet and carries away from the road a large flow of water coming from a spring lake on lot 33. This drain is 3 to 4 feet deep and is working splendidly.

Wherever this Department undertakes the construction of large tap drains such as the above it should be impressed upon the Municipality in which the drain is constructed that they open up the roadside ditches and take full advantage of the improvement so that the roads may receive the greatest amount of benefit.

Yours truly,

Geo. Hogarth,

Assistant Engineer Public Works.

Toronto Feb. 17th, 1913.

SUPERINTENDENT OF COLONIZATION ROADS.

To the Honourable the Minister of Public Works, Ontario.

SIR,—I have the honour to submit my report of the progress made in the construction and improvement of roads throughout the Province under the Colonization Roads Branch, Department of Public Works, in the year 1912.

In this report I have classified the roads upon which work has been performed in the usual order as follows:—

(1) Sudbury-Soo Trunk Road.

(2) New Trunk Roads.

(3) Colonization Roads (ordinary).

(4) Colonization Roads (by-law).

The latter two classes are subdivided into "North," "West," "East" and "Temiskaming" Divisions and in the attached "Tabulated Schedule" is shown the designation of the roads for which an appropriation was provided in the "Further Supplementary Estimates" with the important details of their construction, such as the character and qualities of work done, the approximate length of road built with the cost thereof set forth in each case.

There is also appended herewith:—

(1) A special report, by Mr. J. L. Lang, C.E., the resident Engineer in charge, on the work done on the Sudbury-Soo Trunk Road during the season.

(2) A special report by Mr. G. Hogarth, C.E. who was in charge of "drainage works" in the District of Rainy River.

(3) "Itemised statement" showing the amount expended on each work up to November 1st, 1912, as provided by Mr. M. P. Doherty, Accountant of the Colonization Roads Branch.

In reviewing the work of the past year I consider that, in many respects, there has been an improvement over that performed in former years and this notwithstanding that it was carried on under exceptionally unfavorable weather conditions, particularly in the spring and fall when wet days being of so frequent occurrence as to cause delay and, therefore, our operations were prolonged later than usual.

There was a very marked improvement in the method of supervision and inspection by our staff of inspectors, due largely to the adoption of a standard regulation to apply to the ordinary work of road construction and a uniform system of report in relation to the character and details of each work.

Much, however, still remains to be desired, but I feel confident that our endeavours will result in an increase of efficiency on the part of Overseers and improvement in the quality of work done, so that at the end of another season much greater satisfaction will be given by the Department throughout the community in which its operations are located.

A great difficulty with which the Department has to contend is to obtain first class men, as Overseers, and retain them from year to year. This, under present conditions, appears unavoidable.

In the first place it is evident that until a high standard amongst the inspectors and overseers, as road builders, is attained our work cannot be made thoroughly satisfactory. Moreover, if each year we have to instruct and train a new lot of overseers, it is obvious that, while undergoing the instruction, their services are lost and great expense is incurred thereby. It is necessary, therefore, that all good overseers should be retained as long as possible, so that they may become expert road-builders and learn to handle their men to advantage, as well

Bend in Sudbury-Soo Trunk Road.

Sudbury-Soo Trunk Road.

as to keep accounts accurately, and thus become the basis of a systematic, business-like and active road-building organization, which is the chief essential to secure good results.

While many overseers have spared neither time nor trouble to give good service, it must be confessed that others are lamentably careless and do not display the possession of even the primary qualifications, which are required to successfully carry on the works under their control (this applies particularly to the keeping of accounts) and it is to be regretted that men, who are unfitted by lack of training and education, should be placed in positions of trust and authority over their fellows, and I am of the opinion that it is infinitely preferable to leave a work undone than to put it in charge of a man unqualified for such a position.

During the season I made a special visit to each of the Districts of Rainy River, Kenora, Port Arthur, Fort William and Temiskaming and after making a somewhat exhaustive examination and inspection of the works underway and the road situation there, I can report favourably on them and that in the majority of cases satisfactory results are being obtained.

Sudbury-Soo Road.

Owing to extraordinary obstructions, in the way of large cuts and fills, encountered on this important work, our expectations as to mileage of road built were not fully realized at the close of the year. Two large working parties were, however, maintained on this road throughout the season and considering the circumstances the result of their work was all that could be desired.

A detailed and comprehensive report of this work by Mr. J. L. Lang, C.E., Engineer in charge, is attached herewith.

New Trunk Roads.

These roads, being as they are, the extension of a system which, if continued, will eventually link up important commercial centres in the northern area of the Province, are assuming such proportions and the traffic thereon has increased to such an extent that the question of their repairs and maintenance requires immediate attention.

The most important "New Trunk Road" undertaken during the year was that from Sudbury to Coniston in the District of Sudbury. The construction of this road was made necessary from the fact that a large nickle smelting industry was recently established at Coniston and a town of considerable size rapidly springing up adjoining it, a line for vehicular traffic was required to establish communication back and forth to Sudbury, the nearest and most important commercial centre, and while this road has been opened for the entire distance much improvement and further extensions are yet needed.

Another Trunk Road which received attention was the "Bridgeland Trunk Road" in the District of Algoma. This road was extended three miles to give access to the settlements northwards from the Town of Thessalon. It was constructed under contract and while the work, as far as it went, was quite satisfactory, it will, however, require some improvement and further extension in order to adequately supply the purpose required of it.

The construction of the Dryden-Richan Trunk Road in the District of Kenora was undertaken to connect the Town of Dryden on the C. P. R. with Richan Station on the G. T. P. R., a total distance of eighteen miles.

Sudbury-Coniston Trunk Road.

Sudbury-Coniston Trunk Road.

The work was done by day labor, but owing to unfavorable weather conditions in the fall the road was not completed, so that it will also require extensions and more work to make it entirely satisfactory.

From the towns of Lakeview and South Porcupine a trunk road was built to connect with the Town of Golden City. This was a very necessary undertaking and with the exception that a finishing surface was not placed upon it, otherwise the work was well done.

A road was also opened for winter traffic from the Town of Pottsville to South Porcupine along the northern shore of Porcupine Lake. This road will require further attention before it will be fit for wagon traffic.

Several other trunk roads were included in the operations during the season,

Bridgeland Trunk Road.

but as they were, however, the subject of "Special Reports" I need not make a reference to them here further than to say that the work in each case was quite satisfactory.

Colonization Roads (Ordinary).

As all the important details in connection with the work of building and improving these roads are included in the schedule attached herewith, I need not refer to them more than to say that in the very large percentage of cases entire satisfaction was given and good value received from the expenditure. I wish here, however, to mention that, while the demands, that are made for the construction and improvement of Colonization Roads in those sections of the Province which can be termed Agricultural, are receiving adequate attention, yet there are other large areas, although of not much importance from Agricultural standpoint that could be developed and their resources as summer tourist and hunting and fishing resorts could be greatly increased in value by the construction of roads therein.

Colonization Roads (By-Laws).

The By-law system of constructing and improving roads, which is carried out in accordance with the Colonization Roads Act and under which roads are improved in organized townships, has now assumed considerable proportions, and as the officials of the Municipalities are becoming more familiar with its administration and the benefits to be derived from taking advantage of it are better understood, a higher standard of road is being built and more permanent work secured.

Colonization Road in Temiskaming.

There were 120 townships operating under this system during the season and a total expenditure of the sum of $185,409.27 was made upon the improvement of 890 miles of road towards which the Government contributed the sum of $111,857.31.

In this connection I would recommend that some alterations be made in the present Colonization Roads Act in so far as it refers to the administration thereof and also that a concise code of regulations and instructions, respecting the carry-

ing out of the purpose of the Act and also that the essential "Principles to be observed in road construction" be included therewith and published in convenient pamphlet form for distribution among those Municipal Officials, who are interested and entrusted with the carrying on of this scheme of road improvement.

During the year the Department have undertaken the work of indicating on maps the more important roads, which have been constructed by them and also those which are being placed under construction.

These maps will in a short time become valuable for reference and will supply much information to all parties desiring it. This work has been placed in charge of Mr. Charles Meader, B.A.Sc., and I am pleased to say that under him it is progressing in an eminently satisfactory manner.

SUMMARY OF MILES OF ROAD BUILT AND IMPROVED WITH THE EXPENDITURE THEREON IN 1912

	Miles	$ c.
Sudbury-Soo Road	21	29,971.00
New Trunk Roads	96.57	27,522.04
Colonization Roads (ordinary)	1,095.81	343,982.27
Colonization Roads (by-laws)	890.49	145,409.27
Total	2,083.08	$566,884.67

Note.

The difference in the amounts shown as expended under the various classifications in the Accountant's statement and the amounts shown in this report is accounted for by the fact that, while a great many works were completed and reported on at the end of the fiscal year, the accounts therefor were, however, unsettled and, therefore, the payments are not included in the Public Accounts for the current year.

I have the honour to be, Sir,

Your obedient servant,

G. W. Bennett,

Superintendent of Colonization Roads.

Toronto, February 11th, 1913.

Sault Ste. Marie, Nov. 25th, 1912.

To Superintendent Colonization Roads,

Parliament Buildings,

Toronto, Ont.

Dear Sir,—I beg to report that during the season of 1912 the Sault Ste. Marie-Sudbury Trunk Road has been completed from the Sault to Echo Bay and from Webbwood to Espanola. Some work has been done between Blind River and Iron Bridge, betwen Echo Bay and Desbarats together with some miscellaneous repairs on other sections.

Sault-Garden River Section.—During the winter of 1911 and 1912 this section was gravelled, partly under contract and partly by day labor. Later during the present season some $700.00 was spent in miscellaneous repairs in rolling and spreading the gravel. This section is now in good condition but should receive some additional surfacing in the near future.

Garden River-Echo Bay Section.—This section has been constructed during the present season, has been graded, drained and equipped with culverts. The easterly two and a half miles which was through loose sand has been covered with clay and gravelling carried slightly over a mile west from Echo Bay Village. The fill across Echo Bay leading to the bridge has been completed and rip-rapped and is now in good condition.

Echo Bay-Desbarats Section.—This section which consists of existing road and a mile and a half of the worst portion, which formerly consisted of a trial over rocky and wooded hills, has been cleared, graded and brought up to the standard.

Webbwood-Espanola Section.—This section is complete and is in satisfactory condition though containing as it does large embankments. It will always require some care and a few repairs annually.

Nairn Over-Head Bridge.—The over-head bridge crossing the C.P.R. on the Nairn-Espanola Section being in bad shape it was necessary to do some repairs. The approaches of this bridge which are of loose sand have been continually washed away leaving a gap at each end of the bridge. Masonry wing walls were put in during the present season to retain the fill and the surface of the approaches was clayed.

Blind River—Iron Bridge Section.—On this section under the supervision of Thos. Grigg about a mile and a quarter of the worst part was graded and culverts placed.

Summary.—There is now a road in fair condition between Sault Ste. Marie and Blind River. A considerable amount of work is necessary to bring this up to the standard requirements but it is passable at all times and is in fairly good condition.

From Blind River to Cutler there is no road at all. It is intended to spend the major part of the 1913 appropriation on work in this gap.

From Cutler to Massey there is an existing road in good condition.

From Massey to Nairn the Trunk Road has been built and is in fairly good condition. The Nairn-Espanola Section is, however, through heavy sand and should be gravelled if it ever carries much traffic.

From Nairn to Victoria Mines there is an existing road which the Trunk Road location follows to some extent. This road though passable is in bad condition. From Victoria Mines to Whitefish there is a good existing road and from Whitefish to Sudbury the Trunk Road has been built and is in good condition.

When the Trunk Road is constructed between Cutler and Blind River there will be a passable drive-way between the Sault and Sudbury though considerable work must be done on the Nairn-Victoria Mines section. It would be advisable, if possible on the score of cost, to construct a certain amount of permanent road each year. By 1913 there will be several crusher plants in operation along the north shore of Lake Huron and the very best of trap rock can be obtained and delivered on the road at very little greater cost than gravel. I will forward the supplementary estimate with this in view.

Yours truly,

JOHN L. LANG, C.E.

Engineer, Sault-Sudbury Trunk Road.

DEPARTMENT OF PUBLIC WORKS, TORONTO,
October, 31st 1912.

M. P. DOHERTY,
Accountant, Colonization Roads.

STATEMENTS

OF THE

ACCOUNTANT

AND

LAW CLERK

Department of Public Works, Ontario.

Toronto, February, 1913.

Hon. J. O. Reaume,

Minister of Public Works, Ontario.

Sir,—I have the honour to submit the following statements of capital expenditure on public buildings, works, roads, aid to railways, etc., and of contracts entered into in connection therewith, being: (1) The capital expenditure for public buildings and public works, etc., for 12 months to the 31st of October, 1912,(2) the total capital expenditure on public buildings, public works, colonization and mining roads, aids to railways, etc., from the 1st of July, 1867, to the 31st of October, 1912, (3) a classified statement showing (*a*) the expenditure for thirty-seven years and six months from the 1st of July, 1867, to the 31st of December, 1904; (*b*) the expenditure for seven years and ten months from the 1st of January, 1905, to the 31st of October, 1912, and (*c*) the grand total of expenditure from the 1st of July, 1867, to the 31st of October, 1912, and (4) a statement showing the several contracts and bonds entered into with His Majesty during the 12 months ending the 31st of October, 1912, for the carrying out of the sundry works under the control of your Department.

I have the honour to be, Sir,

Your obedient servant,

J. P. Edwards,

Accountant, etc.

STATEMENT No 1.

SIXTH ANNUAL REPORT

OF THE

Game and Fisheries Department

1912

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

TORONTO:
Printed and Published by L. K. CAMERON, Printer to the King's Most Excellent Majesty
1913

Printed by
WILLIAM BRIGGS,
29-37 Richmond Street West,
TORONTO

To His Honour Sir John Morison Gibson, Knight Commander of the Most Distinguished Order of St. Michael and St. George, a Colonel in the Militia of Canada, etc., etc., etc.,

Lieutenant-Governor of the Province of Ontario.

May it Please Your Honour:

I have the honour to submit herewith, for the information of Your Honour and the Legislative Assembly, the Sixth Annual Report of the Game and Fisheries Department of this Province.

I have the honour to be,

Your Honour's most obedient servant,

J. O. Reaume,

Minister of Public Works.

Toronto, 16th December, 1912.

Sixth Annual Report

OF THE

Game and Fisheries Department of Ontario

To the Honourable J. O. Reaume,

Minister of Public Works.

Sir,—I have the honour to submit for your consideration, and I trust your approval, the Report of the Department of Game and Fisheries for the twelve months ending 31st October, 1912.

The Statistics, Reports of Inspectors, Wardens, Overseers and Deputy Wardens, and other matters in connection with the administration of the Department, will appear as usual, for the information of yourself, your colleagues, and the public, which I venture to hope will receive the general approval accorded those preceding it.

Laws and Regulations.

I am pleased to be able to report that with few exceptions the licensed fishermen of the Province have respected the conditions of their respective licenses, which augurs well for the future. Those few failing to do so have received much needed and costly lessons and I trust will not have to be repeated. I also have great pleasure in reporting that, as a rule, the tourists are more disposed to act in accordance with the conditions on which their angling permits are issued. The net fishermen, as well as the anglers, are evidently realizing that a strict observance of the laws and regulations is imperative, to enable the Government to succeed in their strenuous efforts to perpetuate and improve one of the most valuable assets of the Province in the interests of present and future generations. It augurs well for the future of the Province, and of the fisheries, to realize the general desire to have the unwise and unnatural pollution of public waters abolished. Some of our scientific authorities allege it is not practical to discontinue the death dealing pollution of our lakes, rivers and streams. The health and stamina of the inhabitants is absolutely necessary in our country to ensure their welfare and prosperity. Without digressing, it cannot be denied that the refuse of all that is taken from the surface of the land should be returned to it. This is one of Nature's laws, of which we have a most convincing illustration in our grand forest trees, growing on rocks in less than fifteen or eighteen inches of soil. If these trees had been deprived of the yearly stimulant accorded them by the decomposed leaves and other matter, these rocks would have produced only useless stunted trees. All we have to depend on comes from the land. This being an undisputed fact, we should be just, and also generous, to our best friend, by returning to it its proper share of

what it produces for our benefit. We frequently hear of farmers leaving their farms on the plea that the land is played out. Land will never be played out if it receives common sense honest treatment. All sewage should be treated by an intelligent system of interception works, the solids from the tanks should be pulverized, put into coarse sacks and sold to farmers at cost of production. This may not have been practical when alum was used as a purifier, but with the substitution of lime, the residue so treated would have a considerable commercial value as fertilizer, and would do much in preventing land starvation. All deleterious waste products from manufactories should be destroyed by those producing them, on the same conditions as owners of sawmills are compelled to destroy sawdust. The recent deplorable events in the capital of the Dominion was one of Nature's severe warnings, the deduction from which is that neither collectively nor individually can we ignore her laws with impunity. When such an unfortunate state of affairs prevails in what should be one of our most enlightened cities, with all the appliances known to Science at their command, what better can be expected from the farmers or dairymen who locate their stables and cattle sheds contiguous to their wells or springs, even though the results of so doing resemble those that occurred in a village near Manchester, England, a few years ago, when many of the inhabitants died from typhoid fever, resulting from the use of milk from cows having access to water polluted with sewage. The vexed question of defilement of public waters can be settled permanently only by making it too expensive for those who continue endangering the public welfare. Unrestricted sewage has already destroyed many of the best spawning grounds in the Great Lakes and rivers. With increased population, of course, there will be an increased demand for fish. Then everything possible should be done to put a decided stop to anything having a tendency to decrease the supply of this most valuable commodity.

Game laws originated in England, where it was decided that game was the property of the Crown, who granted the privilege of hunting game exclusively to the owners of large estates, and of course when game laws were enacted they were drastic and unduly oppressive. These arbitrary laws were modified during the 18th century, but even now game is protected in England for the exclusive benefit of the land owners. What a contrast to the above are the game laws in this man-making country of ours. When there were many less people in the Province, and more game and fish, game laws were not considered necessary; but now, with the large increase in the population of the Province, and consequent decrease of game and fish, and also of fur-bearing animals, it is imperative that corresponding restrictive and protective measures be enacted. License fees should be required for killing any kind of game, also from trappers. It is alleged that the annual value of game birds and game and fur-bearing animals in the State of New York is $750,000. If this is correct for the State of New York, with their restricted forest lands, the annual value of the above-named animals and birds in Ontario will no doubt be worth to the Province at least $2,000,000. This is worth considering, and those receiving the lion's share of it should be required to pay the cost of conserving it for them.

It is a difficult matter to effect the desired reduction in the number of permits annually issued, enabling the holders thereof to take insectivorous birds and their eggs. In many cases the applications come for permits from those who desire to shoot birds for amusement. It is impossible to say how many of these applications come from men and boys that honestly require the permits for *bona fide* scientific purposes. To prevent the numerous applications, and consequent destruction of our beautiful feathered songsters and the farmer's best friends, I strongly advise

that the Act be so amended as to require a fee of not less than $5 for these permits. This would be the most effective way to secure the much desired reduction.

The Department has had a considerable amount of trouble with a number of fur buyers or dealers during the past year. While all possible has been done by the Department to enable dealers and manufacturers to do an honest and legitimate business on lines satisfactory to them, I regret that there are a number of so-called buyers in the Province who evade the game and fishery laws whenever possible, by so doing defrauding the Government and railway companies. Their mode of procedure is to check empty trunks to parties having illegal furs for sale. The checks are then sent by mail, enabling the confederates to claim the trunks at the respective terminals. This system can only be operated by collusion or carelessness of station baggagemen, and is very difficult to detect. Therefore, when caught at their unlawful business the maximum penalties should be imposed, there being strong presumtive evidence that bribery of employees is concomitant with their other illegal transactions.

I regret there is no apparent intention on the part of those having the authority to establish and enforce the much needed close seasons for fish in the whole Province. This is regrettable, when we take into consideration the increased number of requests we are receiving from the authorities of the various states south of the Great Lakes, and also from the Federal Government of the United States, for permission to take spawn from our side of the lakes, not procurable in their own waters. It is reasonable to presume that the same unwise course, if continued on our side of the lakes, will produce the same unfortunate results, I am under the impression sooner than anticipated, and then the problem will be where can spawn be procured. With increased population, and consequent increased demand for fish, it is difficult to understand the object of this policy, which, if persisted in, will eventually result in practical extermination.

Game.

Moose are reported in those portions of the Province suitable for them, as showing a satisfactory increase.

Deer, I am pleased to say, are reported to be as abundant as in past years, except in the vicinity of some of the older settlements.

Ducks.—In many localities the season has been very satisfactory. In waters contiguous to cities and towns ducks have been scarce, from several causes, chief of which is the large increase in number of motor boats being constantly on the move, and the destruction of duck food by deleterious waste matter from manufactories being allowed to pollute the water in their vicinity.

Ruffed grouse were not so abundant as a year ago, no doubt due in a large measure to the cold wet weather during the nesting season.

Quail.—It was considered advisable to have a close season for these. I am not sanguine as to the future of these grand little game birds, as I have stated in former reports, improved farming being to a large extent responsible for the decrease. The substituting of wire fences for the rail and pine stump ones has destroyed both cover and food, also compelling them to nest in grass fields and meadows, where the eggs and sitting birds are frequently destroyed by the mowing machines.

Pheasant.—These beautiful birds being ground feeders are compelled to stay and feed in the vicinity of farm houses during the winter months, resulting in their being semi-domesticated. Becoming an easy prey to hunters, they will never

become a prominent factor in our game supply—one or two open seasons would result in exterminating them. It was found necessary to again prohibit the shooting of them in the Province.

Fur-bearing Animals.

Beaver are reported to be increasing, many complaints reaching the Department of damage to roads and grass lands by flooding from dams erected by them. On an investigation of damage complained of, it was found (to some extent) to be the result of the unprecedented wet spring and summer.

Otter.—Isolated complaints have been made of the destruction of fish by these active denizens of our northern lakes and rivers. So far as I have been able to learn they are not in sufficient numbers to be a menace to fish, as reported.

Muskrat, mink, and the coarser fur-bearing animals are not decreasing to any appreciable extent.

The staff of the Department, inspectors, wardens in charge of their respective districts, overseers and deputy game and fishery wardens, as in the past, have been most faithful and efficient in the discharge of their respective duties.

It is my pleasant duty to again extend my sincere thanks to the employees of the Departments of the Honourable Attorney General and the Honourable Minister of Lands and Mines for their valuable and effective assistance.

I also tender my sincere thanks to the various Railroad and Navigation Companies for their valuable assistance so kindly given to the Department during the past year.

Re-Stocking.

The Bass ponds at Mount Pleasant have reached such a proportion that the question of hatching bass in large quantities is now possible under favourable conditions. The past season has been a most successful one, considering the difficulties that had to be overcome, and next season, barring accidents, the output of these ponds should be very great indeed, and the most important of the inland waters of the Province should receive an adequate supply. Mr. Edwards, who has been in charge of this hatchery, has discharged his duties in a most satisfactory manner, both as to the care and rearing of the young bass, as well as the construction of new ponds.

Angling Permits.

The sale of angling permits was not as great this year as last, owing, no doubt, chiefly to the cold and wet summer, but another reason is given as well. The present craze for motoring has diverted to a considerable extent the tourist traffic from their former haunts; but those non-residents who did avail themselves of the privilege of angling have observed the laws and regulations, except in a few instances.

Patrol Service.

There was added to the present patrol service this year an additional gasoline boat, which chiefly patrolled the waters of Lake St. Clair, Detroit River, and the western portion of Lake Erie. This service was most satisfactory and prevented to a great extent infractions of the Act, which occur so frequently in the vicinity of the International Boundary Line. The crews of all the patrol boats gave satis-

faction to the Department, and showed a willingness at all times to comply with their instructions, and displayed an eagerness in the protection of the waters which were assigned to them to patrol.

Special Officers.

In the same manner as in former years special officers were stationed at various points to inspect all the fish that were intended for shipment. The number of these officers was increased and their services in the main were satisfactory. The exporting of immature fish has diminished to a very great extent during the last few years, through the watchfulness of these officers.

All of which is respectfully submitted by your obedient servant,

E. Tinsley.

GAME AND FISHERIES INSPECTORS.

Toronto, 3rd December, 1912.

E. Tinsley, Esq.,
Superintendent, Game and Fisheries.

Sir,—I have the honour to submit my report for 1912.

Commercial Fishing.

The season just closed has been fairly successful from a commercial point of view, nearly all points reporting as good a catch as last season, many reporting a better catch and very few saying that there was a decrease. Lake Erie points report an increased catch of white fish, also a good catch of herring.

Too many small blue pickerel, herring and perch are being caught; a limit to the size of these fish should be established. I notice that in last year's report Warden Chauvin recommends a ten inch limit. From enquiries made I agree with him that this would be about right. Something of this kind should be done. Lake trout are about the same as last season, the catch not being quite as good up to the 1st of November, but the ten days extension made up the deficit. This appears to me a somewhat reckless way of making it up, but if it had not been done most of the hatcheries would have been short of spawn. As it is all of them are filled up.

Yellow pickerel (dore), one of our most valuable fish, are becoming scarcer in most of our waters; in my opinion the close season for these fish does not begin early enough.

Angling.

Reported that black bass were numerous, but not as many caught as in some former years, anglers blaming the weather.

Tourists were not as numerous as last season. The weather, no doubt, accounts for this.

Altogether it was a disappointing year at the summer resorts.

I am told that in some of the Muskoka Lakes they are seeing the results of the planting of Bass fingerlings from your Mount Pleasant bass ponds. This, of course, was to be expected.

License for Trappers.

Fur-bearing animals being the property of the Province, just as the fish are, do you not think the men who make a business of trapping them are as much entitled to pay for the privilege as the fishermen are? I would not ask for a large license fee, but do not think any trapper would object to a fee of $5.00. I know that a great many of them would be pleased to have it enforced. In this connection why not license fur buyers as well. If both trappers and buyers were licensed and compelled to make returns to your Department of catch and business done, you would at least have some check on them, and should be able to much easier prevent the illegal handling of furs. Beaver are reported as being on the increase, in some places doing damage.

The wolf question is still a serious one. No doubt they are increasing in numbers; one of your special patrol men who was on duty north of Lake Superior telling me that he was satisfied that they killed more deer than the hunters. The present bounty of $15.00 does not appear to be large enough to induce the trappers to make hunting them a business. They say the only ones killed are what they get when looking for something more valuable or more easily caught.

I would like to see the bounty raised to $20.00 or even $25.00 for some years and note the effect. I am told this would be an added inducement for fraud, but since to secure the bounty the whole hide must be given up the chance for fraud is not as good as under the old law.

Deer and moose are reported as being plentiful, especially in the Western part of the Province.

The game and fishery laws have been fairly well observed.

Your overseers and special men have, with very few exceptions, been diligent in the discharge of their duties.

I must congratulate you on acquiring the fine yacht "Athene" for patrol service on Destroit and St. Clair Rivers. She, with her crew, has rendered valuable service in those waters.

You still require a good boat for the west end of Lake Superior, the one chartered for that work not being suitable.

Respectfully submitted.

Your Obedient Servant.

(Signed) Wm. W. Holden,

Inspector.

E. Tinsley, Esq.,

Superintendent of Game and Fisheries.

Sir,—I beg to submit my report for the season of 1912.

Commercial fishing has been as good as in former years. There have not been as many tourist visitors this year as last, caused no doubt by the cold and wet summer. The laws and regulations governing both commercial fishing and angling have been fairly well observed. A few fines have been inflicted for infractions, but one lesson seems to be enough. I have received numerous complaints from different towns that the citizens are unable to obtain their food supply of fish, except at exorbitant prices. I think that some arrangement should be made so that our

citizens should be supplied before any are exported. I would recommend that all commercial fish buyers should be licensed, not alone as a revenue producer, but it would enable your officers to have a check upon them.

Partridges have been plentiful, and I would recommend the season to begin on November 1st, the same as deer, also to end on November 15th. Deer is reported as more plentiful than last year, and nearly every hunter obtained his limit. Beaver is reported to be increasing at an alarming rate, and are doing damage to different farmers. I would recommend the season for trapping mink and muskrats to begin on the same date, and also that all trappers should be licensed, that resident trappers pay a fee of $5.00 each. I would recommend that duck hunters be limited to 100 ducks during the season, and that the sale of wild ducks be prohibited, and that no fishing for bass or maskinonge be allowed through the ice. Owing to the fact that wolves are rapidly increasing, I would recommend increasing the bounty to $25 each. The revenue derived from trappers' licenses would more than pay increased bounty.

Your obedient servant,

ALFRED HUNTER,

Inspector.

GAME AND FISHERIES WARDENS.

Warden, Wm. Burt, of Simcoe, reports:

SPECKLED TROUT.

There has been an increase in the number of speckled trout in those streams in which was planted fry supplied by the Department. The anglers also report seeing numbers of small trout, no doubt being the fry that was planted last spring.

BASS.

The bass fishing in Long Point Bay has again been excellent. When weather conditions were favorable, and the bass hungry, any angler could easily catch his legal number of fish from a half hour to an hour.

COMMERCIAL FISH.

The commercial fishing in his district is practically the same as in his last report. If there is any increase at all it is in the number of carp that are caught.

QUAIL AND RUFFED GROUSE.

The quail continues scarce in his district. From all reports he has received he does not think there has been any change in numbers.

The ruffed grouse are more numerous this year than last. There have not been a great many killed, however, as the leaves have been on the trees until quite recently, so that the sportsmen have not been able to see to shoot them in the covers, but from reports of people who have visited the covers during the summer, he gathers that there is a material increase in the number.

English Pheasants.

Reports from the eastern part of his district, where the Department experimented with this game bird are very encouraging. Last season the sportsmen were able to kill quite a number of them, and they are reported to be still on the increase, so that there can be no doubt that the bird has become thoroughly acclimated in that district. The southern part of the County of Norfolk is particularly well adapted for this bird, and he would suggest that a few pair be sent to that County and an endeavor made to establish them there.

Woodcock.

As usual, this bird is very scarce in his district, but after making his annual report last year, he heard of several bags of five or six being made in a day. However, they are so scarce that they can hardly be counted as one of the game birds of the district.

Black Squirrels.

As he reported last year, there are so few woods left in the district, these little game animals are becoming quite scarce. From all the reports he has been able to get they appear to be as numerous as they were last year.

Wild Geese.

Very few of these birds have been killed. They practically only visit this district in the spring, and as they have adopted a system of spreading out all over the country, lighting in the wheat field instead of feeding in the marshes as formerly, it is very difficult to get an estimate of the number. If anything, there has been a decrease.

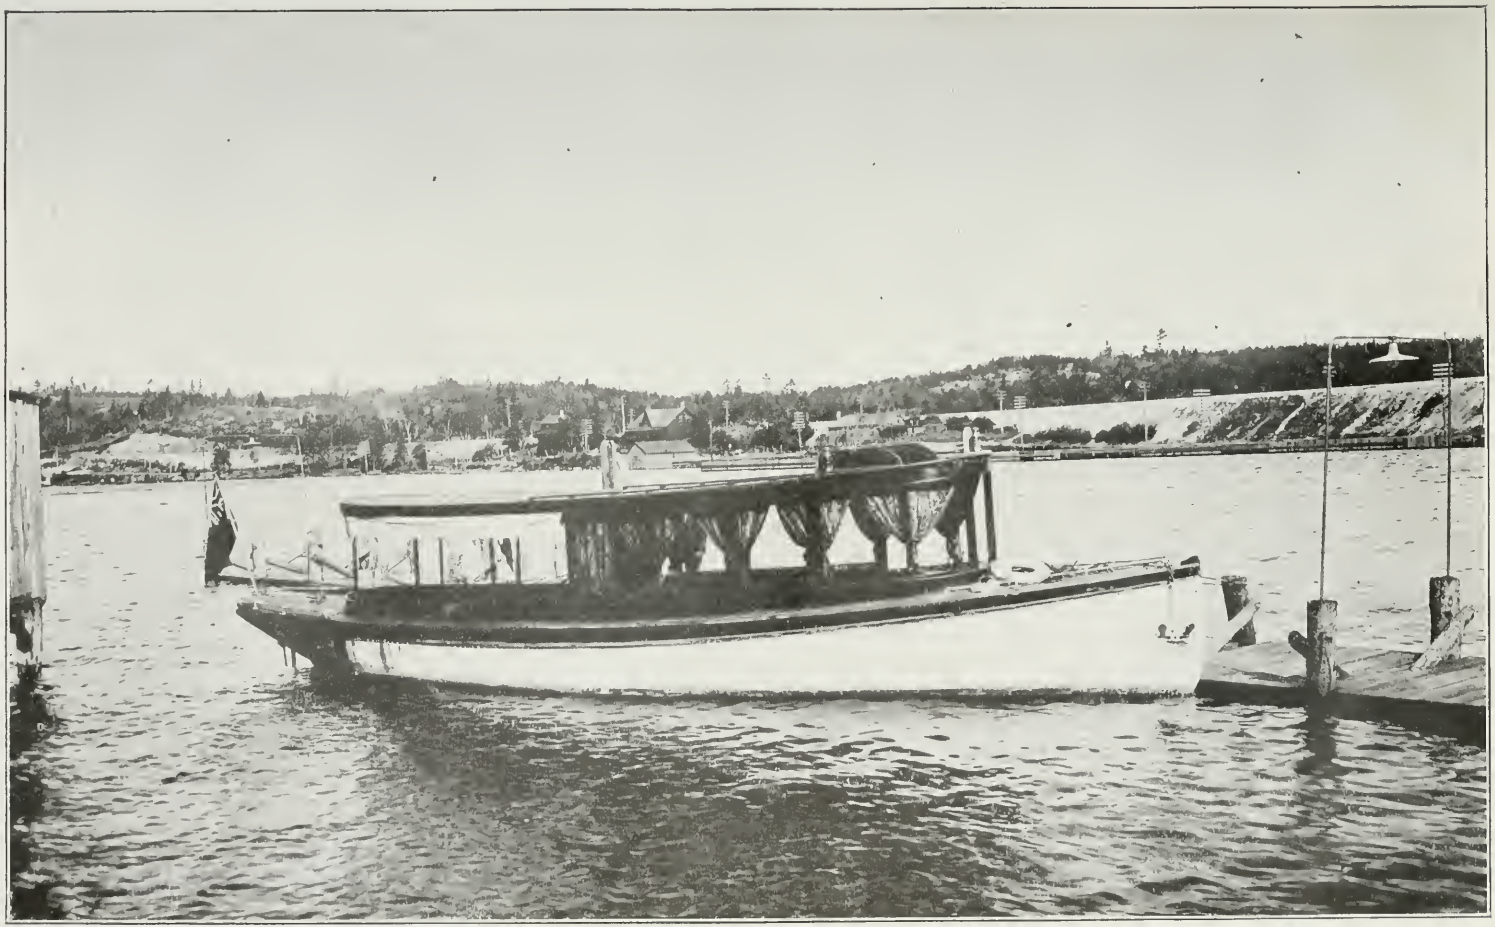
Wild Ducks.

The Long Point District reports a very successful season this fall. The ducks seem to be in greater quantities than ever. The number of Black Ducks that breed in the marshes surrounding the Bay is increasing from year to year. In talking with the different sportsmen, he finds that they attribute the increase in the number of ducks to the fact that the greater part of the marshes surrounding Long Point Bay are owned by game clubs where the shooting is limited, so that the ducks are not shot at as continually as they are at other places, and they seem to have changed their line of flight to the south, stopping here where they formerly stopped at other points from which they have been driven.

Fur-bearing Animals.

The muskrat is still the main fur-bearing animal in this district. The water in Lake Erie was very low again last winter, so that there was a very small catch. The Long Point Company, the largest game preserve in his district, allowed no trapping whatever, as so few survived the winter they desired to keep them as a breeding herd. The other marshes were not trapped to their full capacity for the same reason.

The Deputy Wardens and Overseers have been active and efficient in their duties, and there have been very few complaints of infringements of the law.



The " Wenonah," patrolling the waters of the Lake of the Woods.

Warden Victor Chauvin, of Windsor, reports, that during the year he has visited nearly all the fishermen in his district and it was reported by them that they had a good year for fishing, especially herring in Lake Erie, East of Point Pelee, only the trouble was that they were running small, and they should not be less than ten inches in length. Perch and blue pickerel are also plentiful, and white bass also running very small, and there should be regulations on them. He states that they are catching white fish by the ton West of Point Pelee and Detroit River, and also at the mouth of Lake St. Clair. In Detroit River there is good fishing for white fish. The fishermen claim that the cause is that there is no blasting at the mouth of the river this fall. The anglers have reported satisfactorily in catching bass in St. Clair Flats and Mitchell Bay and other places. There is a lot of sturgeon caught in Lake St. Clair and Lake Erie, and the majority is small. Lots of them on the market weigh from three to four pounds. There should be regulations on them.

The law was very well observed by the fishermen throughout this district.

In regard to game. Quails have been reported as plentiful as last year. Woodcock hunters are reported to have seen two or three bevys a day. Partridge is not increasing, and the Hungarian partridge which were planted by the Leamington Club were reported doing well. They have found two pairs of birds with fifteen young. Black and grey squirrels are about the same as other years, very scarce in Essex County, but plentiful east of there. Muskrat is showing very good. Wild geese have not been showing very plentiful this fall, but there were a lot of them last spring. The mallard ducks, black and grey, are more plentiful this fall in the Detroit River and marshes around Lake Erie and Lake St. Clair than for years. The river ducks are very scarce. There are quite a number of woodcocks this fall. The snipe are also scarce this fall. The sportsmen claim that they are pleased with the bags of birds they got this fall in a day's shooting, but there is a great objection raised regarding the law of sunrise and sunset for shooting.

Warden H. J. Metcalf, of Kingston, reports, that he has visited the principal portion of his district during the year, and was much gratified to observe that the overseers and other officers whom he met were diligent and painstaking in the performance of their various duties. Violations of the Departmental laws and regulations have been few in number. Owing to the past spring and early part of the summer having been very much cooler than usual, the number of tourists were lessened. The patrol boats and their efficient officers have been of great service in promoting and ensuring the carrying out and observance of the laws of the department. Whenever he has needed their assistance they most cheerfully rendered it. He was much gratified to learn from numerous residents residing along the Rideau and adjacent lakes of the beneficial effects produced through the continuous efforts of the Department to exterminate ling.

Angling in most places visited has been excellent. Bass fishing has been particularly good. Commercial fishing during the season has improved considerably. Fishermen engaged therein have manifested a uniform desire to conform with the laws and regulations.

Owners of saw-mills have, this season, been more careful in the disposition of their refuse material. Partridges have shown fair increase in numbers. To ensure this continuously for future years, he would suggest that a reasonable limit be placed on the number falling to each gun. Would deem twenty-five or thirty to be a fair maximum. Ducks have been more numerous than in 1911. Muskrats

have been abundant, and each succeeding year proves their increasing value as fur-bearing animals. Would recommend most respectfully that a trappers' license be instituted by your department at a very early time. He is of the opinion that farmers living near lakes containing fish of little use for angling purposes, should be permitted to secure domestic licenses at a nominal cost to provide fish for their own use.

He must congratulate the department on the uniform expressions of approbation he has heard throughout this portion of the Province regarding the wise administration and fairness of the laws and regulations.

Warden George M. Parks, of North Bay, reports, that regarding fish he would say that all kinds are very plentiful in many of the lakes throughout the district, especially Lake Nipissing and the French River. The tourist trade has been exceptionally good this year, large numbers of tourists locating in the French River and West Arm, which is reported to be a great summer resort and speaking very highly of the fishing in that district. The restocking of several lakes along the Temiskaming and Northern Ontario Railway has met with great favour among the residents in that locality. Also he would like to recommend that net fishing be done away with in Lake Temiskaming, as fish are becoming very scarce in that lake. The country is fast filling up with settlers, and the fish should be protected for angling purposes. At present, the Quebec fishermen are rapidly emptying the lake of all the best fish.

Referring to game, he finds that moose are not nearly so plentiful in the vicinity of North Bay as they are a little further north. During his travels he has seen a great many deer, and believes that they are increasing in numbers.

Beaver and otter are increasing rapidly, beaver being found in nearly all the small streams in that district. All other fur-bearing animals are also on the increase, especially mink and muskrat.

Partridges are not nearly so plentiful this year owing to the cold wet spring which destroyed the young birds. Ducks are again quite plentiful, also many flocks of plover and snipe are to be seen in the vicinity of Lake Nipissing.

He would strongly recommend that the open season for hares be changed to commence on the 15th October the same as partridge, many partridge being killed by the hunters who pretend to be hunting for hares during the early part of October.

Warden J. T. Robinson, of Sault Ste. Marie, reports that commercial fishing was good in the early part of the spring, but during the months of July and August the catch was light in some parts of Lake Superior, but around the Lizard and Mamaise Islands the gill net fishing has been good. All through the season the pound nets have had a fairly good season. The number of suckers destroyed in the pound nets this season have paid well for the experiment, and he would say that there should be three more pound nets in the east end of Lake Superior to get rid of the suckers. When the full returns come in he would say that the season of 1912 will be a good season for the fishermen. The laws have been well observed with the fishermen as there have been no convictions. The patrol boat "Jessie T." has done good service this season. She has been on the go all the time in Lake Superior.

Speckled trout is very plentiful in the rivers and inland lakes. The anglers say that this was the best season they have seen for a number of years, as there

were lots of fish and the fish were larger than usual. There have not been as many tourists in this district this season as usual, the reason was the cold, wet summer. The law was well observed with the anglers here.

Bass is on the increase in St. Mary's River, also in the inland lakes the anglers report good catches.

Maskinonge is scarce in Lake Superior, but there is some in Echo Lake. There was one taken out of Echo Lake this season that weighed 35 lbs.

Pickerel is getting more plentiful in the waters of Lake Superior and St. Mary's River. There have been some good catches made this season.

Red deer are very plentiful in this district. They are increasing this year to a wonderful extent considering the number that is taken by the hunters in the open season each year. The increase he would say is owing to the open winters they have had the last two years with no crust on the snow. The wolves could not catch them as in former years.

Moose is plentiful in this district. There were not as many taken by the hunters in the open season of 1911 as there were in the season of 1910 in his district.

Caribou is very scarce in this district, and he would say that there should be a close season put on them for at least five years.

Beaver is increasing to a very great extent throughout this district. They are doing a great deal of damage to timber and roads. Under instructions from the Department he has blown up a number of their dams, but what he destroyed in the day time they would build up in one night. He would suggest an open season for one year, or have the Government send trappers out and catch them where they are doing the most damage.

Mink are decreasing in number very fast, and if something is not done to stop the trapping of this fur-bearing animal for a few years they will soon have no mink to trap. He would suggest giving them a close season of two years as they are an animal that increase very fast.

Muskrats are holding their own. They seem to be on the increase.

Otter is very scarce here. The cause of their being so scarce is hard to determine, as he has not known that any have been caught there.

Bears are increasing in that district. There have been quite a number of them killed in the lumber camps, and he would say that they should be protected as the fur is valuable.

Wolves. There are quite a number of them in this north country, but they have not been able to catch as many deer these last two winters owing to no crust being on the snow in the spring. If the bounty was raised to $25 the trappers would take more interest in catching them as the wolf is hard to catch.

Black squirrels. There are none in his district to his knowledge so far as he has seen in all his travels through the woods.

Quail are very scarce in his district.

Partridge are plentiful. There were a lot of birds taken by the hunters in the season of 1911, some hunters taking as many as 70 birds in the season. In his opinion there should be a limit in the open season of twelve birds to each hunter.

Woodcock are very scarce in that district.

Wild ducks of all kinds are more plentiful this season than they have been for years. Wild geese are scarce. There are a few birds on Lake Huron. These birds should not be taken, only from the 15th September to the 15th December.

Trappers of fur-bearing animals were the biggest trouble they had in that district owing to the number of lumber camps that are in operation in New Ontario, and the number of men that were trapping in those camps who did not care for the law as far as killing game was concerned, and it was almost impossible to convict those people. They keep the skins hid in the bush until the season opens, and then they sell them. There is only one way to get after those trappers, that is to put a license on trapping and make the fee not less than ten dollars for each resident trapper, then it would be easy to convict if found trapping without a license.

In conclusion he would say that considering the number of aliens they have in the district the law has been well observed. There have been few violations, but those that broke the law were punished to the limit, and it has been a warning to others. The overseers in his district have done their duty with the exception of one.

Warden C. N. Sterling, of Kenora, reports that during the year he has visited most of his District several times and has found, this year, a decided improvement in the keeping of the Game and Fish Laws.

He would recommend that more Overseers and Deputies be appointed along the line of the Transcontinental Railway, and also along the boundary line between the State of Minnesota, U.S.A., and our Province.

The District is a large one and the additional protection which he recommends would, he thinks, help greatly towards the maintenance of this part of Ontario as a reserve and a future source of revenue to the Province. Foreigners are now looking toward this part of the Province as a sporting ground.

Fish.

During the past year, fishing has been fully up to the standard of former years in the western part of the District, whilst in the eastern section, along the north shore of Lake Superior, the catch is reported to be very light, especially in white-fish and trout.

Black bass fishing has not been so good as last year. The stocking of the lakes adjacent to the greater lakes of that District has proven a success; but what was done by the Province, by placing fry in some of these lakes, must be kept up if the work already done is to be effective. The fishing for black bass is a great attraction for sportsmen and would become a great source of revenue to the Province if it were kept up, which can only be done, in his opinion, by the re-stocking of the old grounds, or the stocking of new grounds.

Fur-bearing Animals.

Mink is fully up to the standard of last year and the regulation regarding the season for this animal has proven most beneficial to the quality of the fur that has been taken in the past season. In this regard, he thinks that all trappers taking fur, whether resident or non-resident, should be licensed, because fur-bearing animals have been a source of great commercial revenue there, which revenue would soon die out if fur-bearing animals were allowed to be killed in all and any season.

In some portions of this District, it is difficult for trappers to get to towns, where they can dispose of their catch, in time to comply with the law, and he thinks some latitude should be allowed in such cases. It very often happens there where a man who has caught fur within legal limits he is unable to walk or paddle to a commercial centre and still be able to dispose of his catch legally.

Kenora, Ontario.

Muskrat is still fully holding its own as compared with the last season.

With regard to the larger game, he would say that never to his knowledge have moose been so plentiful as they are at the present time.

Scarcely a week passes but it is reported to him by men working upon the line of the Canadian Pacific Railway that moose have been killed by passing trains, and he may say that about fifty per cent. of the hunters, to whom he has issued licenses, have reported killing the one they were entitled to.

Red deer particularly and caribou are increasing in that District. Throughout the Lake of the Woods and the northern portion of that district, red deer can be seen upon any island, any stream, or any lake that one may go to. The only reason he can give for this is that they have been protected by the laws of the Province. The greatest enemy of the deer, in the past, was the number of wolves in that part of the district; but the wolf is not now reported as being very numerous in that part of the country.

Birds.

Among the game birds, the exceptionally wet year we have had affected the partridge and grouse during their hatching season, with the result that at this season the birds are very scarce.

This would also apply, in part, to the ducks, which are more scarce this year than they have been for the past thirty years, and in the case of the ducks the unusually heavy snow storms of last September had a tendency to drive these birds to the south.

In conclusion, he would suggest that every person who has use for a gun should be licensed to carry such gun, as the indiscriminate way in which firearms are now carried and used, causes many of the troubles which the officers of the Department meet with.

Warden J. H. Willmott, of Beaumaris, reports that the sporting tourist has not, he believes, met with the same success in angling as has been enjoyed for several years. The cause of this has not been from the scarcity of fish but rather from the unprecedented cold and wet season.

He would again point out the advisability of allowing the actual settler the privilege of netting herring during the month of November. At that season it would be highly improbable that other fish would be taken where herring frequent, with perhaps the exception of a few white fish which would really not signify. Many of our northern lakes abound in herring, which do not answer any other purpose than to provide food for other fish. His idea would be to issue permits for which a charge of say $2 could be made, and he has no doubt it would be cheerfully paid by the holders of such permits. He would then make it illegal for anyone not licensed to have a net in possession at any other time of the year. He would also make it compulsory for licensees to deliver up their nets to overseers at the end of November and leave them in their charge until the beginning of the following November, when they would again become possessed of them on payment of the license fee, and so on from season to season. Under the present law nets can only be seized whilst in actual operation, whereas by granting licenses they could be seized wherever found during the prohibited time for their use. During the present year a number of bass fingerlings have been deposited in the inland lakes with great success, these fish having come to hand in first-class condition, and with very little loss. This means of re-stocking is much preferable to importing

the adult fish, the mortality in the latter method being much greater than that of the former. Private parties have in several instances started hatcheries with the object of re-stocking public waters. These, he thinks, should have the assistance of the Department in procuring spawn, etc.

Deer hunters met with their usual success last season, and from enquiries and personal observations he gathers that they are holding their own. The cutting down the number to one deer per man was certainly wise legislation, and this will no doubt be the means of sparing this noble animal to us for an indefinite time.

Partridge are not so plentiful as he would wish to see. Instead of meeting with large covies, as should be the case, two or three birds are the usual limit. Possibly owing to the advanced stage of the season the covies are broken up. He is afraid the chicks suffered from the wet weather in the spring. He thinks another close season would be advisable as there is plenty of breeding stock at present.

Beaver are decidedly on the increase, and in many cases prove an actual nuisance, inasmuch that in many cases they have dammed up streams rebutting in the flooding of roads and cultivated lands. He believes the supply warrants the throwing open of our open season, as these animals have been protected since 1892. He is also convinced that the best protection we can give these animals is to have an open season every three, four or five years and to let the public be assured of this. Under these conditions settlers and others would do all they could to protect them, knowing that by so doing they would reap the benefit when the open year occurred.

Wolves are reported numerous in some sections. He believes that by raising the bounty to $25.00 for males and $50.00 for females this would be an incentive for trappers and hunters to go after them, and he feels sure many more would be destroyed. There is a great dissatisfaction evinced by hunters in their being compelled to leave their entire skin with the officials to whom they apply for the bounty, as they consider that they should have their skins or their equivalent or the current value of such.

Warden D. D. Young, of Quetico Reserve, Kawene, reports that most of his time has been taken up in building and locating trails, that is finding the best way out. The nearest railway station is Kawene about ten miles off. He has built men's building, two out-houses for stores, etc., stable and small office at French Lake, headquarters, cleared about 4 acres of land and had about 1½ acres under cultivation. Had out of the garden potatoes, carrots, turnips, cabbage, cauliflower, corn, peas, beans and beets. He considers the garden was a success. It is a grand country to grow vegetables. Built shacks at Sturgeon Narrows, Tinsley's Point, Lake La Croix, Eva Lake, also stable. Took over shacks on Eden Island and Basswood Lake from fire rangers. They require fixing up. There is another shack he understands in good repair on Rahnipim Manikok Lake. He has cut about twenty miles of trail through very thick second growth and over hill and dale, and at present making a land trail from French Lake to Kawene.

He has only been partly over the reserve, and has seen some signs of illegal trapping which he thinks was done last winter south of Edon Island by American Indians so reported. Found several trapper's shacks and traps which he had destroyed.

The Americans have Indian Reserves on Basswood Lake and opposite the south-east corner of the Quetico Game Reserve near what is known as the Iron

Monument. It is a very easy matter for them to cross over. The country has been open to trappers for years. It will take time to get used to them and make them understand it is a reserve. Our Indians kept the law fairly well. He considers the law has been well observed this summer, as he has seen no signs of misdeeds.

Quetico Game Reserve is one of nature's most beautiful spots with nature unadorned. The lakes and waters cannot be surpassed in beauty, and forests in their true light. Of course there is a great deal to be done yet, viz:—cutting trails, building landing and camping grounds for tourists. He considers it will be the greatest tourist recreation resort and fishermen's paradise on this Continent in the near future when it is known to the public. He has met people from the States who have been coming to the Reserve for years and were delighted to hear that it was made a reserve and the game and timber protected.

He understands the C.N.R. Railway are contemplating building a hotel in the near future. He would strongly recommend that the reserve be extended from Windigo Station C.N.R., to Banning west of the C.N.R. tracks, and running south from Banning to the International boundary.

The best timber on the Reserve is on Edon Island and south of it.

Game and Fish:—Moose are plentiful. Saw as many as twenty in one day.

Red deer. Saw a few.

Wolves. Heard and saw a few.

Bears scarce.

Grouse and partridge are very plentiful.

Pintail grouse seen round Kawene station.

Hares plentiful.

Duck scarce.

Geese, a few flocks passed over.

Beaver, mink and muskrat are scarce in the north end of the Reserve.

Otter, have seen none.

Fish, White fish, pickerel lake trout, pike and suckers very plentiful.

Black bass in three lakes to my knowledge, south end of the Reserve.

The pike is a different fish to what we get east, very gamey, inhabits swift water, good hard flesh even in the summer. Have caught them up to as high as 17 lbs. weight.

Since his appointment he has been over the southern part of the district as far as the town of Rainy River. The inhabitants have kept the law fairly well. He cannot say as much for the men along the railway track and foreigners. They will kill game for food at all times although the Canadian Northern Railway has issued orders that no rifle or shot guns are to be carried on hand cars.

The appointment of two overseers, one at Fort Frances the other at Emo has greatly assisted in the protection of game. The Overseer at Fort Frances having a Government launch has been able to patrol the waters of Rainy Lake which never has been done so thoroughly before and has stopped a good deal of illegal fishing and net stealing. He reported that he found three carcases of moose, but did not find the guilty parties. From reports he is sorry to say that the smaller lumber camps are the greatest law breakers they have. He understands they actually hire men at $40 to $50 a month to keep them supplied with moose, deer and fish all winter. Another scheme. They buy several licenses, shoot and conceal the dead animals and haul one at a time into camp when required. The only way to stop them in his opinion is to sell no license to anybody belonging to a

lumber camp or having any connection therewith. If reports can be believed, some camps have actually used from fifty to a hundred moose during the winter.

He might suggest that all trappers should have a license and send in a return to the Department of what they have trapped and what they have done with the pelts, so that a check could be kept on them and Americans could not pass themselves off as Canadians.

SPECIAL GAME AND FISHERY OVERSEERS.

Overseer D. Blea, of South River, reports on the Fish and Game in his district as follows: He has found the fishing has been really good, as reported to him by those who have had the pleasure of the sport, which condition, no doubt, was attributed to the unusually cool weather of the past summer. He finds the partridge not nearly as plentiful as last season, no doubt largely owing to the cold, backward spring and wet summer. He also thinks the birds would have a far better chance if the hare season was changed to the 15th of October, as it is quite common to see men and boys in the swamps with guns between the 1st and 15th of October, and when challenged they say they are hare hunting; therefore he would recommend that the open season for hares do not start before the 15th of October. As to the deer, he has pleasure in reporting them, if anything, more plentiful than last season, but would again recommend the discontinuing the sale of venison.

Overseer Henry Watson, of Toronto, reports that the past season was the worst ever experienced by the licensed fishermen in the vicinity of Toronto, caused, no doubt, by the pollution of the water, and it is getting worse every year and extends for miles out in the lake. Illegal fishing is a thing of the past around Toronto.

Both the game and fishery laws are well observed; very few infractions of the game law occur.

The rod-fishing, thanks to the despised carp, is improving. Hundreds of anglers who have discovered the proper bait to fish with put in their spare time and holidays fishing for carp, and appear to enjoy it as much as if it were salmon they were landing.

With reference to shipments coming to and passing through Toronto, the fishermen and large fish companies behaved themselves better than ever before, and it looks as if they are all taking a sensible view of the wastefulness of catching fish during the spawning season, and also those of illegal size at any time. The seizures of game and furs were about the same number as last year.

Some of the hunting parties report the deer as being very plentiful, but the same parties' bags consisted of nearly all fawns and does. The deer brought out the last few days of the season were a good sample and were most of them bucks, but previous to that the greater number of them were does and fawns.

Nearly all the hunters report very few partridge, and if we have a bad breeding season next year they will be about as scarce as they were four years ago.

WILSON'S SNIPE.
(*Gallinago delicata*)

GAME AND FISHERY OVERSEERS.

Addington County.

Overseer W. J. Donaldson, of Donaldson, reports that there have been only four domestic licenses issued to catch fish in his district.

The game and fishery laws appear to have been well observed during the past year. Although he made diligent inquiry there were no violations, excepting one, brought to his notice. This was for hounds running at large during close season. On investigation he found the case to be of so trifling a nature as not to be worth taking proceedings, so he cautioned the parties and ordered their dogs to be tied up.

Deer appear plentiful. Partridge are also on the increase. Ducks are scarce. Muskrat, mink, otter and fish are very scarce.

Overseer John E. Irish, of Vennachar, reports that he has visited the different lakes several times during the season, and no violation of the Act has come to his notice. There are no fishways in his district.

He would recommend that the close season for salmon trout be from the 1st of October until the 30th October, as they spawn one month earlier in those northern waters.

Regarding game, he finds partridge are more plentiful than last year.

Black squirrels are getting quite plentiful, as there were several seen this summer.

Ducks are quite numerous. Muskrats are scarce. There is little or no trapping done for them. Deer are not so plentiful as last year. In conclusion he is pleased to say that the Game and Fishery Laws have been well observed during the past year in his division.

He put up all the notices sent him in several places, so that hunters could see them.

Overseer H. R. Purcell, of Colebrook, reports that a number of tourists came into Beaver, Long and Mackerel Lakes, and all report good catches of bass, pickerel, maskinonge and pike. He says that with the exception of a few old nets which he took and destroyed, as they were not worth taking home and shipping, the law was well observed. The trapping last spring was fairly good, and he believes all trappers should pay a license, as those who trap cause him more trouble than deer hunters, and it is harder to catch them, and he thinks all fur dealers should pay a license.

Partridge are getting plentiful.

He thinks there is great need of a fish pond, as there is no better place in the province than Camden East—good lasting springs on the Canadian Northern Railway, which connects with the Canadian Pacific Railway and the Grand Trunk Railway and Pembroke Railway on main line of the Canadian Northern Railway. He kept up a patrol through the deer district in August, and saw three deer in a field close to Hawks Woods, only about two miles from the thriving village of Tamworth, in a section that has been settled one hundred years.

Overseer William Young, of Cloyne, reports that he has had no complaints or informations reported to him *re* violations of the game and fisheries regulations since his appointment, and he thinks the law has been very well adhered to in that respect.

Re Grey Trout. Non-residents that obtained permits and fished in the several lakes report good catches equal to last season. He would recommend the extermination of ling in the several lakes if possible. They are very destructive on trout fry and spawn, and are the cause of trout not being more plentiful than they are.

Re Bass. Better catches and better specimens are reported than last season, which speaks well for lakes stocked some few years ago by the Department, viz., Mississauga, Long and Marble Lakes, and Little Mississippi River.

He would recommend the stocking with bass of three other lakes in that locality, as follows: Loon Lake, Deer and Buck Lakes.

There have been one or two instances of the violation of the game law that he has observed in his regular trips over his district, but could not ascertain who was the guilty party or parties.

Re Deer. In territory that he has visited in his district he has to report from indications observed that they are more plentiful than last season.

Muskrats and mink are scarce. He would recommend prohibiting the trapping or sale of same for at least two years.

Partridges are as numerous as last season. He approves of the limit of ten birds in any one day's shoot.

Ducks are scarce. He attributes this to the scarcity of feeding grounds.

Algoma District.

Overseer J. R. Bradbury, of Blind River, reports that he considers the catch of marketable fish in that district considerably better than the average, and, considering the price received for some varieties, and also the increasing receipts, this has been a good year for the fishermen, and although showing a falling off in the western part, it also shows an increase in the eastern part of the district. The regulations have been fairly well observed, and no fines have been imposed this year. The stringent regulations, especially regarding the size of pickerel allowed to be shipped, have had a good effect, and he would strongly advise that regulations be enacted to protect the sturgeon in a like manner. He would advise a limit of not less than three feet. He would recommend a considerable number of small licenses throughout the district, and while they have not been successful during the summer months, it has been an advantage to quite a number throughout the winter, as there is a good demand for winter fish, and a good price has been received for mullets, pike and pickerel. The catch of bass shows no increase in the North Channel, but those fishing in the small lakes appear to have good success. Maskalonge are not plentiful, but some good specimens have been caught in the pound nets and liberated, showing a good chance for increase in the future, and altogether the fishing industry in that district is in good condition, and is holding its own, while making good returns to those engaged in fishing operations; quite a number of launches and fishing parties have visited that locality and gone away well pleased. Although the majority of them had secured their permits at the Soo and Little Current and other places, they assured him they would make this their headquarters next year. Deer and moose are fairly plentiful, although

Kakabeka Falls in Thunder Bay District.

keeping farther back than last year. The wolves are increasing every year, and are destroying many red deer. He would advise that the bounty be increased sufficient to recompense the person killing the wolves for the skins, as they require to send the skin to the department, which is the same as reducing the bounty to ten or twelve dollars; also that the overseer be given authority to take an affidavit of persons killing wolves and do away with the red tape now necessary before a bounty can be secured, as he knows of several last year who simply sold the skin to the fur-buyer, rather than take the chance of turning it over to some clerk of the Court or other person who is in no way interested in encouraging the destruction of these dangerous animals, and any change which would encourage their destruction and assist in securing the bounty should be adopted by the Department.

A very good business has been done by some trappers in mink, muskrat, fishes and fishers, and he considers that some system of license for trappers would assist in compelling fur-buyers to show where they secured their skins, thereby keeping tab on those engaged in trapping operations.

Partridge are not so plentiful this year as last, on account, perhaps, of the heavy, cold winter and hard crust on the snow, in which they sometimes bury themselves to protect them from the severe cold.

Ducks are scarce, as also geese, and only a very limited number are shot in that district. Considering the large extent of that district he considers the laws are fairly well kept: but an overseer cannot sufficiently police a district like that unless continually on the move.

Overseer Fred. Eddy, of Carterton, reports that the angling is better than in former years. Tourists report good fishing, and all fishing has been very good. Ducks are quite plentiful, not many being shot. The tourist season was not as good as former years, it being cold, and they did not stop long, and not having his boat until late, many had come and gone. Many come and stay but a few days and then go again. He took two trap nets that had been set in their waters. He notices it takes close watching or there would be many more.

Deer are quite plentiful on St. Joe Island, and there are quite a number of hunters there. Some moose were killed in season.

The law is observed on St. Joe Island quite well, but being so close to the American side parties slip over and hunt and get back before one can get to them.

Overseer Herbert Edwards, of Nairn Centre, reports that the game and fishery laws have been well observed.

There were not many fishing parties this summer, only a few with rod and lines, and those only took the fish that were in season. With regard to partridge, he keeps a very close watch for anyone breaking the laws, as there were a lot of Polocks and Bulgarians working on the A. C. Railway, but he finds everything going according to law.

Brant County.

Overseer W. W. Jackson, of St. George, reports that he has done his duty as well as he could. He has been over his ground several times, and has made two convictions for shooting black and grey squirrels, and also gave Overseer Johnson, of Brantford, his assistance on one occasion, and they made a conviction for catching bass before the season came in.

Partridge and black and grey squirrels are more plentiful than last year, also ducks. Rabbits are so plentiful that they did an amount of damage to trees last winter. Muskrats and mink are also very plentiful.

He would also like to recommend that each trapper pays a license, and that a license be put on all guns. He thinks it would be a good step towards the protection of game and also a revenue to the province.

Overseer Henry Johnson, of Brantford, reports that angling in the earlier part of the season has been better than that of former years. As to game fish, bass fishing is reported as being splendid, owing to the Grand River having been restocked from time to time, and its results are being felt. But during the months of August and September, owing to heavy rains, very little fishing was done, but October was never better, as foreigners in general confine themselves to coarse fish, which are about the same as to quantity. Trout fishing, fair. He transplanted four thousand brook trout in the Scotland Creek, which were in first-class condition, for the Brantford Trout Club.

As to game, black and grey squirrels and partridge are on the increase as to quantity. Woodcock about the same. Fur-bearing animals: muskrats are on the increase, also mink and rabbits.

The fish and game laws have been, with a few exceptions, well observed, and here he wishes to thank the different Deputy Game Wardens, also the general public, for the valuable assistance they have given him this season.

He has made several visits to the Mount Pleasant Bass Hatchery.

Overseer Jacob F. Kern, of Burford, reports that the fishing around there is good, especially the bass, several large ones having been caught; but very little fishing has been done, due, no doubt, to the wet season.

The speckled trout in the Scotland Ponds are increasing largely, and are being very carefully guarded by local fishermen.

Oakland ponds are full of fish, but no one seems to be fishing, which is, no doubt the cause of their numbers. Cooley Pond is also full of bass and pike, but is evidently deserted as regards fishermen.

Game seems plentiful, especially south of Harley, and in spite of the large numbers of muskrats caught last year they seem as plentiful as ever.

During the season he visited the hatcheries at Mt. Pleasant, and was much interested in the work accomplished. Mr. Edwards, the overseer, spared no pains to explain the working of the several ponds. This hatchery is one of the sights around there, and when fully completed, as explained by Mr. Edwards, it will be worth anyone's while to visit these ponds.

Bruce County.

Overseer J. W. Jermyn, of Wiarton, reports that he regrets to state this season has been the worst the fishermen have experienced in many years. The spring opened up very late, and during the summer the fishing was very light, and many of the sail-boats stopped operating, as it did not pay, and even some of the tugs ran in debt. Then this fall, the fish did not come on the shoals until about the 15th or 20th of this month. And all this season it has been so windy they could not lift or set nets. The last three weeks have been a continuous storm with heavy gales, so that the best tugs did not leave their docks for a week at a time. In that part of Georgian Bay there have been very few fish taken. The

Dominion Fish Company have not over 15,000 lbs. in their freezer, and last season at this date they had 80,000 lbs. The fish hatcheries there have no spawn gathered, which is the reason that little or no fish were taken this season.

He says it is much to be regretted that in some parts of that division there are fishermen who have no regard for the fishery laws, but violate them by setting night lines with baited hooks attached. This season he feels certain that he has lifted and destroyed upwards of thirty miles in length of those lines. On one occasion he caught two of the offenders, took them before a police magistrate and got both convicted. Fined $25.00 and costs each. He considered it had a good effect in deterring others. There were nearly one hundred deer shot on that peninsula last fall, the game law in this respect being well observed, the hunters rendering valuable assistance in enforcing the laws. Partridges and rabbits are plentiful. Ducks are scarcer than other years. Fur-bearing animals are increasing. There was over three thousand dollars paid out for raw furs there last winter. Those comprised fox, coon, skunk, mink, muskrats and a few bears. Those have certainly been increasing, or the hunters and trappers have been more diligent in their work.

Overseer D. Kehoe, of Millarton, reports that he has not had any conviction in his division the past year, and nothing has come to his notice of any illegal work *re* either the game or fisheries laws. Game is very scarce in part of his division, but more plentiful in the eastern part of the county. He is satisfied the fishermen are trying to observe the law.

Overseer W. J. Trelford, of Southampton, reports that he has been over the district several times this season between Southampton and Tobermory, and finds that fishing has been very good up till October, and after that it has been very light on account of such stormy weather. The tugs and boats at Southampton have not brought in one ton of fish in twenty days in October, and there have been very few whitefish caught this season. The tourists are coming more every season to this district. There are quite a few from the United States, and they are trying to live up to the laws pretty well. There is good bass and pickerel fishing along the shore from Southampton to Pike Bay. He was up the shore quite a few times in July and August, and was watching them pretty close. He finds that hare are very plentiful this season, but there is some skin disease amongst them. Wild ducks are plentiful. Black squirrel are very scarce on account of the country getting cleared up.

Carlton County.

Overseer Adam Greene, of Diamond, reports that fishing was good this season. Bass and pickerel were plentiful, also all kinds of coarse fish. Partridges are plentiful this season, for the shooting of them comes in so late. They are well able to take care of themselves. Duck is not so plentiful. Deer is increasing, and they have a few beaver on the Carp River, about two miles from the mouth.

The law has been well observed.

Overseer E. T. Loveday, of Ottawa, reports that the past year has been almost a repetition of the last few years. Quite a number of seizures have been made and owners of illegal game, etc., have been prosecuted and heavy fines imposed and paid. But he believes on the whole the general public are more inclined to

game and fish protection. There are more people go out hunting and fishing, but now-a-days they get a copy of the game laws or find out just how they stand. It is nothing for him to be called on by phone from 20 to 30 times during the 24-hour day and night to answer questions about the game laws.

He has patrolled the upper Ottawa River very often and the lower Ottawa occasionally, also the Rideau River district. The Government patrol boat has made several trips down the river where some 25 nets were seized. Fishing, he says, has been very good. Others say it has been "poor." He has not much time to fish when out, but on Labour Day his son and himself put in about five hours at a point about ten miles above the city. Their catch was eleven bass, nine pickerel (dore), three pike and half a dozen perch. They had one bass of 5¼ lbs., 2 of 4½, and others were a good size. They used live minnows for bait. Bass seem to be holding their own in size, but pickerel are smaller in size each year. About two hundred dollars has been collected for licenses during the year. He would recommend that a quantity of small black bass be put in Lake Deschenes, as he believes has been done at other places. He has just come home after a trip up the Ottawa, where he seized six guns from parties shooting on Sunday, and the owners may be prosecuted later on. Ducks are plentiful but very hard to get. They keep to the open water mostly. Plover were plentiful during the summer, but have disappeared since the open season. He has heard that partridge are plentiful, but so far has not been out after any.

A gentleman wished to know if he could go up the Gatineau district and buy partridge, and he told him (the overseer) that he could get all the birds he wanted at 30 cents per brace. This is different to two years ago when the price ran from $2.50 to $3.00 a brace. Of course there will not be a bird left alive. Every farmer and his family will hunt, as they all have guns, and will kill all they can, for no matter how little they get for them they consider it clear gain. Every one in Ottawa will lay in a stock for winter eating. It seems a pity to have this nice bird slaughtered, but he supposes they will go like the wild pigeon. He thinks it is time some restriction was placed on people carrying guns. If it was made compulsory for everyone to take out a gun license there would not be so many out with guns, and the Government would make a nice fat revenue, say $100 a year. No sportsman would mind this amount, and then they could get after those who had not a license. He would also recommend that the open season for muskrat be shortened considerably. There is no doubt that at the rate muskrat pelts have advanced during the past few years they will become very valuable as a common fur before long. A gentleman phoned him that he shot 37 ducks in a few days within 15 miles of the city limits.

Overseer William Major, of Woodlawn, reports that the ten months past have been well overseered in his district. Fish was not very plentiful this year. Pike is scarce this summer, also bullheads, sunfish and pickerel. No illegal fishing or shooting done. Everything in good order in the past season. Some ducks, but not very plentiful. Partridge are scarce, also geese. Not many muskrats were caught this spring. The water is pretty high in the creeks and lakes this year, owing to the heavy rains.

Overseer D. E. Younghusband, of South March, reports that during the past year there have been no complaints of illegal fishing, and the fish and game laws appear to have been well observed. The angling season was fairly good. No permits were sold, and none were asked for. The principal fish in that district

are bass, pike, pickerel, white fish, sun fish, sucker, bull heads, and perch, with some catfish and some sturgeon and an odd maskinonge. Some Sunday shooting by young boys was reported and they were warned to cease such practices. The warning had the desired effect.

Local hunters appreciated the change of season for duck and shot a goodly number. Partridge are quite plentiful, and a good season is expected. There are not many deer in his locality, but mink and muskrat are quite numerous.

Dufferin County.

Overseer George Moffatt, of Glen Cross, reports that the fish in his division are trout, and he found them more numerous than last year in the small streams, but in the rivers they were not so plentiful on account of the spring floods washing away the dams. The fur-bearing animals such as mink, red fox and muskrat are getting scarce on account of the value of their fur. The laws have been well observed in his district. No violations have come to his notice. He would recommend a close season or two for trout, muskrat and mink.

Overseer John Small of Grand Valley, reports that fishing has been good this season, and deer is getting more plentiful on account of their being protected for a few years.

Ducks and geese have been very plentiful this season.

Mink are very scarce.

The law has been well observed. There have been no violations. He has been taking a great interest in preserving the game.

Durham County.

Overseer S. G. Pickell, of Bowmanville, reports fishing to be the best there has been for years. Pike, bass, perch and carp are very plentiful. Speckled trout is also plentiful in the trout creeks.

The wood hare is not as plentiful as in former years, but the cotton tail rabbit is more numerous than ever before.

The partridge in his territory, Durham County, are holding their own, considering the way the timber and breeding ground is cut away.

The muskrats in his territory are not as plentiful as in former years. They are kept trapped off too close. He is strongly in favour of the Department abandoning all trapping or killing of muskrats for two years.

There have been more ducks in his locality this autumn than for the last twenty-two years. It is believed by the duck hunters in his district that protecting the ducks in the spring has all to do with the ducks being so plentiful.

He has had no occasion to arrest or fine anyone. He has in his hunting ground some true sportsmen who give him considerable assistance.

Overseer C. Twamley, of Caran, reports that the speckled trout are more plentiful this year. The law was fairly well observed, and he would strongly recommend the close season to commence the first day of September.

The bass are very scarce, coming up the creek from the Otonabee River, he thinks owing to the Peterboro' sewage. The river was high so late in the season that the spawn was all hatched and out and none destroyed.

Black duck were never more plentiful than this season in that locality.

Partridge are very plentiful, and seem to be increasing.

Black squirrels are very plentiful. Mink are scarce. Muskrats are getting more plentiful and he thinks the close season should commence the 15th day of April.

Overseer John Watson, of Ceasarea, reports that the game and fishery laws have been fairly well observed in his division, excepting shooting. Before and after sunset this is a very hard act to enforce, still he has it fairly well under control at present. He has just made four convictions in the past year, one for trapping muskrat out of season, one for trapping mink, and two for trapping on Sunday, and he has found no traps on the same creeks this season as he did last year.

He says that mink are very scarce. They should have more protection by a shorter season. Muskrat are none too plentiful. The open season for them should be from the 1st of April to the 1st of May. Black duck are very plentiful, the first of the season, more so than in years past, but the open season coming in the first of September, and the weather being hot, there are a lot of them lost, and he would advise the open season to be put back to the 15th September.

There do not appear to be many fall duck. Geese were plentiful last spring.

Partridge are getting more plentiful every year in his division. Rabbits are plentiful, but he thinks that it would be much better to have the open season for them come in on the 15th October and extend it to the 1st January, as the hunters all want to get out on the first day of the season, and there are a lot of rabbits wasted by the hot weather, and besides this, it would give more sport during Christmas. He would advise that all hounds and other dogs that will run rabbits be tied up during the months of April, May, June and July, as they run down and kill the old rabbits when heavy with young and before they can get out of their way.

He would advise that the open season for mink be from the 1st of November to the 1st of January.

Maskinonge and bass fishing have not been much good in Scugog Lake the past summer on account of the hard winter. Some of them died out, and others did not bite much from the affects. But if nothing happens to them this winter they will catch lots of them next summer.

He would also advise cutting down the catch to two maskinonge and four bass for each man per day.

Speckled trout fishing he would advise to be shut out for at least two years, as some of the creeks that had lots of trout in have none in now, and the open season for trout should be from the 1st of May to the 1st of September, as he found them spawning on the 28th August this season.

Elgin County.

Overseer Kenneth McClennan, of Gravesend, reports that during the spring of 1912 white fish was very plentiful. He thinks they had the largest lifts and probably the best prices in his experience.

During the summer months fishing was very light, owing to the prices being so low for herring. About the first of October white fish became quite plentiful. They are on the increase very fast, which he thinks is due largely to the propa-

The "Athene," patrolling the waters of Lake Erie, River Detroit and Lake St. Clair.

gation of this species at the hatcheries, which he thinks is a move in the right direction. He would strongly recommend a hatchery at Port Stanley. The fishery regulations have been well observed in his division.

The game is about the same as in former years. Black and grey squirrels are quite plentiful. Raccoon is also on the increase. Quail is almost extinct in that county.

He would recommend that open season for quail be done away with for five years.

Overseer A. McEwen, of Aldboro, reports that there are few changes to note during the year 1912. With respect to the fisheries, the most notable feature is the enormous catch of herring made in the fall by the tugs running out of Port Stanley, bringing in as high as 200 tons a day. The absence of any sturgeon for the past few years would seem to indicate that the waters there have been depleted of this kind of fish. Game of all kinds is very scarce. Very few quail or partridge. Black squirrels are to be found in greater numbers than in former years.

Essex County.

Overseer A. Drouillard, of Walkerville, reports that he is pleased to say the catch has increased considerably since his last annual report, and notwithstanding this fact, the law has been surprisingly well observed, and as an evidence of this he might mention that out of the great quantity of fish which he has inspected at the various stations in his district, but one box has he been obliged to seize.

He would, however, be pleased to offer a suggestion gathered from his observations, that some restrictions might justifiably be placed against the taking of small blues and perch, as it appears to him such privileges are not in the interests of the general public.

Overseer H. A. Henderson, of Pelee Island, reports that during the year of 1912 the catch of fish has been very light; but his opinion is that there was a little increase. The angling has been very light this season, the game very scarce. The game laws have been strictly observed. No illegal fishing has come under his notice.

Overseer R. Laframboise, of Canard River, reports that he has been over his division on different occasions, and is pleased to say that everything was satisfactory as far as fishing is concerned. No illegal fishing came to his knowledge during the present year. The whitefish fishing has been very good up to date this fall, but carp seems to be on the decrease, but all other fish, such as bass, pickerel and perch, seem to hold their own. The anglers are well pleased with the change that the Department made in the price of permits, though they report a small catch for the present season.

Re Game.—River ducks have been very plentiful during this last spring, but not many this fall to date. Marsh ducks have been very plentiful during the month of August and the first part of September, that is, Mallards, Black Mallards and Wood Ducks. Quails seem to be as plentiful this fall as they have been for this last two or three years. He has seen three or four bevies himself during the months of August and September. Black and grey squirrels are very scarce in his division, he thinks on account of having very little of bush land. Geese were also quite plentiful last spring. Rabbits are very plentiful in his division.

Muskrats are quite numerous yet, though the price was not quite as high last winter as the winter before, and he would recommend that a small fee be charged to those who want to hunt them. The game laws have been fairly well observed in his division.

Overseer M. W. Scott, of Leamington, reports that the season has been very good for fishing purposes, and every prospect of its continuance to a late date of the season. Whitefish and herring seem more plentiful than for some years heretofore, as these two varieties seem to be on the increase in these waters, he would think on account of the aid of the fish hatcheries.

Game of all kinds in his district is almost extinct, hardly a quail to be seen. No partridge, no squirrel, ducks very scarce. On account of the light open weather continuing so late very few have been killed.

Frontenac County.

Overseer James B. Angrove, of Kingston, reports that since the 15th of June last he has visited all portions of his district several times, and has discovered no illegal fishing nor any other breaches of the laws and regulations. Bass and other game fish were plentiful this season in his district. The fishing in the St. Lawrence River adjacent to Kingston was very good indeed.

The tourist season this year did not come up to the usual number of visitors, owing to the very cool and wet weather which prevailed most of the summer.

Ducks were to be seen in large numbers, and several times he has met hunters who had success in their outings.

He has not seen many black squirrels during his visits, but red ones abounded in large numbers at all points.

He is very gratified to be able to report that throughout his district the laws and regulations of the Department have been very uniformly obeyed.

Overseer M. Avery, of Sharbot Lake, reports that the fishing has been good this season, but on account of so much wet weather there has not been as many out as other years. The partridge are very plentiful this year, and ducks more than other years. Deer are quite plentiful around there.

He finds the people have kept the law very well, except fishing. He has taken three nets out of the waters of Sharbot Lake, and had he not watched closely he thinks there would have been more nets out in that section.

He has had no trace of partridge being shot or shipped, and keeping over the ground keeps hunters from breaking the law.

Overseer George Barr, of Harrowsmith, reports that the angling in Fourteen Island and Long Lakes were excellent, in rock and silver fair, and in Desert Lake angling for salmon trout and bass was above average.

The pike in Long, Silver and Rock lakes was infected with cancerous sores, and many are dying owing to high water. Up to four years ago a raft of logs went down these waters in May, and the dams were then opened and the water let off. The fishingwas better where water was low, and there was no disease among the fish. He has examined Fourteen Island Lake and Petworth Dams several times during the summer and there is no fishing in either. On the 25th June, there was a large number of dead fish around the Fourteen Island Lake Dam. Muskrat trapping this spring was good. He thinks it advisable to allow no

trapping until March, to prohibit shooting of muskrat altogether, and charge a small license fee, as trappers will be trapping for muskrat and mink and be catching otter, and unless he was a trapper himself he could not detect them.

Partridge and rabbits are becoming plentiful. Ducks are quite plentiful.

Black and grey squirrels are quite numerous.

On the 15th April, had one man fined for cutting a muskrat house.

On May 8th, had one man up before the magistrate on charge of catching otter. Could not get sufficient proof to convict him.

The tourist trade is on the increase, having sold three permits as against none last season.

Overseer M. Cox, of Howe Island, reports that as there are no licenses issued and no illegal fishing going on in his district, game and fish are on the increase.

Anglers report good sport the last summer.

Overseer J. W. Davis, of Sydenham, reports that the fishing in his district the past season has been fairly good, especially in the back lakes. Partridges are plentiful, but ducks and woodcock are scarce, and, owing to the severity of last winter, black and grey squirrels are very scarce.

Muskrats are not as plentiful as they were a few years ago. The marshes in this township are small and trappers can take nearly all the rats each season, leaving very few for breeding.

Mink are more numerous this season than for the past five years.

The people in the vicinity of the lakes take an interest in preserving both fish and game.

Overseer Henry Drew, of Long Lake, reports that, having kept close watch over all parts of his district, he believes the laws were strictly observed. He finds the fish have been increasing both in quantity and quality the last three years in the Inland Lakes in his district.

As to game, partridges are getting quite numerous, also ducks are on the increase. Regarding deer in the north part of his district, the wolves are simply driving them out and destroying them. He would strongly advise a larger bounty on the wolf. He believes it would induce parties to kill more of them.

Overseer James Fisher, of Sunbury, reports that the fish and game laws have been well observed in his district this year, very few complaints coming to his notice, and upon investigating them he could not see any illegal work going on.

The bass and salmon seemed to be very numerous this season, the tourists always reporting good catches. The black and grey squirrel are not very plentiful this year. The partridges are more plentiful than in former years. The ducks are very numerous, although a great deal of shooting is being done.

Muskrat and mink are very scarce in that district.

Overseer George Gates, of Whitmount, reports that fish were as plentiful in his district—the Rideau Canal—as in other years, trolling being very good. No violations of the laws came to his knowledge. Dog fish are very plentiful. He thinks there ought to be some remedy for them, there being as many as twenty-four caught in one set of nets.

Partridges are very scarce this season, but ducks are more plentiful than in former years.

He thinks there ought to be a law for the protection of muskrats as they are getting very scarce. He found a good many houses cut open and captured some traps.

Overseer Henry Holliday, of Wolfe Island, reports that during the year the fishing in his district has been good, bass being being very plentiful all season, and of good size, never had better bass fishing. Pike, pickerel and maskinonge were plentiful, and the net fishermen have had good catches. Salmon very plentiful: whitefish not very good in October. Hoop net fishing was on an average with other years, and good catches of other coarse fish. There has been no illegal fishing in his district with net or lines. There have been no fines, and the law has been well observed.

Wild ducks have been very plentiful all season, and the hunters have had good hunting. Muskrats are getting very scarce in his district. He would advise the close season for trapping until the middle of March.

Overseer J. A. Kennedy, of Tichborne, reports that black bass fishing was not so good in that district, owing largely to lake shore road of C. P. R. being built through there, and blasting drives fish into deep water: however, some good catches were made.

Pickerel are larger than last year he thinks.

The work began in 1911 regarding ling and other coarse fish. It should be continued, or hoop-net license should be granted.

Game. Partridges are plentiful, but ducks are scarce.

Mink and rats are on the increase. He sold thirty-two permits to anglers.

The law is being fairly well observed. The settlers are beginning to see that the object of the department is to preserve fish and game.

Overseer William Truelove, of Fermoy, reports that the law in his district has been well kept. Bass fishing has been good, also pickerel, salmon fishing rather poor, and he thinks the close season on salmon should commence on the 15th October, and end on November the 30th. This would protect the salmon, as they run about the 20th generally, salmon trout about the 15th November, one month later.

Ducks are on the increase, especially black ones.

Partridges are getting very plentiful.

Mink are on the increase.

Muskrats scarce.

Racoons are not bothering the farmers' cornfields much.

Fox are still after the turkeys in spite of all that are shot by the fox hunters during the winter months.

Black squirrels are plentiful, and there are some grey ones.

Red deer have increased wonderfully in the last two years. They seem to be nearly as plentiful as in the years of the old settlers.

Tourists are still adding to their cottages and it looks as though they intend to come back next year.

Overseer H. E. Wartman, of Portsmouth, reports that the bass this year was slightly on the increase, some good sized ones were reported caught.

The law was well observed. He heard of one or two illegal nets, but could not find them. Ducks of all kinds are numerous, especially blue bills, plover and snipe about the same as last year. Muskrats appear to be quite plentiful. He had heard of quite a few mink being seen this fall.

Overseer W. L. Wormworth, of Arden, reports that the fishing was very good in most of the lakes in that neighborhood, and a large number of tourists were attracted. A party from Toronto has built a club house, called the Toronto Cross Lake Fishing Club, and have also built a number of cottages on their grounds. One of the summer hotels was full to its utmost capacity most of the summer.

A quantity of bass fry was put into Big Clear Lake this summer.

The deer hunting season was good, nearly every one getting his number. There were quite a number of campers, most of them buying deer hunting licenses. They would like the open season changed, commencing on the 15th November. They say that there would not so many wounded deer get away, as there would be snow then, and they could be tracked better.

Partridge were quite plentiful.

There were no violations of the Game Laws that he knew of.

Grenville County.

Overseer J. H. Boyd, of Merrickville, reports that he thinks the fish have increased considerably in the last year, especially coarse fish.

The people seem well pleased with the way the fish have been protected by not allowing bag nets. There have been quite a few tourists for fishing season and they expect quite a few next year. There has been considerable maskinonge caught this year and they have been exceptionally large.

He has sold thirty-one licenses for dip nets. Fined three men for illegal fishing, confiscated four nets.

There are quite a number of deer in that vicinity. They have had very little trouble with the hounds hunting the deer this year. He caused one hound to be shot to save fine. Sold three deer licenses.

Ducks are very numerous, they have increased greatly in the last couple of years. There has been quite a number of them shot.

Partridge are increasing very rapidly.

Muskrats are very numerous and a great many have been caught in the last year. Would recommend them to be licensed as the best hunters recommend this.

Mink are about the same as last year. On the whole the laws have been very well observed.

Overseer James A. Fraser, of Prescott, reports that since his last report there has not been much illegal work in his district, and what there was, was of a small nature, except one, viz., an American fishing with night lines, and he got about 3,000 hooks he had set.

Fishing in that part of the St. Lawrence was not so good as in former years, and all agree that it was the high water especially in the early part of the season.

Bass was scarce, and he would recommend that some fry be put in that part of the river.

Pickerel was more plentiful than for years. They seem to be gradually increasing every year. Eight or ten years ago they were a rare thing around there.

Ducks are on the increase. Last spring the river was full, and they seemed to be very tame, not being shot at all the time.

Partridges are the same, while rabbits and squirrels are scarce, being hunted by so many, especially boys, who are becoming a nuisance, for when they can't find game they shoot at anything they can find, even to cows, one man having had a cow killed that way; and he would also recommend that a gun license be charged everyone who hunts with a gun, which he thinks might help to lessen this nuisance.

The "Laura" was launched in April, and did good work till August, when she became hard to start, and is now laid up to have her engine sent to the shop.

Grey County.

Overseer James Gillespie, of Berkeley, reports that as usual his duties in regard to fisheries are more particularly to look after small streams and lakes in that district with a view to preventing, if possible, the illegal taking of speckled trout. The notices sent out by the Department last year offering ten dollars reward for information that would lead to the convictions of any party or parties guilty of illegal fishing in Bell's Lake or Ewart's Lake, were again posted around those lakes this year, and he believes they were of benefit in warning the public that the practice of illegal fishing would be dangerous. He visited the above lakes quite often during the months since the ice broke up last spring, often using the boat furnished him by the Department, and going all over those lakes, having a drag with him which he frequently used looking for nets. On several occasions he has been at the lakes before daylight, at other times after night. The fact that it was known that he was likely to drop around at any time had he believes the effect of making people cautious, and he believes that very few (if any) fish were caught illegally. This was not considered a good season for angling, less fish being caught in those lakes than has been the average for some years. The very wet season may in part account for it. In May last he went out with Mr. Watson of Toronto, who had with him several thousand of speckled trout fry, some of which were put in what is known as Ford's Mill Dam on the Saugeen River near Makdale, and the balance in Ewart's Lake.

Many anglers tell him that more speckled trout spawn is destroyed in the early part of September than would be in the latter part of April, and he would like to see the open season begin April 20th, and close on the last day of August. He has his eyes and ears open at all times trying to get information, and has arranged with some parties to let him know if they notice anything suspicious. He received a hint during the summer that some parties were trying to arrange to buy some speckled trout to take out of Markdale, and took a few trips to that village, which he thinks was the means of stopping that business. He took several trips to Chatsworth during the summer, and posted up the regulations in several places in the village and along the different streams so people would know the law. He heard a couple of parties complaining that some were breaking the law, but they could not produce the least bit of evidence that such was the case, while the general opinion was that the law was being well observed. He went out to Kimberley in November last and found that a boy there had caught some muskrats in close season, and this his father acknowledged. The boy went with him to a justice of the peace where he laid an information. He put in a defence first that he did not know the law, and second that the animals were damaging property. He reported the matter to the Department, and left the

case in the hands of the Magistrate who dealt with it as the law provides. The notices from the Department were all distributed through the district, and posted up so that people would have a chance to know the law.

No angling permits were sold by him and none were asked for.

During the summer he discovered one set line in Ewart's Lake, the only one he has come across so far. He had particularly warned people against using them. No infractions of the game laws have come to his notice, and he believes the law has been fairly well observed.

Overseer James Myers, of Orchard, Ontario, reports that the chief fish in his district is speckled trout: the catches this year were fairly good. He examined more trout this year than last year.

The high water mark this spring took away five dams in his district, and none of them have been rebuilt yet, leaving a free run for the trout for winter. There are no speckled trout sold in his district that he is aware of, and no fishing out of season that he knows or hears of.

Last March, about the 27th, he was informed that there was a deer killed in Proton about the 14th. He made two visits there, and with another man called on several parties, but failed to get the information as to who killed the deer. He wrote to a man in the summer to find if he could let him know if he heard anything, but he said he did not. About the last of April he examined a parcel of furs at Holstein, and being expressed by a man from Proton to London, Ontario, but found them all right.

All that came to his notice he reported to the Department. He has his district fairly well posted with the game and fish laws.

Overseer T. McKenny of Thornbury reports that the fishing has been somewhat lighter this season than last, owing in part to adverse weather conditions throughout the season. He regrets to say that during the season there has been a good deal of illegal fishing principally with night lines in Owen Sound Bay and in the vicinity of Griffith's Island.

He has seized over seven miles of these lines, and in conjunction with the very efficient overseer of the Department, Mr. Jermyn of Wiarton, twelve miles of these lines were seized in one string. These lines are very difficult to locate, and all kinds of devices are used to prevent detection. One is not to put buoys on but to set nets on ranges known only to the setter, who knowing the exact location drags for and finds them. Another plan is to set legal sized nets, (generally herring nets) at each end and between them, night lines making it imperative to lift strings of nets to find lines, and as part of the outfit is insignificant as compared to nets, the seizing of illegal lines is not regarded as a very serious loss. He would suggest that the penalty for this class of illegal fishing be made more severe as a deterrent to these law breakers.

He has during the season seized some six or seven thousand yards of net, some for being illegally set and others for being of illegal mesh dimensions, principally herring nets some of which measured only 2⅛ inch instead of three inches as directed, but the 3 inch measure is too large for successful herring fishing in Georgian Bay, herring being much smaller than in the Great Lakes. He would suggest the advisability of making legal size 2½ inches extension measure.

This fall, by authority of the Department, he engaged the fishing tug "T. R. Morrill" to patrol Grey and Bruce Divisions which enabled him to seize a large quantity of nets, two boats, one tent, and also trout hooks and lines. The

employment of this tug had a splendid influence and prevented many from illegal fishing, and he feels confident the Bay is practically free from nets or lines at the present in consequence of this wise expenditure by the Department.

Overseer Thomas W. Robinson, of Collingwood, reports that during the first three months of the year fishing was not very good, and during the months of July, August, and September there was practically no fishing in this district. Most of the fishermen took their nets up and did not fish until the month of October, when the fishing was fairly good, especially the ten days' extension. There were more salmon trout than white fish.

All streams are free for fish to ascend, no obstructions being in the way, nor any rubbish to pollute the water.

Haldimand County.

Overseer Edward Lee, of Low Banks, reports that the catch of fish in his district has been much in excess of last season. Very heavy catches of herring were taken by pound nets which seem to be on the increase. The tugs fishing out of Port Maitland have also had a more profitable season than last year, there being about 90 per cent. of fish caught and shipped to the United States. No abuses exist.

The close seasons have been well observed.

Quail are not as numerous as in former years. Squirrels getting scarce and only found in some localities. Other small game quite plentiful.

Overseer James Vokes, of Nanticoke, reports, that the gill net fishing with tugs has been exceptionally good, both from Port Maitland and Port Dover. The fishermen report the best results in three years. Whitefish were plentiful, both fall and spring. Herring were very plentiful and of large size as caught by the Port Dover tugs, but although some big catches were brought into Port Maitland, the fish were somewhat smaller.

The gill net fishing for pickerel was very good last fall, and a fair run is reported all summer. No infractions of the law came to his notice amongst the tug licenses. The pound net fishing has also been very good this year. Last fall, however, the catch of whitefish was considerably lower than for two or three years previous. This, however, was entirely owing to the heavy weather on the lake putting so many of the nets out of business. The fish appeared to be along shore in big numbers, but it was impossible to take them. This season they appear to be coming in very nicely so far.

Herring were also very plentiful at times, but the price was very low, and large quantities were allowed to escape back into the water uninjured. The herring in the pound nets were not so large as those brought in by the gill net men. A good steady run of blue pickerel was secured.

The catch of sturgeon has been exceptionally good. No big hauls at any one time are reported, but the fish have been coming in steadily all summer and were of good size. Not much caviare was taken. Coarse and mixed fish were very plentiful.

Perch were not quite up to the average.

The law was well observed by the pound net fishermen.

The spawn takers last season did not do much last fall, owing to the bad weather, but they have now started taking spawn again this fall. They appear to have made special preparations for handling the spawn in a thoroughly up-to-date manner.

There is not much angling goes on in his district. It was not very good at Port Maitland, but the residents in and around Caledonia report good angling on account of the breaking of the dam at York letting the fish go up the river.

Game. Black squirrel appear to be on the increase. Complaints were received by him about shooting out of season, but on investigation he found it impossible to trace up the guilty parties.

Muskrats also appear to be on the increase in all the streams. It is a hard matter to thoroughly protect these little animals, but owing to previous convictions the law is better observed than formerly. Mink are rather scarce in that neighbourhood.

He has not heard of any quail being seen in that district for some time. Probably the close season will increase their numbers.

Woodcock in good numbers were along the Grand River.

Plover were plentiful, and large numbers were secured for a few days after the season opened.

He fined three men from the neighbouring county of Norfolk for illegal fishing in the waters of the Nanticoke creek, which he thinks was a salutary lesson to others.

Complaints twice reached him about Sunday shooting along the Grand River, but he was not successful in bringing the guilty parties to justice.

Haliburton County.

Overseer M. Maybee, of Cameron, reports, that there was no winter fishing that he could hear of. Ducks were plentiful this season, especially the first part of the season. The muskrats were not disturbed until open season. The catch of muskrats was better than usual this spring. Through the spawning season the fish were well protected by rain, high winds and cold weather. The angling season has been poor, excessive rains and high water the cause. Some good catches were made the first of the season, generally of a large size. Some maskinonge up to 22 lbs. were caught. He would advise that the close season for maskinonge and bass start the first of April, for it is difficult to tell by the scales around a trapper's tent whether they were caught on a line, and in an early spring they start spawning the first part of April. Partridge seem to be plentiful in some localities, especially on dry grounds, as it was a wet season in hatching time. Frogs are still scarce. Rabbits are plentiful. The law has been well kept, and no violations have come under his notice. He must give the duck hunters credit. They never fired a shot on Sunday, the first day of duck shooting on his territory, Sturgeon Lake or Goose Lake and McLaren's Creek.

William H. Switzer, of Gooderham, reports, that the close season for fish was well observed. No illegal fishing came to his notice. The salmon trout catch was up to the average of last year, also bass. He visited several lakes in his district and saw some fine catches of fish. There are both salmon and bass. There are salmon trout, speckled trout and black bass in the waters. In his division all fish caught, as far as he knows, were used for home consumption. There are no

fishways in his district. The mill owners have observed the law fairly well. No tourists visited his district, as far as he knows. There are some fine lakes in his district that have no game. If those lakes were stocked with salmon trout and bass and pickerel they would soon have their share of tourists. The game laws were well observed. He did not hear of any illegal hunting going on, except one instant. He heard of some deer dogs running at large. The hunters of 1911 say the deer was not up to the average of the year 1910. If dogs were prohibited for a few years deer would soon increase. There are beaver, otter, mink and muskrats, but no black or grey squirrels in his district.

Halton County.

Overseer R. M. Brown, of Milton, reports, that, as to fish the only kind they have there is a fine speckled trout, and they are fast disappearing. If the farmers along the stream would shut off fishing there would soon be plenty.

The law has been very well observed, except by Italians who kill everything that comes in sight. Many there would like to see a fish pass at Oakville, and at Zimmerman. They are also in favour of a gun license.

Partridge have increased wonderfully, also black and grey squirrels. Thanks to the three years' protection, fur-bearing animals are about the same as last year, except for mink which is not so plentiful.

Overseer W. Sargent, of Bronte, reports, that he has been over his division a number of times during the year and has always found the law well observed. He does not think the herring fishing is quite so good as the former year, but he is pleased to report that whitefish is increasing both in size and number. He has weighed one catch of whitefish himself which was 500 lbs., and the fish would all average from 3 to 5 lbs. each.

Also there is a samll increase in the salmon trout and some very fine species caught. He noticed quite a number weighing from 12 to 18 lbs. each.

But he is strongly opposed to the extension of ten days allowed to fishermen during November, as most all the fish caught during that time are spawners, parent fish which should not be disturbed, as they are in on their spawning beds and in the midst of their propagating season, and will ruin our whitefish and trout if continued. Angling in the 12 and 16 mile creek is about the same as in former years. He might say that all fish are sold at home market, Toronto being the principal market, and fair prices are received.

There is very little game in his division. He notices quite an increase in the squirrels, that he attributes to the law in the county of Halton prohibiting squirrels being shot, and the same in regard to partridge.

Hastings County.

Overseer H. C. Armstrong, of Glen Ross, reports that the overseeing of his division has been quite agreeable to himself. The residents along the stream and in the vicinity assist him in seeing that the law is enforced. He has had no trouble with the foreigners, as they are keeping within the law. He has had occasion to visit and inspect the shipments of fish, which were very satisfactory. He seized one net, and had reports of others, but could not find them upon grappling. Some trouble was caused by eel racks being allowed in the River Trent, and complaints of same came to him, which caused the removal of same, but he is

satisfied it was caused by the enmity of certain persons. He maintains that the eels being removed is a benefit to the multiplying of all game fish, and would suggest that eels be allowed to be caught under a license in the River Trent, under the inspection of the overseer, nets being allowed by being reversed, the mouth of the nets being placed up stream, thus avoiding the catch of game fish. He finds that game fish of all kinds are increasing, and the increase would be still greater if the Red Horse Sucker and Pike were got rid of by some means. He also finds that partridge and black and grey squirrels are increasing greatly. The cotton-tail rabbit is becoming very numerous, so much so that they are doing damage to young orchards in several of the surrounding districts, and would advise that they be allowed to be shot at all seasons.

Overseer Robert T. Bonter, of Marmora, reports that in his report of what has come under his observation he might say he has made several searches for nets with very little success with the exception of finding two hoop nets. He would ask and recommend the Department to allow overseers to offer small rewards to settlers for the taking up of such nets and other unlawful appliances and bring to the overseer. And also for information that would lead to conviction of the illegal deer and partridge shooting reported to go on in isolated parts of the township, which seems impossible to get at other ways.

It would be a great improvement to allow Overseers to have the selling of the deer licenses as it would allow them to know who had licenses, and to what parts of the township hunting parties went, as it would save a lot of driving and inquiries as to who had licenses.

Partridge are plentiful in this district.

Overseer Thomas Gault, of Deseronto, reports that he has found during his patrol this season that the fish have been plentiful, especially hoop net fishing.

Anglers had a good season. The bass were a fair size.

Whitefish are just coming up the bay and are late spawning.

He made a seizure of 6,000 yards of gill nets at Point Ann. On the whole the laws were very well observed. Game: Duck shooting and small game was good and rats were scarce.

Overseer John Haggerty, of Gilmour, reports, that deer are quite plentiful. Partridge are not very plentiful.

Beaver are quite numerous near the settlement, but there are not so many in the centre of the forest. He thinks they have been pretty well caught out.

Trout and bass are quite plentiful. There are not many mink and muskrats.

He has looked after his division as well as he could, and had had no occasion to fine anyone, as there has been no violations that he knows of excepting a person who killed two partridge on the 14th of October, and he has not settled with him yet.

Overseer J. A. Moore, of Trenton, reports, that game and fish are very scarce in the Bay of Quinte waters, in fact in all the waters in that district during the past season for some reason which he cannot account for, unless the extreme high water would cause it. Tourists were also very few in number during this past season, owing probably to the same being very unsatisfactory for such.

There is a matter which he would recommend to the notice of the Department, and that is, that all gill nets should be entirely prohibited within the waters of

the Bay of Quinte even for domestic license or otherwise. The domestic license he would consider to be an entire failure, inasmuch as the privilege is abused in about nine out of ten cases by all those who obtain them. They fish more yards of net than the law allows in spite of all watchfulness. They also secretly sell fish, and in both cases abuse the privilege given. He would also recommend that these waters be re-stocked with young bass fry to prevent depletion.

Ducks have been unusually plentiful this fall, and a great many have been shot, but a great many complaints have been made about shooting from monitors anchored out from the shore. There is always a certain amount of doubt as to the exact distance at which the decoys are anchored from the shore, and the hunters use such large quantities of decoys that they readily attract the ducks, and being placed so near the feeding ground they make the ducks extremely wild and drive them away. He would recommend that all shooting from the monitors be entirely prohibited, and would consider that such would make it very beneficial for the preservation of the game.

In the matter of partridges, they have not been so plentiful this present year, which he attributes to the very cold, rainy weather of the early summer having killed the young birds. Deer hunting has not been good this season, but the opinion is that it is not from lack of game, but owing to the swamps being so filled with water that dogs could not be used in their pursuit. He would strongly urge that a limited number of partridges for the whole season be fixed at a not greater number than fifteen, also a limited number of ducks smaller than at present, and that monitor shooting be entirely prohibited, also that no gill nets be allowed in that district.

Overseer J. W. Morton, of St. Ola, reports fishing very good, that is for salmon trout, but bass were very scarce.

Not many angling permits were sold this year. No fishways.

There were quite a number of old partridge, but young ones were very scarce, owing to the very wet May during the hatching season. Ducks were plentiful.

There are lots of deer, bear, squirrels and rabbits, but wolves are not very numerous.

The game and fishery laws are being well observed as far as he has any knowledge.

Overseer James McCaw, of Bancroft, reports, that the deer has been more plentiful this summer and fall, and partridges quite a few, but he would recommend another term of say three or five years reserve or if not have season from the 1st November to the 15th, both days included, and limit five birds instead of ten, and give them a chance to increase. Also with regard to fish, he is sorry to say they haven't enough for the splendid waters they have, but the Dominion Government has been very good this past year in giving them some fry and parent fish so as to stock their lakes. People there are taking more interest in the preservation of them now than they have done in the past, so he is looking forward to see the day when lots of game and fish will be within reach of every sportsman.

Overseer C. St. Charles, of Madoc, reports, that he has found the laws and regulations have been well observed.

Re fisheries. In Moira Lake there are such fish as maskinonge, pickerel, black bass, pike, white suckers, redfin suckers, rock bass, sunfish, eels and mudcats.

Fishing Pound Nets on the North Channel of Lake Huron.

Lifting Pound Nets on the North Channel of Lake Huron.

There are no trout. Mudcats are very plentiful. The fishing, such as black bass and pickerel, has been good this season. Pike are quite plentiful, but maskinonge are scarce.

The past spring was not as good for fish spawn as was the year 1911. There was no fishing through the ice. There are no saw mills in his district. There are none here who make a business of fishing, and the local sports like to see the laws enforced, and no violations of the Act have occurred, although there are quite a number who take all the pleasure out of this sport that the law allows.

All the fish caught in that district are used for home consumption.

Deer are very plentiful in the northern district and the surrounding vicinity. Deer has been seen within two miles of Madoc village.

As regards mink and muskrat he thinks the month of April should be cut out, because that is the month in which they have their kittens. Many are caught in this month, and this destroys numerous young ones.

Beaver and otter are scarce here. Partridge are very plentiful. Wild ducks are scarce. Rabbits are quite plentiful. Black and grey squirrels are very plentiful. It is quite a common thing when driving along the country roads to see a black squirrel running along the fences.

Overseer E. A. Wootton, of Maynooth, reports, that the game law has been well observed in that district in the present year.

The salmon and speckled trout fishing has been fairly good.

The deer have been badly thinned out by wolves in many sections and in others are reported fairly plentiful.

Partridges are fairly plentiful where not killed out too much last fall. Beaver are more plentiful.

Muskrats and mink are scarce, also ducks.

Huron County.

Overseer Robert McMurray reports that the fishermen in his division have had a fairly good season. In the early part of May a bad storm destroyed the pound nets and also the gill nets. The pound net fishermen report the catch not as good as 1911. The catch of trout has been good this season.

Bass fishing was fairly good. Perch were plentiful in the early part of the summer and also in the fall. No illegal fishing has been brought to his notice. He thinks the several close seasons were well observed.

He thinks the game laws have been fairly well observed during the past year. He thinks the Department should be slow in giving outsiders the privilege, as our own men have a right to be protected. They have for years had hard luck and should be protected against what he calls tramp fishermen.

Kent County.

Overseer John Crotty, of Bothwell, reports, that the catch of fish was less than usual on account of rainy season and high water, which made the fishing season very short before the close season started, as after the close season very little fishing is done: it is only the farmers that are now using nets, principally for home consumption.

No fish exported, probably 20 per cent shipped to the cities of Ontario, the balance used at home.

No abuses exist.

The close season was strictly observed.

No violations of the act came to his knowledge, therefore, no fines or confiscations.

Quail are more plentiful here than for two years. Partridge and woodcock scarce, as also black squirrels.

Overseer John Featherstone, of Renwick, reports that the Game and Fisheries Act has been well observed in that district. He has visited all parts of the district, some parts on several occasions and generally found things in O. K. order.

The pound net fisheries in that district for the past year has been about on an average with other years. Last spring the fishing was not as good as in former years, owing to the lateness of the opening of the waters after the severe and late winter. But in the months of June and July they had large catches of medium and jumbo herring which did not realize much profit as the price was very low, some days as low as one cent per pound. But during the present fall, the fisheries are having some fine hauls of whitefish of a good quality, one fishery of 5 pound nets landing as much as 6,300 lbs. in a single day, which seems to give credit to the hatcheries, as whitefish on the shores of Lake Erie seem to be yearly on the increase.

The tug men report large catches of herring and perch late last fall, but so far during the present year the gill net fishing has not been up to the average. This is caused by the run of fish being nearer the shore.

The patrol boat under the charge of Warden Victor Chauvin has done excellent service on Lake Erie in keeping their own boats and nets according to regulations: also not one complaint has come to his notice of American tugs fishing near their shore; in former years they were being almost daily visited by their tugs.

He would estimate that about 90 per cent. of the catch in that district are exported to the United States markets.

Overseer Richard Little, of Wallaceburg, reports, that there is little change in the quantity and quality of the fish caught for commercial purposes as compared with former years: the net or commercial fishermen are well pleased over the permission being granted them of starting to fish in September instead of October, and they have expressed to him a hope that the Department will not extend the period of the spring fishing.

The angling for small-mouth black bass was exceedingly good throughout the whole season, except the month of August, and in that month the fishing for these game fish was poor, on account of a succession of north winds, which affect these waters by making them muddy.

The lake and marsh ducks, with the exception of Blue-bill which have become quite scarce in the last two or three years, are now there in great numbers; the blue and green winged Teal are there in greater numbers than has been known for years.

The laws of the Province protecting game and fish have been quite well observed in his district during the past year.

Overseer James McVittie, of Blenheim, reports, that from the 1st November, 1911, to the 1st November, 1912, in east Kent the fall fishing of 1912 very good. The spring fishing of 1912 was light, but during the month of July and August

the catch was very heavy. The herring was much larger this year than last, a much better sample. This shows the herring, which were put back into the water last summer have grown to be market size. The prices were low and the fishermen had a hard job to get rid of them at any price. During September, the catch fell off to nothing, some fishermen getting less than one box out of 5 and 6 nets. The second week in October the catch got better, but mostly all herring. The blues were small, very few No. 1, mostly all No. 2, whitefish were scarce. They do not get many in east Kent any time. There are no gill nets in east Kent. The Seine net fishermen in Rondeau Bay have had a very poor year, and at the time of writing are getting nothing. Other years they have a large catch of carp. This is the only year they have been allowed to take pike, and this is the only year that they have not had any. They did not get enough pike to pay for their extra license. The anglers made a cry about the Seine fishermen being allowed to take pike. The angling permits sold at Erie Eau this year do not come up to last, the steamboat service from Cleveland not being so good as other years, and for some reason the catch was not so good. A lot of ducks stayed with them all summer, but the hunters are not getting many yet. He has had but one person fined this year for spearing pike and selling them without a license. Some parties were making a kick about the hydes built at Rondeau for shooting purposes, but they are within the law as far as he can see. The deer are getting very plentiful on Rondeau Park, and are a sight to see for any person that never saw a drove. At times you can see 40 or 50 when you drive up the Park Road. Our laws have been well observed and licenses all paid early in the season.

Overseer Henry Osborne, of Dante, reports, that the catch this year is not as large as usual, owing to the water being very high at the time of spawning, and parties were unable to get nets in the river. There are very few dip nets, most of the fish caught being by the use of roll nets, and that only for domestic purposes. The fisheries act is fairly well observed and there is no disposition on the part of the fishermen to violate the law. There are no dams or other obstructions in the river to obstruct the free passage of the fish.

Overseer Theo. Peltier, of Dover South, reports, that owing to the late spring and the presence of ice late in the season, the catch of fish was below the average. The extension of the open season granted some relief, and helped to increase the catch, but he would not recommend that any further extension be granted on account of the price of the fish dropping so materially after the 15th of April, as the amount received by the fishermen is not sufficient to warrant the capture of the fish and the depletion of the waters.

The regulations have been carefully lived up to, and he is pleased to be able to report that he did not find it necessary to have any prosecutions, excepting one person for fishing with a night line in the River Thames, and refusing to take out a license. Upon being fined he ceased fishing.

Game in that territory is very scarce. The quail have not increased in number, and are quite scarce. Wild duck and a few geese are the only other game found in the district to any extent.

According to his observation, the ducks in that district are year by year getting more scarce.

So far as he knows, there have been no violations of the game laws.

Lambton County.

Overseer H. A. Blunden, of Sarnia, reports that the fishing season opened a little later than usual owing to so much ice, but for the first few weeks after setting their nets the pound net fishermen had good catches which suddenly dropped off during the mild weather in June.

As to the fall fishing, there seems to be a heavy run of herring of large size, but nothing unusual as to other fish, but cannot speak definitely till the fishermen have sent in their returns, and the same can be said of the seine fishermen.

The amount of sewage discharged into the international water from towns and cities must have serious effect on our best food fishes.

Owing to last winter being so severe it had a serious effect on game of all kinds, except ducks, which are as plentiful as usual on the St. Clair River.

Lanark County.

Overseer G. Burke, of Perth, reports that last year in November he was on the Rideau watching the run of the whitefish with a good man and good boat, and had a lot of stormy weather to contend with. Left the camp at dark, got back at daylight. Seized two nets, gave two men a chase, when they got up to them they dropped their nets in the lake. Fishing on Christie's Lake was very poor this year on account of so much blasting. Pickerel and bass fishing and pike have been the best this year for years on the Tay River. They have been catching pickerel this year on Otty Lake which they have not been doing for years. Suckers are on the increase in the Tay River. He thinks they should be taken out of any stream they are in. Deer is very plentiful around here. Partridge also, and ducks. Mink is getting scarce. There was a very good catch of rats last spring. Squirrels are on the increase. There ought to be a close season for three years to give them a chance.

Have had very few complaints of people breaking the law this year. Have had very few convictions. There should be a limit on salmon. If there is no limit put on, our inland lakes will soon be depleted. The people in that section are obeying the laws, and are taking more interest in the fish and game.

Overseer E. Deacon, of Bolingbroke, reports that the past season for fishing has not been as successful as in previous years.

The game laws have been well observed, and no cases of illegal fishing have come under his notire.

Ducks are not so plentiful as in former years.

Muskrats are scarce on account of their fur being so valuable.

Partridge are more plentiful than formerly on account of none being sold. Deer are increasing in this locality. Issued five non-resident permits.

Overseer William Pepper, of Lanark, reports that during the year he has visited periodically all parts of his inspectorate, namely the townships of Lanark, Drummond, Lavant and Darling, and found no provable violations of the law. He has heard rumours of violations on a few occasions, but when these rumours were investigated, there appeared to be nothing in them.

Ducks have not been very plentiful this year, and muskrats about the average catch. With regard to fish, one very gratifying thing is that the Mississippi River is fast becoming very well stocked with pickerel. In this connection he would suggest that pickerel fry be placed in Kerr's Lake and in Gilles' Lake.

Partridges seem to be very plentiful this year, some even invading the corporation of the village.

Overseer J. A. Phillips, of Smith's Falls, reports that during the month of November he patrolled Rideau Lake with a row-boat, protecting the salmon and whitefish. On the 27th November he started with his assistants to fish ling with hoop-nets in the Big Rideau. They continued this work until the last of February and many tons of those destructive fish were taken out. They did not get as many, however, as the year before, and this shows they are getting them thinned out.

March, April and May were not very busy months, but he made frequent trips throughout his district to see the rat houses were not interfered with and no one was spearing or fishing with a dip-net illegally.

On the 10th of June he left Smith's Falls with crew for Kingston, to take charge of the patrol steamer "Ella C." On the 11th of June had the boiler tested in Kingston, and left for Smith's Falls. From that time a constant patrol was kept up of the Rideau waters between Merrickville, Smith's Falls and Newboro, until the 23rd of October. Then he turned her over to Capt. Fleming at Kingston and returned to Smith's Falls.

The fishing in the Rideau this year has been very good, the salmon especially. On account of the cold weather early in the season the bass did not spawn as early as usual, and it was quite late in the season before there was any good bass fishing. There were not as many tourists from the States on the Rideau this summer as usual, and he thinks the reason was because of the elections being held there this year.

Many new cottages were built and much land bought up for next year. The C. N. R. intend building a large summer resort in the near future and this will certainly attract more tourists and make the Rideau more popular.

The laws and regulations have been reasonably well observed this year. The seizures and convictions he made were as follows:

On the 17th September he seized a gun from a man shooting partridge and had him fined five dollars. On the 23rd September he seized a gun from some Italians shooting on Sunday. On the 21st October he seized a gill-net in the Big Rideau, and on the 27th he seized 200 yards of gill-nets which were set near Portland.

The wild ducks are not as plentiful as last year.

There is any amount of partridge this season.

Last spring there was a large number of muskrats trapped.

He never saw the salmon as thick as they were this fall on the shoals.

Overseer Fred Stanzell, of Carleton Place, reports that during the past year the game and fishery laws in his district have been well observed, therefore he has no illegal acts to report. In regard to fish, bass fishing has been fair and some very good sized ones have been caught. Pike, perch and other rough fish have been plentiful.

Mink are exceptionally scarce. Muskrat and other furbearing animals are pretty much the same as last season. Partridges and ducks are very plentiful.

Overseer Hugh Wilson, of Elphin, reports that he finds the bass in Dalhousie Lake very scarce.

Partridges are quite plentiful, and there are a great many sportsmen in this section. Water fowl are scarce. Some parties last winter were up for killing deer in the close season and found guilty by the law.

Leeds County.

Overseer W. J. Birch, of Delta, reports that he considers that the fishing and game laws were well observed in that locality during the past year. Although he did receive some complaints of violations he was unable to procure sufficient evidence to convict the parties. The bass and trout fishing was good from the 1st of June until about the 1st of August, when the wet weather commenced, and from that on became very poor. Taking the bad weather into consideration, the Lakes were well patronized.

The shooting for duck late last fall was very poor, but the early shooting this season was good, some parties getting as high as from forty to seventy in a couple of days, which he considers is altogether too many, and would therefore advise a limit to be put on duck, say ten a day.

The season opening so late for black squirrels, there were very few killed last fall, and there are hundreds in that locality; also partridges quite plentiful.

Muskrats are becoming scarce, and he believes a trapper's license would meet with the approval of everyone.

Overseer Gordon Clark, of Westport, reports that the fishing around there has been better this season than it has been for a good many years, especially black bass and pickerel. The tourists report the best catch they have had for years. Ducks have been very plentiful, but very few shot. Partridge are getting more plentiful every year. Muskrats are getting very scarce. He thinks the season should not open in December for them, as the lake has been open and there have been a lot of them caught that way. Mink are very scarce, but deer more plentiful than they have been for years, and a good many of them shot. The game and fishery laws were well observed this year.

Overseer H. N. Covell, of Lombardy, reports that he has kept a close watch in his division, and he has found the fishing laws fairly well observed, as no illegal fishing came under his notice. Black suckers are very plentiful in the creeks in the spring, and the farmers think they ought to be allowed to catch them. He has sold two dip-net licenses and one permit. The ducks are not as plentiful as in former years, but partridges are very plentiful this fall. Muskrats were very plentiful last spring, but mink are very scarce. He saw one red deer.

Overseer John McGuire, of Jones Falls, reports they started on November 6, 1911, from Jones Falls to patrol the Rideau Canal, passing through the lakes and locks to the River Styx, where they stayed, patrolling with a row-boat until the afternoon of the following day. He and his assistant worked very steadily with the rowboat and grappling hook, looking for illegal gill-nets, but found none. From there they went with the launch "Mermaid" to Kingston, leaving again on the 8th, patrolling the different lakes and waters to Jones Falls. On the 13th they made a trip to the Big Rideau, coming back on the 14th, and on the 18th they laid up the "Mermaid" for the winter.

He had little to do during December, except to look after licensed fishermen. He made a practice of visiting their locations every week, always finding them fishing all right.

A Pond at Mount Pleasant Hatcheries.

Pond No. 3 at the Provincial Hatcheries at Mount Pleasant.

Nothing very eventful took place during January, and everything was satisfactory. During February and March he made occasional trips over his district, calling at the different fishing locations. The fishermen reported the fishing poor in April, the season being late and cold. He thinks the Department did wisely in extending the hoop-net season from the 15th April to the 30th, for the winter had been so very severe and the ice so thick they could not do much fishing.

He went to Belleville on the 22nd April, by order of the Department, where he spent the remainder of the month doing patrol service on the Bay of Quinte, having been furnished with a motor boat and an assistant. He seized five sets of hoop-nets in Massassauga Cove that had been set for fishing, and the stakes that held the nets were all sawed off below the surface of the water, and the ends of the stakes were blackened so as not to be easily seen. He brought them in to Belleville and stored them in the Government boat-house, and the owner was afterwards fined $25.00 and costs. On another occasion he seized and took up a great quantity of gill net—about 500 yards—at the mouth of the Murray Canal, which he also took to Belleville and stored with the hoop-nets. At the end of the month he returned to Jones Falls.

On the 15th May, he and his assistants began to fit up the "Mermaid" for the season's work, and by the 29th had her in first-class shape. From that date throughout the season of navigation on the Rideau Canal they kept up a constant patrol of the Canal waters from Newboro to Kingston. The spring was late, and the weather very wet and cold, and they worked under considerable difficulty during the last days of May.

On the 30th May he received eight cans of salmon fry at Newboro station from the Dominion Fish Hatchery at Newcastle. They emptied two cans in Indian Lake, South Crosby, and took six cans to Dog Lake, Storington Tp., and deposited them there.

On the 15th June the tourists and non-residents began to come in, and the bass were not done spawning until the end of that month. He saw them brought in by the anglers to the hotels, with the spawn running out of them. He never heard better reports from the anglers, and he never saw finer catches than he saw exhibited on the lawns of Hotel de Kenny, Jones Falls, and the Club House at Chaffey's Locks, Rideau Canal, this summer. Bass weighing 6½ lbs were to be seen on different occasions at Jones Falls, and 5½ lbs. were common.

He spent the month of July looking after non-residents, selling permits, collecting the fees, and keeping up a daily patrol of the waters in his district.

During August the weather was very unfavourable for the tourists, and although the fishing was good, there was so much rain that the tourists could not get a whole day's fishing at a time. He thinks the weather conditions were largely accountable for his business not being as good financially as in some years past.

The continued cold through September drove the tourists away, and it was easy to see that the tourist season was at its close for this year.

They did a good deal of patrol work in October, some days with the "Mermaid," and part of the time with a rowboat when they wanted to grapple for nets. On the 12th of that month, while patrolling Whitefish Lake in this way with a rowboat, they grappled up two large gill nets, about two miles from Seeley's Bay, and the same night they found a hoop-net in waters where he knew no one had a license. There was no tag on the net, so he seized it, and brought the three nets to Jones Falls. Next day they dried them and measured them. There were 200 yards of gill net, which no one has yet claimed. The hoop net

belonged to a party who had a license in Pierce's Bay, and who claimed that he was catching nothing and thought he would move the net to where it was found to try the fishing there, intending to tag it next day. His net was returned to him with a warning.

He thinks the close season for salmon should commence on the 10th October and continue until the 10th November in that part of the Province. He says the overseers have no chance under the present conditions, as the poachers flock from all directions to salmon waters in October on pretence of trolling, but this is only an excuse. While trolling in day time, they as a rule are netting at night, and if an overseer makes his appearance, their reply to him is, every time, "I am trolling and within the limits of the law." But why do they come often 20 miles just at the spawning time, and lots of them farmers that fish no other time of the year?

He thinks that another bad move as regards the protection of salmon was the abolishing the limit of four salmon to a rod. As the law is now, if an overseer comes up to a man in a boat trolling right in the spawning time, say the 15th October, if he has a barrel of salmon in his boat he has altogether likely caught the most of them with nets, but he is sure to say that he caught them trolling. The overseer is then powerless: no matter what he thinks he can do nothing but let the poacher go. While the catch per rod each day was limited to four (which is as many as can generally be got), if he had more than four the overseer had him all right. But the way the law is now, if he had one hundred in his boat, the overseer has no business to ask him how he came by them, unless he sees his net, which he is sure to have, but very likely it is in the water and cannot be seen by the overseer. He says he has been connected more or less with the protection of the salmon for seven or eight years, which places him in a position to know what he is talking about.

Overseer George M. Slate, of Rockport, reports that the season of 1912 has been a good year. Fishing has been about the same as 1911, only black bass fishing has been better than in former years.

There are about as many ducks this autumn as last. Black squirrels are quite plentiful. Partridge are very scarce. There were not any violations to speak of.

Overseer William Spence, of Athens, reports that this season has been a very successful one for both game and fish. There has been only one case of illegal fishing, but on the whole the game and fish laws were well observed. There was an increase in the number of guide licenses sold this year. He would suggest a license to be granted to farmers for about one week to catch whitefish for their own food supply.

He thinks it would be a good idea to have the close season for salmon in October, during their spawning season, instead of November.

Partridges are quite plentiful, which is due to the wise protection of having only one month open season.

Mink and black squirrels are scarce.

Muskrat are scarce. Found several houses disturbed, had two fined. He thinks it would be wise if each person were allowed a limited number.

Overseer R. B. Storey, of Escott, reports that the game and fishery laws have been well kept this season. Fishing has been fairly good, and game more plentiful than last season.

SPECKLED BASS.
(*Pomoxis sparoides*).

Ducks and partridge are not plentiful.

Black squirrels are more numerous this season than they have been for some time.

Muskrats were also plentiful.

Sportsmen report that they have had good shooting all fall.

He has had no complaints, and has not found anything himself to indicate that there has been anything illegal going on.

Overseer George Toner, of Gananoque, reports that on the 15th November, 1911, the river froze over, and he had his boat hauled out and dismantled. The ice was in only a couple of days, however, as a storm broke it up again, and as nets were being put in the river he found it necessary to put the boat into commission again. He went down the river and seized one set of hoop-nets in Landon's Bay, on the 28th November. Patrolled up the river to the head of Howe Island, where he found that a number of rat houses had been destroyed by flow ice. He then went down the river to Jones Creek, and at the foot of Grenadier Island he seized three gill nets on the 18th December. A number of rat houses there were also destroyed by flow ice.

The tourists were not so numerous this year, although the fishing has been very good. There have been numerous good catches of bass and perch, and several of maskinonge.

There was not so much netting done this year as in former years, as he has only taken up eighteen nets and five night lines during the year.

Muskrats seem to be getting scarce, and he thinks it would be well to shorten up the time of trapping till the first of March.

Ducks were very plentiful on the river this spring. On April 23rd he seized a boat and two guns—duck hunters'.

Mink seem to be more plentiful, as he saw more last spring than in any previous year.

Partridge, snipe and plover seem to be quite plentiful, but the black and grey squirrels are getting very scarce.

Overseer James Townsend, of Long Point, reports that during the past year he has made several trips over his district, and finds that the law has been well observed. The fishing was good, and tourists were well pleased with their catch, and said they were coming again. He sold more permits than in previous years, and would recommend the re-stocking of those lakes with bass and salmon, and also hoop-netting for ling during the winter months, as these fish are getting very numerous.

Game is fairly plentiful. Duck shooting is good. Partridge is on the increase, which is due to protection and scarcity of foxes. Muskrats are very scarce. He would favor licensing of trappers, and also a gun license.

Overseer J. R. Wight, of Newboro, reports that he thinks the law has been well observed in the district of which he has charge, and he would strongly recommend the day's catch of bass to be reduced from eight to five. The bass have been very plentiful this season, and much better in quality. The lakes west of Newboro are getting very popular for salmon trout, and that seems to be the choice of the tourists' catch. There have not been so many tourists there this season, owing to the peculiar season and the U. S. general election. There has been only one case of illegal fishing, and that was for catching pike with a gill

net, and the party was brought up before the magistrate and fined. He thinks the season for catching bass should be extended till the 1st of July, as the spawning season is not out till then. The number of guides is increasing, as he sold more guide licenses this year than last. The anglers had better luck this year, as they have had better fishing, and they seem to go away well satisfied. The patrol boat under the able management of Mr. John McGuire has been of great service to local overseers in having its laws all well observed.

Lennox County.

Overseer P. W. Dafoe, of Napanee, reports that in doing his duty he has been greatly assisted by the honourable and law abiding fishermen he represents.

He thinks he is safe in saying no illegal fishing or hunting has been done on the Napanee River or the part of the Bay of Quinte under his charge in the year 1912.

The Government dredge, with two or three tugs and four or five scows, have been on the Napanee River most of the summer, and with the general traffic, have kept the water boiling and muddy, notwithstanding, the fishermen are doing better than usual, but as the Government are dumping their scows in the lost channel in Hough's Cove, it may harm the best fishing grounds on the river.

On the Salmon River he has spent a good many days and nights, yet he fears many fish will be killed with dynamite by the railroad men.

Deer.—A good many hunters have gone to the woods.

Partridge are very plentiful.

Ducks are quite plentiful.

Muskrats are not building as many houses as last year or as high, but are plentiful.

Mink are not very plentiful.

Black squirrels are thick.

He would recommend licenses for trappers, and he thinks ducks should not be sold.

Overseer R. C. Fowler, of Emerald, reports that the fish were very scarce in the early part of the season, but towards autumn were more plentiful. Owing to the scarcity of fish and the more rigid enforcement of the laws, several fishermen have dropped out of the business, and less net is in use than in former times. A good many of those holding licenses only fishing for a short time each season as a side line.

The angling has been very good this season, and a great many yachts have been in evidence on the bass grounds.

He considers that the close season for whitefish and salmon trout in being fixed for the 1st of November is, if anything, too late as it is, and when an extension of ten days is granted, as was done this season, he thinks the close season might just about as well be done away with.

Overseer E. M. Huffman, of Hay Bay, reports that everything has been quiet, no convictions. The law has been well observed. Fish have been plentiful, especially during the Spring, more being caught than the buyers could handle, and at the close of the season the fishermen had to let a great many go that had been caught.

Ducks are plentiful this fall. Not as many rats caught as usual, caused, he thinks, by so many being trapped owing to the season being too long.

Lincoln County.

Overseer J. C. May, of St. Catharines, reports that the rules and regulations of his division have been well observed by the fishermen. There is scarcely any shooting done in that district, game of all kinds being scarce. The fishermen have just begun their fall fishing, and so far the herring has been very plentiful, the catches being a great deal larger than last year at this time.

The fur-bearing animals in that district are very scarce.

Overseer Oliver Taylor, of Niagara-on-the-Lake, reports that the fishing at the mouth of the Niagara River this season has been very poor. He learns from the fishermen that it is not owing to a scarcity of fish, but to so much easterly weather, which has kept the water out of condition.

The bass fishing for anglers has also been very scarce.

The trap nets above Queenston have caught very few fish this season.

He has patrolled his district very carefully, and has seen little signs of illegal fishing being done outside of the three set lines that he picked up.

He only sold four angler's permits, they having bought most of them in Buffalo.

The game in that district are pheasants, the principal bird, but the hard winter and the two years' open season has made them scarce, but a goodly supply is left to breed.

He knows of a few quail in the township, but not very plentiful.

The fur-bearing animals are muskrats, which are quite plentiful around the ponds.

He thinks the law has been very well observed here.

Manitoulin District.

Overseer J. J. Avis, of Cockburn Island, reports that the season just ended has only been an average one there, and will show a decrease in the catch of whitefish and lake trout. Often trout come in on the shore to spawn early in the month of October, and whitefish on or about the 10th of November. Pound nets did not pay expenses, and very few gill nets were in the water during the summer months.

He would further suggest that the Department have more hatcheries. They further believe the hatcheries are now the only source for keeping our lakes stocked, the whitefish spawn being destroyed by other kinds of fish.

Partridges, ducks and rabbits are numerous, but very few shot. Deer are on the increase, but no one appears to take time to hunt them, although reports have come to him that deer have visited the farms in most every direction on the Island.

Fur-bearing animals are very scarce.

The game and fishery laws have been well observed.

Overseer W. M. Boyd, of Kagawong, reports that the season just closed has been an exceptional one in that locality, although in his opinion the fish are as plentiful in Kagawong Lake this season as any year for the past twenty-three years. Not so many, perhaps, were caught, owing to the cool season, which seems to have been universal, and not in any one particular section or locality. The fish or black bass in Kagawong Lake were very fleshy, and the high water in all incoming streams has flooded an abundance of food for them, together with the immense

shoals of young whitefish, which furnish immense quantities of feed. The fish did not probably bite quite so well as in some other seasons. Possibly the service of the motor-boat *Florence* on the lake kept much closer in touch with the angler, and not a single scoop has been reported of anyone getting more than the legal catch under their permits.

He thinks something should be done to reduce the whitefish in Kagawong Lake, as it is overstocked with whitefish: that is beyond the shadow of a doubt, and will in all probability affect the angling to some extent. The black bass are full to the neck with young whitefish, and certain to be lazy and not hungry for any kind of bait on certain days, but the fish are then in abundance and in quality were never better in his time in that locality. If the settlers could be encouraged to fish out some of the whitefish, he thinks it would be an improvement, or make it much better for the angler who has only a few days to go fishing and thinks it necessary for the bass to be a little hungry every day.

The ducks have been much more plentiful than for many years.

Partridge were plentiful when the season opened, but certainly got a thinning out. He thinks the number should be reduced to not more than six in any one day to one hunter. Perhaps the wet spring had some effect in reducing the broods. Not nearly so many appeared in the flocks as are usually to be seen. Deer are more plentiful on the island, and a few strong moose have been seen. In all probability the farmers are taking advantage of taking the deer without having to buy a license and getting the deer due them during the open season.

This he thinks an unfair advantage, as in his opinion everyone should pay alike in those new districts, and he still thinks that two dollars is too high a fee for one settler to pay and another go free simply because he is tilling the soil.

Overseer Andrew Hall, of Gore Bay, reports that the commercial fishing has been very good during the season, the brook trout and bass very plentiful, although there were not nearly so many American tourists in that district this season as usual, but as usual they observed the regulations very closely.

Ducks are very plentiful, a large number having been killed.

Partridges were not nearly as plentiful as last year. The limit to the bag seems to meet with general approval, and, he believes, in that district has been closely observed.

The red deer are very plentiful, and no doubt quite a large number will be killed during the season.

He would recommend that a fish hatchery be established on Kagawong Lake.

There have been no prosecutions for breach of the game and fishery regulations in his district, the laws having been well observed.

Overseer Joseph Hembruff, of Manitowaning, reports that the angling for bass has not been as good as last year. In July the catch was fairly good, but in August and September not quite so good. Speckled trout is about the same as last year.

As to the game, partridge is scarce. Ducks are about the same as last year. Deer are scarce. There have not been so many tourists there this year. The game laws have been well observed.

Overseer David Irwin, of Little Current, reports that while patrolling the waters between Midland and Lake Superior in the North Channel of Lake Huron and the Georgian Bay with the yacht *Lotus* he finds the commercial fishing well up to the average and in most places better than last year.

The "Lotus," patrolling the waters of the North Channel of Lake Huron and Georgian Bay.

The American tourists have not been so plentiful in the district this year, and while bass are quite plentiful, the amount caught has been proportionately small, no doubt owing to the amount of rain during the season. He would strongly recommend that a fish hatchery be established at Little Current, or some place in the North Channel, as any amount of spawn could be obtained there from whitefish, trout and pickerel. The opening of Lake Kagawong for domestic fishing seems to meet with general approval.

The deer in Manitoulin Islands and on the north shore of McGregor Bay and Bay Finn are very plentiful.

The new regulations limiting the partridges to ten a day seem to meet with general approval, and also the earlier opening of the duck season in the northern district, but ducks are not so plentiful this season as last.

Overseer J. Ramesbotton, of Little Current, reports that angling has not been as good this season, the cause being, he thinks, that a great many of the bass follow the log rafts down the bay and go under them for shelter, and when the raft goes they go too. Another reason is the number of anglers up there. For instance, 228 permits taking 8 bass would be 1,824 each day. He thinks the limit is too large, as no one man can eat eight bass in a day, besides the pickerel he gets. He finds that the creeks and rivers in the spring are full of pickerel, and they are not all out on the 15th May. There should not be any nets set nearer than seven miles of those places, to give the fish a chance to spread before they are ambushed.

Partridge are scarce on account of the wet season. Deer and moose plentiful. He thinks the partridge limit is too big by half.

Overseer W. J. Wright, of Ice Lake, reports that the law has been well observed in his district this season. He has had a few complaints, which, when investigated, turned out to be incorrect. Game fish are about the same as last year—a little on the increase, if anything.

The red deer are quite numerous around there. They are not much hunted, as the settlers do not seem to have time, and the town hunters go to the North Shore.

Ducks are quite numerous, but not a great number shot.

Rabbits are plentiful. Farmers complain about them eating their crops.

The beaver dam and colony on Ice Creek are doing fine. He watches them closely to see that they are not molested. He found that part of them had emigrated, but has not been able yet to locate them. Beaver are like deer—when they get too numerous part of them leave and form a new colony at some other place. That is what has happened there. He does not know whether the old ones or young ones go, and wishes someone would tell him.

Minks and muskrats are plentiful. Otter are scarce. He knows of only one family on Ice Lake.

Partridge are scarce, and no wonder, for as soon as the season opens every man and boy that can carry a gun (town and country included) are out, and some of them every day except Sundays and wet days as long as the season lasts; but cut it down to 15 a day, which means 150 birds, and he has no doubt that at the end of the season some men will brag about the 200 they got. He thinks that to give every one a chance (birds included) 25 birds for the season for each hunter should be enough. The rabbit season opens 15 days ahead of partridge, but he thinks the two seasons should start together, as it gives men an excuse to take

guns to the bush. He found several in the bush this year whom he strongly suspected of hunting partridge, but they said they were after rabbits, and he had no proof to the contrary.

MIDDLESEX COUNTY.

Overseer William Boler, of Byron, reports that the fishing in the Thames River was about the same as last year. The game laws have been very well observed. He would suggest a close season all the year round for black squirrels, as they are beginning to get very scarce. Quails are almost extinct in this neighbourhood. Partridge are scarce. There are more flocks of ducks and geese than last year.

Overseer J. D. Campbell, of Sylvan, reports that the law has been well observed in his division during the present season. Coarse fish have been very plentiful and game fish scarce. The two fishways in his division are in good repair. Game of all kinds, except ducks, is very scarce.

Overseer W. E. Collins, of Strathroy, reports that the law in his district has been fairly well observed, no illegal fishing having come to his notice. The catch of pickerel, pike and bass was about the same as last year, and altogether the fishing was very good.

Squirrels were plentiful this season, but not many mink or muskrats, as the young were flooded out by the rains. Partridge were scarce, also quail. He thinks last winter was a hard one on them.

Overseer Arthur Corsant, of Masonville, reports that the fishing in his district has been light on account of some high water in the river and streams this summer caused by the heavy rains. There have been some very fine catches of black bass. The laws have been well observed.

The fur-bearing animals will soon become extinct.

He thinks that the hunting or killing of those animals for at least three years in his district should be prohibited.

Overseer J. M. Temple, of Dorchester, reports that the fish laws are generally well kept by the country people, but they are broken by the city people and boys from the city destroying the small birds and going around people's buildings, firing at and destroying useful articles. Therefore he thinks that a sufficient reason to place a license of five dollars on each gun, and the man who buys the license be permitted to do trapping, and not without a license. There are scarcely any quail. Black squirrels are scarce; in fact, all game and birds are scarce. Mink and muskrats are scarce in this section, also coon. Otter is an animal of the past. There are no beaver nor deer. Some few fox were caught last winter. There are quite a number of hares in the swamps, and cottontail rabbits are quite plentiful. He thinks there should be a fine for allowing dogs to run and annoy and kill young cottontail rabbits, so there would be more to shoot when they are in season.

He has been taking notice since the first day of November, 1911, concerning fur-bearing animals, and finds as mink come in season on the 1st of November, that as traps are set in or near the water a number of muskrats are caught and killed and their hides cured, and when the parties are spoken to they make the remark they did not set for rats; and small boys do a lot of violating of the law

by carrying a gun, and every bird or squirrel they see they must take a shot at if in range, and in trapping the young lads take rats at all times from November till May, and it is hard to catch them, but nearly every boy has some fur to sell. Therefore he would recommend a small license should be placed on any person for the privilege of carrying a gun or trapping without a license, their gun or traps to be seized and sold and the person not having a license on them at all times in the hunting and trapping season could be arrested and prosecuted, the license to be five dollars for each gun, overseers to have licenses for sale.

Overseer S. Turner, of London, reports that the game and fish laws in that district have been very well observed, although he has had numerous complaints, but when he investigated such complaints he found that his informant in every case exaggerated conditions. All cases he investigated proved that small boys, who did not know the laws, were the culprits.

Fishing has been very good, and he would imagine from reports that things are improving.

Game laws are being well observed. This, no doubt, is accounted for by the stand he took last year in summoning several dealers for selling cottontail rabbits.

Muskoka District.

Overseer F. A. Hanes, of Huntsville, reports that bass is on the increase this fall. He has kept a very close watch this season, and finds that there are lots of small bass in all the lakes. Speckled trout are also increasing, but it has been a bad season for the fishermen, having been so cold. He thinks there should be some way to destroy the suckers, as they are very destructive to the salmon trout.

Deer are increasing in numbers, as he has been all over his district, and has noticed signs, and has also been told by parties that take an interest in seeing game protected. Rats and mink are very few in number, and do not seem to increase very fast. Ducks are scarce. Partridge are on the increase, as they seem to be more plentiful.

Overseer John A. Remy, of Dorset, reports that he has a few suggestions to make, which, if made law, would encourage people to protect our game and fish laws, and they are as follows:—

First, by giving an open season for otter every year, because it destroys our best fish.

Secondly, by giving an open season for beaver for one year, and closing with three, with a guarantee that there would be an open season every three years, and make the penalty imprisonment for killing or having skins in possession.

Thirdly, by putting a limit on salmon or lake trout of, say, five each day, and that any guide who allows any person to catch more than five be liable to a fine of, say, $5.00 for each fish caught over the limit, and also changing the close season in minor inland waters from the 1st to the 31st October, for as it is there might as well be no close season, for the salmon are practically done spawning by the 31st October. As it is now, the close season is too late by one month.

Fourthly, by including red deer in the non-resident license for small game, as $50.00 is prohibitive, as it is hard to get moose or cariboo in the territory where deer are found. The province would get more revenue, and more men would be employed, and men would give $15.00 for guiding, where, as it is now, the guides

kill the deer and some more than they would if they were out with a hunting party, and the Province only gets $2.00 where they should get $25.00 for the chance to hunt, and make the moose and cariboo license separate from the deer license, and make them $50.00. If the non-resident deer license were reduced to $25.00, including partridge and ducks, it would turn in a good revenue to the Government and be a saving on our deer.

He would also advise the Government to put the bounty on dog wolves at $25.00 and on bitches $50.00. As it is now, the Government does not pay $15.00 bounty as stated, for the value of the hide is included in the $15.00, and some hides are worth from $2.50 to $5.00. They should pay the bounty and also allow the one who killed the wolf the value of its hide over and above the bounty.

Overseer William Robinson, of Kilworthy, reports the fishing season not so good this season as last. He has not sold as many angling permits, as the cold, wet summer prevented the usual number of tourists from visiting those lakes.

Partridge are also scarcer, for the same reason, viz., the wet season. Deer are fairly plentiful; beaver and otter are increasing. Ducks are about the same as last season. Muskrat and mink are on the increase.

There are two sawmills in his division, and the owners keep the sawdust out of the river well.

The laws have been fairly well observed.

Overseer William Smith, of Gravenhurst, reports that for five and a half months since the 15th day of May, 1912, he has patrolled all parts of Muskoka Lakes in the boat *Meenagha*, and visited places where the boat made it more easy to visit, and found the fishing laws strictly observed, and no fines were levied for violation of the fishery laws since his last report.

One violation of the game law was observed, that of shooting partridge out of season, and the offender was fined $25.00 in order to pay the court costs in connection with same.

There were not so many fishing licenses sold this season on account of the cold, wet weather, as the tourists did not feel inclined to go out on the water. The same interest still continues with the settlers in seeing the laws strictly observed.

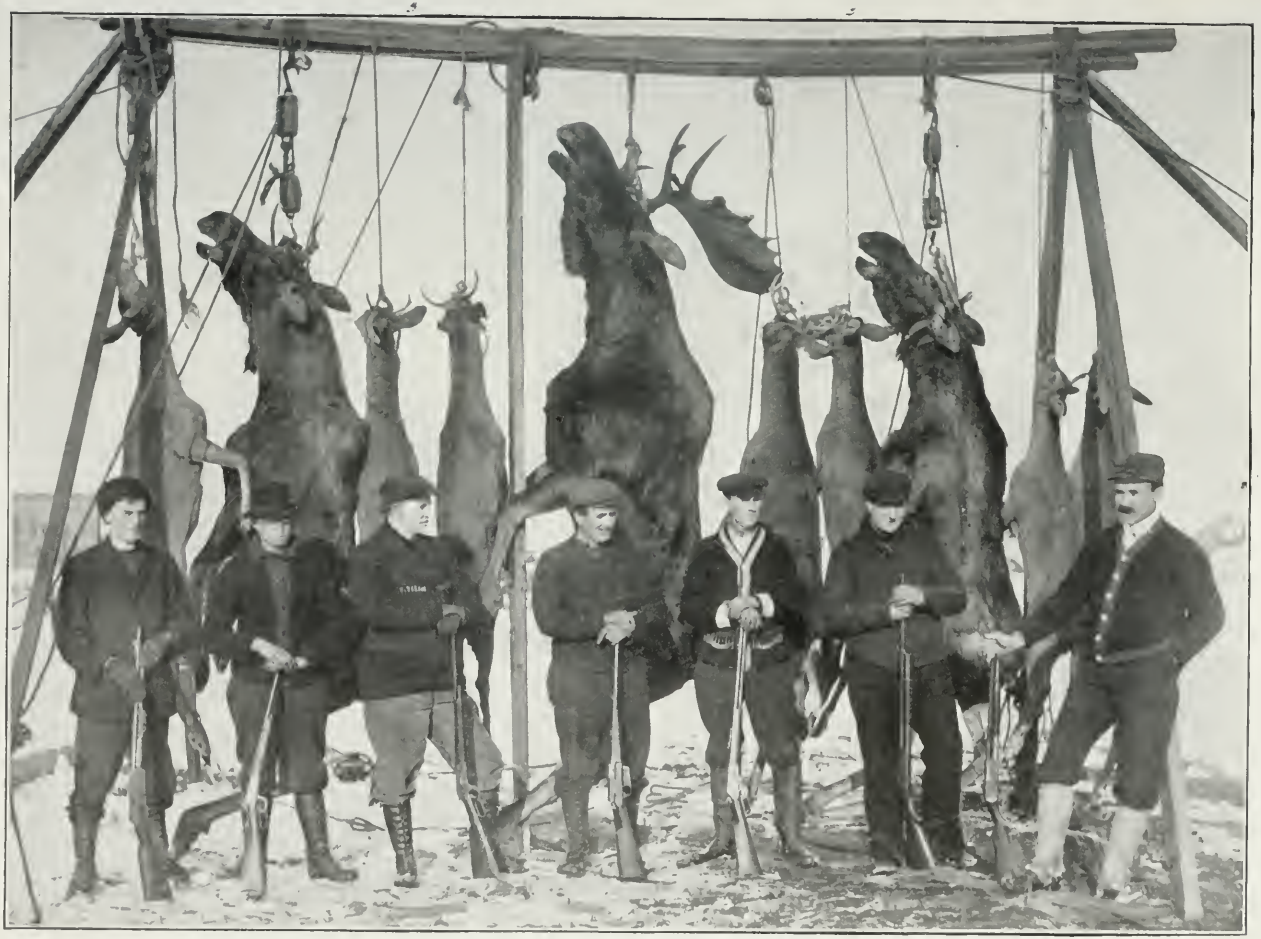
Two carloads of bass fingerlings arrived from the Mount Pleasant hatchery in a number one condition, and were deposited in the Muskoka Lakes.

Angling compared favourably with former seasons, but fishermen claim the fish did not bite so well, as it seems they are too well fed from some unknown source.

The ducks are more plentiful than in former years, and the partridge are about the average.

The Government should be congratulated on the manner in which it has endeavoured to protect the game and fishery laws, and the efficient methods observed in furnishing fingerlings for the different lakes.

Overseer John Traves, Sr., of Fraserburg, reports that the fishing in the spring was not very good, on account of the high water and cold weather, but since that time fishing has been fairly good in the Lake of Bays and South Branch River for trout and bass. Red Pine Lake is well stocked with herring. Bigwing Lake is improving in trout. He has patrolled several lakes this summer, and found no one breaking the law regarding either fish or game.



A Little Current Hunt Club.

Last fall most of the hunters in his district got their number of deer, and three of these parties got them the first week. Two camps did not get their number, not that there were no deer, but they were poor shots.

Partridge was fairly good.

Beaver, otter and muskrat plentiful; mink not as good, but on the increase.

Ducks were fairly plentiful last fall, and this fall the same.

The first week in October this year he saw, while travelling through a bush, a very large moose in Ockley Township.

Nipissing District.

Overseer James Dunlop, of Mackey Station, reports that there is little to be said in regard to his district. The people have come to realize that the game and fishery laws are made to be observed. The first few years he had trouble putting up notices, but that has all passed. Now a notice will remain where he puts it until the weather beats it down. This is a sure sign of no bad feelings against the game laws.

The duck season opened with an abundance of game, and they were very little hunted this season. The partridge season also opened with an abundance of game, and he might say were well thinned out. In fact they are very scarce here now, and in his estimation they should get further protection. There should be a license of, say, two for not more than 75 birds to be shipped in one season, to be regulated the same as deer license. Railroads should not accept any more than one license. He is told that there are men come there from Toronto and Ottawa, who take away three, four, and even five hundred. He kept a close watch this year, but failed to catch anyone breaking the law. Deer are plentiful, and are receiving just protection.

Overseer Joseph Rivet, of Sturgeon Falls, reports that American anglers have found splendid fishing in Lake Nipissing and tributaries this season, a marked improvement being noticed over previous years. The game and fisheries laws have been observed to the best of his knowledge. There has been no illegal fishing in said district.

Norfolk County.

Overseer J. S. Smith, of Port Rowan, reports that the seine fishing in Long Point Bay this season has been exceptionally good, especially the carp fishing, every net in the bay having had a first-class season.

Lots of fish and good prices. Bass fishing this year was up to the average. A large number of the tourists were there, and all reported the bass were very plentiful.

There has been no violation of the law of the anglers of any importance. The gill nets and pound nets in the lake have had a good average season in all kinds of fish.

The plover and snipe are very scarce, scarcely any at all around there. Wild ducks are very plentiful there this year. There have been more hunting permits sold there this season than any season before. The partridge and woodcock are very scarce in that section, but black squirrels in some sections are very plentiful, and several reports came to him of them doing considerable damage to the corn fields.

NORTHUMBERLAND COUNTY.

Overseer C. H. Cassan, of Campbellford, reports that the fishing this year has not been good. After the season opened it was fairly good during the last of June, but during July, August and September, it was not so good. He thinks the reason was that the weather was cold, and there have been quite a lot of Government works going on in his district. There are four contracts at work, and there has been quite a lot of dredging and the waters have been dirty. The law has been pretty well kept this year, although there has been some illegal fishing where the contracts are going on. The bass fishing has not been good, and he would recommend that the waters be stocked. There have not been as many Americans this year as last. If they could keep the waters stocked the revenue from non-residents would be better, and he would recommend that a bass hatchery be put in in that district, as there could be one at Healy's Falls, and would not cost much. He was much pleased to see the duck season come in at the first, as he thinks it is the proper time.

The bullheads seem to be getting quite plentiful. He thinks if there could be some net licenses it might be a good thing, but would not have too many fishing.

He would recommend a close season on frogs. There has been very good fishing this month. There have been some good catches, mostly pickerel.

Overseer Thos. H. Cheer, of Brighton, reports that the Game and Fish Laws have been well respected in that vicinity. The catch of trout and white fish has just been fair this season, but there has been a large catch of rougher varieties. There have been several applications for domestic license, and he has refused to submit the applications to the Department, as one domestic license will cause more trouble than a dozen licensed fishermen.

Ducks of most all species have been fairly plentiful this season, but snipe and plover are very scarce Under the present protection squirrels are becoming more plentiful, and he thinks the protection should be continued.

Partridge are very scarce, and he thinks the open season should be limited to fifteen days, and that the open season for partridge and squirrels be at the same time in order to keep tab on the hunters.

Muskrats are getting scarcer every year, and he thinks the open season is too long and suggests it be made from the fifteenth of March to the last day of April of each year, which would prevent the destruction of their dens and houses.

There is hardly any mink left, owing to the long open season, and the high prices paid for this fur, and he suggests the open season be made very short, if allowed to be caught at all.

Overseer W. H. Hayes, of Murray, reports that in his district fishermen report a very good catch of bullheads in the Bay of Quinte this fall; very heavy catches of herring are reported from Lake Ontario, as high as 1,300 fish in one lift. The fish are the largest seen for years. He has had two violations of the fishery law, and seized two bullheads nets after the law had run out in the spring.

Ducks are quite plentiful, more hunters than usual this fall, and they report very heavy bags. On Labor Day he caught two men, not residents of the district, hunting. He seized their boat, decoys, and guns. They were brought before the magistrate, who fined them. There is scarcely a muskrat or mink in his district, where they formerly were plentiful. He would recommend a close season for two years. Unless something is done they will become extinct in his district.

Overseer J. H. Hess, of Hastings, reports that the game and fishery laws have been well observed. The fishing in the beginning of the season was good, and the quality of the fish caught was far above the average of other years. The fishing at Hastings was not good, on account of the Government works which are under construction causing the water to become dirty.

The game laws, as far as he can learn, have been well observed. Ducks are quite plentiful, but partridge are very scarce in that district.

Overseer William Henry Johnson, of Harwood, reports that the game and fish laws have been fairly well kept in his district. He discovered one case of illegal fishing—a raft made of rails and boards nailed together and which had been used for Jack—light spearing. He watched for two or three nights, but no person came to use it, so then he destroyed it.

This has been a good year for the fish spawn to hatch, as the water was kept at a certain height, and gave the little fish time to get out of the marshes into the lake before the water went down.

The fishing has been good in Rice Lake this season. There has been a large number of fine fish taken out.

Quite a number of Americans visited Rice Lake this season, more than there have been for some years previous. They went away well pleased.

He sold fifty-five permits and eleven guide licenses, and one license to buy and sell game.

Rat-trapping was very good last spring.

Mink is very scarce.

Black and grey squirrels and partridges are scarce.

Duck shooting is very good.

He suggests that frogs should be protected, and anybody catching and shipping them should take out a license, as there is good money in the sale and export of frogs.

Overseer A. J. Kent, of Bewdley, reports that the past close season for bass and maskinonge was well observed, and when the season opened on the 16th of June they had excellent fishing. The older residents informed him that it was the best fishing they had known for over 30 years, at the end of the lake. Whether it was due to protection or high water is a matter of opinion, but no doubt there was some reason for its being so good.

Ducks were plentiful, but had to get. The weather was so fine that the ducks would stay out in the open water all day, but as it got colder the shooting became better. Black ducks are not in condition to shoot on the 1st of September. He would suggest the 15th of September, and allow rice bed shooting, as the ducks are slaughtered after they go south. Canada raises the ducks, and we should have a good chance at them first, instead of our neighbours to the south getting the majority of them

Partridge were not so plentiful, he believes the wet spring spoiled the hatching.

Black squirrels seem to be scarce. They were pretty well thinned out last Fall.

The muskrat houses were not interfered with during the Fall of 1911 and winter of 1912, consequently there were a goodly number of muskrats trapped last spring, and he is of opinion that quite a few got safely away on account of the high water.

Overseer J. R. McAllister, of Gores Landing, reports that during the month of April they had very cold and windy weather, and did not see so many fish in the

marsh as other years; but the fish were in just the same, but spawned in the deep water, and he thinks it was the best spring he has ever seen for the spawn to get hatched. He is speaking of what he saw around the Otonabee River and the drowned land in that end of the Lake. Maskinonge fishing was good this year, better than for years. Black bass fishing was good around some of the islands, but it was not so good in the Otonabee River as it has been other years.

All kinds of wild ducks were as plentiful as other years. They are coming in to Rice Lake now at the time of writing, the end of October. Grouse are increasing in numbers. Squirrel, both black and grey, are quite numerous. Muskrats were very scarce on account of the long open season—last December was an open month, and there were a great many rats caught that were worth only half the money that they sold for in April, 1912. The season for taking muskrats should be from the 15th March to the 1st day of May. All the trappers are in favour of it on Rice Lake. The Game and Fish Law was very well observed in the west end of the Lake and Otonabee River, as far as Bensfort Bridge.

Overseer F. H. Meneilley, of Warkworth, reports that he believes that the fishing is better than ever in that district, which he ascribes to the following causes: Abolishment of the use of nets and close watch on spearing.

All fish caught there are used for home consumption.

He does not know of any abuses that are existing in that district.

The close seasons have been well observed.

No violations of the law came to his knowledge, except that he found a night line and two sets of nets, which he confiscated.

The different mills in that district have observed the law well. He notified them every spring, and then watched for any infraction, and may say that there have not been any.

The fish have a free passage in that river, except for a natural fall.

Overseer Amos Shearer, of Roseneath, reports that during the close season for fish and game in Rice Lake last spring the lake was higher than it usually is at that season, and very cold and rough, almost impossible to see any fish, and he thinks very few were taken out.

The fishing in the open season has been very good.

Duck shooting about as good as usual.

Partridge are very plentiful, also black and grey squirrel.

Cotton tail rabbits are becoming a decided pest to the farmers.

Overseer D. C. Stuart, of Codrington, reports that in his district he thinks the law has been very well observed during the past year. The fish must be increasing, particularly pickerel and bass, as there were a great many caught this year, and in the smaller streams there seem to be more speckled trout than usual, he supposes on account of not much mill refuse such as sawdust running in the creeks.

In regard to game, ducks are about as numerous as usual, and he finds that partridges and black squirrels are thick. He has seen more this year than he ever saw before.

Muskrats are also plentiful around there. One trapper caught twenty-four one night last spring in Marsh Creek.

Overseer W. H. Thompson, of Bensfort, reports that the Game and Fish Laws have been well observed during the past season in his division, not saying but what there has been some illegal work going on.

The fish spawn last spring was well protected, as the water remained very high late in the season, and the spawn was hatched and out in deep water before it went down. Maskinonge fishing has been better this season than for a number of years. Black bass has not been so good as other years, although some good catches have been had. Black and wood ducks have been scarce and very hard to get, as the water this fall has been extra high, therefore ducks can feed on any place in the marsh and not be disturbed.

Partridge are also scarce and very closely hunted. There are very few black squirrels to be seen this season.

Muskrats are about the same as last year, and should be protected more closely, as they are very closely trapped every spring.

Skunk and raccoon should have a close season, as trappers catching them have a good excuse for being in the trapping grounds, therefore they have a chance to catch an odd rat or mink. Skunk, coon, and mink should have a close season together, and open season for rats should start the 1st of March and close the 15th of April. The carrying of guns during the close season should be prohibited entirely, as people discharge them on Sunday and other days as well, and if asked to stop say they are not shooting game. Of course Overseers have no proof unless they see them with the game.

It would be a good idea for the overseers between Hastings and Peterborough to meet once a year and have a talk together. Much good could be done in this way.

A number of trappers in this division are yet in favour of a trapper's license.

Ontario County.

Overseer Gilbert Gillespie, of Brechin, reports that the laws were well observed in his district. There were no reports of net fishing, and he did not find any one so doing. It was very rough weather during November on that side of the lake. There was no jacklight to be seen on the lake during the fall. He found no illegal fishing during the winter season. In May and June trout was plentiful. Black bass fishing was not very good this season, very few having been caught there. Angling for trout in October was not good, the weather being too windy: could not get out with small boats. Reports from the islands were good. He found no fish offered for sale in the butcher stalls.

Ducks are not plentiful and there are no duck hunters looking for them. There are a few muskrats, and no trappers. No mink to be got.

Overseer Charles E. Halward, of Cannington, reports that most game is plentiful this year, especially ducks. The game laws have been well observed around there. He has watched his district carefully and has not found a single case warranting a prosecution. He thinks the present game laws are all that could be desired, except that he thinks there should be a daily limit on the number of ducks shot.

Overseer George Hood, Senr., of Scugog, reports that during the summer and fall of 1911 the bass were very plentiful. The bass were what are ordinarily called green bass. The bass caught were of a very large size. During the winter there was a great deal of fishing through the ice, and everyone reports big catches of bass. Last year the lunge fishing in Lake Scugog was the best known for years. He had to report that when the ice went out in the spring of 1912 a great many dead lunge

and bass were washed up on the shore. During the summer there had been no fishing for lunge and bass. After careful consideration, he had to report that lunge and bass were mostly killed by the ice last winter. This happens in a particular winter, in his belief, because the mills at Lindsay lower the water in the lake so that the ice practically freezes to the bottom. He would urge that an effort be made to keep the water in Lake Scugog, or at least as high as the top of the dam. He would also recommend that a fish slide be put in the Lindsay dam so that fish can pass into Lake Scugog in the spring and during the spawning season. He recommends also that winter fishing be prohibited. Ducks are very plentiful this fall, more than he has seen for years. Partridge is very scarce around there this year.

Snipe are not so many as he has seen in other years.

Geese were plentiful last spring.

Mink is scarce.

Muskrats were very plentiful last spring. All trappers should have licenses to trap. The muskrats should only be trapped in the spring and all winter catching of rats be discontinued. It should not be allowed. Mink should not be hunted by dogs in the winter. In conclusion, he is pleased to say that the game laws have been fairly well observed during the past year in his division.

Overseer H. McDonald, of Beaverton, reports that the game law was very well observed in his district this last year. Game seems to be as plentiful as in former years. Partridges seem to be increasing. He could not say that the fishery laws were well observed, and he and Capt. Carson grappled some shoals at Thorah Island, and secured some hundreds of yards of net, but could not discover the owners. During the month of February he sold twenty-seven licenses for spearing through the ice. Taking the year all through he thinks it has been satisfactory to both fishermen and tourists, as the spring travelling was very good, and bass fishing was good in the first part of the season. He went on board the "Naiad" on the 12th of October, and stayed until the 28th. He also put up all posters sent him by the department, and patrolled his district when he thought it necessary.

Overseer D. McPhee, of Uptergrove, reports as follows on fish and game in his district for the past season:

In Lake Simcoe—Trout, whitefish and maskinonge are plentiful. Bass are scarce and those caught are small.

Ducks are not numerous around that lake, there being no good feeding grounds.

Owing to the cold wet spring killing most of the young birds, the partridge are not plentiful.

Mink and muskrats are plentiful.

Mud Lake, Mara—Maskinonge, bass, and pickerel are plentiful in that lake.

Ducks are more numerous than in Lake Simcoe.

Muskrats and mink are plentiful.

Partridge are scarce.

No cases of illegal fishing came under his notice, the law being well observed.

Overseer Thomas Mansfield, of Pickering, reports that without doubt the fish in that district are gradually increasing, two fishermen in his district making the best week's fishing that they ever had, and two others bringing in the biggest haul that has been brought in there for 25 years or more. Both the ducks and the fur bearing animals are holding their own. The laws have been well observed in that district. He has visited the different parts of his district, more often the

western parts and has always found things O.K. The fishing for pike and perch has been up to the average, both with troll and angling with bait, and some good hauls have been made.

Overseer Michael Timlin, of Atherly, reports that the fish laws in his district have been very well observed this season.

The fishing has been very good, and in several instances good catches have been reported.

The game laws have been well observed as he has had no occasion to prosecute.

Muskrat are quite plentiful.

Mink are scarce. Duck and partridge are plentiful.

Parry Sound District.

Overseer John G. Duncan, of Callander, reports, that there were not the usual number of tourists this year around that end of the lake. In July the visitors had exceptionally good fishing. He has seen parties of six get the limit eight bass each before 10 o'clock in South East Bay around the east shore. There were a great number of cat fish caught by the settlers in the evening. Throughout the day-time there was a great number of rock bass, perch and sunfish caught and some sheeps head. There did not seem to be so many dore or pickerel caught this season as he has seen other seasons, and it seems to him that the sunfish, perch and rock bass have multiplied greatly from the number he has seen before in the past 35 years. Of course, his attention was not so directly drawn to fishing in general then as now.

In August there were very few visitors outside Canadians, and they were not so keen for bass, but all had good fishing. Some would bring in 6 pike, 3 pickerel from 4 to 15 lbs., and pickerel from 3 to 6 lbs., of the golden colour, a thing he has noticed for a long time.

In October there were very few fishing. He did not see anyone out in the last two weeks, only one man and he had eight pike that would average 12 lbs. in one afternoon's trolling.

In general he thinks that the fish there are better than they have been in the last number of years, and he thinks that in general both the visitors and native sportsmen tried to observe the law in every respect better than he has seen in past years.

He found everyone very easy to deal with in all matters pertaining to the law. There were a few natives in the past who from the want of regular employment trafficked in fish and partridges, but he has not found anything of the kind in evidence, as there was lots of employment to be had there this season.

Overseer John Dunk, Sr., of Kearney, reports, that he finds in his territory that partridges are scarce owing to the cold wet spring of 1912.

Mink and muskrat are also scarce.

Beaver are very plentiful. Almost every creek in his territory has its colony, and in some instances farmers are complaining of the damage done by flooding of lands and roads.

Deer are not by any means plentiful. This, he thinks, is largly due to the number of hunting camps annually. The railway running north and south and east and west through these townships renders every facility to hunters who usually get their quota.

Overseer Thomas H. Johnston, of Royston, reports, that during the past year the game laws have been well observed. He had only one complaint which he thoroughly investigated and found it could not be proved. During the season the Government put some bass in Barry Lake on the boundary of Ryerson and McMurrick. He made three trips through the fishing resorts in his vicinity and found thirteen without licenses who immediately bought them.

Overseer Richard Lambkin, of Loring, reports, that during the summer of 1912 the game and fisheries regulations have been well observed. In that locality there are some of the most beautiful waters of the north country, but they have no speckled trout. He would suggest that the waters be stocked with the same.

Bass, pickerel, and pike are quite plentiful, also lake trout.

The proposed improvements on the Pickerel River, in the near future may interfere with the fish coming up from the Georgian Bay, and he would suggest that a fish slide be put in at what is now known as Dollars Dam. A number of deer have been destroyed in the past spring of 1912 by wolves, which seem to be increasing in that locality. He would advise that the bounty on wolves be given for the scalp instead of the whole pelt, as a wolf pelt is now worth considerable money, and thereby has been taken from the trapper.

Mink and muskrats are holding their own. Beaver and otter are increasing slightly.

Overseer Henry W. Reid, of Parry Sound, reports, that upon inquiries from the fishermen in his district he finds that they have had a very good season, and have had good catches all through. Any of them he has spoken to are well satisfied. He believes that there was some illegal fishing carried on in the early spring in the Shawanaga Bay, but hopes next year to be able to look after it better, as the Department have furnished him with a launch the "Katherine C," but as it came a little late the fish were going out before he got started. During the tourist season he may state that the fishing was not as good as last year. The bass did not bite as good but there seemed to be plenty of them. There were a large number of tourists in this district, but they did not stay as long as usual, as August was so cold and stormy. He finds that the non-resident tourists observe the laws very well and seem well pleased with the sport in bass fishing they find there.

During the year he seized two pieces of gill nets used for illegal fishing and the party was fined. He also went to Shawanaga Bay in the "Katherine C," and found a large Seine net on an Island and sent it to the Department, but did not find the owner of it.

During the month of August he went to a place called Salines on the C.N.O. Railway and arrested four men for angling without permits, and had them appear before the magistrate and fined. One of the party was also charged with killing deer out of season. He pleaded guilty and was fined $20.00 and costs, which he (the Overseer) thinks was a very small fine for the offence. There was also a guide in the party who escaped at the time, but was later arrested and charged with killing deer out of season and guiding without a license. There were two canoes, 1 rifle, 1 shot gun and four fishing rods confiscated.

Partridge this year are very scarce, and he believes it is owing to the cold, wet weather during the hatching season.

Ducks seem very plentiful, and there have been quite a number killed.

Deer are numerous, and there are a large number of hunters in the woods. There have also been four moose and several bear shot near there during this season.

NORTHERN PIKE.
(*Lucius lucius*).

Overseer Murdock Watts, of Byng Inlet, reports, that there has been more maskinonge caught in the Magnetawan River this year than ever before, some of them weighing as high as 29 lbs. Fishing has been splendid all through the tourist season, although there were not as many tourists in his division this year as last. The cause of this was owing to such a cold, wet summer. He has had no complaints from the licensed fishermen, although the catch will be much lighter than last year.

Deer are on the increase, and he has no complaints from the hunters. Partridge are not as plentiful as last year. This is caused by such a cold, wet and backward spring, and he believes that the young birds perished. Ducks are very plentiful. There have been more moose seen in his division this year than ever before. He has seen as many as five together in Sand Bay and in Black Bay.

Overseer John Woods, of Parry Sound, reports the fishing to have been very good this season, as far as the guides report.

The game around the Townships of McKenzie, Burpee and Burton have been fairly well observed.

Game of all kinds seems to be plentiful.

Peel County.

Overseer Alex Clunis, of Claude, reports, that they have had a good season of trout fishing. Most of the dams went away in the spring floods on the River Credit, allowing the fish to get down and get up the tributaries, there being a lot of very fine ones caught by the anglers. Bass fishing was not as good as usual, the cause he presumes being from the lowering of the water in all the inland lakes, that being where the bass fishing is mostly done.

There is a fine showing of partridges this fall, and they should winter well, as the beech trees are teeming with nuts, which is one of their best winter food-stuffs.

Cotton tail rabbits are very plentiful. Black and grey squirrels are getting numerous, thanks to the close season.

Overseer James Johnston, of Orangeville, reports, that the speckled trout fishing has been as good as previous years. He notices the partridge is quite plentiful, and also reports that rabbits are numerous, especially the cotton tail rabbits which are on the increase. He hears complaints of them doing a lot of damage to crops and fruit trees. He would recommend no protection for them.

The mink and muskrat are on the decrease. He would recommend better protection. He would also strongly recommend that every trapper pay a license fee.

Overseer R. J. Walker, of Port Credit, reports, that the fishing has been very good. Trout and whitefish have been quite plentiful with good price and large demand. Herring remains about the same.

The angling has not been so good. He thinks so much rain keeping the water so muddy has been the cause.

The game laws have been fairly well observed, but game in that section is getting very scarce.

Black and grey squirrels are not so plentiful this year. Partridges are about the same. There are no ducks worth speaking of, but the cotton tail rabbit is getting quite numerous. All other game is about the same.

PERTH COUNTY.

Overseer Charles Jickling, of St. Pauls, reports, that he has covered the district for which he was appointed about four times in the season and found the laws fairly well observed, and has had to impose no fines during the past years work.

He finds that black and grey squirrels are getting very scarce. Partridges seem to be holding their own. A few quails are to be heard, and he has asked members of the gun clubs to leave them alone and let them live.

There is very little shelter for the quails, as the country is pretty well cleared.

Cotton tail rabbits are very numerous, and a great many people are complaining of their garden shrubs being destroyed last winter.

Wild duck are seen flying over, but there is not a large enough body of water there to entice them to alight.

Large flocks of geese were seen in April alighting on the fields, and seemed to stay till May.

Muskrat and mink seem to get very scarce.

He has been asked by gun clubs, why not have shorter seasons, and have same season for all. There would then be less chance for having them shot out of season.

If you were to prohibit the shooting of muskrat altogether, and shorten the season for trapping from about March to April, and then have everyone who cares to trap fur-bearing animals pay or take out a license of about $2.00, then those who take out a license would be on the lookout for any who do not pay.

He fears the time will soon be at hand when all must have license to carry guns.

PETERBOROUGH COUNTY.

Overseer Wm. Clarkson, of Lakehurst, reports that the Game and Fishery Laws were well observed this year.

The Bass and maskinonge are holding out well with an increased catch every year.

The trout in Catchacoma and those other lakes north, the fishermen report favorably.

The tourist trade is increasing every year. The ducks are holding out well considering the number that is taken every year.

Partridge are plentiful, also mink and muskrat.

The deer hunters say a few more years with the same regulations will bring around the desired effect.

The "Naiad" with Capt. Carson has done excellent work in helping to enforce the game and fishing laws.

The regulations regarding mill refuse have been well observed. There are no fish slides in his district.

Overseer Edward Dulmage, of Oak Lake, reports that as to quantity of game fish and animals in the surrounding country and neighbouring lakes he thinks that in Oak Lake bass are decreasing, the cause being that spawn is destroyed by red finned mullet; trout scarce; Koshabog bass fairly numerous. Round Lake maskinonge and bass are also fairly numerous. Deer are not as numerous as in the past. It is his opinion, and the settlers think the same, that if the hounds

The Lift-Lock at Peterboro on the Trent Canal.

were stopped and the season fifteen days later, deer would increase. Mink are scarce. Muskrat is quite plentiful and partridges are numerous. The game laws have been well observed in that locality, and there is small cause for complaint.

Overseer Edward Fleming, of Hastings, reports that there has not been any fish caught in Hastings in the close season that he has any knowledge of. There has been good fishing below Hastings this summer, some big fish having been caught. He has heard of no spearing having been done this spring. He thinks the fish spawned early in the spring and then moved out into deep water. The laws have been well observed.

A number of muskrats were caught in the spring, and he thinks it would be a good think to put a small license on each trapper. The ducks on the river are very plentiful this fall, but are very wild, the reason being, he thinks, that there have been a number of steamboats on the river drawing stuff down to Healy's Falls for the canal, and they have been dredging out the river below Hastings, so the ducks have been disturbed considerably. He did not see any one shooting in close season.

Overseer Wellington Lean, of Apsley, reports that fishing has been fairly good during the past season, and a larger number of tourists than usual have visited those lakes.

There are three mills in his district which he has visited from time to time and found in a satisfactory condition in regard to sawdust and waste. There are no fishways in his district.

There are beaver colonies to be seen on almost every little lake in his district, and they are becoming more numerous every year. He has visited these colonies different times, and can see no sign of them being molested in any way.

Muskrats are very scarce, and mink is almost extinct.

Ducks are more numerous this year than for a number of years.

Partridge are not as plentiful as they gave promise of being earlier in the season. Deer seem more numerous than for a number of years. It is a splendid idea allowing only one deer to each person, and he would advise prohibiting the killing of any deer for three years and prohibit the running of dogs.

A number of working men report having seen a moose in different places.

He thinks the game and fishery laws and regulations have been well observed in his district.

Overseer F. J. Moore, of Lakefield, reports that during the past year the Game and Fishery Laws have been fairly well observed in his district, with the exception of a few cases with the settlers, which he handed over to the Fish and Game Inspector and were settled satisfactorily.

The past spring was fairly good for fish spawning in his district, for the reason that the water was kept up until the season was well over, which gave the small fish a chance to get out into the deep water.

Tourists have had fairly good luck with rod and spoon this year, particularly bass fishing; maskinonge have not been so plentiful this year, particularly during the beginning of the season. He would again strongly recommend that Stony Lake be re-stocked with bass, as he thinks it of great importance that the fish supply be kept up in these waters, as Stony Lake is fast becoming a great summer

resort for tourists, who come from all parts of the United States, as well as from our own province. He does not think the fishermen would mind paying more for their angling permits if they had better fishing, as they seem delighted with our lakes.

They have not had as many fishermen this year as in former years, as they seem to go farther up the lakes. Then a number of Americans get their permits on their way to Canada, but with the tourists and people of our own province there are a great many people on Stony Lake.

He thinks it would be a good thing if arrangements could be made with the Dominion Government in regard to keeping the waters as nearly one height as possible during the spawning season in the spring, as a large amount of fish spawn could be saved by a little care in regulating the height of the waters in the spring.

He would again suggest that the close season for bass and maskinonge be from the first of April to the 15th of June, as the fish run as soon as the ice disappears.

The Game Laws have been fairly well observed during the past year, particularly in regard to deer hunting, in his district. Partridge are plentiful this season. Ducks are not so plentiful. Trappers have had a good season, particularly trapping muskrats. Mink are very scarce.

He would again suggest that the carrying of firearms be prohibited as much as possible in his district in close season, as there are so many people on the water in the summer, it is very dangerous, and there is no necessity for carrying such. If this could be done it would be better for tourists and all parties on the waters.

Overseer John McFarlane, of Keene, reports that the game and fish laws have been very well observed in that district. The majority of the people are interested in the preservation of game and fish. Rice Lake never had a better chance to be restocked with fish than it had this last spring, as the marshes were flooded until late in the summer, and the small fish were in abundance along the shores. Bass fishing has been excellent this year—but longe fishing was not so good, although there seemed to be plenty of them in the spawning season. When the time came for fishing they did not seem to take the bait, except at the mouth of the Otonabee river, and Trent. Longe fishing was very good at these two places. Muskrats were plentiful, and a fairly good number were trapped, considering the amount of trapping that has been done every year.

Rice was a fair crop this year, but the season was short for gathering it, as the wind blew a lot of it off when it was time to harvest it.

Ducks are plentiful this year, but sometimes hard to get as they raft out in the middle of the lake in large flocks. At times shooting was good and a good number has been taken. Most of the shooting was done on points along the lake, and on islands; very little blind shooting was done. It is reported there was some shooting from a gasolene yacht on a Sunday, but there was not much of it done. He was told some of the hunters ordered them to stop. There were also some wild geese on the lake at times, but they did not remain long. The hunting season needs a lot of attention from an overseer, especially on Rice Lake where there is so much hunting done, and there are strangers coming and going all the time. A good number came from Toronto this fall, and stopped at James Ashburn's summer resort, and took home a good supply of ducks.

The partridges are increasing in that district. Mink are scarce. Black squirrels are plentiful. Mill owners are careful as to sawdust and rubbish.

Overseer John Watt, of Peterboro, reports that both game and fish have increased wonderfully, more particularly the fish. Maskalonge and bass have been very plentiful, and some excellent catches have been reported, unusual as to size and quantity. The high water in the spring favoured the fish and made it more difficult for poachers using nets, as the fish spawned in the drowned lands among reeds and rushes over a large area, where in low water they confine themselves almost entirely to the creeks. The rush of water made work hard, but it discouraged others that had no legal business on it. He had some violations and a few prosecutions. He captured five small nets, but that is not bad for his territory. He kept a pretty good watch, and held them down to the minimum. The muskrat catch was very fair, and duck are coming in plentifully. Partridge are increasing in numbers.

Prescott County.

Overseer F. Dupuis, of Hawkesbury, reports that the game and fishery laws have been reasonably observed although he had to make some investigation on hunting dogs running through the bush during the close season. As to the game, ducks have been plentiful, but very few shot. Partridges not very plentiful. Fur-bearing animals, mink, muskrats and fox were very good. Fishing has been fairly good. The fishermen seem seem to be well satisfied.

Prince Edward County.

Overseer Angus Brisbin, of Picton, reports that the fishing season this year around Main Ducks and Traverse Point has been as good as usual, but around Waupoose and Indian Point white fish and salmon have been not as good, but eels have been plentiful.

The early part of the season the weather has been quite rough, he having to stay there five days for wind storm. He has in all thirty-eight gill net fishermen, five hoop net, and about twenty-eight line fishermen.

He never saw as few anglers as this year.

He had eight rat traps in his possession, which he gave to Captain Flemming, who called several times during the season to see him.

It will be necessary to have some steps taken to show the line between the American fishermen and our own.

They have had trouble, and he is of the opinion it was the American who took some of their nets and cut them. It will have to be buoyed to show the division.

He has not any fault to find with the way the fishermen have observed the laws.

Overseer David Conger, of West Lake, reports that the catch of whitefish and salmon trout has been very satisfactory to the fishermen. He has been over his territory on different occasions, and is satisfied that the licensed fishermen observed the laws.

Angling has not been as good this season in West and East Lake on account of carp, bullheads, pike and suckers.

He would suggest to the Department that hoop-net licenses be granted for these waters.

Regarding game, ducks are very plentiful. Muskrats and mink are very scarce. He seized six muskrat traps last winter, which he found set in muskrat houses. He entered an action against the parties, and had them appear before a magistrate, and got a conviction against them. Partridge are very scarce. Black squirrels are holding their own. The game laws have been well observed.

Overseer E. R. Fox, of Northport, reports that the fish of all kinds are on the increase, more so than the season of 1911. The bass are very plentiful, so that any angler can catch his limit in a few hours. But he notices in calling at the different packing houses that there are a number of small pike that are unfit for use, and he would recommend that all pike retained from the waters be not less than 18 inches in length; also, he would recommend that the open season for gill-nets be the same as for hoop-nets—the 1st of October. There were plenty of ducks on or before the 16th of September, and well looked after as regards to shooting before the date of open season, but since the open season they have been quite scarce, owing to scarcity of food. There were more ducks killed on the 16th of September that he ever remembers on the first day of open season, and all hunters report the same. Muskrats and mink are quite scarce, owing to the large amount of trapping, and they will very soon be something rare in his division, if there should be open season the same as in the past.

Overseer E. A. Titus, of Wellington, reports that this season has been a favourable one for fishermen in his division. Salmon and whitefish have been very plentiful, and those who fished principally for salmon say they never knew them to be more numerous, and when fishing for whitefish had splendid results. Both salmon and whitefish were much more plentiful than last year. Bass, pickerel and pike are on the increase in Weller's Bay and Consecon Lake. Hoop-net fishing was a success this last spring. Black ducks were very numerous in the early season. Fall ducks are just beginning to come. There were a great many wild geese, but very few killed. Partridge, they tell him, are about the same as last year. Muskrats appear to be as plentiful as last year. Mink, beaver and black squirrels are very scarce in his division. The licensed fishermen he had no trouble with, but outsiders will drop in a net and take their chances of being caught. He has lifted eight pieces of gill net out of Weller's Bay, but he could not learn who the guilty parties were.

Rainy River District.

Overseer Wm. Aymer, of Fort Frances, reports that he has been on the lakes and in the woods continuously, weather permitting, since July 15th. The game laws have been fairly well observed, except in a few minor cases, where a warning seemed to answer the purpose. The fishermen on Rainy Lake have done fairly well the early part of the season, but not so well latterly, owing to the high water changing the run of the fish.

Game of all kinds is plentiful. Partridge and grouse are on the increase. Deer never appeared more numerous. Moose does not appear to be as plentiful around the lake as before, but rangers and others travelling the woods tell him there are just as many, if not more. He has been told that east of Mine Centre the sectionmen working for the Canadian Northern Railway carry guns on their hand cars, and have been shooting partridge since they were feathered out. The greatest trouble there is with boys and foreigners owning 22 calibre rifles, and there are a number of Americans owning islands on the lake who bring rifles and shot-guns

Pither's Point on Rainy Lake.

with them, especially 22 calibre rifles. He would recommend a gun license; it would hold guns that come across the border, returning them when the owners leave; it would help.

There are a number of American trappers coming into the country. One fur company of St. Louis, Mo., is beginning to make a business of sending trappers into Canada. They come in at some out-of-the-way place, work for three or four months, and smuggle their catch over the line, bringing their traps and guns and ammunition with them. The only way to get them is to go into the woods after them.

Overseer George S. Cates, of Emo, reports that, owing to the very wet weather and bad roads, he has not been able to get around as much as he should like to have done. However, he has observed that the people of that part obey the law quite well.

Partridge, he finds by enquiry, is very plentiful.

Prairie fowl are increasing slowly, but a few can be found in almost any settled part of the country.

Wild ducks seem to be plentiful.

Wild geese do not stop much there.

Rabbits are so numerous, they have become a pest.

Deer are increasing every year.

Moose are holding their own north of the river, in spite of the settler.

Beaver are getting quite plentiful, and their dams and houses may be found on many small streams in various parts of the country. He believes that all trappers should pay a license.

Renfrew County.

Overseer Samuel Andrews, of Micksburg, reports that he has taken reasonable precaution in regard to the game and fishing regulations, and has found no person violating them, consequently has collected no fines. He finds pike more plentiful than last year, due no doubt to the fact that very few nets were set this season. Black bass are scarce. Ducks and partridge were not as plentiful as last year. Muskrat and other small fur-bearing animals are also scarce. Deer are more plentiful, and are often seen in the settled parts of the country.

Overseer W. L. Briscoe, of Killaloe, reports that he has kept a very close watch over his territory this year, and finds that the people in general are observing the game and fishery laws much better than in previous years, with the exception of some outlaws, whom he had to fine. But, owing to such a large area of barren territory in that district, one man is not able to look after all of it, as he would need to be out all of his time travelling to catch the poachers. Although there have been quite a number of convictions there, there have not been many in his territory.

Fish: Trout are becoming plentiful in Round Lake. He has not allowed any netting this year, and he only sold one non-resident permit.

Deer are increasing every year since he has been acting as overseer. Partridge are plentiful. Beaver are becoming numerous on the north side of the Bonnechere River. There are not many muskrats, but mink are coming into that district. Moose are fairly plentiful on the north side of the river in the mountains.

Overseer D. E. Burns, of Pembroke, reports that he has had several complaints from settlers in the back settlements that beavers are doing considerable damage to property. He had a man from the Province of Quebec up and fined for illegally

hunting ducks. This same man is back again this fall. It was last fall that he had him fined. He held him up the other day and asked him his authority for coming back to hunt ducks. He produced a non-resident duck hunting license which he got from the Game and Fisheries Overseer at Ottawa. He thinks this man had no right to get a license for at least two years. The open season for hunting partridges in the Province of Quebec starts the 1st of October, and in the Province of Ontario the 15th of October. He thinks those dates should correspond in the two provinces, as it causes considerable illegal hunting along the lines.

Overseer John Devine, of Renfrew, reports that the game and fishery laws have been fairly well observed this year in his division, although complaints come in from time to time claiming that illegal hunting is practised in certain sections, but on investigation they nearly all appear to have no foundation. He has had three parties before the resident magistrate during the year, and obtained convictions against them.

The hook and line fishing has been good in the Madawaska River and Calabogie Lake. The black bass in those waters are plentiful.

There were no angling permits sold this season. At present there is a regularly licensed fishermen catching bullheads with hoop-nets in White Lake, and with fairly good results.

Deer are not as numerous as last year, owing, he believes, to the fact that wolves are very numerous along the valley of the Black Donald in Brougham and Griffith Townships, Slate Falls in Lyndock, and Mud Lake in North Cananto. They have also destroyed a number of sheep belonging to the settlers convenient to the above named places. He would suggest something should be done toward exterminating them, or to encourage their extermination. Partridge are not as numerous as last year, owing, he believes, in a large measure to the cold and unfavourable weather of last spring.

Overseer A. H. G. Wilson, of Eganville, reports that the conditions are apparently healthy all over that district with regard to fish. There has been no illegal fishing in this district. Any fishing that was done in his district to his knowledge was mostly done by campers who fish more for amusement and sport than for profit, although there was no illegal fishing done. There was no netting reported to him this season, and he has never seen a net out on the lakes or anywhere else. He thinks it is a good idea to prohibit netting all through that section of the country, as there are lots of fish for all if caught only by hook and line, or trowl either, and he thinks next season will be better, as they have had abundance of rain, and the rivers and creeks will be deeper and faster, and fish will be able to get back to higher spawning berths and marshes on the creeks and lakes. He thinks prospects are very good for next season's supply of both fish and game, and with a favourable winter there will be still fur-bearing animals left in that district.

From what he has seen and heard from the settlers wherever he has been they are satisfied with all the conditions, unless hunting with dogs. They claim that the deer are driven out of the country by outside parties who come into their locality and bring a host of dogs with them and hunt for two weeks, and what they don't kill and take away are driven out of their resorts and feeding grounds and hunted back north of the Petawawa across the Ottawa River to the Quebec side, and lost to them entirely. The settlers claim if dogs were not allowed to run in the hunting season there would be plenty of deer for all. But as it is the law, they must submit to it for the present at least.

He thinks that both partridge and duck are fairly plentiful, for on his last trip from Dacre to Lake Clear he saw quite a number of partridge, and also two nice flocks of duck on Lake Clear. The people of that district are all getting down to observe the law better than a few years ago. They either have not time to hunt game, or they are afraid of the law.

He knows where there are a fair number of mink about two miles down the Bonnechere River since last spring, and he supposes there are a few more down the river further, and as there are no hunters or trappers around there, they are therefore multiplying.

Russell County.

Overseer J. B. Bourgon, of Rockland, reports that the catch of fish during the season of 1912 averaged about the same as in 1911. About the same number of licenses have been issued. Bullheads and cat fish were taken in the Ottawa River. During the summer three parties were fined, two for fishing without licenses, and one for fishing with a hoop-net near Petrie's Island, between Orleans and Cumberland.

No anglers' permits were required during the season. As this district is well settled, there are no fur-bearing animals to any extent.

Simcoe County.

Overseer John Beatty, of Midland, reports that there were very few violations in regard to the Game and Fishery Laws.

A great number of black and yellow bass was taken out of the Little Lake during this season.

There were some very large maskinonge caught in the Wye River and Bay, some weighing as high as thirty pounds.

Ducks are plentiful.

Partridge not as good as last year.

Mink are about as plentiful as in former years.

There was a great number of muskrats taken out this year on account of the high water.

Overseer Samuel Coulter, of Gilford, reports that during the past year the game law has been well observed in his district. There was no illegal fishing that he knows of during the winter and spring seasons. Quite a number of trout were caught during the winter season. The bass fishing was fair, but the maskinonge seemed to be very scarce. The Bradford Fishing Company during the fall of 1911 had some grand catches of carp, catching as high as 30 tons at the start. He had no trouble with the anglers, as the people who follow this sport seem to know the law.

Ducks have been more numerous this year than they have been for a number of years past. He has seen a few flocks of geese this fall.

Black squirrels do not seem so plentiful as they were a year ago. Raccoons are quite numerous in those parts, but the muskrat and mink continue very scarce.

Overseer B. A. Dusang, of Waubausheue, reports that angling has not been quite as good, one reason, he thinks, being the cold season. Bass kept outside where they found shoals in the open lake. They had good fishing. The anglers lay the

blame on the pike, as they are very plentiful on the bass grounds. Many more tourists visited those waters during the past season. He sold over one hundred permits more than last season. The fishermen have had a very rough season. They have lost a lot of their nets. Pickerel is increasing. Trout and whitefish are not up to last year. Ducks and partridges are up to other years. He thinks that the sporting season on partridges has done a lot towards increasing them. He got two trap nets in Moon River. In May they were hid on Waubuno Island, ready to set. He destroyed them on the spot. Also got one hoop-net and about two hundred and fifteen yards of gill-net under size. The laws have been kept well.

From the 12th to the 19th October there was only one day fit to fish. If there are any trap nets anywhere they must be hid in the bush, as they cannot find any in the water, and they have got them hid before now. There are a lot of complaints from the anglers on account of coarse fish in towards the shores. They get tired of pike, and they tell him that they destroy the bass spawn. A great many want to know if the Department would take into consideration and allow some few of the guides to gill them out by paying a license in the winter.

Lunge has not been as plentiful in the past twenty years, he is sure. A party told him there the other day that they should set gill nets and thin them out.

This has been the stormiest season since he has been on duty. For twelve days the fishermen have been tied up.

Overseer George G. Green, of Bradford, reports that the extremely high water has been a grand thing for the game there this year.

Ducks are very plentiful, and the quantity of black duck has been numerous, some splendid bags having been made.

Teal were also rather plentiful.

The wood duck are scarce.

Snipe have been numerous, but the high water has driven them to the high lands, so that the shooting of them has not been so good. Partridge are scarce; he supposes the wet weather has drowned the chicks. Squirrels are not very plentiful. Fishing has not been very good, presumably on account of the enormous quantity of feed. The fish company who are operating there have had a very good season. He strongly advises a close season on all fur in this district, as a few years for the rats and mink would give these animals a chance. This opinion is concurred in by the local trappers.

Overseer J. H. Laughlin, of New Lowell, reports that the Game and Fishery Laws have been well observed in that district. Red deer are increasing very fast; also partridge. Wood hare are very plentiful. Mink are scarce; also raccoon. He would be in favour of having a close season for the raccoon the same as mink. Trappers have their traps set for raccoon in October, and the same trap will catch a mink or rat.

Overseer Robert Leadlay, of Barrie, reports that there has not been as many whitefish and herring caught as in 1911. Trout are seldom caught in Kempenfeldt Bay. The spawning season for them begins about the middle of October, and with ten days' extension this year they are off the shoals before the close season begins. He does not think it necessary to protect trout from the troller, as there are few caught in proportion to the quantity in the lake. Muskrats have been plentiful, but the Indians trapped most of them last spring. There are quite a few deer between Angus and Minnising, but they do not seem to increase very fast.

The "Audrey C," patrolling waters of Georgian Bay.

Overseer William McGinn, of Orillia, reports that angling for bass in the beginning of the season was very poor, but the latter part of the season has been excellent and the sample large; also pickerel are becoming more plentiful. Muskalonge trowling has been good, some very large ones having been caught. The parties having a license to net carp found it a failure, the water being so high being the trouble. They gave up the business in despair.

In Lake Simcoe the bass fishing has been very poor. Have been out with fishing parties all through the season and have never had a fair catch. But trout are very plentiful, and some very large. Catches have been made with the trowl. This is accounted for by the careful watching of Captain Carson and the crew of the patrol boat "Naiad."

Whitefish are also very plentiful. During the season there have been very few tourists in that district, on account of the cold, wet weather.

Regarding game. Mink, muskrat and fur-bearing animals are very scarce in that section of the country. They are almost extinct in most cases.

Ducks are also scarce on account of no rice in these waters.

Partridge are becoming quite plentiful.

Deer is almost a thing of the past.

The law regarding game, especially partridge, has not been as well observed as in the case of illegal fishing. He has had several complaints of illegal shooting of partridge, but found it impossible to convict, as the settlers would make reports but would not stand by them.

Overseer Harry Mayor, of Painswick, reports with regard to fish, there have been quite a number of trout taken, but they are by no means plentiful. Whitefish and herring are very numerous, and although there are a great number caught, the supply does not seem to diminish. He regrets that bass are still on the decrease, and although he has tried to find the cause of the decrease, he can furnish no reasonable solution to the problem, and he thinks the matter is well worthy the attention of the Department, and should be looked into.

Lake Simcoe should be an ideal place for bass, and one would naturally think they would multiply instead of diminish.

As regards game in that locality, the conditions are much the same as last year. Quite a few partridges have been seen, and he thinks they are also more plentiful.

Ducks and other water fowl are not quite so numerous, while hares and squirrels are easily holding their own.

Overseer Samuel Patterson, of Dunkerron, reports that he has had no reason to inform on anyone in his district. Regarding the big fish, they seem more plentiful than last year, and the wild ducks and partridges seem quite numerous. Muskrats and mink are rather scarce.

Thunder Bay District.

Overseer W. H. S. Gordon, of Port Arthur, reports a particularly good season's fishing throughout the districts under his supervision.

Port Arthur and Fort William District.—In this district the fishermen report better fishing than has been enjoyed for years. The gill-net men state that it has been many years since there has been the run of fish of this season. The increase

has been particularly noticed in the catch of trout. During the summer and fall there has been some large catches. Whitefish have also increased, in fact there has been a noticeable increase of whitefish during the past two years.

The pound net fishermen have also had a good season.

Fish brought a good price this year, almost the entire catch being marketed in the two cities, Port Arthur and Fort William, at prices averaging from 8 to 9 cents a pound. The fish retail at 12 cents a pound.

The herring season last fall was also a heavy one. The weather was good, there being sufficient frost to keep the fish until they were shipped to outside ports.

Rossport District.—The fishing at Rossport was somewhat better this season than last, the fall fishing being much better and the weather being more favourable than during the season of 1911-12. The same experiences he found at Port Coldwell.

Inland Lakes.—The Inland Lakes fishing has proved to be good. The only falling off in the fishing has been reported from Whitefish Lake. This no doubt was due to the warm weather, as the fish remained in the deeper water. However, the licensee states that she intends to give the lake a rest next season, following out her custom of former years, of securing a license and doing no fishing at all for a year. The other fishermen he finds have been fishing conservatively, and they are certainly doing the lakes no harm. If they continue to fish with the same wisdom as heretofore, there will be no fear of the lakes becoming depleted. In fact there is not the least doubt but that with the present conservative fishing the lakes will be the better for it. The fish are better now than when the netting first commenced.

The lakes are mostly fished in the winter time. This is due to the fact that the fish can only be transported by team.

Extension of Fishing.—He has advised the fishermen that there will be no extension of the fishing this season. In view of the fact that they have had such a good season, he would not recommend such an application.

Sawdust Dumping.—There has been no sawdust dumping in the waters. In fact, there is but one mill running, this on Black Sturgeon, and the sawdust is now being conveyed to a burner, where it is consumed.

Hatchery.—Mr. McNab, who is in charge of the hatchery, has been very busy this season. He has secured a large amount of fry from different points. The fishermen have also been giving him all the aid possible in securing the eggs.

Game.—The district is so large that it would be impossible to give the entire section close surveillance. There has undoubtedly been game destroyed out of season, especially along the railway construction. However, some arrests have been made, and convictions have resulted. The Provincial police have been responsible for these. Game is very plentiful this season, especially the small game. It has been some years since partridge have been so plentiful in this section. Since the open season large numbers have been shot, and the general report is that the birds are more plentiful than ever before.

There was a report that the Americans were fishing in Canadian waters along the north shore. He made it a point to investigate and found that there was absolutely no truth in the statements. The local fishermen are fishing in the waters right to the boundaries, and they state that they have never found a net of the Americans in the waters on this side of the line. A few years ago the Indians on the American side might come over into the Canadian waters, but they only crossed occasionally, and they were fishing light rigs.

His inspections have been most favourable. He found that the fishermen are prospering throughout that whole district. The men mostly all own their own property, and they are fine citizens. They are all experienced fishermen, and they have excellent fishing equipment.

Victoria County.

Overseer William Adair, of Norland, reports that the Game and Fisheries Laws have been well respected in that vicinity. The bass and maskinonge catch was as good as usual. The chief fish caught there are bass, maskinonge and trout. There are none caught for export. The sawmills in that district respect the law in regard to disposal of refuse. There are no fish-ways in that district. The fur-bearing animals are becoming plentiful, especially beaver and otter. There have been several complaints from farmers about the beavers damming up their creeks and flooding their lowlands. Only one violation of the law came to his notice, and that was for trapping beaver. Two skins were confiscated and sent to the Department, and a fine of $25.00 imposed, and reported to the Department at the time.

Partridge are plentiful. Ducks are scarce.

Overseer J. R. Boate, of Fowler's Corners, reports that maskinonge and bass have not been as plentiful as in former years. Perch are very plentiful this season.

Fur-bearing Animals.—Muskrat is more plentiful than in former years. Mink are getting very scarce. Fox and raccoon are not as plentiful as in former years. Rabbits are very plentiful this season.

Duck.—Ducks have not been as plentiful as in former years. The high water this season destroyed the rice beds.

The Game and Fishery laws have been very well obeyed in that district. This season no violations came to his notice. No convictions this year.

Overseer A. Bradshaw, of Lindsay, reports that the angling season was a most satisfactory one. Maskinonge were more plentiful than they have been in these waters for years.

Bass were caught in large numbers, also. In spring, when the maskinonge were on their spawning beds, the water was high and the weather rough and windy, so that the fish were enabled to deposit their ova in comparative safety, and by these conditions the roe had a good chance to mature.

The protection given the frogs in that county for a period of two years should help them to become numerous.

Ducks are increasing year by year; they were more numerous this season than they were last year, and this is pleasing to all true sportsmen.

Muskrats were plentiful in spring last, and good catches were made by local trappers; prices were higher than usual for their skins, so that trappers were well satisfied with the season's catch.

Mink were caught during the fall and winter months, but many were caught in spring when trappers were catching rats.

The law during the close season was well kept in that section. Only one case upon which he could take action came to his knowledge—a case of an Indian spearing rat houses. The Magistrate imposed a fine, and the case is not fully settled, owing to the defendant having left the County of Victoria.

Overseer Chris. Burtcheall, of Coboconk, reports that the bass are scarce, although there seemed to be quite a few just when the open season commenced; towards the end there were none being caught. The maskinonge fishing was very good towards the end, that is to say, for the months of September and October. As for spring spearing, he saw no one doing any.

The deer hunting around there last year was fairly good. Nearly every man succeeded in getting his deer, he thinks owing to there being no snow till the last few days of the season. No deer were shot till the last week. As to partridge and ducks, they are both rather scarce in his district. As for quail, there are none.

He thinks there should be some amendments made in regard to the guides. He thinks that no person should be allowed to row any person or persons outside of their own family without first obtaining a license—that is to say, a guide's license. This season a great many rowed without their license, and as there was no amendment in regard to that, it made it very hard for the overseers to do anything towards prosecuting those parties who row tourists without their guide's license.

Overseer W. J. Fry, of Kirkfield, reports that maskinonge and bass are not very plentiful this season in the canal water east of the Lift Lock. Maskinonge was very plentiful in the spearing season in the flooded land. This year carp are plentiful in these waters. Muskrat and mink are scarce. Ducks are plentiful this season. Partridges are getting plentiful these last two years. Beaver and otter are scarce in that district. Deer are also scarce. The Game and Fisheries law has been very well observed.

J. J. Irwin, of Dalrymple, reports that the canal waters contain carp and suckers in abundance, and a few maskinonge and rock bass.

Maskinonge, pickerel and bass are plentiful in Mud Lake. Dalrymple is becoming a favourite summer resort with tourists.

Ducks are plentiful this season; partridges are in goodly numbers.

There are not many deer in his district.

There are a considerable number of muskrats this year, but somewhat less than last year. Mink are scarce. There are a few otters this year.

Three violations of the law have come under his notice this year.

Overseer John Jones, of Fenelon Falls, reports that the laws in his territory have been well observed as far as he is aware of. Cameron, Balsam and Sturgeon Lakes have had better fishing than for some years. There is one thing he would like to draw the Department's attention to which is entirely wrong—the trout fishing north of there. The close season comes in on the 1st of November. He thinks it should be from the 1st of October to the 1st of November.

On his many travels on special patrol north of Haliburton he might mention that the wolves are getting more plentiful every year. He believes they are killing more deer than the hunters are. He thinks it would be wise to raise the bounty from $25 to $30 a head so as to encourage the people to get out and destroy them. In the district he travelled this fall he found the wolves had come out and killed several farmers' sheep.

He finds there have been few deer taken out north of there, but he thinks the reason is on account of the high water, as the marshes are flooded, and that there is no doubt this saved the massacring of many deer.

Rats were fairly plentiful from the reports of those trapping, as there was something like from sixteen to eighteen hundred rats caught within three miles of Fenelon Falls.

Ducks have been about the same as other years.

Overseer H. B. Parker, of Bobcaygeon, reports that during the past year the fishing has been better than it has been for some years, especially the maskinonge. The lake appears to be full of small ones just over and under the limit 24 inch, although there were a great number of very large ones caught this season.

The bass are about the same as usual as to size and number.

The spawning season for both bass and maskinonge was fairly good last spring. The tourists are increasing every year, both anglers and hunters.

Deer seem to be about the same as usual. Muskrats are fairly numerous, but it is very hard to get some people convinced they are making a mistake by trapping them in the fall.

Mink are about the same as usual in number, for they are caught by some people they call "hogs," who will kill them when the hides are practically worthless.

Beaver are on the increase all over the back country.

Partridges are very numerous this fall.

The early fall duck is very scarce this fall, he believes, owing to the water falling very low last spring, and then about the 22nd of May the heavy rains came, and the lakes and inland marshes alike rose to a height that they very seldom get, even with the spring freshets, and probably drowned out their nests. The late fall ducks are at present coming in, in large flocks.

Wolves are getting numerous here and work havoc among the deer.

Overseer C. W. Parkin, of Valentia, reports that maskinonge and bass were very scarce throughout his division during the past season, caused to a certain extent by the low condition of the water, and some perished during the severe winter weather. Then when the new cement dam at Lindsay was constructed, there was no proper provision made for the fish to come up to the Scugog waters, as fish always work up stream when spawning. He maintains there should be a proper fish-way provided in said dam to permit fish coming up to Scugog Lake. The bass were fished out through the ice during the winter, therefore the tourists who enjoy casting for those gamey fish were deprived of that pleasure. It seems ridiculous that a body of water so suitable for the breeding of such fine fish should be depleted by a few fish hogs during the winter months. If the Government would see fit to make the close season from the 15th of December to the 15th of June, it would stop the winter fishing, and the true sportsman would be able to enjoy good sport fishing for bass during the summer months.

Muskrats were plentiful last spring and trappers secured large numbers.

Partridges are becoming more numerous every year.

Mink are increasing in numbers in his division.

Hares or cotton-tail rabbits are becoming very numerous, and he has had many complaints from farmers against the law protecting them. They breed so fast and are so destructive, they are becoming a great nuisance to the country.

Ducks are very plentiful. He never remembers seeing so many beautiful redheads and blue-bills on that lake as there are at present. The hunters are getting large bags. He would be pleased to see the pump gun demolished as the automatic was.

He would again suggest that the meadow lark be placed on the game list, as they belong to the quail family, and therefore should not come under the insectivorous list.

He has kept a vigilant watch over his district, and finds the laws are well observed.

Overseer Neil Sinclair, of Glenarm, reports the closed season has been well observed in his division, and there has been no illegal fishing done that he is aware of. Bass and maskinonge have been more plentiful the earlier part of the season. Towards the latter end the catch was not so good.

Mink and muskrat are very scarce. There is no beaver in his division.

Wild ducks are plentiful this fall. There are not so many wild geese light on the lake.

Partridge are not so plentiful this fall, he thinks on account of the wet season this summer.

There is no deer in his district.

Frogs are more numerous this season.

Overseer Ira Toole, of Omemee, reports that the maskinonge fishing has been good this summer in Pigeon River. Bass were about as usual, but very few people fish for them there, as they seem to prefer trolling for the lunge.

As to winter fishing, he would like to say that, as there was a good supply of maskinonge in those waters, the summer fishing still remained good, and perhaps may last fairly good for a couple of seasons yet; but if there are not some restrictions to stop the winter fishing, viz., the snaring of maskinonge through the ice, there is only one thing to expect—that the waters there will become depleted, as they were once before by the same means. If there was a close season for maskinonge, say, from the 15th November until the 15th June, an overseer would have some chance to stop the illegal fishing in the winter, but as the season stands at the present time, the poacher has things pretty much his own way, as he is not at all likely to convict himself, and in most of the cases which he has had to contend with, it would be impossible to prove how the fish were caught, which is what an overseer would have to do to make a conviction in any of the winter months, as the season exists at the present time.

Black ducks are not so plentiful this year, and very few fall ducks have got that far south yet. From what he has seen, he thinks partridge are holding their own pretty well, as there seem to be quite a number of them this fall.

Mink are very scarce in that locality. Muskrat are holding their own fairly well, considering the number of trappers that are after them every spring. The catch was not quite so good last spring as usual in that district. But the trouble lies in the fall trapping, as they are hard to protect at that season of the year, and he thinks it impossible unless an overseer could afford to stay on the water all the time.

Frogs seem scarce, considering there were none caught for the market this summer, but as the water has been unusually high, they may be back farther in the marsh, where they cannot be seen.

Welland County.

Overseer T. J. Briggs, of Bridgeburg, reports that the game laws are well obeyed, and there are no reports of any violations of the laws.

Americans were well pleased with the angling this year. Maskinonge is very plentiful, and there are large bass in the lake and fair catches. Rough fish in creeks have been plentiful. The game in his division is very scarce. The duck season is closed before the duck come in the river there.

Commercial fishermen complain about the fishing being poor this season. Anglers who take out permits to fish in Niagara River are well pleased with the river permits.

The Inspectors of the Game and Fisheries have been over his division a number of times, which has helped him in the work of protection of the game and fish.

Overseer David Jones, of Welland, reports that he has found that the laws and regulations have been fairly well observed. There have been quite a few complaints made, but it is hard to get the complainants to name the parties. There are quite a number that do their utmost to see that the law is well observed, and he has kept a close watch all over the district, although there are still some parties that he is very anxious to get, in regard to pheasants and squirrels especially. Fish were rather scarce in the summer, but were up to the average in the spring. Pickerel were good; black bass also. Not so many carp. Sheep-head in abundance. Pike fair; coarse fish good. He destroyed several trap nets. No trouble with foreigners fishing. Report that dynamite was used at Beaver dam and Welland feeder, but could not find the parties.

Ducks plentiful, and geese are now returning from the north. Saw about thirty in one flock. Muskrat fair, and would like to see coons protected, as they are destroyed when the fur is of no account, and would like to see all trappers licensed.

Wellington County.

Overseer Colin Robertson, of Hillsburg, reports that he has been over his territory several times during the season, and is pleased to report that the Game and Fishery laws have been fairly well observed. The Caledon Mountain Trout Company and the Guelph Fishing Club own or control the ponds there. They report a fair season, but not nearly so good as last. A great many people there complain about the Caledon Mountain Trout Company screening the creeks flowing into their ponds. This prevents the trout from going up the creeks that flow through other property, and he is of the opinion that private fishing ponds built on the main stream should not be screened. It also prevents the large trout in the spawning season from going up the creeks too near the head of the stream, their natural spawning beds.

The laws regarding sawdust, etc., have been well observed by the mill owners. Mink, foxes and rabbits are plentiful. Muskrat, partridge and wild ducks are scarce. There are not many deer, otter, beaver or other large game in that section. There is scarcely any shooting in his district, game of all kinds being scarce.

Wentworth County.

Overseer C. J. Kerr, of Hamilton, reports that angling in Burlington Bay during the past year has been fair, some good catches of bass at the piers in the Canal at the Beach having been reported. He had two seine licenses issued for carp in the bay this season, but the fishermen could not make it pay.

He got the usual complaints that the drawing of nets was destroying the bass and other spawn, but these men declared they never could see any spawn. However, he has come to the conclusion, as these nets never will pay in Burlington Bay, that no more nets should be issued for any purpose whatever, and that the bay should be kept for angling alone. He believes that the nets destroy more spawn and fish than the carp will if let alone.

Transportation inspection.—This is a trade by itself, and no one would believe the traffic that is going on if they did not see for themselves. He finds that the traffic in fish of every description is increasing greatly every year. The trout and whitefish that were shipped this year from the upper lakes through Hamilton and to Hamilton were of a larger class than in former years, but the shippers run their fish sometimes close on the 2-lb. limit, and nearly every box contained one or two fish undersized—not sufficient to make a seizure of the box. However, he was forced to seize several boxes in the early part of the summer, about 30 small fish being in each box. Last November there was a glut in the fish market. The London freezer was completely filled up, and one shipment of trout (40 boxes) came to Hamilton from Wiarton, and it was re-shipped back to Collingwood in an effort to save the fish from going bad. And also during the same month, whitefish from Lake Erie were going through Hamilton by the hundred boxes every day—all spawners, and taken in the act of spawning. And, furthermore, the herring fishermen from Selkirk, Dunnville, and along the lower part of Lake Erie, shipped herring all over the country, and to Hamilton, and he found some of the boxes contained one-third whitefish, herring size. He seized a great many boxes of these fish, and had some of the shippers running to Toronto to see the Department about it. There was something strange about these small whitefish: while the fishermen were catching them at the lower end of Lake Erie with the herring, none were caught at Port Stanley, and the upper end of the lake.

Fur-bearers.—Muskrats, mink, skunk and coon are holding their own in Wentworth County, but outside of there he is in a position to see a great deal of this fur being shipped on the trains during the hours of transportation inspection to the United States and to England and Europe, but tons of furs reach these countries by other outlets.

It is an everyday occurrence during November to see bags of coon and skunk of 100 pelts going through to the States by express through Hamilton.

The taxidermists and dealers in moose and deer heads, he finds in various parts of the Province. There are men engaged in this business, and they are fur dealers and tanners as well. There are no dealers in moose and deer heads in Hamilton, but there are two taxidermists who will mount moose and deer heads, etc.

Fur Farming.—He finds this is a business that is drawing the attention of many persons in the United States, and a good many persons are engaged in the business, and it is said with fair profit. He has had several applications for permits to catch mink out of season to supply a farm of this kind, but he passed the applications on to the Department. He says this business will have to be looked straight in the face, as it is bound to come before long, and it must be controlled by the Department licensing the farms.

Illegal Acts.—There were some contraventions of the Game Act, and in each case the offenders were treated to a visit to the Police Court, and were fined more or less severely. He says there are many who will not listen, and it is the ignoramus who does not, or cannot, read, and has no conscience or moral sense to which one can appeal.

Deer and Moose.—Last November he found a lot of deer that had come to Hamilton to be distributed there on the trains to other places. After some trouble in several cases, he found he had to hold the deer that did not have proper shipping coupons, but on investigation he straightened out every case.

Wild Ducks in Burlington Bay.—Some good bags were taken in October, one man getting 39 in one day, and others 22 and 25 daily, and still others 11 and 17 on various days. The water being high this year resulted in better shooting on the bay. He received a number of complaints of screening—that is, the placing of decoys strung out from the shore to the limit of 200 yards, and when a flock settles at the outer end, the shooter, who is in his boat at the shore, hidden by screens, shoots out at these ducks with pump guns, with the result that he fairly slaughters them. The distance from shore should be 50 yards to decoys, and no farther. This would do away with the so-called screening. There are only four shooters on Burlington Bay who screen, and if these four men are out on the bay shooting and screening on the same day, no one else will get anything. There are lots of complaints about these men.

The traffic in ducks from Port Rowan is of large dimensions already this fall, and things look bright for good eating for everybody.

He has a number of licensed game dealers in Hamilton, as well as clubs and hotels, and collected $100 during the year from them.

Snipe, Woodcock and Partridges.—He has made some fair bags of snipe himself this fall, knowing where to get them. He also saw some woodcock. Reports say that partridges are fairly numerous this fall in the back parts of the townships. This short season is of great benefit to them. He has shot woodcock, snipe and partridge over thoroughbred dogs for the last 40 years, and is doing so at the present day, and can say that this year has been the best for these birds to his knowledge for a number of years.

Mill Dams.—There are two mill dams in the county of Halton—one at Zimmerman Mills on the Twelve Mile Creek, or, as some call it, the Bronte Creek. He strongly recommends a fishway to be put in this dam. This creek is what is called a live spring creek—always running, and if a fish pass was in this dam, bass would go seven miles up in the country and be a blessing to the people there. The other is on the Oakville Creek, above the G.T.R. bridge. If this dam had a pass in it, fish could ascend as far as the Town of Georgetown.

York County.

Overseer Albert E. Tarry, of Toronto, reports that during the past year the fishing has been very poor, both angling and net fishing in the lake. The fishermen say it is the worst year they have ever had. Some of the fishermen have had to quit fishing early in the season and seek other employment. There practically seems to be no fish in the waters. He can give no definite reason why fish are so scarce—as far as he has seen or known for salmon trout and white fish. The close season has been well observed.

As regards game, ducks have been fairly plentiful, especially sawbills, which he thinks ought to be a longer open season for this class of duck, as they are very destructive to fish, and as they are very difficult to shoot at this time of the year, more so than they are later on. He has forced as many as thirteen small fish out of one duck's mouth after it had been shot, showing how destructive they are to the fish. There are many of the sawbill ducks in the lake. There have been twelve convictions under the Game Act this year, and one under the Insectivorous Birds Act. Muskrats have also been very scarce during the past season.

Overseer Robert Tillett, of Roach's Point, reports that the bass fishing was not very good this year, and very few maskinonge were caught on the trowl. There seems to be a scarcity of bass and maskinonge in his district, but there are lots of salmon. The spearing licenses last winter were a good thing for the protection of the salmon in close season. Those that buy a license want to protect the fish. There were no Americans here this year. He has had very little trouble with the fishermen this year. He has only taken one net and a couple of spears. The net he got at Fox Island, the spears in Cook Bay. There seems to be more ducks than usual. There is quite a lot of wild rice coming up in Cook Bay again where it was destroyed by the carp. The Bradford Fish Company should get the credit of the wild rice coming back, for which they took the carp out, that is where the rice is. Partridge are very scarce here. There are quite a few black squirrels, and there seem to be more each year. The game and fishery laws have been very well observed here.

Overseer Charles West, of Holland Landing, reports that he has every reason to believe that all kinds of game and fish are increasing very rapidly. There have been some good catches this season. Better than in former years.

The carp are very scarce. They suddenly disappeared after spearing season was over. There is also satisfactory increase in all kinds of game. Old sports tell him there was better shooting this season than in former years.

He is pleased to say that the game and fishery laws have been well observed, and he has had no occasion to prosecute anyone.

Overseer G. W. West, of Holland Landing, reports that he has watched his division during the season, and has obtained the best information he could, and he finds that most of the game and fish are on the increase. Maskinonge he finds is getting more plentiful as well as black bass, and also Dore has been more plentiful of late. There has been quite a growth of wild rice this season. He thinks that is on account of the Bradford Fish Company driving the carp away from the river beds and leaving more feed for other fish and ducks. Fish is on the increase around there.

Black and grey ducks have been more plentiful as well as other game. Snipe in particular; partridge he finds is on the increase. The law has been well observed both in fish and game as well as fur bearing animals.

135 pound Sturgeon caught off the shore of Amherst Island in Lake Ontario.

In Quetico Reserve.

Mt. Pleasant, October, 10, 1912.

E. Tinsley, Esq.,

Superintendent Game and Fisheries, Toronto, Ont.

Sir,—I herewith beg to submit to you my fourth annual report in connection with the construction of Bass ponds and the propagation of fish. In the first case the result being that two ponds were completed this year, thus making five ponds all told. Two dams were also build.

A considerable amount of grading and levelling had to be done in connection with the location of ponds so as to continue on same grade. The water pipe line has also been connected and continued past pond Number Five, so that little difficulty will be experienced in the next connection that will have to be made.

The flower display this year was exceptionally fine, the plants seem to thrive well on the islands in the centre of the ponds, as they get a good supply of moisture therefrom.

You are to be congratulated on the appearance and general results of the Bass Hatchery, as they compare favourably with any of our neighbors in so far as they have been developed.

The engineering under Chief Engineer Halfred has been carefully figured out, and many problems that would seem impossible to the amateur have been successfully brought to the desired end.

I might here state that while excavating we came across a pair of deer antlers which were in a perfect state of preservation, and as no trace of any deer can be found in these parts for a century or more it is safe in saying that they are over one hundred years old.

As to propagation and its results, three ponds were made use of for breeding purposes, and over eighty-one thousand fingerlings have been successfully transferred to the different inland waters, the transportation of which were very successful, and the mortality did not amount to more than fifteen or twenty. The average size of fingerlings sent out this year was about three inches in length, very uniform as to size, plump, and in first class condition.

From reports gathered from reliable sources, the result from this annual distribution is very encouraging, as the bass are becoming more numerous each year, so in this direction you are well repaid for the untiring activity that you have displayed. One has to gain considerable experience in this industry, for what might seem to be a good idea when put into practice may prove a failure.

I might also state that a convention of Fish Culturers was held this season at Erie, Pa., for the purpose of exchanging ideas and experiences, and as I was one of the fortunate in being in attendance, considerable information was received by myself, and it will be of great benefit to me in future.

A great number visited the Hatchery this year, a considerable few came from a distance in touring cars, and who expressed themselves as being pleased with the present and future prospects of the Mount Pleasant Hatchery.

The Fish Car had a better appearance this year owing to its having had a new coat of paint and undergoing general repairs.

With weather conditions favourable a very large output may be looked forward to next year.

Yours truly,

J. T. Edwards,

Superintendent, Mt. Pleasant Hatchery.

Biological Department, University of Toronto, Oct. 14, 1912.

E. Tinsley, Esq.,
Superintendent of Game and Fisheries, Toronto.

Dear Sir,—I beg to report as follows upon the work carried on at the Georgian Bay Biological Station during the past summer:

The Station has had an unusually successful season, both in respect of the number of workers and the results obtained. The progress of the investigation of the parasitic animals attacking fishes, which has been under way for several seasons, is now such that many points in the identity and life history of these forms have now been cleared up. Several new species have been identified. Mr. A. R. Cooper, who has had this work in hand, has also made infection experiments with small bass, using parasite-bearing minute crustacea, which serve as food, as a source of infection.

The work of Mr. A. D. Robertson on the Mollusca and that of Mr. H. F. White on the Bryozoa has been extended to comprise a general survey of Georgian Bay and is now nearly complete.

Dr. E. M. Walker, under whose supervision the laboratory has been conducted, has continued his work on the identification and life-histories of the Dragon-flies of the region. He has already published a memoir on this group in North America, and now has the material at hand for the special description of the Georgian Bay species.

Mr. W. A. Clemens has been associated with him during the past season and has made collections and identifications of the local species of May-flies.

The botanical work of the Station has been placed upon a definite footing through Professor W. T. MacClement, of Queen's University, who has himself carried out extensive studies on the Water-moulds, some of which attack living fishes and their eggs, and has supervised the work of collecting and identifying the fleshy fungi of the region. Miss E. Penson, Mr. Wodehouse and Mr. Bissonnette have been engaged in the latter work and upwards of three hundred species have been identified.

Yours respectfully,
B. A. Bensley.

REPORT OF WORK PERFORMED BY THE PATROL BOAT "NAVARCH" ON THE RIDEAU WATERS AND BAY OF QUINTE DURING THE YEAR 1912.

Began on Friday the 3rd May fitting out the "Navarch," for the season's work, and on Saturday patrolled to Picton and back to Belleville. Spent Sunday at Belleville. From the 6th to the 11th May patrolled in the neighbourhood of Belleville, visiting Brighton, Bakers Island and Hay Bay, patrolling in the Marsh between Kingston Mills and Kingston on the 10th instant and the North side of Wolfe Island on the 11th. Spent Sunday in port at Kingston, also Monday on account of the rough weather. The following week visited Kingston, patrolling down the North Channel to Gananoque on the 14th instant, and on to Brockville, Rockport, the North side of Wolfe Island and Point Alexandria, spending Sunday at Kingston.

On the 20th May patrolled from Kingston down to Overseer Cox's at Howe Island, and from there on through Bateau Channel reaching Amherst Island on the 22nd inst., where two thousand yards of gill net were seized. Then went to Glen Island, Picton and Deseronto, arriving on Saturday the 25th instant in Belleville. The following week was spent in painting the "Navarch."

From the 4th to the 8th June patrolled through Belleville, Murray, Picton, Deseronto, Amhert Island and around the Brothers Islands to Kingston, in which district the following fortnight was spent. On the 25th June, patrolled around the head of Amherst Island and Upper Gap, and over to Bath. The remainder of that and the ensuing week was spent in the neighborhoods of Belleville and Kingston. On Tuesday the 9th July patrolled the twenty-seven mile run and then on in to Ottawa. From the 10th to the 27th July passed through Rockland, Wendover, Cumberland, Smith's Falls, Newboro, Westport, the Islands of the Rideau Lakes, Brockville, Grenadier Island, Gananoque, Kingston, the Bay of Quinte and back to Belleville.

The rest of that month was spent in patrolling around Belleville, Brighton, Wellers Bay and the Bay of Quinte.

In August, on account of illness of the Captain, patrolling was not commenced until the 9th instant. The following week was spent in the district of Kingston, patrolling around Brockville, Gananoque, Bateau Channel and Simcoe Island. On the 17th inst., patrolled from Kingston up around the Brothers Islands and Collins Bay. The remainder of the month was spent in the districts of Belleville and Kingston.

On the 31st August patrolled from Belleville to Mosquito Bay. Patrolled the Bay all day. It was reported to the Captain that ducks were being shot, but he found no illegal shooting going on.

Spent Sunday the 1st September at Belleville. Mate Taylor patrolled the marsh looking after the ducks. On the 2nd September, patrolled in gasolene launch. On the 5th patrolled from Wellers Bay to Brighton Bay and seized about two thousand yards of gill nets. The following week patrolled Wellers Bay, Brighton Bay, Kingston and Newboro, reaching Ottawa on Saturday the 14th instant. On Monday the 16th inst., went from Ottawa to Thurso, patrolling all the bays. Seized four gill nets in the county of Russell between Ottawa and Rockland. On the 17th inst., patrolled the water between Papineauville and Thurso. Seized one net in the county of Russell and three gill nets in the county of Prescott. The rest of the month was spent in patrolling around Wendover, Hawkesbury, Papineauville, Ottawa, Burrits Rapids, Newboro, Westport, Kingston, Howe Island and the north side of Wolfe Island, Gananoque, Brockville, the Brothers Islands, Amherst Island, Collins Bay and back to Kingston.

The whole of October and part of November until the 14th instant was spent in the districts of Kingston and Belleville.

On the 14th the "Navarch" was laid up in good order for the winter.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "NAIAD" ON LAKE SIMCOE AND KAWARTHA LAKES DURING THE YEAR 1912.

On Wednesday, May the 1st, spent the forenoon fitting out steamer, and in the afternoon went over to Wolf Str. Wharf, and found that the valve on the pipe of the blow-off was leaking badly, and had to get new valve. On Tuesday left Peterboro, and patrolled to Goodfellow's Creek, and remained there over night; the next day patrolled Goodfellow's Creek, Baxter's Creek, Squirrel Creek; thence to Steamboat Creek and Dyells Creek, Kent's Creek and Riddel's Bay, and thence to Overseer Thompson's for the night. On Saturday patrolled from Thompson's to Jubilee Point, thence to Gore's Landing, Harwood, and between there and Idyl Wild. Broke valve and had to return to Peterboro, and remained there during the next few days. On Wednesday, 8th, took skiff and patrolled the marsh around Plum Point, McIntyre's Bay, Roach's Point; also waited in hiding until 11 a.m., but as no Indians put in an appearance, returned to steamer, and run to mouth of Keen's River, but saw no person, then went to mouth of Ooze River, patrolled it, and went on to Hastings, while there was informed that there was a net set every night on the Ooze, went back, stayed there until 1 a.m. then returned to steamer at 2 a.m. but got nothing. Thursday, May 9th, patrolled to Trent Bridge, then took skiff, and patrolled to Healy Falls, the reason for taking skiff from Trent Bridge, there was too much current through the bridge, also wanted to patrol back of McKenzie's Island, a place not navigable for steamer. Friday, 10th, took on coal and patrolled the waters from Hastings to the Ooze river, then came up to Stevenson's Landing and met Overseer Shearer, took him on boat and went over to Sugar Island, where we met Overseer McFarland, they both report any amount of work to keep the Indians from fishing, otherwise everything quiet. Left Sugar Island and went to Gore's Landing, thence to Jubilee Point, met Overseers McAllister and Thompson, and patrolled Rice Lake. Next day cleaned steamer, and patrolled to Overseer Thompson's, thence to Bursford Bridge, brought Overseer Thompson to Goodfellow's Creek, and came on to Peterboro and remained there over Sunday. The next week was spent at Peterboro waiting for Lift Lock to open. On Monday, May 20th, patrolled to Lakefield, thence to Young's Point, and laid there over night on account of wind and rain. The next day patrolled the waters from Young's Point to Burleigh Falls, thence to Lovesick, Buckhorn, Oak Orchard, Bobcaygeon, and on to Lindsay for orders. Wednesday, 22nd, patrolled the waters from Lindsay to Fenelon Falls, thence to Rosedale and Kirkfield, and up the canal to Overseer Fry's, and got boat that was seized at Mud Lake, by order of the Department. Thursday, patrolled the waters from Overseer Fry's house to the Lift Lock, thence to Lake Simcoe and around Thora Island, found six hundred feet of whitefish net, then returned to Beaverton for the night. Friday, 24th, after the arrival of Mr. Cox, patrolled the waters from Beaverton to Bradford. Saturday patrolled the waters from Bradford to the mouth of River, then took gasolene launch belonging to the Bradford Fish Co., and along with Mr. Cox went to Cook's Bay to see carp seine. Patrolled to Barrie, and after leaving Mr. Cox patrolled to Beaverton, and remained over Sunday. On May 27th, patrolled the waters from Beaverton to Maynard's shoal, thence to Trout Shoal, and on to Strawberry Island; on the way searched several boats travelling. They all had good catches of salmon, and report salmon fishing good. After landing at Strawberry Island, Overseer McGinn came in with his gasoline launch, and we then left for Orillia, Tuesday, the 28th, having made

arrangements with Overseer McGinn to go with his launch to Washago, and waiting until 9 a.m., according to arrangements, left Orillia, and patrolled to Beaverton in a heavy storm, and laid there until the storm was over, then went on to Kirkfield. Next day patrolled the waters from Kirkfield Lift Lock to Balsam Lake, thence to Cameron Lake, and on to Fenelon Falls, took on coal and patrolled Sturgeon Lake to Bobcaygeon, on arrival there the "Arthur C" was towing logs through the lock, and after she got through we locked down and stayed over night. Thursday patrolled the waters of Pigeon Lake, Chemong Lake and up around Herron's Island, also searched three houses belonging to the Herron's, but found nothing, we then came back to Chemong and got net that had been seized by Overseer Nicholls. Friday the 31st, patrolled the waters of Chemong Lake, and searched several canoes, but they were catching frogs. Brought Overseer Nicholls as far as Gannon's Narrows, he then patrolled back to Chemong, and I came on to Bobcaygeon, thence to Fenelon Falls. Saturday, June 1st, patrolled the waters of Cameron Lake into Balsam Lake, up to the North Bay, then took skiff and rowed up the creek about four miles; while there was informed of some illegal work going on, but could find nothing, and only one boat, which from appearance had not been used this spring. Monday patrolled the waters from Beaverton to Big Bay Point, thence to Hawkestone, Eight Mile Point, then went on to Orillia to meet Capt. Hunter. Tuesday, June 4th, waited for Capt. Hunter at G. T. R. station, but he did not come, owing to sickness. The Department told me to go to Bradford River, but could not go on account of heavy winds. On Wednesday patrolled to Orillia Narrows, thence to Eight Mile Point, found everything all right: as the wind was rising fast I put for the Island, and thence to Roache's Point. On June 6th, lay in Bradford River, and watched Bradford Fish Co. land seine: they only hauled once, and got five carp, one bass, and one perch: the bass and perch they put back into the water. In the afternoon went to Gilford, afterwards to Orillia to meet Capt. Hunter. Friday patrolled Lake Simcoe to Orillia, met Capt. Hunter, and in the afternoon drove out into the country to see Overseer Timlin, then came back to boat, and laid in Orillia all night. Saturday, June 8th, patrolled the waters from Orillia to Thora Island, went on to Beaverton, laid there for the rest of the day on account of high wind. Capt. Hunter came down to Beaverton with us, and left for Belleville. Sunday laid at Beaverton. On Monday patrolled the waters from Beaverton to Kirkfield Canal, stopped to see Overseer Fry, and showed him how to make out his reports, then patrolled Balsam Lake, and then to Coboconk. Saw Overseer Burtcheall, and patrolled to Rosedale Lock. Tuesday patrolled the waters from Rosedale to the Gull River, and Burnt River, then took skiff and patrolled up to the old Lock: also Goose Lake, patrolled Cameron Lake, and went on to Fenelon Falls, and after leaving there patrolled Sturgeon Lake. The following day took on coal and patrolled the waters from Lindsay to Scugog Lake, and thence to Washburn Island, Port Hoover, and Port Perry thence back to Washburn Island, and on to Overseer Parkins for the night. Thursday patrolled the waters from Overseer Parkins to Lindsay, took on coal: also met Overseer Mabee and Bradshaw, then patrolled the Lindsay River, and on to Sturgeon Point, and then to McConnell's Island for the night, watched until dark around Sturgeon Lake. On Friday, took skiff and patrolled Emily Creek to Emily Lake. Then patrolled with steamer to No. 10 Lighthouse in Lindsay River, took skiff and patrolled McLaren's Bay, Goose Lake, thence patrolled to Lindsay, remaining there Saturday and Sunday. On Monday 17th, patrolled the waters from Lindsay to Bald Point thence to Sturgeon Point and Bobcaygeon, sold two Angling Permits, took on coal, and patrolled to Gannon's Narrows: called at several fishing boats

on the way, but found all had Angling Permits: also called at Oak Orchard. The next day left Gannon's Narrows, and patrolled to Chemong Village, Huntingdon Island, and on to Bridge to meet Capt. Hunter, as he had not arrived Overseer Nicholls and myself patrolled the south west end of Chemong Lake: also searched the houses belonging to the Herron Bros., but there were none of them there. On June 17th, patrolled the waters from Chemong Park to Buckhorn thence to Lovesick, Burleigh Falls, Young's Point, and on to Lakefield for coal with Capt. Hunter on board. also held court in the forenoon at Chemong and fined a party for netting: stopped at Chemong village, and sold guide licenses. The next day patrolled the waters from Lakefield to Young's Point, thence to Mount Julian, Bellevedere, thence back to Glenwood. On Friday rowed to Gilchrist Bay, and in all the swampy land in that locality: also part of the Indian River on foot—on the way met four non-residents fishing, but both of them had permits: patrolled the waters of Stoney Lake. Next day patrolled the waters of Stoney Lake, and Clear Lake, then went on to Lakefield for orders. On Monday 24th, left Lakefield, and patrolled the waters to Young's Point, thence to South Beach, Sandy Point, from thence to McCracken's landing, and Jumper Island, from thence to Glenwood, Bellevedere, and Mount Julian. Searched several boats, but found everything right, we then proceeded to Burleigh Falls for the night, and the next day laid at Lakefield. Tuesday 25th, patrolled the waters from Burleigh Falls, to Lovesick, thence to Buckhorn, after leaving here proceeded to Islanda, thence to Oak Orchard, and into Bobcaygeon for the night, also searched several boats as they came in with their day's catch: also examined the express bills at C. P. R. station, and found there had been fish shipped to Toronto. On Wednesday patrolled the waters of Sturgeon Lake, and put up notices at the different points on the Lake, but found no non-residents in that locality: also saw Overseer Bradshaw at Pleasant Point. Went to Fenelon Falls, and took on coal. The next day patrolled the waters from Fenelon Falls to Gull River, and Rosedale Canal, thence to Balsam Lake, patrolled the Canal to Beaverton, and put up notices all along the route. On Friday patrolled Lake Simcoe from Beaverton to Jackson's Point, thence to Big Bay, and back to Georgina Island, and into Beaverton, put up notices at all the places. Saturday 29th, patrolled the waters from Beaverton to Strawberry Island thence to Orillia, met Capt. Hunter, patrolled from Orillia to Beaverton, left there at six p.m and patrolled to Barrie with Capt. Hunter, and remained there over Sunday. On Monday, July 1st, patrolled the waters from Barrie to Big Bay Point, thence to Snake Island and Roache's Point, and back to Morton's Park and Barrie. The next day patrolled from Barrie to Shanty Bay, thence to Hawkestone, Carthew's Bay, Strawberry Island, and on to Atherley to see Overseer Gaudaur, then patrolled to Orillia. On Wednesday with Overseer Gaudaur in gasolene launch patrolled to Orillia Narrows, thence along the north shore to Rama village, Geneva Park, and on to Washago, patrolled the south shore to Orillia, from thence patrolled the waters of Lake Simcoe from Orillia to Barrie. The next day patrolled the waters from Barrie to Big Bay Point, thence to Georgina Island, Port Bolster. On Friday patrolled the waters from Beaverton to Point Mara, thence to Thompson's Point, and back to Thora Island, and stayed at Beaverton over night. Saturday patrolled the waters from Beaverton to Port Bolster, thence to west end of Georgina Island, went back to Thora Island, and into Beaverton, and laid there over Sunday. Monday patrolled the waters from Beaverton to Georgina shoal thence to Jackson's Point, put up notices *re* pollution of waters.

Left Jackson's Point at 4 p.m., posted up notices at the Point, and patrolled to Barrie for coal. Tuesday, left Barrie after coaling up and posting notices, and patrolled to Strath-Allan, and met Mr. Boon lifting his night-lines; he had a very poor catch as he could not get minnows; after leaving Mr. Boon, patrolled to Shanty Bay, posted notices, then patrolled to Hawkestone, and posted notices there, in conversation with a Toronto Gentlemen was informed by him that he had been coming there for six years, and this spring was the best fishing he had in that time; we then went to Eight Mile Point, where we were informed of some illegal fishing, but found no person there, we then patrolled to Orillia; in Barrie we found the Tannery pumping out their tanks, and the contents going into the bay; I also left a notice in their office. On Wednesday, patrolled the waters of Lake Couchiching, with Overseer McGinn on board, posted notices at Rama then patrolled to Longford, and found that there was an oily substance running from the Chemical Works into Lake St. John, and think it would injure the fish, then patrolled to Washago, put up posters and returned to Orillia, and put up posters in Post Office and City Hall. On Thursday, July 11th, after putting up notices in the Smelting Works Tannery, Tudhope, Anderson Co., we left Orillia and patrolled to Strawberry Island, thence to Eight Mile Point, and over to Thora Island and into Beaverton. During the rest of this month patrolled at the different places in my district. From August the first to the twentieth, patrolled at Lindsay, Cannon Lake, Rosedale, Coboconk, Balsam Lake, Kirkfield Canal, Beaverton, to Jackson's Point, Roache's Point, Holland River, Barrie and Big Bay Point; Point Mara and Thompson's Point, Strawberry Island and Orillia, Lake-sheep Island, Atherley, Georgina Island, Ducloes Point; Lake Couchiching, Fox Island, Lake Simcoe. The next two weeks was spent likewise. The month of September was spent in the same way patrolling at the different places. October first to twentieth, patrolled at Lakefield, Young's Point, Mount Julian, Burleigh Falls, Lovesick, Buckhorn, Gannon's Narrows, Bobcaygeon, Oak Orchard, Cameron and Balsam Lake, Simcoe and Beaverton; Thora Island, Big Bay Point, Barrie, Georgina Island, Warren's Shoal, McDonald's Point, Hawkestone, Strath-Allan, Ducloes Point, Woodman's Shoal, Rush Bay; the rest of the month was spent in the same way, and also the month of November.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "LOTUS" ON THE WATERS OF THE NORTH CHANNEL OF LAKE HURON AND GEORGIAN BAY, DURING THE YEAR 1913.

Began the season's patrol on Monday, May 6th, calling the first week at Killarney, Parry Sound, Point au Baril, and Gore Bay, remaining at the latter place until Tuesday. The following week patrolled to Blind River, calling at Spanish, Cutler, John Island; then to the Soo, calling at Thessalon, Hilton and Richard's Landing. Had to stay at the Soo for the next two weeks, as weather stormy and the engineer had left for home and could not get another. On Tuesday the 4th June took Overseer Pitfield down the shore of Philip Edward Island and picked up a seine. The rest of the month patrolled to Killarney, Whitefish, Gore Bay, Kagawong, Cockburn Island, Meldrum Bay, Richard's Landing, Hilton, Thessalon, Cutler, Oak Harbor, Byng Inlet, Bustards, Round Island, Fraser Bay,

and among the islands in McGregor's Bay. Spent July patrolling the waters as far south as Parry Sound and back to Little Current and Gore Bay, calling at Tobermory, Wiarton, Blind River, the summer cottages in and around Point au Baril, and on August 2nd, seized some night lines, hooks, nets, gasolene boat and fish at Griffith Island, and fined the guilty parties. The remainder of August visited Meaford, Thornbury, Collingwood, Christian Islands, Penetang, Midland, Copperhead, Parry Sound, Point au Baril, Killarney, Little Current, Blind River, Thessalon and the Soo. Weather very stormy towards the end of the month. During September went to Killarney, Beaverstone and Point au Baril, calling at Byng Inlet; thence to Parry Sound for several days; thence to Killarney, calling at the Bustards, thence to Little Current and on to Spanish, thence to Gore Bay for a few days; thence to Meldrum Bay, Duck Islands, Cockburn Island, Gore Bay, and on to Little Current, remaining there four days cleaning up boat. Left on the 25th for Fraser's Bay, but had to stay there all day and next day on account of storm. The next few days were spent patrolling to Round Island, Killarney, Manitowaning, Sheguiandah, Little Current and Squaw Island. Spent the first three days in September at the Bustards, as weather stormy. The remainder of the season was spent patrolling the same waters, calling at the places already mentioned, often encountering heavy seas and stormy weather. Finished the season's patrol on Saturday the 9th November, and laid the boat up at Little Current for the winter.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "JESSIE T." ON THE WATERS OF LAKE SUPERIOR, DURING THE YEAR 1912.

Began on the 1st May getting the "Jessie T." ready for work and spent several days fitting her out. On the 10th went from Sault Ste. Marie to Goulais Bay. Encountered lots of floating ice. Started from there to go to Batchawana. When near Maple Island got into a large field of floating ice and broke one of the blades off the propeller wheel, and had to return to Sault Ste Marie for repairs. From the 12th to the 23rd patrolled around Echo Bay, Echo Lake, Neabish Island, North Channel, Lake Huron, Maskinonge Bay and Parisian Island.

On the 25th took Overseer Eddy aboard, and went from Hilton to Milford Haven. Grappled nets, found none. On the 26th patrolled around Milford Haven and Sterling Bay where a boat was examined and it was found the owner had a license to fish. Reached Hay Point on the 27th. The following day met Inspector W. W. Holden and Capt. Hunter and arrived on the 31st at Sault Ste. Marie.

On the 25th proceeded from Garden River to Echo Lake, and from there on to Hilton, Richard's Landing and Sault Ste. Marie.

During the first two weeks of July patrolled from Sault Ste. Marie up Lake Superior around the Parisian Islands and then to Batchawana, Montreal River, Agawa Bay, Lizard Islands, Brule Bay, Michipicoten, Dog River, Ganley's Harbour, Pilot Harbour, Otter Head, Gargantua Harbour, Agawa River, Sandy Island,

On the Ottawa River, near the Chaudiere Falls.

Copper Mine Point, Sault Ste. Marie, Mamaise Point and Batchawana, and from there to Montreal and Agawa River on the 11th, at which place waited to ascertain that all the tourists had licenses, and found they had. The rest of the week patrolled around Indian Harbour, Michipicoten Island and Gargantua Harbour, and on Monday the 15th to Batchawana, Agawa Island, Copper Mine Point, Parisian Island, Sault Ste. Marie and Hilton St. Joe Island. Telephoned Overseer Eddy with reference to pound nets set in Canadian waters. On the 19th went from Hilton to Richard's Landing and around west side of St. Joe Island to Hay Point, and from there to Seine Islands and Whiskey Bay where it was found that pound nets were in American waters. Then patrolled from Seine Islands to Richard's Landing. From the 20th to 30th was spent in the districts of Sault Ste. Marie and Batchawana.

On the 1st and 2nd August searched for nets in the neighborhood of Sault Ste. Marie but found none.

On the 3rd laid up at Echo Lake and walked to the McPherson camps. Searched the camps but no moose or deer meat was found. From then until the 28th patrolled in the districts of Sault Ste. Marie and Batchawana.

On the 29th walked to McPherson Camp, having heard there was game being shot there, but found everything all right. The 30th and 31st were spent at Sault Ste. Marie.

The first two weeks in September visited Richard's Landing, Sault Ste. Marie, Whiskey Bay, Batchawana Harbour, Goulais Bay, Nebish, Milford Haven, Sailors' Encampment and Echo Bay. On the 16th patrolled from Sault Ste. Marie with Inspector Holden to Hilton St. Joe Island and return.

The rest of the month was spent in the districts of Sault Ste. Marie and Gargantua Harbour.

On Tuesday the 1st October, went out with Game and Fisheries Warden Robinson of Sault Ste. Marie to Little Goulais Bay, Nebish, Milford Haven, Sailors' Encampment and Echo Bay. On the 16th patrolled from Sault Ste. Marie with Inspector Holden to Hilton St. Joe Island and return.

The rest of the month was spent in the districts of Sault Ste. Marie and Gargantua Harbour.

On Tuesday the 1st October, went out with Game and Fisheries Warden Robinson of Sault Ste. Marie to Little Goulais and tore down beaver dams which had the main road flooded.

The following fortnight patrolled to Parisian Island, Maple Island, Batchawana, Pancake Bay, Goulais Bay, Montreal River, Agawa River, Lizard Island and Michipicoten Harbour.

The remainder of the month visited Batchawana Harbour, Maple Island, and Point au Parr and remained until the 31st storm bound at Batchawana Harbour.

The 1st and 2nd of November were spent in the districts of Batchawana and Gargantua Harbour.

On the 3rd remained in the Agawa River on account of gale. Walked 12 miles out to Boyle Bros. construction.

The rest of the month patrolled around Agawa River, Mamaise Point, Batchawana, Soo, Groscap, Pinx Aux, Maple Island and Goulais Bay, and on the 30th finished the season's work.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "ELLA C." ON THE RIDEAU WATERS DURING THE YEAR 1912.

Left on Monday, June 5th, with crew for Kingston to take charge of steamer "Ella C." After testing the boiler they patrolled down to Jones' Falls to Newboro and on to Portland, Oliver's Ferry, Poonahmalee, and back to Smith's Falls. Here they spent three days repairing and painting boat. The following Thursday they continued to patrol along the north shore of Trout Island, Anglers' Inn and Bungalow, and then across to the south shore and patrolled up to Hog's Creek, Long Island, over to Far Island, and all along the shore to Smith's Falls, where they spent the night and remained in port for Sunday.

The following Monday, July 8th, they patrolled up to Oliver's Ferry, Germain Bay and down to Horseshoe Bay. They visited the big Rideau, patrolling around Grindstone Island and on to Murphy's Cove for the night. The next day they patrolled Noble's Bay on down to McLean's and McVeety's Bay on to Oliver's Ferry and Stone House Point, and called at some club-houses and put up Fishery Laws and came on to Smith's Falls and here took on coal and spent some time in cleaning up the boat.

On Monday, July 29th, and for the entire week they patrolled from Stone House Point to Oliver's Ferry up the south shore to Portland over to the Bungalow, on to Grindstone Island, McLean's Bay, Horseshoe Bay, and McDonald's Bay, where they patrolled with a row boat watching the duck grounds. The following few days it was storming hard.

The following week they patrolled up to Rideau Ferry along the south shore to Garrett's Rest, Portland, over to the Bungalo and Anglers' Club, then down the north shore to Horseshoe Bay and Bass Bay to Murphy's Cove, and on to the north shore to Sam's Island, on to Trout Island, in to Portland, calling at all club houses, and stopped at Oak Island for the night.

The next Monday and the subsequent days they patrolled up the north shore to Far Island, Trout Island, and back down south shore to Horseshoe Bay, on to Rocky Narrows and Gem Island, then down to Noble's Bay and on to MacDonald's Bay and back to Oliver's Ferry, took a row boat and patrolled to Old Tay to see if there was any illegal shooting, but found none. Spent Sunday in port at Smith's Falls.

The following week they patrolled from German Bay down the south shore to Noble's Bay on to McLean's Bay and Rideau Ferry on to Poonahmalee and Smith's Falls. They took on coal and cleaned up the boat, after which they patrolled from McDonald's Bay down to Boxes Island on to Oliver's Ferry, Hogs Creek, Horseshoe Bay and Long Island, then down south shore to Gem Island.

The next week, Monday, September 23rd, they patrolled the shore up to Garrett's Rest on to Portland and Trout Island, then to Westport and Newboro, along the shore to Far Island, Horseshoe Bay, and down to the Rocky Narrows on to Oliver's Ferry. Took on coal and patrolled up to the Tay Canal and on to Perth, where they stopped for dinner and patrolled back down to Smith's Falls.

On Monday, 30th September, and the following days they patrolled the north shore up to Bass Bay, Horseshoe Bay, along Grindstone Island on to Portland, back to the Bungalow, along Far Island and down the south shore, patrolling Noble's Bay, McVeety's, McLean's, and McDonald's Bay on to Boxes Island and Poonahmalee, and on to Smith's Falls. Here they remained in port for Sunday.

On Monday they patrolled up to Stone House Point to Oliver's Ferry on to Rideau Wharf. Here they were obliged to stay for some time as the weather was blowing a gale.

As soon as the weather permitted they patrolled up the south shore to Far Island on to Portland, to Horseshoe Bay, Hog's Creek, and Noble's Bay, then to McLean's Bay and Tay Canal, patrolled down to Boxes Island and thence to Smith's Falls, and spent Sunday there.

Leaving Smith's Falls on the following Monday they patrolled the south shore up to Oliver's Ferry and on to Murphy Cove, and seized one gill net near Hog's Creek, and found the salmon spawning on the shoals. From here they steamed up as far as Little Boys Camp. Took row boat and patrolled as far as Sam's Island, on over to Trout Island and Long Island, then on to Gem Island. From here they drove to Perth to telegraph the Department that the salmon run would be over this week. On the return trip they patrolled around Trout Island and Sam's Island down the north shore to Big Island and the Far Island, up to Little Boys Camp, and down to Horseshoe Bay and Gem Island. Left Gem Island and patrolled up to Newboro, Chaffey, Jones' Falls and Kingston Mills and to Kingston, where "Ella C." was delivered over to Captain Fleming.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "ATHENE," ON THE DETROIT RIVER DURING THE YEAR 1912.

On Thursday, the 20th June, patrolled the Detroit River.

On the 24th left Sandwich for Sarnia. Stopped at Canadian Club, St. Clair Flats, Sombra, and St. Clair River. The rest of the month patrolled around south shore Lake Huron, Sandwich, Amherstburg, Big Creek, Lake Erie, Lake St. Clair, Thames River, and Belle Island.

The first week in July left Sandwich and patrolled through Windsor, Lake St. Clair, Detroit River, and Pike Creek, returning to Sandwich on the 7th.

From the 8th to the 14th called at Windsor, Amherstburg, Detroit, Pelee Island, Sandwich, and Kingsville.

The following week visited Pelee Island, Sudder's Dock at the north end of the island, Rondeau, Big Creek, Kingsville, Sandwich, and Walkersville.

On the 22nd patrolled to Walkersville and Lake St. Clair and from there to Pecke Island, where found three boats of Americans fishing.

Three refused to take licenses. Compelled them to leave Canadian waters.

On the 24th went down the Detroit River and found four boats fishing on the west side of Fighting Island.

Three refused to take out licenses for fishing with hook and line. Compelled them to leave Canadian waters at once. They did so.

From then until the 29th patrolled around Sandwich, and on the 30th proceeded up the Thames River to collect license fees.

On the 31st went up the Thames River to Mitchell's Bay and from there to Wallaceburg.

Left Wallaceburg on the 1st and during the following fortnight proceeded to Sandwich, Lake St. Clair, Lower Detroit River, and Fighting Island, where there were several American small boats fishing, three of which refused to take out licenses. Compelled them to leave Canadian waters. Proceeded from there to Lake St. Clair, Upper Detroit River, Peach Island, Windsor, Sandwich, where an American yacht was found fishing in Canadian waters, and from there to Windsor and back to Peach Island.

On the 15th and 16th patrolled in the Sandwich district, and on the 17th visited Fighting Island and found one poacher fishing. Made him take out license, which he did, paying $2.00 for same. From then until the 24th called at the various places in the neighbourhood of Sandwich. On the 25th went to Fighting Island, where some fishermen were found on the west side, all of which had licenses except one. Made him take out license and pay $2.00 for same. From then until the 30th patrolled around the Sandwich district.

On the 31st patrolled up Detroit River and Lake St. Clair. Found one poacher at Peach Island Wharf. Compelled him to take out a license, which he did, paying $2.00 for same.

On Sunday, the 1st September, left Sandwich Wharf for Lower Detroit River. Found three American fishermen and compelled them to leave Canadian waters. Two had licenses.

The rest of the week visited in the neighbourhood of Sandwich.

The following fortnight patrolled to Amherstburg and on to Windsor, Walkerville, Sandwich, Grassy Island, Lake St. Clair, Lower Detroit River, and Peach Island. The remainder of the month was spent in the Sandwich district.

During the month of October patrolled to Windsor, Sandwich, the east side of Detroit River, Grassy Island, Choppers Canal, Upper Detroit River, Fighting Island, Turkey Island, Mitchell's Bay, Kingsville on the 18th, went to Pelee Island and thence to Peach Island, Amherstburg, Lake St. Clair, Belle River, and on the 21st patrolled up Lake St. Clair and Upper Detroit River to Windsor and back to Peach Island. From the 1st to the 22nd November patrolled the various points around Sandwich, and finished the season's work on the 23rd instant.

REPORT OF THE WORK PERFORMED BY THE LAUNCH "HELEN" ON THE WATERS OF THE ST. LAWRENCE DURING THE YEAR 1912.

On Saturday, March the 23rd, went to Sugar and Burnt Islands, and on returning home that evening it was reported to me that trappers were cutting the rat- houses open in Long Bridge Creek, but on investigation found that this was not so. The next few days were spent at Landon's Bay, Fearn's Creek, Leak, Sugar, and Burnt Islands. During the following week went to Fiddler's Elbow, as there were some Americans hunting in that vicinity, but we could not reach them owing to too much floating ice. On Wednesday, April 17th, went to Grasses Creek, and grappled Freeman's, Brown's, Leekey's, and Seburn's Creeks. On April 21st, patrolled the Gananoque River to Fiddler's Elbow, and grappled the bays and creeks, seized a skiff and a gun. During the next few days patrolled the river down

to Jones' Creek, seized one gun, and one set of hoop nets, patrolled to Rockport, and grappled the bays and creeks up to Fiddler's Elbow. Again patrolled the river to near the foot of Garden Island, saw a float and took it up, the line was a mile long and eleven hundred hooks on it. Patrolled up to the south side of Howe Island, and the waters between Wolfe and Howe Island, took up a night line about one mile and a half long which belonged to some parties in Clayton. On Friday, May 10th, went to Marble Rock and the creek and bays. There were two men camping at the mouth of Mud Creek, searched their camp but did not get anything. On Saturday patrolled to Brakie's Bay, and down to Hecker's Island, and Leak Island. The following Monday patrolled the Gananoque River and grappled Landon's Bay, had to return owing to storm. The remainder of the week was spent patrolling and grappling at Howe Island, Jones' Creek, Fiddler's Elbow, Float Island Channel, and Grenadier Island. On Saturday, June the 1st, patrolled among the islands, but had to return as the Inspector was coming, went out again when he left, and went as far as Grenadier Island and grappled. On Monday patrolled down to Pools and grappled back to Tar Island. The next few days were spent among the islands, and on Thursday 6th painted and varnished boat, as it was raining. The following day the boat was dry, and I put her in the water, left Gananoque, and patrolled among the islands. On Saturday patrolled to the foot of Grenadier Island and grappled. On Sunday patrolled among the islands, looking after the guides. The remainder of the week was spent patrolling and grappling at Rockport, Sugar Island, Howe Island, and Grenadier Island. The following week was spent patrolling at the different islands and creeks in my district. Wednesday, July 3rd, went to Fiddler's Elbow, and from here to Grenadier's Island, grappled and took up a set of gill nets. On Friday patrolled to Rockport, and up to the head of Howe Island looking after guides, took fourteen dollar guide's license, the next day went to Rockport, and up the river to the head of Howe Island. On Sunday went up the river looking after some men, but did not catch them, but got their nets. The next day patrolled the river around the head of Howe Island, and around Hickery Island. The following week was spent patrolling and grappling at Grenadier's Island, Tar Island, Howe Island, and the Big Waters, and around Hickery Island, from here to Union Park, and on to Jones' Creek. On Thursday, July the 18th, went to Wolfe Island, the boat was damaged, and had to be towed home, the next day was spent repairing my boat. On Saturday patrolled the river to the foot of Grenadier Island, and back to Tar Island. The next few days was spent in patrolling and grappling at Jones' Creek, Fiddler's Elbow, to the head of Howe Island and Union Park, then on to Garden Island, and among the islands down to Rockport, and up to Landon's Bay. Thursday, August 1st, patrolled down to the foot of Grenadier Island and grappled, the next day patrolled the Gananoque River to the head of Howe Island, and over Brakie's Bay to the south side of Wolfe Island. Saturday, patrolled and grappled among the islands. The remainder of this month was spent patrolling at the different islands, creeks, and bays in my district. On Sunday, September 1st, patrolled the river to the head of Howe Island; the next day went among the islands, and took up one gill net. Tuesday, patrolled down to Pools resort and grappled the bays; the next day patrolled up the Big Waters looking for floats of night-lines. Friday, patrolled to Ivy Lea and grappled the bays. On Saturday patrolled down to Big Stave and grappled and took up two sets of gill nets. The rest of the month was spent patrolling and grappling at the different islands, creeks, bays, and channels in my district. The following month, October, was spent in the same way; also the next month.

REPORT OF THE WORK PERFORMED BY THE "KATHARINE C." ON THE WATERS OF THE GEORGIAN BAY DURING THE YEAR 1912.

Left Parry Sound on Thursday, May 16th, and patrolled to Rose Point, Two Mile Narrows, and Boyne River, to try the launch, and next day to Depot Harbor, Batteau Channel, and Rose Island. The following week went to Spider Bay to drag for nets, but found none, then on to Sans Souci and Copperhead Island, Bald Rock Island, Deep Bay, Bower's Bay, where a jacklight was burning and parties spearing fish in a narrow channel between two islands, but although we stayed around till daylight we did not find them. The remainder of the month was spent between Parry Sound, Dillonsport, Haggart's Island, Shawanaga, Skerryvore Hotel, Point au Baril, Oak and Twin Islands. Searched in and among the islands and found everything all right. The first two weeks in June were spent in the same way, and on Friday, the 21st June, patrolled to Sandy Island, thence to Jones' Island, Batteau Channel, Spruce Island, Snug Harbor, Dillonsport, and Haggart's Island. Saw a gasolene boat going to Mink Island and pursued it with launch, but was unable to overtake it on account of darkness coming on. The rest of the month patrolled Shawanaga Bay, calling at Skerryvore, Ojibway, thence to Shawanaga Landing, Frederick Inlet, Pine Island, Twin Island, Snug Harbor, and Dillonsport. Spent July and August patrolling between Parry Sound and Point au Baril, visiting the different hotels and summer cottages, and searching in and around the different islands, but found nothing illegal, except one seine on the 29th of July set on an island. Continued the same patrol during September and October, but had a good deal of stormy weather, and also trouble with the engine, which was not working well. On the 19th of October went to Bower's Bay to search for nets reported to be there. Grappled all over bay, but did not find any. Next day went to Blair Landing, having had reports of Sunday hunting in that vicinity, but found nothing wrong. On Sunday, November 24th, left Blackstone Landing for Moon River, grappling in bay. Found a trap net in bush hanging on poles ready to set. Piled it up and burnt it. From there went to Capt. Allen's Straits, Whistle Wing Bay, Iron City Club House, and thence to South Channel. Engine stopped while crossing Big Bay. Blowing hard and snowing. Got in yawl and towed launch to Yank Cannuck Club House, leaving next day for Parry Sound.

REPORT OF WORK PERFORMED BY THE PATROL BOAT "MEENAGHA," ON THE MUSKOKA LAKES DURING THE YEAR 1912.

On Wednesday the 15th May, patrolled to Montgomery's Hackrock River, Bryden's Bay and up to Gravenhurst. Arrived at the Muskoka Lakes on the 16th. The following fortnight was spent in the districts of Muskoka River, Big Island, Walker's Point, The Narrows, Shanty Bay, Montcalm, Gerry Lea Island, the Sanitarium, Gravenhurst, Beaumaris, Port Carling, Brickenridge Bay, The Bluffs, Marenins, Minett, Woodington, Joseph River, Port Sandfield, Skeleton Bay, Juddhaven, Rosseau River, Monyra, Maplehurst, Morgan's Bay, Port Bay, Hatton House, Smith's Bay, St. Elmo, Windermere, Dee Bank River, Waskada, Marenius House to Paynton House and return to Port Carling. On the 31st, went to Ferndale Bay to set trap net for hatchery.

On the 1st June, set net in Ferndale Bay remaining there to watch it till Sunday Morning.

From then until the 6th was spent in watching net, but with no success. The next week patrolled in the districts of Beaumaris, Walker's Point, Montcalm, Gull and Silver Lakes, Gravenhurst, St. Elmo, Big Island, Milford Bay, Brickenridge Bay, Windermere, Dee Bank River, Monyca, Skeleton Bay, Rosseau River, Marenius, Juddhaven, Maplehurst, Sandy Bay and Port Carling.

On Monday, the 1st July, called at Princedale Hotel, Gull and Silver Lakes, calling at all cottages in rowboat. Between the 2nd and 9th visited Montcalm, Beaumaris, Milford Bay, Port Carling, Ferndale, Gregory, Port Sandfied, Foote's Bay, Barnesdale, Garden Bay, Port Cockburn, Ridwood, Craigie Lea, Joseph River, Windermere, Beaumaris, Waskada, Walker's Point, Gull Lake and Silver Lake. The rest of the month was spent in the districts of Port Carling and Gravenhurst.

The first fortnight in July, visited the points around Gravenhurst arriving at Port Carling on the 17th. Patrolled in that neighbourhood the remainder of the month.

On Thursday, the 1st August, left Rosseau for Maplehurst, visiting Cape Elizabeth, Skeleton Bay, Marenius, Painten House, Woodington and Port Sandfield. The remainder of the week patrolled through Pinelands, Hamil's Point, Craigielea, Joseph River, Tobin's Island and Port Carling. Between the 5th and the 10th, called at Beaumaris, Walker's Point, Montcalm Island, Gravenhurst, Gull and Silver Lakes, Brickenridge Bay, Windermere, Dee Bank River, Skeleton Bay, Juddhaven, Royal Muskoka and Marenius, spending Sunday in Waskada. The following week visited the various points around Waskada. The remainder of the month patrolled in the district of Royal Muskoka, reaching Gull and Silver Lakes on the 31st instant.

The whole of September was spent in patrolling the various points in the vicinity of Gravenhurst.

The first week in October, visited Big Island, Gerry Lea Island, Shanty Bay, Gawans Island, Hae Rae River, Dennison's Island, the Narrows, Montgomerys, Stephen's Bay, Muskoka River, along the Monck Shore to Milford Bay, Beaumaris, Mortimer's Point, Smith's Bay, Walker's Point, Montcalm, the Narrows and Gravenhurst.

The rest of the month was spent in the district of Gravenhurst.

From the 1st to the 15th November, patrolled around Gull and Silver Lakes, Walker's Point, Beaumaris, Milford Bay, Windermere, Port Carling, Rosseau, Shadow River, Morgan's Bay, Rosseau Falls, Juddhaven, Skeleton Bay, Port Carling, Rossclair, Walker's Point, Mortimers, Bala Park, Torrence, Dudley Acton Island, Whitesides, Loon Lake, Ley Lake, Milford Bay, Point Kay, Rosseau, Bass Lake, Cape Elizabeth, Maplehurst, Royal Muskoka, Marenius, Tobin's Island, Elgin House, Pinelands, Woodington, Neepawin, Ridwood, Port Sandfield and Gravenhurst. This finished the season's work.

REPORT OF WORK PERFORMED BY THE LAUNCH "SWALLOW," ON THE WATERS OF LAKE NIPISSING DURING THE YEAR 1913.

Began the season's patrol on the 8th May, going first along the east shore of lake to Lavass River and Gouche's Point. Saw no signs of illegal fishing.

On the 15th made a trip to Manitou Islands, patrolling around group, and on the 21st patrolled along the north east shore of lake to Callander Bay. On the 25th destroyed two small nets, which he believed belonged to settlers, while patrolling along south shore to Lonely Island. Three days later made a trip to Callandar, as per instructions from Department to investigate certain complaints. On June 20th went to Goose Islands and patrolled all around the group, but saw no signs of net fishing. Went to Callander Bay again the next week. Went to the same place again the following week and on the 4th to Goose Islands. Made a trip to French River on the 18th July, and then on to Frank's Bay and Sand Island, on the 30th to Callander; on the 23rd to Fish River and French River. Patrolled around Franks Bay to Chaudiere Falls, and found campers all supplied with licenses. The following two weeks patrolled from Franks Bay to Wigwam Point, Five Mile Bay, Little Chaudiere Falls, group of islands at the mouth of French River, and seized two guns from Italian camp at Little Chaudiere Falls. On the 14th August, left for West Arm in company with Overseer Blea and patrolled around that neighbourhood until the 17th, and seized four guns from Indian hunters. Returned to French River, and seized 13 guns, and collected a fine of $100 from American campers buying venison and sending their guide out to hunt deer. Patrolled North Bay to Callander on the 22nd, and on the 26th left for Fish Bay with Overseer Blea, as per instructions from the Department re complaints about illegal hunting. Storm bound at Fish Bay for two days. On Sept. 2nd patrolled around Manitou Islands, and on the 5th to Lavass River, and on the 10th to Goose Islands. Saw no signs of illegal fishing anywhere.

Made trip to Fish Bay on the 21st Sept., on October 2nd to Callander Bay, and on the 18th to Franks Bay to investigate complaints about illegal hunting.

REPORT OF THE WORK PERFORMED BY THE LAUNCH "MAGGIE MAY" ON THE NORTH SHORE OF GEORGIAN BAY DURING THE YEAR 1912.

On Wednesday, 8th May, launched the boat and started patrol work the next day, going first to the rapids on the Magnetawan River, the pickerel being very plentiful at the rapids. Got one pickerel on the shore that had been speared by some one unknown. Went up the rapids again next evening and stayed until one a.m. About 10 p.m. a light was struck by three unknown men, who got away when they heard some one coming. Went up again on Saturday, Sunday and Tuesday, but saw no more signs of illegal fishing. Thursday, went to Bastard Islands to Bad river to inspect Mr. C. H. Gauthier's pound nets. He had only three set. Proceeded to French River, leaving next morning at 8 a.m, calling at the Bustards and Key Harbour, then went round Sand Bay, but saw no signs of illegal fishing. Returned to the Bustards on Friday the 31st May, then up Bad River as far as Herring Shoot, and on to French River for the night. Next day called at the Bustards and Key Harbour, and from there proceeded to Black Bay. On July 2nd, went to Duquesne House to see if any more tourists had arrived, and put up some posters while there. Spent the rest of the week putting up posters at different points on the river Magnetewan. The following Monday went to Naishcotyang River, having heard reports about dogs running deer. Went up the

river again next day. Heard dogs running and saw where a little fawn had been killed. Shot two dogs that were after a deer, which was nearly played out. The next week went to Judge Rodger's Island and sold four tourists licenses. On Thursday, July 25th, heard of a party of tourists fishing without a license, and started out after them, but when within a mile of them they got in their launch and started off. I followed them to Hang Dog Point, a distance of 40 miles, but before overtaking them they all had licenses, but their guides were not licensed. Went to Black Point on Saturday to investigate one of Mr. C. H. Gauthier' pound nets. Found it was properly set, and not interfering with any one. On Tuesday, went to French River and remained all night to look after some tourists who had just arrived. Found they all had licenses. Next day went to Naishcotyang River looking for tourists without licenses. Patrolled all day round the islands, but could not find them. Found them next day in Barrot's Bay, and they all had licenses except two, who then got them. Laid information against a party on Monday for conveying and assisting non-residents to and from their camping grounds and islands, and for taking them out to fish with his launch without a license. Case adjourned until the Department heard from. On Friday was informed that a non-resident was fishing and selling his fish to the boarding house. The following Wednesday went to town and laid information against a party for acting as a guide without first taking out a license. He pleaded guilty on Saturday and was fined $5 and costs. The following week, patrolled Sand Bay and Key Harbor, and on Saturday laid information against another party for fishing without a license. Attended court next day and had case adjourned until the 28th. Adjourned again for a week.

Left for French River on Saturday the 14th Sept., calling at Key Harbor on the way, then on to the Bustards, where Overseer R. J. McKinney reported some one having killed a deer. Returned on Monday to investigate, and received enough evidence to lay two informations against two parties at French River.

Went to French River again on Friday, and got evidence sufficient to make a conviction. Had to stay at the Bustards over night on account of storm, and could not leave till Sunday. Left for French River and Bustard Islands again the following Thursday in company with the Police Magistrate. Very Stormy and took all day to reach there, and had to stay till Saturday before leaving for the Bustards. Served the guilty party in the deer case with a subpoena. He was fined $20 and costs. Had to run inside the islands on our way back to Byng Inlet, owing to the big seas that were running. Spent the following week patrolling around looking after tourists.

On Sunday, 20th October, went to Naishcotyang River, having been informed of a party coming there to shoot ducks. Stayed there all day, but heard no shooting. On Tuesday started for Bustard Islands and Bad River. Got as far as Key Harbor, but had to return on account of storm. Got back as far as Sand Bay, and had to stay on an island all night, as the storm was so severe.

The next Sunday went up Still River in search of some illegal trappers, but did not see any. The remainder of the week patrolled around among the bays looking after illegal fishermen or trappers, and selling licenses to hunt deer.

REPORT OF THE WORK PERFORMED BY THE LAUNCH "MERMAID," ON THE RIDEAU WATERS DURING THE YEAR 1912.

On Monday, the 27th May, patrolled to Morton.

The rest of the month went to Whitefish Lake, Seeleys Bay, Jones Falls and Newboro.

The first fortnight in June, visited Kingston, the waters of the Rideau Canal, Cranberry and Dog Lakes, Whitefish Lake, Newboro, and River Styx and Benson and Mosquito Lakes.

Between the 15th and the 30th patrolled the different lakes of the Rideau Canal to Jones Falls and from there on to Brewers Mills where nine angling permits were sold to a houseboat party, Cranberry and Dog Lakes, Sand and Opinicon Lakes, Elgin, Chaffeys Lock and Mosquito and Loon Lakes.

The first week of July, visited in the district of Jones Falls, calling at Bedford Mills, Benson and Mosquito Lakes, Seeleys Bay, Cranberry and Dog Lakes, Battersea, Milburn Reach and the Crane's Nest, the different lakes of the Rideau Canal and Newboro.

The remainder of the month was spent in the neighbourhood of Jones Falls.

During the month of August, patrolled the lakes of the Rideau Canal, Kingston, Brewers Mills, Battersea, Cranbury Lake, Dog Lake, Whitefish Lake, Sand and Opinicon Lakes, Seeleys Bay, Mud, Mosquito, Benson and Indian Lakes, Hart Lake, Newboro, Chaffeys Lock and Jones Falls.

The first fortnight of September went to Brewers Mills, Chaffeys Lock, the different lakes of the Rideau Canal, Whitefish, Cranberry and Dog Lakes, Battersea, Benson and Mosquito Lakes, Newboro, and Jones Falls.

The remainder of the month was spent in patrolling the same waters.

The first two weeks of October went to Sand and Opinicon Lakes, Brewers Mills, Whitefish and Cranberry Lakes, Indian Lake and Benson and Mosquito Lakes.

The rest of the month was spent in the same district.

The first week of November patrolled the different lakes of the Rideau Canal and on to Dog Lake, the River Styx, Brewers Mills, Chaffeys Lock, and Jones Falls.

Between the 8th and the 21st went to Kingston, Battersea, Dog Lake, Whitefish and Cranberry Lakes and Jones Falls.

Patrolled the same waters during the remainder of the month.

This finished the season's work.

REPORT OF THE WORK PERFORMED BY THE LAUNCH "AUDREY C." ON THE WATERS OF THE NORTH SHORE OF THE GEORGIAN BAY DURING THE YEAR 1912.

On Thursday, the 18th April, patrolled to Thesserton.

On the 20th went as far as Sturgeon Bay.

From the 20th until the 30th went to Port Severn, Sturgeon Bay, Victoria Harbour, Duck Lake, McCrae Lake, Musquash and Honey Harbour.

On the 1st May, patrolled to McCrae Dam, North Channel and Midlands.

The following fortnight went to Jubilee, Summersetts, Yank Cannuck, Waubanno Island, where two trap nets were seized and burned them; McCrae Dam, Honey Harbour, Midland, Musquash and Thompson Island.

The remainder of the month patrolled around Sturgeon Bay, Potatoe Island, McCrae Dam, Midland, Penetang, Methodist Point, Matchadash Bay, Waubaushene and Honey Harbour.

During the month of June, patrolled to Thesserton, Midland, Potatoe Island, Penetang, Morreau Quarry Island, Port Severn, Musquash, McCrae Dam, Blowsand, Thompson Island, Honey Harbour, Pinery Point, Cogne Sheen and Moon River.

The first two weeks in July, went to McCrae Dam, Honey Harbour, Moon River, Sans Souci, Indian Harbour, Twelve Mile Bay, Port McMichael, Sturgeon Bay, Penetang, Victoria Harbour and Port Severn.

The remainder of the month was spent in patrolling the same waters.

Between the 1st and the 20th August, called at Gloucester Pool, Honey Harbour, Sans Souci, Midland, Moon River, Whalens, Copperhead, Jubilee, North Channel, Yank Cannuck, Honey Harbour, Iron City, Musquash, Summersett and Cogne Shene.

The rest of the month visited McCrae Dam, Sturgeon Bay, Honey Harbour and Whalens.

During September patrolled to Christians Islands, Midlands, Merton, Salt Harbour, Cove Island, Musquash, Honey Harbour, Split Rock, Moon River, McCrae Dam and Sturgeon Bay.

The first fortnight in October patrolled to Midland, Mitchels Island, Musquash, McCrae Dam, Salt Harbour and Hope Island.

The remainder of the month called at Indian Harbour, Moon River, Split Rock, Coldwater, Cove Island and Whalens.

On Monday the 4th November, finished the season's work.

REPORT OF WORK PERFORMED BY THE LAUNCH "CREST," ON THE KAWARTHA LAKES DURING THE YEAR 1912.

On Wednesday, the 1st May, patrolled Sturgeon Lake with canoe. On the 3rd, 6th, 7th and 12th took trip around Sturgeon Lake, Burnt River and Cameron Lake.

The following fortnight was spent in the vicinity of Goose Lake, Burnt River and Cameron Lake.

On Saturday, the 1st June, went to Rosedale with Launch "Crest." On the 2nd patrolled Balsam Lake to Rosedale with launch. From the 4th to the 12th was spent in the neighbourhood of Burnt River, and the remainder of the month in patrolling Goose Lake, Cameron Lake, Sturgeon Lake, Balsam Lake and McLarens Creek with canoe. The beginning of July was spent in the same district until the 16th instant when a trip was taken down Fenelon River with Launch. The rest of the month was spent in the vicinity of Burnt River, Cameron Lake, Balsam Lake, Coboconk River, Fenelon River and Kirkfield.

From Monday, the 5th to the 21st August, patrolled around Cameron Lake. On the 22nd took trip down Fenelon Falls with launch. The remainder of the month was spent in that vicinity.

In the month of September, patrolled through Burnt River, Coboconk River, Cameron Lake, Balsam Lake and Fenelon River.

The whole of October was spent in the same district.

REPORT OF THE WORK PERFORMED BY THE LAUNCH "BESSIE G." ON THE ST. LAWRENCE RIVER DURING THE YEAR 1912.

On Monday, the 6th May, patrolled to Browns Bay and from there to Horse Shoe Island and Simcoe Island.

On the 11th visited Wolfe Island and on through the Canal to Barrots Bay.

The 23rd and 30th were spent in the neighbourhood of Barrots Bay, Simcoe Island, Horse Shoe Island and Point Alexander.

On Tuesday the 4th June patrolled to Browns Bay and from there to Barrots Bay and Simcoe Island.

Between the 13th and 29th called at Wolfe Island, Simcoe Island, Reeds Bay and Browns Bay, and from there back to Wolfe Island, then on to Browns Bay and Barrots Bay, reaching Simcoe Island on the 29th.

On Tuesday, the 2nd July, patrolled to Barrots Bay, and from there to Simcoe Island on the Battan Channel.

On the 10th, 18th, 24th and 25th called at Reeds Bay, Big Sand Bay, Wolfe Island, Barrots Bay, Simcoe Island, Horse Shoe Island and back to Wolfe Island, and from there on to Big Bay and Button Bay.

The first two weeks in August visited Carrots Bay, Browns Bay, Simcoe Island, Horse Shoe Island and Reeds Bay.

On the 15th and 23rd went to Wolfe Island and from there to Big Bay, Barrots Bay, Simcoe Island and Horse Shoe Island.

The remainder of the month was spent in patrolling around Simcoe Island, Reeds Bay and Big Sand Bay at the head of Wolfe Island.

On the 3rd, 6th, 14th, 18th, and 28th September went to Browns Bay, Simcoe Island, Wolfe Island, Big Bay, Barrots Bay and Reeds Bay.

The whole of October patrolled in the district of Simcoe Island and Wolfe Island. This finished the season's work.

REPORT OF THE WORK PERFORMED BY THE LAUNCH "AGGIE B." ON THE BAY OF QUINTE AND LAKE ONTARIO DURING THE YEAR 1912.

On Sunday, 26th May, patrolled from Picton to Glenora and back to Picton. On the following day went to Prinyer's Cove and from there on to Indian Point.

On the 1st June patrolled around Waupoose, South Bay, Lake Side, Point Traverse, False Ducks, Long Point, Bay Side, and back to Picton on the 23rd. On the 25th met the patrol boat "Navarch," at Indian Point Gap, and arrived at Picton on the 30th.

The first fortnight in July visited Glen Island, Bongards, Indian Point Light House and Emerald, reaching Picton on the 14th.

The rest of the month patrolled in the neighbourhood of Cressy and Glen Island.

From the 4th to the 20th August patrolled through Deseronto, Picton, Glen Island, Bongard, Cressy, Main Ducks, Glenora, Prinyer's Cove, Indian Point, and Point Traverse. The rest of the month visited Picton, Bongards, Adolphustown, and Carnaham Bay.

The first two weeks in September visited Bongards, Indian Point, South Bay, Picton, Pigeon Island, Main Ducks, Yorkshire, and Point Traverse. The remainder of the month patrolled around Indian Point, Picton, Glenora and Glen Island.

The whole of October was spent in the district of Picton.

On Thursday, the 7th November, patrolled the waters to Prinyer's Cove. Reached Indian Point on the 11th and found the waters clear of nets.

On the 18th visited Picton and Bongards, and on the 30th left Picton and patrolled to Cressy, arriving back at Picton.

This finished the season's work.

REPORT OF WORK PERFORMED BY LAUNCH "LIBBY" ON STONY LAKE DURING THE YEAR 1912.

Started the season's patrol on May 10th, calling at Young's Point, Clear Lake, Burleigh Falls, and Lovesick Lake, to see that parties were not netting fish, continuing the patrol for several days. On 28th May went to Stony Lake, from there to Burleigh Falls, and on the 4th June to Lovesick Lake; on the 12th to Black Lake; next day to Stony Lake, Mt. Julian, and Burleigh Falls, seeing that fishermen had their permits. The months of July and August were spent patrolling among the different lakes seeing that the laws were being observed and that Americans and other non-residents had angling permits.

On Monday, 2nd September, went to Young's Point, Stony Lake, and Burleigh Falls to see that Americans were not shooting ducks without a license. The remainder of the month was spent in the same manner.

Went to Lovesick Lake on Monday the 14th October, having been informed that parties were netting bass and maskinonge. Next day patrolled Deer Bay, and on Thursday and Friday went to Black Duck Lake, Stony Lake, Burleigh Falls, and Lovesick Lake. The last day of patrol (Monday, 28th October) was spent at Stony Lake seeing that parties were not trapping.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "LOOKOUT" ON THE RIDEAU WATERS DURING THE YEAR 1912.

On Monday, 20th May, started the season's patrol on Gananoque Lake. Received six applications for licenses. Patrolled the same lake again on Saturday, and again on the following Friday. During the latter part of June patrolled Lost Bay, Gananoque Lake, Red Horse Lake, Singleton Lake, Cardinal Lake to Lyndhurst, returning to Long Point on the 25th. During July and August patrolled Singleton Lake and Gananoque Lake at different intervals. On Sunday, September 15th, went to Gananoque Lake and the drowned lands looking after duck shooters. On the 19th, patrolled Red Horse Lake, Singleton Lake, and Cardinal Mill Lake, and on Friday went from Long Point to Marble Rock, and returned. The following Monday to Gananoque Lake again, on Tuesday, the 8th October, patrolled from Long Point to Marble Rock and returned, and the next day patrolled Gananoque Lake.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "WENONAH" ON THE LAKE OF THE WOODS AND SHOAL LAKE FOR THE SEASON OF 1912.

On Saturday the 25th May patrolled Long Lake. On the 26th went to Gustfron's Fishery and Andrew's Fishery.

From the 10th until the 26th June patrolled to Kenora, Rainy River, Lake of the Woods, Rabbit Point, Rope Island, Clearwater Bay, Ash Rapids, and Long Bay.

Sunday, the 7th July, was spent at Snake Bay. Between the 8th and 28th went to Kenora, Rainy River, Clearwater Bay, Sunset Channel, Shoal Lake, and Long Bay.

On the 6th August left for Long Lake and back to Kenora.

On the 11th went to Yellow Girl Bay and destroyed one trap net.

From the 12th to the 26th visited Barney's Narrows, Long Lake, Long Bay, Berry Lake, Blindfold Lake, Big Stone Bay, Kenora, Oak Island, Bishop's Light House, and Shoal Lake.

The first fortnight in September patrolled to Shoal Lake, Rush Bay, Ash Rapids, Sunset Channel, Kenora, Welcome Channel, Yellow Girl Narrows and Bottle Bay.

The remainder of the month called at Crow Duck Portage, Yellow Girl Narrows, Witch Bay, and Big Stone Bay.

During the month of October patrolled to Clear Water Bay, Nester's Falls, Split Rock River, and Kenora.

This finished the season's work.

On the Kaministiquia River in the Thunder Bay District.

REPORT OF THE WORK PERFORMED BY THE PATROL BOAT "MINGA" ON THE WATERS OF THE GEORGIAN BAY DURING THE YEAR 1912.

Made a trip up the river on May 6th, and on the 11th went down the shore. The following week went to Jerves Point and Geddes Bay, and the following Friday patrolled Lakes Bay. During the month of June patrolled the bay several times and on the 26th ran out to fishing grounds opposite Meaford. Continued patrolling the bay during July, and on the 17th went to Giant's Tomb. During the first part of August went around Beckwith and Hope Islands, patrolled bay opposite Thornbury, examining nets on a fishing tug, made a trip to Jerves Point, and on Thursday, the 22nd, started on northerly trip, patrolling all along shore up to Vail's Point and across to Cape Commodore. Seized and lifted five miles of lines. Next day went to Griffith Island, and after patrolling around it went on to Owen Sound. On returning home next day, found buoy without number or name and seized same for illegal setting. Went north again on the 9th September, visiting Vail's Point, Squaw Point, and Griffith's Island. Next day took outside waters, then returned and lay in the bay. Seized eight pieces of net illegally set. The remainder of that month and the month of October was spent patrolling opposite Meaford and Vail's Point. On Thursday, November 14th, went to Owen Sound to meet Mr. Jermyn, seized two pieces of net illegally set. Left Owen Sound on Saturday. Saw two men at Presque Isle hurrying away. They took fish from a gasolene boat and put in bay. Saw spawn and fresh blood in boat. Seized boat, then found box of freshly-lifted nets a few rods away. Seized the whole outfit, but could not find men or fish. Also found illegal night lines and hooks and some nets. Seized them and brought all to tug. Went to Griffiths and saw two men in boat. Found boat, fish and nets. Seized all and brought aboard. The following Monday went to Owen Sound and seized two pieces of trout nets. Thence to Vail's Point, called at fishing station and made examination. Went towards Presque Isle, got two small pieces of net set without buoys; thence to Vail's Point and dragged for nets two hours: thence to Cape Rich again and dragged, but no nets set. On Thursday started for Wiarton to meet Overseer Jermyn, but found that he had gone on Lake, so coasted along both shores of Owen Sound Bay. Seized two pieces of net. Left Owen Sound on Friday, and dragged for nets on all fishing grounds on way home, but none to be found. Put away boat for the season on November 30th.

Loading Fish-Car at Mount Pleasant.
